*Optional temperature accuracies are available upon request.

NTC Type C100 Thermistors

Well suited for temperature measurement, control and compensation applications, low cost makes them ideal for high volume applications such as energy management systems, small appliance controls, automotive and industrial equipment controls. These units exhibit faster still air response times than comparable glass probe devices while maintaining a relatively high dissipation constant and are manufactured to closer resistance tolerances. **Maximum Power Level:** 0.075 watt at 25°C (derating to zero watt at 100°C). **Dissipation Constant In Still Air:** 1 mW/°C. **Thermal Time Constant In Still Air:** 10 sec. Although suitable for applications in the temperature range of –80°C to +150°C, best stability is achieved at temperatures not exceeding 105°C.

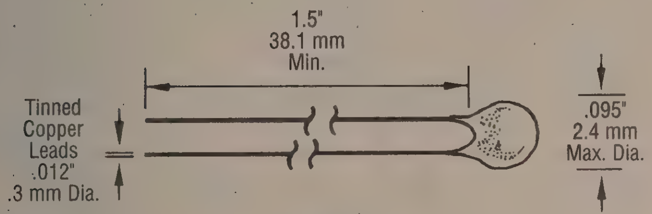
NTC Type DC95 Thermistors



DC95

The DC95 NTC thermistors are manufactured using proven materials and techniques, making it possible to obtain close tolerances and resistance-temperature curve tracking at a low cost. The result is a rugged, stable, easy to handle device. All DC95 thermistors are epoxy coated for stability and have a maximum diameter of 0.095". Standard leads are 1.5" long. Each unit tracks a specified curve to within ±0.1°C or ±0.2°C over the temperature range of 0°C to 70°C. The DC95 thermistors have higher dissipation constants than glass-coated beads or probe-style thermistors and therefore can be used in circuits of moderate power levels. The thermal time constant of chip-style thermistors is comparable to that of large glass probes. This series chip thermistor is especially suitable for disposable and permanent medical product usage, as well as energy management systems, appliances, industrial equipment and automotive applications. **Maximum Power Level:** 0.075 watt at 25°C (derating to zero watt at 100°C). **Dissipation Constant In Still Air:** 1 mW/°C. **Thermal Time Constant In Still Air:** 10 sec. Although suitable for applications in the temperature range of –80°C to +150°C, best stability is achieved at temperatures not exceeding 105°C. Additional temperature ranges are available as special order items. Narrower temperature ranges may be specified for effective cost savings or to accomplish even tighter curve tracking tolerances as special order items. They are available in a large variety of sensor configurations, housings, enclosures and mountings as special order items.

NTC Type EC95 Thermistors

The EC95 NTC thermistors are manufactured using proven materials and techniques, making it possible to obtain close tolerances and resistance-temperature curve tracking at a low cost. The result is a rugged, stable, easy to handle device. All EC95 thermistors are epoxy coated for stability and have a maximum diameter of 0.095". Standard leads are 2.5" long. Each unit tracks a specified curve to within ±0.2°C over the temperature range of 0°C to 70°C or –20°C to 50°C. The EC95 thermistors have higher dissipation constants than glass coated beads or probe-style thermistors and therefore can be used in circuits of moderate power levels. The thermal time constant of chip-style thermistors is comparable to that of large glass probes. This series chip thermistor is especially suitable for disposable and permanent medical product usage, as well as energy management systems, appliances, industrial equipment and automotive applications. **Maximum Power Level:** 0.075 watt at 25°C (derating to zero watt at 100°C). **Dissipation Constant In Still Air:** 1 mW/°C. **Thermal Time Constant In Still Air:** 10 sec. How to Select a Power Supply

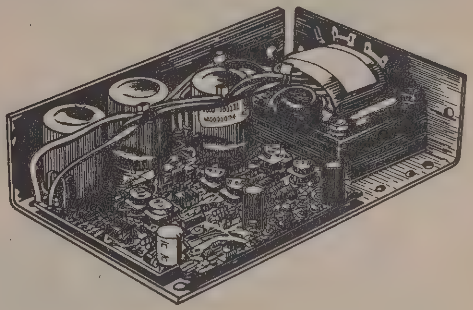
There are times when you need a power supply but you don't have a part number to reference. You know the end application but you have many power supplies to choose from. How do you determine what type of supply to purchase. Here are some hints to make your search/selection easier.

Linear???	Or	Switcher???
8-750 Watts	**Power Level**	30-400 Watts
Larger	**Size**	Smaller
Heavier	**Weight**	Lighter
<5 mV	**Output Ripple**	<50 mV
Runs Warm	**Temperature**	Runs Cool
115/230 VAC	**AC Input**	85-264 VAC
40% Typical	**Efficiency**	75% Typical

SPW Series Regulated Linear Power Supplies

- **World-Wide AC Input Range**
- **World-Wide Safety Standards**
- **UL, CSA, and TUV Approved**
- **Industry Standard Package**
- **Built-In OVP on 5 V Output**
- **Optional OVP for Other Outputs**
- **Overload Protection with Automatic Recovery**
- **100% Burn-In**



Specifications
AC Input Voltage. Input Voltage: 100/120/220/230/240 selectable. **Frequency Range:** 47-63 Hz typical, 60 Hz; 10% derated output current for 50 Hz. **Transient Response:** 50 msec at 50% load changes. **DC Output. DC Output Adjustment Range:** ±5%, min. **Line Regulation:** ±0.05% for 10% line change. **Load Regulation:** ±0.05% for 50% load change. **Ripple:** 3.0 mV P-P, max. **Overvoltage Protection:** standard on all 5 V output; factory set at 6.2 V ±0.4 V; other outputs use optional OVP. **Remote Sensing:** provided on main outputs; refer to output rating chart. **General. Stability:** ±0.05% for 24 hours after warm-up. **Operating Temperature:** 0° to 50°C derate to 40% at +70°C. **Temperature Coefficient:** ±0.01%/°C, typical. **EMI/RFI:** inherently low conducted and radiated noise levels; meet requirements of FCC CLass B and VDE 0871 Class B. **Overload Protection:** automatic current limit/foldback. **Safety Specification:** recognized to UL, CSA and TUV.

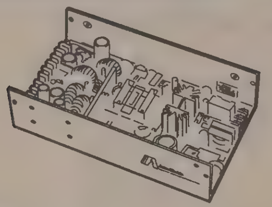
LSW200 Series 200 Watt Output Switchmode Power Supplies



Input Specifications
- Input Voltage: 90-30 or 180-260 VAC (Autoranging)
- Input Frequency: 47-440 Hz
- Input Current: 4.5 A (rms) for 115 VAC; 2.6 A (rms) for 230 VAC

Output Specifications
- Total Output Power: 25-200 Watts

Standard Features
- Autoranging Universal Input
- Built-In EMI Filter
- Short Circuit Protection with Auto Recovery
- Power Failure Detection
- 100% Burn-In at Full Rated Load
- Quantity Pricing Always Available

The LSW200 series is comprised of single and multiple output models for 200 watts of continuous output power. The autoranging input allows the units to operate from any line voltage throughout the world without a selector strap. All auxiliary outputs are equipped with magnetic amplifiers or linear regulators for maintaining regulation. The units are constructed on a printed circuit board with a U-bracket for mechanical support and heat sinking.

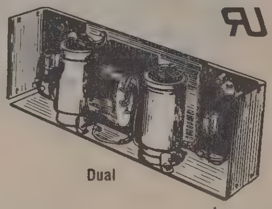
Notes: 1) Peak current is 12 A on +12, 9 A on +15, and 6 A on +24. 2) Output 1 — single output; Output 4 — floating, they can be connected externally for a positive or negative output. 3) 200 watt requires 350 LFM of moving air, 150 watts for convection (maximum current of Output 1 and 2 to 70%).

SPS "Blue-Line" Series 15 to 350 Watts of DC Power



Dual

Standard Features
- Adjustable Output Voltage
- Selectable Input 115/230 VAC, 47-440 Hz
- Temperature Compensated Circuitry
- Floating Outputs on Most Models
- UL Recognized
- Remote Sense on High-Output Current Units
- Safety Shielding for Logic Level (5 VDC) Single Output Power Supplies
- Computer-Grade Capacitors
- 24 Month Warranty
- Quantity Pricing Always Available

Optional Features
- Overvoltage Protection Available

The SPS "Blue-Line" Series offers a total of 17 models to choose from. Single, dual, and triple outputs satisfy virtually any voltage current requirement for your system application. AC input voltage capabilities are 115/230 VAC at 47-440 Hz. (Fan cooled units operate 47-63 Hz only.) The SPS Series is a time proven, durably designed open-frame power supply with industry standard voltages and currents.

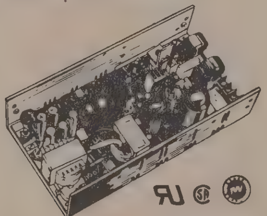
High Reliability 250 Watt Switcher



- MTBF 200,000 Hrs. Calculated Per MIL-217E
- Meets FCC and VDE Levels A Emission Standards
- Meets UL 1459 and 1950, CSA 22.2-220, IEC 950, EN60950 Licensed
- Automatic Input Voltage Range Selection (90-132/180-264)
- Power Fail/Remote Inhibit
- All Outputs Floating
- High Temperature Burn-In
- 20 Millisecond Minimum Hold-Up Time at Low Line, Full-Load
- In-rush Current Limiting
- Remote Sense and Built-In OVP on Main 5 V Output
- Covers Optional
- Chassis Dimensions: Multiple Output — 2.5" × 5.0" × 10.5", 3 Lb., 12 Oz.; Single Output — 2.5" × 5.0" × 9.5", 3 Lb., 1 Oz.
- Quantity Pricing Always Available

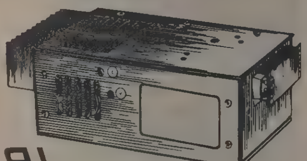
CPS "Blue-Line" Series Enclosed 30 to 500 Watts of DC Power



Electrical Specifications

AC Input
- Input Voltage: 115/230 VAC ±10%
- Frequency: 47-440 Hz (CPS 500 Series: 47-63 Hz Only)

DC Output
- Output Voltage/Current: See Selection Chart
- Voltage Adjustment Range: ±10% Nominal
- Floating Outputs: All Models Have Floating, Independent Outputs
- Regulation (Line): ±0.1% Over Line
- Regulation (Load): ±0.1% No Load to Full Load
- Ripple and Noise: 0.1% Pk-Pk (20 MHz Bandwidth)
- Transient Response: Recovers in 50 Microseconds for 50% Load Change
- Short-Circuit Protection: Fold-Back Type Current Limiting, Factory Set for 120% Rated Load Maximum
- Remote Sense Connections Used in Both Local and Remote Mode Assure All Specifications
- Quantity Pricing Always Available

The CPS "Blue-Line" Series offers a total of 6 models in an enclosed design for maximum personal safety AC input voltage capabilities are 115/230 VAC at 47-440 Hz. (Fan cooled units operate 47-63 Hz only).

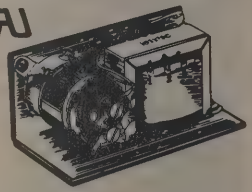
[1] PDT adjustable 24-28 VDC (shipped with 24 V output). [2] Transformer tapped for 24 and 28 VDC operation (shipped with 24 V output).

"Black-Line" Series Bulk Power DC Supplies



High Reliability — Efficient Bulk Power

- High Surge-Current Capabilities
- MTBF to 500,000 Hrs. Per MIL 271E
- Maximum Efficiency to 90%
- UL Recognized to UL 478
- FCC Level B EMI
- Floating Output
- Quantity Pricing Always Available

The "Black-Line" series is a low-cost alternative for many DC power applications where regulation is not needed . . . "raw power" without the bells and whistles but retaining high-quality components assures reliable performance in unregulated applications such as powering solenoids, DC motors, relays, lamps, and signal systems.

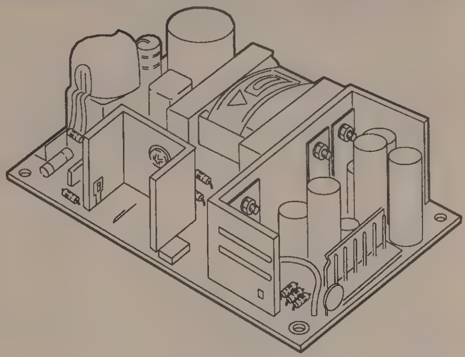
LSW Series — Low Profile Switchers



- ► Compact Size
- ► Universal Input Range: 85 to 264 VAC
- ► High Efficiency
- ► Up to Four Outputs
- ► Input RFI Filter to VDE Standards
- ► Current Mode, MOSFET Topology
- ► Overcurrent and Overvoltage Protection Main Output
- ► 100% Burn-In
- ► Open PCB Construction
- ► UL Listed, CSA Certified, TUV Approved

Specifications

AC Input. Input Voltage: 85-264 VAC. **Frequency:** 47-440 Hz. **Current:** LSW30 — 0.8 A at 115 VAC, 0.5 A at 230 VAC; LSW40 — 1.2 A at 115 VAC, 0.7 A at 230 VAC; LSW65 — 1.6 A at 115 VAC, 1.0 A at 230 VAC; LSW110 — 3 A at 115 VAC, 1.8 A at 230 VAC. **Inrush Current:** LSW30, LSW40, LSW110 — 15 A at 115 VAC - cold start, 30 A at 230 VAC - cold start; LSW65 — 30 A at 115 VAC - cold start, 60 A at 230 VAC - cold start. **Leakage Current:** to EN60950. **DC Output. Output Range:** ±5% on main output. **Line Regulation:** ±0.5%. **Load Regulation:** 1% single output, 3% main output (50 to 100% load change). **Cross Regulation:** 5% typical. **Ripple and Noise:** 1% peak to peak typical. **Overload Protection:** overload and short circuit protected. **Overvoltage Protection:** 5.6-6.6 V on +5 V. **Minimum Load:** approximately 10% on main output. **Power Failure:** on LSW110 series only. **Efficiency:** 65% min. at full load. **Holdup Time:** LSW30, LSW110 — 12 msec; LSW40, LSW65 — 10 msec. **General. Operating Temperature:** 0° to 50°C. MTBF: 100,000 hours minimum. **RFI Performance:** VDE 0871A A (some units to "B"). **Cooling:** some units require forced air for maximum output power.

*Needs 25 CFM Air Flow. 80 W if Convection Cooled.

Class and Type Designations

Cords on this page are UL listed. The type designations of the National Electrical Code are as follows: **SJ** — junior hard-service cord. Rubber insulation, ethylene propylene rubber or other rubber jacket. 300 V. **SJO** — junior hard-service oil-resistant cord. Rubber insulation, PVC jacket or neoprene jacket. 300 V. **SJT** — junior hard-service cord. Polyvinyl chloride insulation and jacket. 300 V. **SPT-1** — all plastic parallel cord. 30 mils polyvinyl chloride insulation/jacket. 300 V. **SV** — rubber insulation, rubber jacket, 300 V. **SVT** — all plastic cord. Polyvinyl chloride insulation/jacket. 300 V.

3 Conductor Electronic Line Cords, Unshielded

Stock No.	Mfr.'s Type	Color	AWG	UL Type	Length	Rating @ 125V		Fig.	EACH	
						Watts	Amps		1-24	25-Up*
663-7087	523	Black	18	SVT	7' 6"	1250	10	A	**3.11**	**2.83**

*Contact the closest sales office for quantity pricing.

3 Conductor Extension Cords

Type SJ cord is rubber. Adapter is rated for 15 amps. 125 V service and is UL listed.

Stock No.	Mfr.'s Type	Color	AWG	UL Type	Length	Rating @ 125V		Fig.	EACH	
						Watts	Amps		1-24	25-Up*
663-7046	633	Black	16	SJ	10'	1625	13	B	**7.59**	**6.90**

*Contact the closest sales office for quantity pricing.

3 Conductor Power Supply Cords

Type SJT Vinyl, SJ Rubber and SJO Neoprene. Hard service cord sets with molded vinyl plug rated for 15 amps, 125 volt service. UL listed, CSA certified.

Stock No.	Mfr.'s Type	Color	AWG	UL Type	Length	Rating @ 125V		Fig.	EACH	
						Watts	Amps		1-24	25-Up*
663-7020	615	Black	18	SJ	6'	1250	10	C	**4.56**	**4.06**

External AC/DC Switching Power Supplies

- 90-264 VAC Input
- Efficiency Typically 72-82%
- Internal EMI Filter to Meet VDC and FCC Class B Emissions Range
- CE Certified
- UL, CSA, TUV/IEC Approved
- IEC 320 Inlet Connector Mates with Interchangeable Cords for Worldwide Use
- 25-84 Watts Regulated Output
- 3 Year Warranty
- Output Loading May be Removed and Reapplied Without Cycling the Input Power

*CSA Certified. †Regular SJT cords are UL listed and CSA certified. CSA does not recognize SJT low leakage cords. ‡Belden SJT Type low-leakage 60 Hz power cord reduces the hazards of shock due to current leakage between the two conductors and from the conductors out through the jacket. Maximum leakage at 120 VAC is 7 microamps from each circuit conductor to the grounding conductor, and 15 microamps from each circuit conductor through the cord jacket. Designed for the hospital use and critical medical applications. Helps equipment meet the requirements of UL 554.

Medicord™ Hospital Grade (Green Dot) Power Supply Cords

- Rated 60°C; 125V
- North American Color Coding

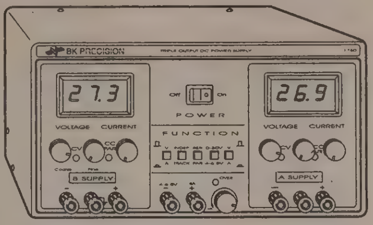
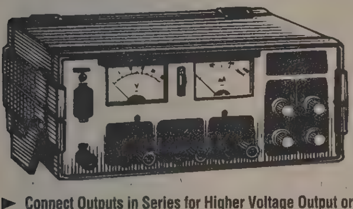
Model 1760 Triple Output DC Power Supply

MADE IN U. S. A.



- Two 0-30 VDC, 2 A Section Capable of Independent, Series or Parallel Operation
- One 4-6.5 VDC, 5 A Section
- Switchable Series/Parallel Operation — 30 V Sections
- Adjustable Current Limit Controls — 30 V Sections
- Unique Variable Tracking, B Track A at 5% to 100%
- Two 3-Digit LED Displays — One Reads Volts or Amps of "B" Supply — One Reads Volts or Amps of "A" Supply or 4 V-6.5 V Supply
- Two Year Warranty

731-1760. Model 1760 .... **EACH 649.00**



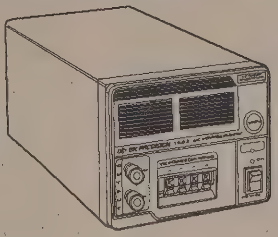
Model 1651 Compact Triple Output DC Power Supply

- Two 0 to 24 VDC Outputs (0.5 A)
- One Fixed 5 V Output (4 A)
- Independent or Tracking Operation
- Adjustable Current Limiting
- Designed to Operate Continuously at Rated Output
- Short Circuit Protection, Overload Protection, Reverse Polarity Protection
- Connect Outputs in Series for Higher Voltage Output or In Parallel for Higher Current Output (Switch Selectable)

731-1651. Model 1651 .... **EACH 429.00**

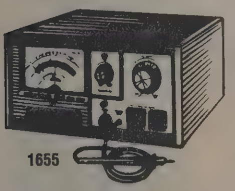
Model 1670 Triple Output DC Power Supply

— NEW —



- One Variable 0-30 VDC, 0-2.5 A Section, Constant Voltage/Constant Current
- One Fixed 12 VDC, 0.5 A Section
- One Fixed 5 VDC, 0.5 A Section
- Three Digit LCD Display
- Ideal for General Electronic Servicing, School Electronics Labs, and Powering Up Electronic Project
- One Year Warranty

731-1670. Model 1670 .... **EACH 199.00**



1655

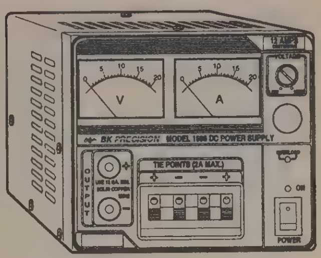
Isolated — Variable AC Power Supplies

MADE IN U. S. A.

- Output: 0-150 VAC
- 3 A Continuous (Model 1655)
- 2 A Continuous (Model 1653)
- Power Line Leakage Tester
- Solid State Soldering Iron Temperature Control (Model 1655)

731-1655. Model 1655 .... **EACH 540.00**
731-1653. Model 1653 .... **EACH 319.00**

Models 1686/1688 High Current DC Power Supplies

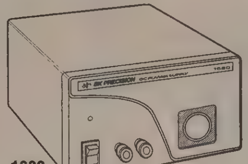


- 3 to 14 Volts DC Output
- 25 Amps Typical at 13.8 V, Model 1688
- 12 Amps Typical at 13.8 V, Model 1686
- Current Limiting Overload Protection
- Over Voltage Protection
- Short Circuit Protection
- Reverse Polarity Protection
- Thermostatically Controlled Cooling Fan
- Thermal Protection (Model 1688)
- Operates Continuously at Full Load Without Overheating
- Connect Two in Parallel for More Current
- Connect Two in Series for Higher Voltage

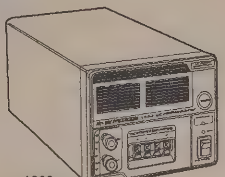
731-1688. Model 1688 .... **EACH 299.00**
731-1686. Model 1686 .... **EACH 199.00**

Model 1680 and Model 1682 High Current Fixed DC Power Supplies

— NEW —



1680



1682

- 13.8 VDC Output (Fixed)
- 6 A DC Peak, 4 A DC Continuous (Model 1680)
- 15 A DC Peak, 12 A DC Continuous (Model 1682)
- Current Foldback, Overload Protection
- Short Circuit, Reverse Polarity Protection
- Thermostatically Controlled Cooling Fan (Model 1682)
- Convenient Cigarette Lighter Plug (Model 1680)
- Input: 110-132 VAC, 60 Hz

731-1680. Model 1680 .... **EACH 50.00**

Isolation Transformers

MADE IN U. S. A.

Model TR-110

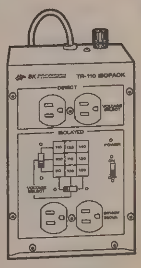
- Direct and Isolated Outputs
- UL Listed Standard 1012; May, 1977
- Input: 105-130 VAC, 60 Hz
- Output: Direct — 500 VA; Isolated — 350 VA Continuous, 500 VA Intermittent
- Nine Voltage Combinations 90 to 140 V

731-0110. Model TR-110 .... **EACH 219.00**

Model 1604A

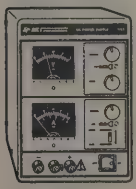
- Isolation Transformer: Leakage Less Than 0.1 mA
- Input: 120 AC, 60 Hz, 175 W
- Output: 1.25 A Continuous, 2 A Intermittent

731-1604. Model 1604A .... **EACH 114.00**

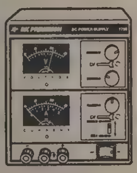


TR-100

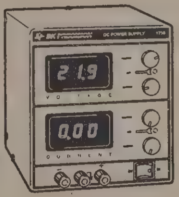
DC Power Supplies



1711

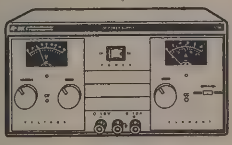


1730



1735

MADE IN U. S. A.



1746

- Fully Overload Protected
- New Compact Style
- Coarse and Fine Voltage Controls
- Reliable, Durable
- Excellent Regulation
- Very Low Ripple
- 2 Year Warranty
- Operate Continuously at Full Load without Overheating
- Constant Voltage or Constant Current Operation
- Continuously Monitor Voltage and Current Output on Two Meters
- Biggest Selection of Voltage and Current Ratings Ever Offered
- Connect Two Supplies in Parallel to Double the Current Output
- Connect Two Supplies in Series to Double the Voltage Output
- Overload Protection: Current, Limiting, Reverse Polarity, Overvoltage, Short Circuit
- Power Requirements: 120 VAC ±10%, 60 Hz Only (120/220/230/240 VAC ±10%, 50/60 Hz Version Available
- Operating Temperature: 0° to 40°C, <75% R.H.
- Storage Temperature: –15° to +70°C, <85% R.H.

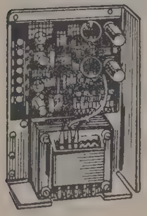
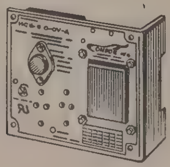
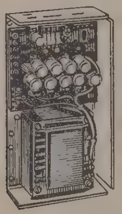
International II Linears







- ► UL1950 Approved without D3 Deviation
- ► World-Wide AC Input Ranges
- ► World-Wide Safety Standards
- ► Industry Standard Packages
- ► VDE/IEC Transformer Construction
- ► TUV Approved, IEC 950
- ► CSA Approved, 22.2,234
- ► 2-Hour Burn-In with Cycling
- ► 3 Year Warranty
- ► Capacitors Have Highest C/V and Ripple Current Ratings in Industry
- ► Anti-Latchup Circuit on Duals and Triples
- ► MTBF of Over 200,000 Hours per MIL Handbook 217D on Most Units

Specifications. AC Input: 100/120/220/240 VAC +10%, –13%. 47-63 Hz. Tolerance for 230 VAC operation is +15%, –10%. Derate output current 10% for 50 Hz operation. **DC Output:** See charts. **Adjustment Range:** ±5% minimum. **Line Regulation:** ±.05% for a 10% change. **Load Regulation:** ±.05% for a 50% load change. **Output Ripple:** 2 to 15 V unit — 5.0 mV PK-PK maximum; 20 to 200 V unit — .02% PK-PK maximum. **Transient Response:** 50 microseconds for 50% load change. **Short Circuit and Overload Protection:** Automatic current limit/foldback. **Overvoltage Protection:** Built-in on 5 V models, set at 6.2 V ± .4 V. Other models use optional overvoltage protection. **Remote Sensing:** On all models 3 Amps and above; open sense lead protection built-in. **Stability:** ±.05% for 24 hours after warm up. **Temperature Rating:** 0°C to 50°C, full rated, derated linearly to 40% at 70° C. **Temperature Coefficient:** ±.01%/C maximum. **Efficiency:** 5 V units — 45%; 12 V and 15 V units — 55%; 20 V and 24 V units — 60%. **Vibration:** Per MIL-STD-810B, Method 514, Procedure 1, curve AB (to 50 Hz). **Shock:** Per MIL-STD-810B, Method 516, Procedure V.

OverVoltage Protection Modules

Optional OVP modules are available to protect your load from an overvoltage condition. These modules are adjustable from 6.2V to 34 VDC and mount directly on your power supply chassis. The OVP-12 is available for outputs which will not exceed 12 Amps and for loads up to 30 Amps. One OVP-12 protects both outputs on the dual output ±12 VDC and the ±15 VDC power supplies. Note that models with factory built OVP are indicated in the table above.

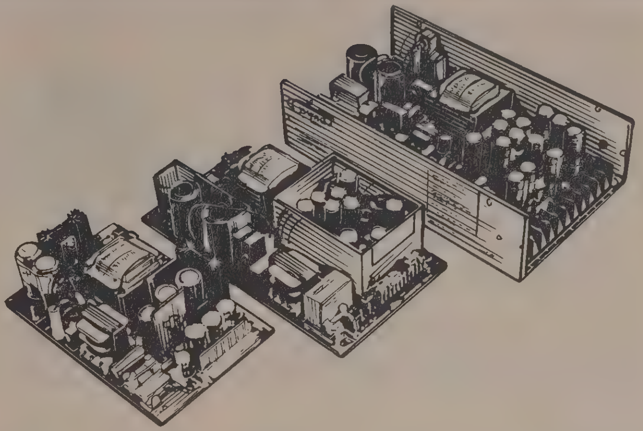
World Class Medical Switchers

CONDOR'S international medical multi-output switchers – approved to UL 544/IEC 601/CSA 22.2, 234. CONDOR'S medical switchers are designed to meet full international specifications, as well as European EMI specifications.



Features

- ► 17 Models, 5 Power Levels, 30 to 110 Watts
- ► Multi-Output (Up to 5 Outputs)
- ► AC Input: 90-132 VAC/180-264 VAC, 47-63 Hz
- ► Designed to Meet the Toughest Domestic and International Medical Safety Specifications
- ► Proprietary Low Leakage – High Attenuation EMI Filter (Patent Pending)
- ► Less Than 30µA Leakage Current
- ► Meets Stringent FCC and VDE 0871 Class B EMI Specs
- ► Power Fail Available on 110-Watt Units
- ► Versatile Output Configurations for Wide Variety of Applications
- ► Industry Standard Packages
- ► 24-Hour Full Load Burn-In and 2-Year Warranty
- ► Covers Available for All Units

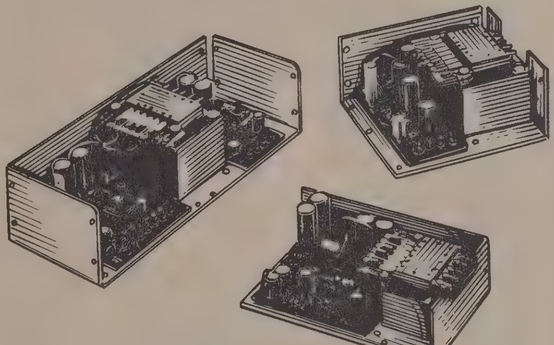
World Class Medical Linears

CONDOR'S international medical linears, approved to meet UL 544/IEC 601/CSA 22.2, 234. CONDOR'S medical linear power supplies offer innovative yet cost-effective design solutions for both high- and low volume users.



Features

- ► 34 Models (Single, Dual and Triple Output)
- ► 3 Power Levels (5 to 92Watts)
- ► AC Input: 110/120/220/240 VAC, 47-63 Hz
- ► OVP On All 5V Outputs
- ► Meets EMI Per FCC/VDE B
- ► Hermetically Sealed Power Transistors and ICs
- ► MTFB 200,000+ Hours Per Mil Handbook 217D
- ► 8-Hour Burn-in With Cycling
- ► Full 3-Year Warranty

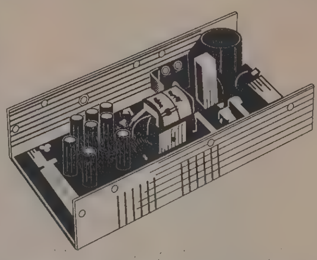
Switching Power Supplies



Global Performance switching power supplies with the agency approvals you need. **Features:** Wide range input (85-264V) and are approved to UL1950, IEC950, VDE0805, CSA, FCC and VDE Class B for EMI. All models also are available in medical configurations, approved to UL 544 and IEC 601. **Input Protection:** Internal A.C. fuse provided on all units. This fuse only blows if a catastrophic failure occurs in the unit — it does not blow on overload or short circuit. A.C. input protected against line transients by metal oxide varistors on all medical units. **Output Noise and Ripple:** 0.5% RMS, 1% PK-PK maximum on all outputs. **Overload Protection:** Fully protected against short circuit and output overload on all outputs. Short circuit protection is cycling type on most outputs; foldback on outputs with 3 terminals regulator post regulation. Overload protection recovery after removal of fault is automatic. **Temperature Coefficient:** 0.03% per degree C typical for all outputs. All medical models are built-to-order, non-cancelable, non-returnable.

GP Models

AC Input: 85-264 VAC, 47-63 Hz single phase. **DC Outputs:** See output rating chart. **Hold-up Time:** 20 mS minimum at full load and nominal line (115 VAC). **Overload Protection:** Fully protected against short circuit and output overload on all outputs. Short circuit protection is cycling type on most outputs; foldback on outputs with 3-terminal regulator post regulation. Overload protection recovery after removal of fault is automatic. **Minimum Load:** Turn-On/Standby. No minimum load required for proper operation. **Normal Operation:** Output #1 and/or #2 combined load current must meet the minimums listed below for proper regulation as other outputs are loaded (GPX55 1.0A GP × 130 2.0A/GPX80 1.0A Single output — Not Required). **Transient Response:** +5V main output — 500 mS typical response time for a 50 to 100% or 100 to 50% load change; maximum voltage deviation — 3.5%. **Voltage Adjustment:** Built-in potentiometer adjusts voltage from 4.5V to OVP trip point (6.2V nominal) on the +5V output. A separate potentiometer adjusts output #2 ±5% minimum. **Reverse Voltage Protection:** All outputs protected against inadvertent application of reverse voltage up to 1 times the rated current of the reversed output. **Temperature Rating:** 0 to 50°C at full rated output power with natural convection cooling in a non-restricted environment. For operation in a confined space, moving air may be required. For operation above 50°C, it is important that the cooling vs. load profile is such that the heatsinks do not operate above 90°C for extended periods. **EMI Specifications:** All models include built-in EMI filters to meet or exceed the conducted emissions requirements of FCC 20870 Class B and VDE 0871 Class B. **Safety Specifications:** All commercial models are designed to meet UL 1950, CSA 1402C Level 3, IEC 950, VDE EN60950 and VDE 0750. All medical models are approved to UL 544 and IEC 601-1. **All commercial models are approved to UL 1950 without D3 deviation, CSA 22.2.234, IEC 950, VDE EN60950 and VDE0750.**

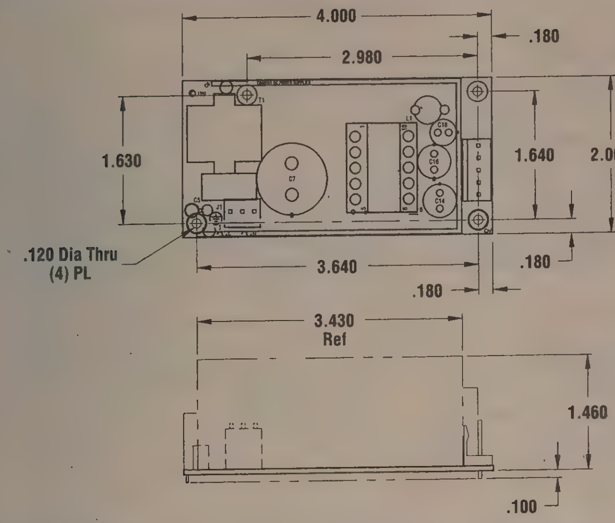
*Replace X in Stock No. as follows: 7 = Commercial version for data processing, control, etc., applications; 8 = Medical version. †Optional 5th output up to 2 amps @ ±5, 12 or 15V; consult factory. ‡Not available in Medical. For optional enclosure information, consult factory. **26 CFM forced air cooling required.



2" × 4", 40 W, Single Output

General Specifications. AC Input: 85-264 VAC, 47-63 Hz single phase. **Input Current:** Maximum input current at minimum 120 VAC, 60 Hz with full rated output load not to exceed 1.3 A. **Output Noise:** 0.5% RMS, 1.5% PK-PK, 20 MHz bandwidth, differential mode. Measured with noise probe directly across output terminals of the power supply. **Reverse Voltage Protection:** All outputs protected against inadvertent application of reverse voltage up to 1 times rated current of the reversed output. **Overload Protection:** Factory set to power limiting at 55 W ±6 W. **Efficiency:** 70% minimum at full rated load, nominal input voltage. **Input Protection:** Fuse to be provided by customer. **Inrush Current:** Inrush is limited by internal thermistors. The inrush at 240 VAC, averaged over the first AC half-cycle under cold start conditions, will not exceed 37 A. **Overvoltage Protection:** A latching overvoltage protection provided.

20 W, Wide Range

General Specifications. AC Input: 90-264 VAC, 47-63 Hz single phase. **Input Current:** Maximum input current at minimum 120 VAC, 60 Hz with full rated output load is .65 A. **DC Outputs. Hold-Up Time:** 15 mSec minimum from loss of AC input at full load, nominal line (115 VAC). **Output Power:** Normal continuous output power is 20 W, 24 W peak for 60 seconds max. duration. Factory set to begin limiting at 28 W. **Output Regulation:** Regulation measured by ±40% load change from 60% rated load with all other outputs at 60% full rated load and a line voltage change from low line to high line. Initial set tolerance is measured with all outputs at 60% of full rated load. **Overload Protection:** Fully protected against short circuit and output overload. Short circuit protection is cycling type power limit. **No Load Turn-On/Standby:** No degradation of reliability will occur however regulation could be affected. **Output Noise:** 0.5% RMS, 1% PK-PK, 20 MHz bandwidth, differential mode. Measured using a 12" twisted pair harness with 47 µF capacitance at terminating end. Fundamental switching frequency ripple and noise may be substantially improved by placing a 100 µF low ESR capacitor at load. **Transient Response:** 750 µSec. typical response time for return to within 0.5% of final value for a 50% load step change, Di/Dt< 0.2 A/µSec. Maximum voltage deviation is 3.5%. **Overvoltage Protection:** Built in with firing point set per table below. OVP firing reduces output voltage to less than 75% of nominal voltage in 50 msec.

Output V	Trip Point
5 V	6.2 V ±0.6
12 V	14.0 V ±1.0
15 V	19.0 V ±1.5
24 V	28.0 V ±2.0
28 V	34.0 V ±2.8

Voltage Adjustment: Factory set with fixed resistors to maximize reliability. **Efficiency:** 72% minimum for 5 V model and improves as output voltage increases. **Overshoot:** Less than 3% overshoot at turn-on under nominal conditions, inversely proportional to input voltage and temperature. Less than 2% overshoot at turn-off under all conditions. **Turn-On Time:** Less than 1 second at 110 VAC, 25°C (inversely proportionate to input voltage and thermistor temperature). **Input Protection:** 2 internal AC fuses provided on all Medical units. 1 internal AC fuse provided on all Commercial units. Designed to blow only if a catastrophic failure occurs in the unit — Fuses do not blow on overload or short circuit. **Inrush Current:** Inrush is limited by internal thermistors. The inrush at 240 VAC, averaged over the first AC half-cycle under cold start conditions will not exceed 25 A. **Temperature Coefficient:** 0.03%/C° typical on all outputs. **Temperature Range:** 0 to 50°C at full rated output power. See Operating Temperature Table for additional details on each model. For operation in a confined space, moving air may be required. Under all conditions, the cooling vs. load profile should be such that heatsinks and/or chassis temperatures do not exceed 95°C for extended periods. **Storage:** –40 to –85°C. Units should be allowed to warm-up under non-condensing conditions before application of power. **Altitude:** –500 to 10000'. **EMI Compliance:** All models include built-in EMI filtering to meet or exceed the emissions requirements of FCC Class B, CISPR 11-Class B, CISPR 11-Class B, and VDE 0871 Class B to 150 kHz. Typical margins >3 dB at all frequencies and line/load conditions. **Safety:** All GSC models are approved to UL 1950 (with no D3 deviations), CSA22.2 No. 234 Level 3, IEC950, EN60950 and VDE 0805 (contact factory for approval status). Leakage current not to exceed 300 µA. **Packaging:** Units are shipped in 50 piece multiples, a 50 piece minimum order is required. **Shock and Vibration:** All models are designed to meet MIL-STD 810E, Method 514.4 Category I. This test consists of random vibration at 0.015 g^2/Hz from 5 to 50 Hz, declining linearly to 0.0015 g^2/Hz at 500 Hz in each axis for 1 Hr. All models designed to meet MIL-STD 810E, Method 516.4. Unpackaged units shall meet the bench handling requirements of Procedure VI for 4 drops per face. Packaged units shall meet the requirements of Procedure IV for transit/shipping drops comprised of 4 drops on each face of the standard container from 30" onto a plywood base.

350 W Switching Power Supplies — Rainbow Series

- ► Automatic Line Range Selection
- ► Fully Regulated and Floating Outputs
- ► 5.00" × 9.50" × 2.50"
- ► Modular Output Configurations
- ► 2 Year Warranty
- ► FCC/VDE Level B
- ► Commercial and Medical Safety Approvals
- ► AC Power Fail Signal
- ► Remote Inhibit
- ► Optional Fan/Cover Package
- ► "SMART LOAD" Eliminates Minimum Load Requirements

Electrical Specifications — Input
- ► RSx = 90-135 and 180-264 VAC
- ► AC Frequency Range: 47-63 Hz
- ► Conducted Emissions: FCC/VDE Class B
- ► Input Current: 9/4.5 A
- ► Inrush Current: 40 A Max.

Electrical Specifications — Safety Agencies
- ► Commercial Units: UL 1950 (No D3 Deviations), IEC950, CSA 22.2 No. 234, EN60950
- ► Medical Units: UL 2601, IEC601-1, CSA 22.2 No. 601.1 for Patient Vicinity (Non-Invasive) Applications, Consult Allied for Approval Status

Output Configurations
- ► "A" Auxiliary Output Adjusts From 4.7 to 5.3 VDC
- ► "B" Auxiliary Output Adjusts From 11.5 to 15.5 VDC
- ► "C" Same as "B"; Factory Set at 15 VDC
- ► "D" Auxiliary Output Adjusts From 23 to 29 VDC
- ► Specifications Subject to Change

Electrical Specifications — Output
- ► Adjustment Range: ±5%
- ► Power: 350 W with 12 CFM (390 W peak)
- ► Minimum Load: "SMART LOAD" Eliminates Minimum Load Requirement
- ► Output Noise: 0.5% RMS, 1% pk-pk
- ► Line Regulation: ±0.2% All Outputs
- ► Total Regulation: Main — ±1%; Aux. — ±2%
- ► Remote Sense: Standard on Main Output
- ► Hold-Up Time: 20 mSec
- ► Overcurrent Protection: Automatic Recovery, Set at 415 W
- ► Efficiency: 74% Minimum at Full Load
- ► Overvoltage Protection: Included on All Outputs

Electrical Specifications — Environmental
- ► Operating Temperature: 0-50°C
- ► Storage Temperature: –40-85°C
- ► Thermal Shutdown: Automatic

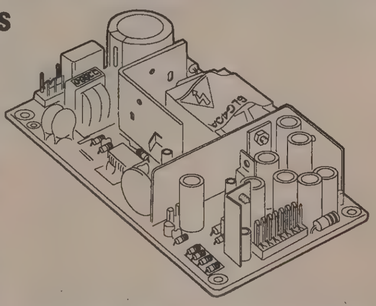
40 W Wide-Input, GLC Series



- ► AC Input: 90-264 VAC, 47-63 Hz Single Phase
- ► Input Current: Maximum Input Current at Minimum 120 VAC, 60 Hz with Full Rated Output Load Is 1.3 A
- ► Hold-Up Time: 20 mSec Minimum from Loss of AC Input At Full Load, Nominal Line (115 VAC)
- ► Output Power: 40 W
- ► Output Regulation: Regulation Measured by ±40% Load Change from 60% Rated Load with All Other Outputs at 60% Full Rated Load and a Line Voltage Change from Low Line to High Line. Initial Set Tolerance Is Measured with All Outputs at 60% of Full Rated Load
- ► Overload Protection: Fully Protected Against Short Circuit and Output Overload; Short Circuit Protection Is Cycling Type Power Limit on Output #1 and #2; Foldback Type on Output #3; Factory Set to Begin Power Limiting at 55 W
- ► Output Noise: 0.5% RMS, 1% Pk-Pk, 20 MHz Bandwidth, Differential Mode; Measured with Scope Probe Directly Across Output Terminals of the Power Supply with Load Terminated with 0.1 µF Capacitor
- ► Overvoltage Protection: Built In On +5 V Output with Firing Point Set at 6.2 V ±0.6 V; OVP Firing Reduces +5 V and Output #2 to Less Than 50% of Nominal Voltage in 50 mSec
- ► Voltage Adjustment: Factory Set on Standard Unit; However, Optional Potentiometer Adjusts Voltage from 4.7 V to OVP Point (6.2 V Nominal) on the +5 V Output; Note: Output #1 Must Not Be More Than 1% Below Nominal to Achieve Full Output Voltage Range on Output #2; Output Regulation Limits in Some Models May Be Exceeded When the Main Output Is Adjusted Beyond ±1% of Nominal Voltage; High Voltage Settings May Degrade the Reliability of the Unit Due to Excessive Power Dissipation in Some Outputs, Consult Factory for Application Assistance
- ► Efficiency: 65% Minimum at Full Rated Load, Nominal Input Voltage, Depending on Model and Load Distribution
- ► Input Protection: Internal AC Fuse Provided on All Units; Designed to Blow Only if a Catastrophic Failure Occurs in the Unit; Fuse Does Not Blow on Overload or Short Circuit
- ► Temperature Range: 0 to 50°C at Full Rated Output Power for 40; For Operation in a Confined Space, Moving Air May Be Required; Under All Conditions, the Cooling Vs. Load Profile Should Be Such that Heatsinks and/or Chassis Temperatures Do Not Exceed 90°C for Extended Periods
- ► EMI Compliance: All Models Include Built-In EMI Filtering to Meet or Exceed the Emissions Requirements of FCC Class B, CISPR 11-Class A and VDE 0871 Class A to 10 kHz; Typical Margins >3 dB at all Frequencies and Line/Load Conditions
- ► Safety: All GLC Models Are Approved to UL 1950 (With No D3 Deviations), CSA 22.2 No. 234 Level 3, IEC950, EN60950 and VDE 0805 (Consult Allied for Approval Status)

Value Line Switching Power Supplies

These VDE, IEC, UL and CSA approved switching power supplies feature full load burn-in and a 2-year warranty. V-Series types have high peak current disk drive outputs, as well as 3 terminal type closely regulated outputs. An internal AC fuse is provided on all units for input protection. All outputs are protected against the Class A conducted EMI filtering.

SPECIFICATIONS. AC Input: 90-132/180-264VAC user selectable, 47-63 Hz single phase. **Overload Protection:** Fully protected against output overload and short circuit. Automatic recovery after removal of fault. **Reverse Voltage Protection:** All outputs protected against inadvertent application of reverse voltage. **Input Protection:** Internal AC fuse provided on all units. **Current Limit Adjustment:** Built in potentiometer factory set to begin current limiting at the following peak power output minimum under nominal line conditions. **Efficiency:** 70% ±5% depending on model and load distribution. Measured at 100% of rated power. **Over voltage Protection:** Built in on+5V outputs with firing point set at 6.2V ±0.6V. **Output Noise and Ripple:** 0.5% rms, 1.5% p-p maximum on all outputs.

*Ratings of these negative outputs assume that other negative output is at no load. Total combined loading cannot exceed 100%; that is, if one negative output was running at 70% of rated load, then the other negative output cannot exceed 30% of rated load.

Notes:
A: Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of +5.0V is ±1.0%.
B: Quasi-Regulated output requires 20% minimum load to meet regulation specs. An additional cross-regulation factor of ±3% must be added in those applications where the main +5V output varies ±25%.
C: Fully regulated output utilizing fixed, 3-terminal regulator.
D: Fully isolated output. May be connected in series with any output, and may be connected for (–) or (+) output. May be paralleled when same output voltage and reg. type. (Quasi-Reg. and 3-pin outputs will not share loads if connected together.)
E: Dual-sensed, regulated output. +5V and +12V outputs are sensed in combination to provide tighter regulation of the +12V output. An additional cross-regulation factor of ±2.0% must be added in those applications where the +5V output varies ±25%. Initial setting of +5V output is ±1.0%.

SDM/SDS International Specifications

SAFETY SPECIFICATIONS: SDM and SDS Series Safety Design Parameters. **Safety Spacings:** Primary to secondary circuitry 8.0 MM; primary to ground circuitry 4.0MM; Secondary to ground circuitry 4.0MM. **Leakage Current:** input to ground 0.5 MA RMS.**Dielectric Withstanding Voltage:** Input to output 4000VAC RMS; output to ground 500VAC RMS. These safety design parameters meet or exceed the requirements of the following international safety specifications: IEC 435, Class 1 and 2; VDE 0730 Part 2P, Class 1 and 2; VDE 0806, Class 1 and 2; UL 478; UL 1012; BPO STD #26; CEE-10 Part 2, Class 1 and 2;CSA 22.2, No's 143 and 154; ECMA-57, Class 1 and 2; and IEC 380, Class 1 and 2.

EMI Specifications: SMD and SDS Series EMI Design Parameters. All Condor International Series Switching Supplies are designed with built-in EMI filters on the output line to reduce conducted emissions to the following maximum levels: 150 KHz to 450 KHz, 54 DB V; 450 KHz to 30 MHz, 48 DB V. These EMI design parameters meet or exceed the requirements of the following EMI specifications down to 150 KHz, FCC 20870. Class A and B (V Series Class A only); VDE 0871, Class A and B. The level B specifications are the most stringent in the industry.

A-suffix models with quasi-regulated secondary outputs for high peak current capability are ideal for powering multiple floppy disk and Winchester systems. B-suffix units have tightly regulated secondary outputs–perfect for applications such as video display units and other linear applications. Versatility is unsurpassed on several models, since their isolated +12V can be stacked with their existing +12V to provide 24V. For very high +12V peak loading applications, the floating 12V can be paralleled with the dedicated +12V on several models.

Notes

A. Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of +5.0V is + 1.0%.

B. Dual sensed reg. output. +5V and +12V outputs (*) are sensed in combination to provide tighter reg. of +12V output. Additional cross reg. factor +2.0% must be added in applications where the main +5V output varies +25%. Initial setting of +5V output is +1.0%.

C. Fully regulated output utilizing fixed 3-terminal regulator.

D. Quasi-regulated output requires 20% min. load to meet regulation specs. Additional cross regulation factor of +3% must be added in applications where the main+5V output varies 25%.

E. Fully isolated output. May be connected in series with any output, and may be connected for ± output. May be paralleled with the same output voltage and reg type. (Quasi-Reg and 3-pin outputs will not share loads if connected together).

F. The total current for +5V* and +12V* outputs must not exceed 10A (14A PK).

G. The total current for +5V* and +12V* outputs must not exceed 13A (17A PK).

H. The total current for +5V* and +12V* outputs must not exceed 15A (20A PK).

J. The total current for +5V* and +12V* outputs must not exceed 20A (28A PK).

Connector Kit for SDS45/SDM45 and SDS80/SDM80 Units Only

744-2019. Type 18-30234-2019 (Amp connector and pins)....................**EACH 8.32**

PAC Series: Encloses Switching Power Supplies

- **FCC Class B and VDE 0871 Class B Conducted and Radiated EMI Filtering**
- **VDE, IEC, U.L. and CSA Approved**
- **Worldwide AC Input Ranges 90-132/180-264VAC with Auto-Switchover - No taps or Switches**

These fully enclosed switching power supplies have a safe, ultra-compact design. Their extremely versatile output configurations are made for your tough and varied applications. The IEC AC output connector and VDE approved On/Off switch mean that no additional AC system wiring is required. Other features include an internal fan for full system cooling, high peak current disk drive outputs (as well as 3 terminal type closely regulated outputs), full load burn-in and a 2-year warranty. Plus, with the PAC Series, agency approvals are very easy since all critical parameters are controlled within the supply. There is an additional remote turn-on for add-on applications such as hard disk sub-systems. AC powerfail signal is provided on 150 and 185 watt units. **Dimensions. 85/105 Models:** 5.75 × 3.70 × 4.20"; 2.1 lbs. **Specifications. AC Input:** 90-132/180-264VAC with fully automated switch-over (no switches or taps required), 47-63 Hz, single phase. Input connections are made through standard IEC320/CEE-22 international type input connector. **AC Switch:** The input AC is controlled by a standard VDE approved DPST rocker switch. In addition, a remote turn-on option is available which allows the unit to be switched on by the application of a +5V logic signal. It is particularly useful for add-on systems (hard disks, etc.) where the remote turn-on line is simply connected to the + 5V of the main computer.

Notes:

A: Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of +5.0V is ± 1.0%.

B. Quasi-Regulated output requires 20% minimum load to regulation specs. An additional cross regulation factor of ±3.0% must be added in those applications where the main + 5V output varies ±25%.

C: Fully regulated output utilizing fixed, 3 terminal regulator.

D: Fully isolated output. May be connected in series with other outputs for higher voltage applications. May be connected in parallel with another output if both outputs are the same voltage and quasi-regulated.

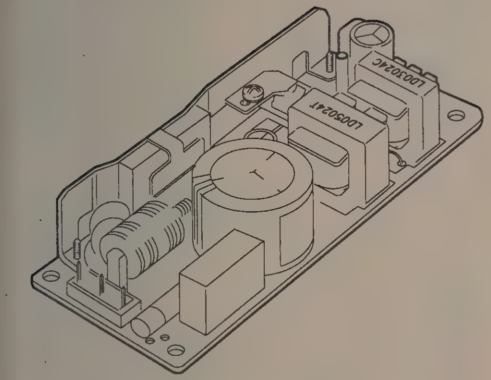
Options:

1. Mating AMP output connectors with pins are available.
Model 18-30234-0013. For PAC 85 and PAC 105.
744-0002 ....**EACH 7.28**

2. A mating IEC 320/CEE-22 type AC input plug and cord set is available. This 6 ft. cord set comes with a standard 3-prong ground plug.
744-0004. Model 20-30793-0001....................**EACH 6.24**

3. Remote turn-on: This remote turn-on option allows the unit to be switched on by the application of a + 5VDC logic signal. 'ON' = 2.4 to 5.5VDC @ 25mA (5V). 'OFF' = 0 to 0.8VDC. This feature is particularly useful in add-on disk systems where the remote turn-on line is simply connected to the + 5V of the main computer. Add suffix 'R' to the mfr.'s part number for this non-stock option.

LDA Series: World-Wide Input, Single Output



- Low Cost, Small, Lightweight Open Frame PC Board Type
- Available With Adjustable Output Potentiometer (Y) Option
- Available With Chassis and Cover (SN)
- Universal Input (85~264 VAC) Inrush Current, and Overvoltage Protection Circuits
- Noise Regulation: Complies with FCC-B, VCCI-2, and VFG 243/91
- Harness Assembly Available, See Page 472
- UL Approved, CSA, TÜV
- 2 Year Warranty
- Quantity Pricing Always Available

LCA Series: Designed for Low Cost, Small Size and High Reliability

- Input AC 85-132 V
- Overcurrent, Overvoltage Protection
- PC Board Open Frame Construction
- Noise Regulation: Complies with FCC-B, VCC1-2
- Harness Assembly Available, See Page 472
- Two Year Warranty
- Quantity Pricing Always Available
- UL Recognized, CSA Certified
- Quantity Pricing Always Available

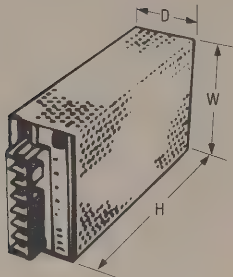
Single Output Switchers: 10 to 150 Watts



- Two and Three Year Warranty
- Protective Cover
- UL and TUV Approved, CSA Certified
- Small Size
- Adjustable Output Voltage Range: ±10%

DPA Series: AC-DC Front End

- High Power Factor 0.98 (IEC100-3-2)
- High Efficiency: 90% — 100 VAC; 95% — 200 VAC
- Wide Input Voltage Range: 85-264 VAC (Free Voltage)
- Safety Standard: UL, CSA, TUV
- Overcurrent Protection (No External Resistor Required)
- Parallel Operation, Built-In Protection Circuits (Overvoltage/Over Heat)
- Inverter Action Monitoring, Power-Ready Signal
- Auxiliary Power Supply for External Signal
- Power Factor Correction

AC Input: 85-264 and 170-264. **Output Watts:** 500. **Output Volts:** 300-360 DC. **Size:** 2.28"W × 0.50"H × 5.12"D. **Weight:** 0.33 lbs.

800-4060. Model DPA500F. **1-4**..........................**EACH 160.68** **5-9**..**EACH 148.32**

LDC Series: World-Wide Input, Triple Output

- Low Cost
- Small, Lightweight Open Frame PC Board Type
- Universal Input (85-264 VAC)
- UL, CSA, TUV
- Inrush Current, Overcurrent, and Overvoltage Protection Circuits
- V1 Isolated From V2, V3
- 2 Year Warranty
- Available with Chassis and Cover Option (SN)
- Available with Adjustable Output "Y" Option Potentiometer
- Quantity Pricing Always Available

*Output pins can be connected in series to make a 24 V output or 30 V output.

DC-DC Converters: Designed for Small Size and High Reliability

- ► Overcurrent, Overvoltage Protection
- ► Aluminum Die-Cast Housing Allows for Low EMI Noise
- ► Power Inhibit Control
- ► Output Voltage can be Controlled by Additional External Circuits
- ► With Dual Outputs, Connected in Series, Single 24 V and 30 V Are Possible

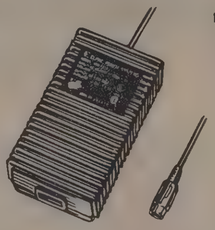
WRI Series Wide Range Input Series — Regulated

General Specifications. Storage Temperature: –55°C to +85°C. **Operating Temperature:** 0-40°C. **Size:** 6.3" × 3.82" × 2.66". **Weight:** 13 oz. **Input Cable:** 6' standard domestic 3 prong. **Output Cable:** 6' shielded with barrel connector. **Output Specifications. Line Regulation:** ±.2% over 90-132 or 180-250. **Maximum Load Regulation:** ±5% for 40% load variation (60% nominal). **Set Point:** ±3% at 60% load. **Ripple and Noise:** ±1% Pk-PK maximum. **Overload Protection:** Automatic recovery. **Overvoltage Protection:** 115-140%. **Overshoot:** None above normal regulation. **Transient Response:** Recovery to within 1% of nominal output within 1 ms for a 50% to 100% load step. Maximum excursion is 6% from initial voltage set point. **Input Specifications:** 90-250 VAC, 47-440 Hz, or 10-350 VDC. **Inrush Current:** 35 A PK at 230 VAC. **Input Protection:** Internal input line fuse.



IEC950 FCC

MIADA I/IV Single Output, Wide Range Switchers

Low Profile External Power Supply

Features
- **95-250 VAC, 47/63 Hz Via Input Connector**
- **FCC B/VDE Class B**
- **IEC 320 Series Input Connector**
- **26 Models**
- **Single Output**
- **International Approvals**
- **One Year Warranty**
- **3" × 5" × 1.31", 13 Oz.**

Application
- **Notebook Computers and Small Systems**

Optional Output Cable/Connectors available on special order. 760 Switchcraft is standard.

Output Connector Female

Regulated Wallmounts and Tabletops

Features
- ► Single and Multiple Output
- ► 2½ Watt to 23 Watt
- ► UL Listed — CSA Certified
- ► One Year Warranty

Specifications. Input Voltage: 120 VAC, 60 Hz. **Output Ripple:** 20 millivolts (p-p). **Operating Temperature:** 0°C to 40°C. **Combined Regulation:** ±5%. **Fusing:** Internal, non-replaceable. **Thermal Current Limited. Dielectric Withstand Voltage:** 1500 VAC, RMS. **Options. Connectors. Shielded Output Cable — S Option:** Shielded cable with EMI ground tied to outer ring of DIN connector (not to be used as safety ground).

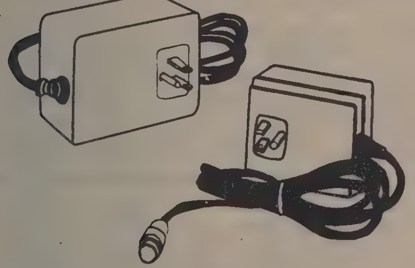
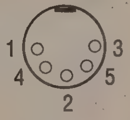
MED Series — Regulated Medical Instrumentation Power Supply



5 Pin Din



5 Pin DIN Standard
Optional Output
Connectors
Available

General Specifications
- ► **A/C Input: 120 VAC, ±10%, 60 Hz (All Models Except MED 220)**
- ► **AC Input MED 220: 115 VAC, ±10%, 60 Hz**
- ► **AC Input Cable 6 Foot Hospital Grade Cord (Tabletops)**
- ► **DC Output Cable 6 Foot**
- ► **Load Regulation: ±5%**
- ► **Line Regulation: ±0.5%**
- ► **Ripple and Noise: 20 Millivolts P-P**
- ► **Minimum Load: 0 Watts**
- ► **No Overshoot on Turn-On/Turn-Off**
- ► **Short Circuit Protected**
- ► **Thermally Fused Primary**
- ► **Standard 5 Pin DIN Connector**
- ► **Operating Temperature: 0-40°C**
- ► **Storage Temperature: –25°C to +85°C**
- ► **Size: Models MED 075, 112, 113, 113TT, 144 — 2.3 × 3.1 × 4.4 Inches; Model MED 220 — 2.7 × 3.8 × 6.3 Inches**

Approvals
- ► **UL Approved to Medical Standard UL544**
- ► **FCC Class B and VDE Class B Emissions**
- ► **CSA Approved to Standard C22.2 No. 220, CSA Evaluated to C22.2 No. 125 (Medical Applications)**

Features
- ► **Medical Agency Approved**
- ► **Tabletops and Wallmounts**
- ► **All Outputs Fully Regulated**
- ► **Output Connector Options**
- ► **Off-the-Shelf Availability**

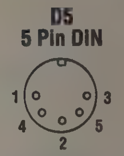
Regulated Tabletops — European Models



DC Output Connections

Features
- ► TUV Approved to IEC 950
- ► VDE Class B Emission
- ► CMIs Have IEC Approved Input Connector
- ► WMs Have 2 Prong Euro Plug
- ► CE Marked
- ► All Outputs Fully Regulated
- ► Output Connector Options
- ► Off-the-Shelf Availability

Specifications. Input: CMI 200-250 VAC 50 Hz, WMI 212-240 VAC 50 Hz. **Ripple:** 1% Pk-Pk for all outputs. **Combined Regulation:** ±5% max. **Minimum Load:** 0 Watts. No Overshoot to turn-on or turn-off. Current limited: Internally Fused. **Operating Temperature:** 0-45°C. **Size:** 6.3 × 3.82 × 2.66 inches.

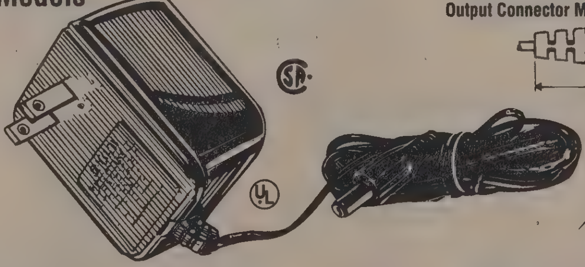
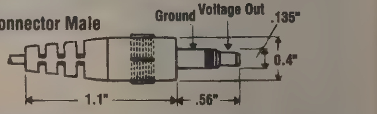
Unregulated Wallmounts — North American Models

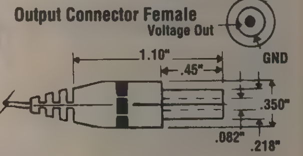
Features
- ► Single Output
- ► 1.5 Watts to 8 Watts
- ► UL 1310 Listed
- ► One Year Warranty



Output Connector Male



Output Connector Female



Specifications. Input Voltage: 120 VAC, 60 Hz. **Output Connector:** Output jack on a 6 ft. two-conductor cable. **Operating Temperature:** 0-30°C Thermal currently limited. **Input to Output Isolation:** 1250 volts.

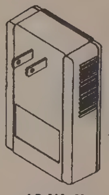
Wallmount and Desktop Switching and External Power Supplies

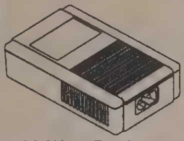
LZRelectronics,inc.

Vulcan 10 and 20 Watt Switching Power Supplies — NEW —

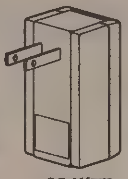
General Specifications. Input Voltage: 90 VAC to 132 VAC for North American units, 90 VAC to 264 VAC for Universal units. **Input Frequency:** 47 Hz to 63 Hz for all units. **Input Current:** Less than 0.5 amps for all units. **Output Current:** No load to full load (no minimum load required). **Output Regulation (Line/Load):** For single output units — ±5%; for multiple output units — ±5% for main output, ±5% for second output, and ±10% for third output (measured at the end of the output connector).



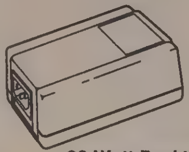
10 Watt Wall Plug-In



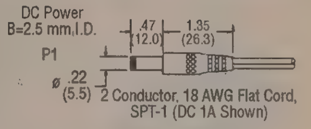
10 Watt Desktop



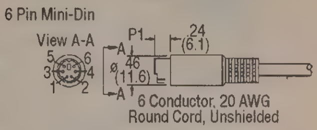
20 Watt Wall Plug-In



20 Watt Desktop



For Single Outputs



For Dual and Triple Outputs

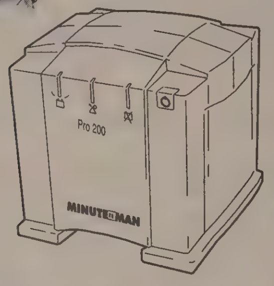
$25,000
MINUTEMAN PLATINUM PROTECTION PLAN
MINUTEMAN will repair or replace equipment, up to $25,000 in value, damaged by AC surges while properly connected to this MINUTEMAN UPS



Pro Series

— NEW —

- **Intelligent, Line-Interactive Technology**
- **Modem/Fax/Network Surge Protection**
- **Hot Swappable Batteries**
- **Advanced Battery Management**
- **Compatibility with Power Management Software**
- **An Unprecedented 3-Year Warranty**

Minuteman's new Pro series sets a new standard for UPSs. With a unique, ergonomic design, the series ranges from 200 to 1400 VA and brings several high-level features down to the low-end of the market.

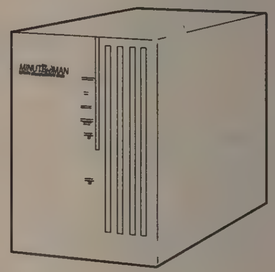
PowerMind Series

- **Automatic Frequency Selection (50 or 60 Hz)**
- **Automatic Power Boost During Brownouts without Using Battery**
- **True Sine-Wave Output**
- **$25,000 Connected Equipment Coverage and 2 Year Warranty**
- **Self-Diagnostic Test on Turn On**
- **Site Wiring Fault Indicators**

The PowerMind (PML) Series from Minuteman are microprocessor-based intelligent UPSs that provide a true sinewave output. Designed for desktop PCs, telephone systems, critical file servers and LAN workgroups, the PMLs also incorporate extensive status indicators and audible alarms. The unique line-interactive technology built into the PMLs provides protection from brownout conditions without using the batteries. In addition, the PML Series provides complete protection from surges, spikes and blackout conditions.



Stock No.	Mfr.'s Type	Applications	VA/Watts	Dimensions L × W × H (In.)	Ship Weight (Lbs.)	Comm Port	EACH

XRT Series

- **Regulates Voltage from 88 to 140 V without Battery Use**
- **Isolation Transformer Provides Superior Noise/Surge Filtering**
- **Extended Back-up Times with Stackable External Battery Packs**
- **True Sinewave Output**
- **$25,000 Connected Equipment Coverage and 2 Year Warranty**

Minuteman XRT Series provides the best surge, spike and EMI/RFI filtering available. The series also incorporates a true automatic voltage regulator, a programmable LCD display (available on XRT1000 and above), and a built-in microprocessor that performs advanced battery management utilities. Minuteman's optional LanMaster monitoring and shutdown software is used for power and event management. **NOTE:** XRT600 includes batteries, all other units require external battery packs. Any number of additional battery packs can be added for increased run time. Each added pack will provide 20 to 30 minutes additional time. Perfect for critical servers and telecommunication equipment.

CP Series

Minuteman's Continuous Power Series features true on-line double-conversion UPS technology that provide unsurpassed power protection for mission-critical applications. With extensive status indicators, synchronized sinewave output and a two-stage alarm, the CP Series represents the finest power protection money can buy. 208 and 240 volt units are available.

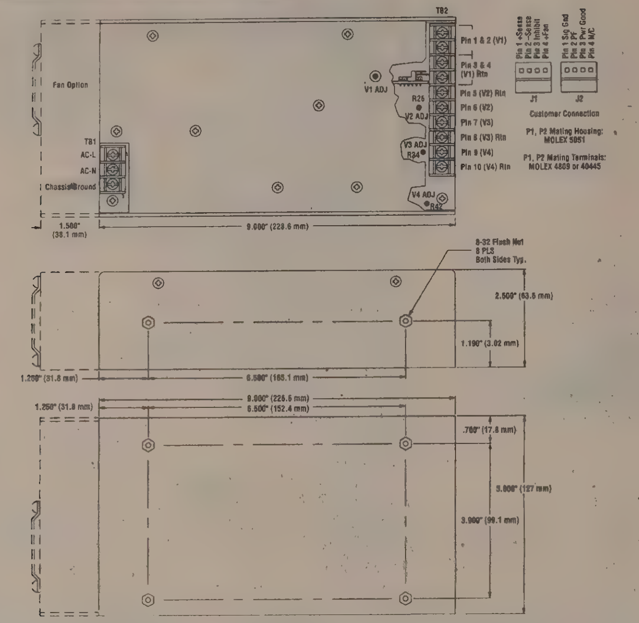
NRG275 and NRG350 Series



General Specifications. AC Input: Automatic selecting dual range 85-132 VAC or 170-264 VAC. 47-63 Hz single phase. NOTE: AC input range selection is fully automatic. No manual switchover is required. **DC Outputs:** See voltage/current rating chart. **Output Power:** See voltage/current rating chart. **Brown-Out Protection:** Regulation is maintained down to 85/170 VAC, at full rated load, with no compromise in performance. **Hold-Up Time:** 20 msec minimum at full rated load and nominal AC input voltage. **Power-Fail Warning Signal:** TTL compatible signal goes low 4 msec before the main output drops to 95% of its steady state value at full rated load. **Efficiency:** Measured at full rated load and nominal AC input voltage. 75% ±5% depending on how the load is distributed among the outputs. **Regulation Characteristics:** See voltage/current rating charts for individual module ratings; Line — Measured over an 85-132 VAC or 170-264 VAC line change; Load — Measured over a min. to max. load change; Multiple output model regulation is subject to the minimum load requirements mentioned below. **Initial Setting Tolerance:** Measured at 50% of full rated load on all outputs. **Minimum Loads:** 10% minimum load on the main output is required to maintain regulation. **Remote Sensing:** Provided on the main output. **Transient Response:** All output — Less than 1 msec typical for a 50-100% load change and recovery to within 1% of initial voltage set point; Maximum excursion — 3% from initial voltage set point. **Overload Protection:** Entire unit hiccups if V1-V3 is overloaded; V4 is self limiting. **Overvoltage Protection:** Provided on the main output; Hiccups over AC operating range. **Output Noise and Ripple:** 1% PK-PK maximum on any output (20 MHz BW). **Overtemperature Protection:** Initiates shutdown in the event of an overtemperature condition; Automatic reset. **Power-Up Initialization Period:** 2.0 sec. maximum turn-on delay assures orderly ramp-up and stabilization of all output voltages during power-up. **Input Protection:** AC input line fuse provided; Internally located. **Inrush Current:** Internally limited at 80 A PK, cold start. **Temperature Rating:** Operating — 0°C to 50°C at full rated output power; Consult factory for operating information between 50°C to 70° C; Storage — –55°C to +85°C. **External Cooling:** External cooling air velocity measured 1/4" above and at the middle of chassis, input to output — NRG275, NRG350 — 300 LFM. **EMI:** VDE and FCC level B EMI. **Vibration. Operating:** 5-32 Hz and 32-5 Hz, Sinusoidal, 0.02 in (DA); 32-2000 Hz and 2000-32 Hz, Sinusoidal, 1 g (PK). **Non-Operating:** 10-350 Hz, 0.04 g^2/Hz; 350-2000 Hz, 0.007 g^2/Hz, 6.15 g (RMS) overall. **Shock:** Operating — 10 ±3 msec, 3 axes, Half Sine, 20 g (PK); Non-Operating — 10 ±3 msec, 3 axes, Half Sine, 40 g (PK). **Dielectric Withstand Voltage (min):** Input to Ground — 1500 VAC; Input to Outputs — 1500 VAC; Outputs to Ground — 500 VAC. **Leakage Current:** Line to ground (max.) — 3 mA. **Altitude:** Operating — 10,000'; Non-operating — 40,000'. **Relative Humidity:** Non-condensing, 95% Maximum. **Dimensions:** 9.0" × 5.0" × 2.5". **Weight:** 3 lbs., 9 oz.

- **Automatic Selecting AC Input: 85-132/170-264 VAC, 47-63 Hz**
- **Terminal Block Connectors**
- **All Outputs Fully Regulated**
- **MOSFET Switching Technology**
- **Rugged Wrap-Around Chassis With Standard Cover**
- **75% Typical Efficiency**
- **High Power Density, Up to 3.1 Watts/Cubic Inch**
- **Optional Fan**
- **Extra Output Voltage to Power External Fan**
- **Thermal Shutdown**
- **UL Recognized, CSA Certified**
- **TÜV Certified to: EN 60950**
- **Meets Domestic and International Safety: 3750 VAC Isolation; VDE Safety Spacings**
- **Meets Domestic and International EMI: FCC 47CFR, Part 15, Level B; VFG 243 Level B**
- **Internal Input Line Filter**
- **Power-Fail Warning Signal**
- **Output Good Signal**
- **Full Load Burn-In and Thermal Cycling**
- **2 Year Warranty**

Outputs #1 and #2 are positive polarity. Outputs #3 and #4 are floating and can be referenced as either + or –.

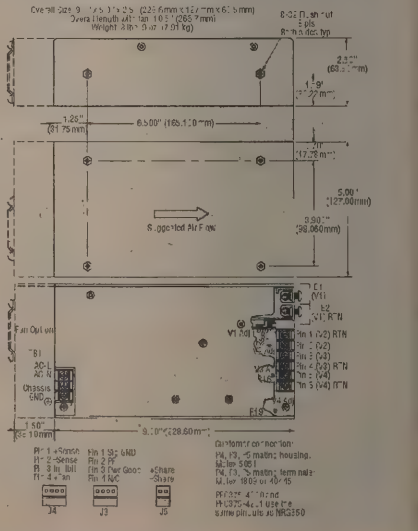
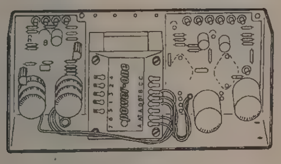
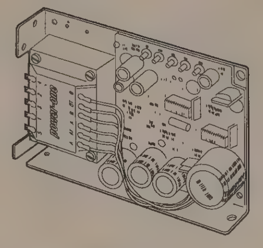
Notes: 300 LFM forced air required unless fan option is selected. Overall size without fan option is 9.00 × 5.00 × 2.50 inches. Overall size with fan option is 10.50 × 5.00 × 2.50 inches.



International Series Linears



HBAA-40W-A



HTAA-16W-A

- Worldwide AC Input Capabilities: 100/120/220/230/240 VAC
- ±0.05% Regulation
- Low Output Ripple
- UL Recognized: 1950 with D3
- CSA Certified: 1402
- TÜV Certified: EN 60950
- Industry Standard Packages
- 77 Models: 6 to 280 Watts
- Up To 4 Regulated Outputs
- VDE Construction
- 2 Hour Burn-in
- 2 Year Warranty
- Made In U.S.A.

General Specifications. AC Input: 100/120/220/240 VAC +10%, –13%. 47-63Hz. Tolerance for 230 VAC operation is +15%, –10%. Derate output current 10% for 50 Hz operation. Factory wired for 120V operation. **DC Output:** Adjustment range ±5% minimum. Voltage nonadjustable on "3 terminal regulator" outputs of models HAD12, HAD15. **Line Regulation:** ±.05% for a 10% line change. Exceptions — ±.01% for F, G case models and CP197-A; ±1% for HAD12 and HAD15; ±0.5% for all other outputs using "3 terminal regulators." **Load Regulation:** ±.05% for 50% load change. Exceptions — ±.02% for F, G case models and CP197-A; ±1% For HAD12 and HAD15; ±0.5% for all other outputs using "3 terminal regulators." **Output Ripple:** 5V through 15V models — 5.0 mV PK-PK maximum (3.0 mV PK-PK maximum for F, G case models and CP197-A); 24V through 250V models — 3.0 mV PK-PK plus .02% of output voltage, maximum; All "3 terminal regulator" outputs — 0.2% PK-PK maximum. **Transient Response:** Less than 50 µsec for a 50% load change. **Short Circuit and Overload Protection:** Automatic current limit/foldback. **Overvoltage Protection:** Provided on 5V outputs where indicated. Set at 6.2V ±0.4V. Other outputs use optional overvoltage protectors OVP12 and OVP14. **Remote Sensing:** See Voltage/Current Rating Charts. Provided on output where indicated. **Stability:** ±0.3% for 24 hours after warm-up. **Operating Temperature Ratings:** 0°C to 50°C full rated, derated linearly to 40% at 70°C (CP197-A requires 50 CFM forced air over heatsink area for full 50A output). **Storage Temperature Ratings:** –40°C to 85°C. **Temperature Coefficient:** .01%/°C typical, .03%/°C maximum. **Efficiency (Typical):** 5V outputs — 45%; 12V and 15V outputs — 55%; 24V through 250V outputs — 60%. **Master/Slave Operation:** Provided on F, G and CP197-A models only. For parallel operation of up to 6 units. **Vibration:** Random vibration from 10 Hz to 2 KHz, 6.15 grms (3 axis). **Shock:** Operating 20G peak acceleration. **EMI/RFI:** These linear power supplies have inherently low conducted and radiated noise levels. For most system application they will meet the requirements of FCC Docket 20780 for Class B equipment and VDE 0871 for Class B. **Safety Specifications.** All models exceed the following safety standards. **Leakage Current:** Line to Ground (Max.) — 0.05 mA. **Creepage Distance:** Live Parts to Dead Metal (Min.) — .345" (9.0mm). **Dielectric Withstand Voltage (Min.):** Input to Ground — 3750 Vrms; Input to Outputs — 3750 Vrms; Outputs to Ground — 500 VDC. **UL Recognized:** UL File Number E55974/E131905. **CSA Certified:** CSA File Number LR38879. **TÜV Licensed:** TÜV to VDE 0806 and EN 60950. Consult Allied for current TÜV license numbers. **Corcom VS&F (Voltage Selecting and Fuse Connector) Compatibility.** All International Series models interface directly with Corcom's VS&F power entry module. The VS&F is an Internationally approved AC line connector, a fuseholder, and a means of externally changing AC line voltages with a unique voltage selector card. With the VS&F, your equipment can be operated anywhere in the world, without modification at time of installation. Developed for the manufacturer who markets his products worldwide, the VS&F eliminates the need for internal transformer wiring changes and for stocking different line cords. The VS&F is also available with a built-in RFI filter for protection of your equipment. Contact Allied for further details.

*Overvoltage protection provided. Set at 6.2V ±0.4V.
****Adjustable Outputs:** F15-15-A — 12-15V; F24-12-A — 24-28V; HA15-0.9-A — 12-15V; HA24-0.5-A — 24-28V.
†Remote sense provided.
‡Isolated output, can be referenced as + or –.
§Nonadjustable 3 terminal regulator.
£Adjustable 3 terminal regulator.
•Can be made into an isolated output by removing jumper W1.

Overvoltage Protection Options

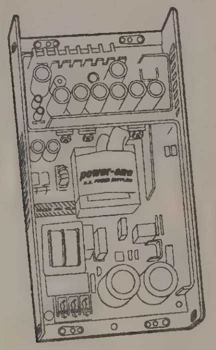
These optional overvoltage protection modules are offered for use with Power-One's International Series Linear power supplies. Each is user adjustable from 6.4V to 34V. NOTE: Outputs with factory built-in OVP are indicated in the Voltage/Current Rating Chart for each model. OVP is not available for 48V through 250V models.

OVP Selection Guide

Model	Case Size	OVP Modules Required
Single Output	B	1 — OVP-12
Single Output	C	1 — OVP-12
Single Output	N	1 — OVP-12
Single Output	D	1 — OVP-12
Single Output	E	1 — OVP-24
Single Output	F	1 — OVP-24
Dual Output	AA	1 — OVP-12 protects both outputs
Dual Output	B	1 — OVP-12 protects both outputs
Dual Output	BB	1 — OVP-12 protects both outputs
Dual Output	CC	1 — OVP-12 protects both outputs
Dual Output	E	1 — OVP-24 protects both outputs
Triple Output	AA, BAA, BAA, D, CBB, 131, DBB, DCC	1 — OVP-12 protects both 12V through 15V outputs
High Peak Current	N, BAA, CBB, 131, CP340-A, CP510-A	1 — OVP-12 protects any output not provided with built-in OVP

218-3028. OVP-12 .... **EACH 8.31**
218-3029. OVP-24 .... **EACH 15.62**

MAP Series — 30 to 150 Watts



- Automatic AC Input Selection
- UL, CSA, TUV Approvals
- Full Load Burn-In and Thermal Cycling
- 2 Year Warranty

MAP Series	Max. Outputs	Max. Power	Regulation	EMI/ RFI	Interface Signals	Mechanical
MAP30/42	1	30/40 Watts Convection Cooled	Fully Regulated	All Models VDE and FCC B	MAP42 has Remote Sense	Board-Only
MAP40	3	40 Watts Convection Cooled	Output #2 Quasi Regulated[3]	MAP40-3100 and MAP 40-3500 VDE and FCC B[4]	—	Board-Only
MAP55/ MAP40-1005	4	55 Watts[1] Convection Cooled	All Outputs Fully Regulated	All Models VDE and FCC B	—	U-Channel Chassis Optional Cover
MAP80	4	80 Watts Convection Cooled	All Outputs Fully Regulated	All Models VDE and FCC B	Power Fail	U-Channel Chassis Optional Cover
MAP110	4	110 Watts Forced Air Cooled	All Outputs Fully Regulated Except V4 of MAP110-4010	All Models VDE and FCC B	Remote Sense[5], Optional Power Fail	Board-Only, Optional L-Bracket, Optional Cover
MAP130	4	130 Watts Convection Cooled	All Outputs Fully Regulated	All Models VDE and FCC B	Power Fail Remote Sense[5]	U-Channel Chassis Optional Cover
MAP140	3	150 Watts[2] Forced Air Cooled	All Outputs Fully Regulated	All Models VDE and FCC B	Remote Sense[5] Optional Power Fail	Board-Only, Optional L-Bracket, Optional Cover

[1] MAP40-1005 provides a maximum of 40 watts output power. [2] MAP 140 — Single Outputs - 150 watts; Multiple Outputs - 140 watts. [3] All other outputs fully regulated. [4] All other MAP40 models FCC B. [5] MAP110, MAP130 and MAP140 have remote sense on the main output of multiple and single output models.

Note: Size of board only — 4.25 × 7.00 × 1.80; with optional L-bracket and cover — 4.50 × 7.19 × 2.40. ***Configuration:** Board Only. **MAP40-3100 meets VDE level B. MAP40-3000 meets VDE level A. †**Configuration:** U-Channel Chassis. ‡P denotes power-fail. **NOTE A:** Maximum load on V3 or V4 can be 1 amp if either V3 or V4 is unloaded.

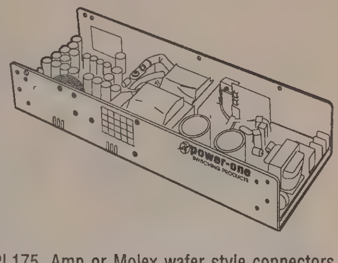
Covers

Optional covers are available for MAP Products. Covers are not available for board-only configured products. MAP products can be ordered with the cover installed by adding a "C" to the end of the part number, i.e., MAP55-4000C.

Products Not Cataloged Are Available — Call 1-800-433-5700 For Price And Delivery

SPL Series

AC Input: Standard dual range — 90-132 VAC or 180-264 VAC, user selectable; 47-63 Hz, single phase. Consult Allied for 400 Hz operation. **Brown-Out Protection:** Regulation is maintained down to 90/180 VAC, at full load, with no compromise in performance. **Hold-Up Time:** 20 msec minimum at full rated load and nominal AC input voltage. Hold-up time increases to 40 msec at 50% load. **Power-Fail Warning Signal:** Single Output Models — Provided on SPL250 models only. TTL compatible signal goes low 10 msec minimum before the output voltage drops 5%, at a 100% load condition. Multiple Output Models — Provided on models with a "P" suffix. Signal goes low 5 msec minimum before +5V main output drops 5%, at a 100% load condition. Warning time increases at reduced load levels. **Efficiency:** Measured at full rated output power and nominal AC input voltage. 70% ±5% depending on how the load is distributed among the outputs. **Regulation Characteristics:** Line — Measured over a 90-132 VAC or 180-264 VAC line change; Load — Measured by varying the load current from 60% to either 20% or 100% of full rated. **Cross Regulation:** Multiple Output Models — Where indicated, cross regulation specifies the maximum voltage change on an auxiliary output when the +5V main output load current is varied from 75% of full rated to either 50% or 100% of full rated. **NOTE:** The effect of load and cross regulation are generally not cumulative, and may actually act to cancel each other in an operating system environment. **Minimum Load:** Single Output Models — 5% of full rated output current; Multiple Output Models — Minimum load required on the +5V main output for full load capability on auxiliary outputs: SPL40, SPL50 - 1A, SPL53 - 2A, SPL175 - 3A, SPL200 - 6A, SPL130 - 5A. **Remote Sensing:** Single Output Models — Provided on SPL53, SPL130, and SPL250 series models; Multiple Output Models — Provided on the +5V main output of SPL130, SPL200, and SPL400 series models. **Output Noise and Ripple:** 0.3% RMS, 1: PK-PK maximum. **Output Overshoot:** No overshoot on turn-on or turn-off. **Transient Response:** Recovery Time — 500 msec typical for a 50-100% load change and recovery to within 1% of initial voltage set point; Maximum Excursion — 3% from initial voltage set point; Multiple Output Models — Above applies to +5V main output only. **Output Overload Protection:** Fully protected against output overload and short circuit. Automatic recovery upon removal of overload condition. **Overvoltage Protection:** Set at 6.2V ±0.6V; Single Output Models — Provided on all 5V models; Multiple Output Models — Provided on +5V main output. **Reverse Voltage Protection:** Inherently protected from damage due to application of reverse polarity voltage across DC output terminals. **Input Protection:** AC input line fuse provided. Internally located. **Inrush Current:** Internally limited by thermistor. Cold start, peak current at 230 VAC input. SPL40 through SPL53 — 9A maximum; SPL130 through SPL250 — 17A maximum; **Operating Temperature Rating:** 0°C to +50°C at full rated output power. Consult Allied for operating information between +50°C to +70°C. **Storage Temperature Rating:** –55°C to +85°C. **Temperature Coefficient:** ±0.03%/°C typical, ±0.05%/°C maximum over entire operating temperature range of 0°C to +70°C. **Cooling:** Convection cooling is adequate where non-restricted air flow is available. When operating in a confined area, forced air cooling is recommended. **Vibration:** Per MIL-STD-810D, Method 514.3, Category 1, Procedure I. **Shock:** Per MIL-STD-810D, Method 516.3, Procedure III. **Options. Overvoltage Protection:** Available on all single output models. **Input/Output Connectors:** Quick-disconnect terminals are available for all models except SPL50 and SPL175. Amp or Molex wafer style connectors (.312 centers) are available for SPL40 and SPL53 series models. **Safety Covers:** Available for SPL130, SPL200, and SPL250.



Safety Specifications. All models exceed the following safety standards. **Leakage Current:** Line to Ground (max.) — 0.75 mA. **Safety Spacings:** 8.0 mm minimum between primary and secondary circuitry; 4.0 mm minimum between primary and grounded circuitry. **Dielectric Withstand Voltage (min.):** Input to Ground — 3750 VRMS; Input to Outputs — 3750 VRMS; Outputs to Ground — 700 VDC. **UL Recognized:** UL File Number E55974. **CSA Certified:** CSA File Number LR38879. **TÜV License Numbers:** Tested and certified by TÜV to VDE 0806 and IEC 380. SPL40 — R30059; SPL53 — R30060; SPL175 — R50177; SPL250 — R50174; SPL50 — R50006; SPL130 — R30062; SPL200 — R30063. **EMI Specifications.** All International Series models are equipped with internal line filtering which allows compliance to the conducted emission limits of FCC Docket 20780 Part 15 Class A, and VDE 0871/6.78 Class A. **Agency Limits — Class A. Frequency Range 150 KHz - 450 KHz:** VDE 0871 Level A — 66 dBµV; FCC 20780 Part 15 — Not specified by FCC; SP Series Design Standards: <63 dBµV. **Frequency Range 450 KHz - 30 MHz:** 60 dBµV; FCC 20780 Part 15 — Consult Allied; SPL Series Design Standards — <57 dBµV. Models may be brought into compliance with Class B limits by the addition of an optional single stage line filter. Please consult Power-One for more information.

Notes:
A = Voltage level adjustable from 4.75V to 0VP trip point. Factory set to ±1% of nominal.
B = Fully regulated output, voltage fixed (3 terminal regulator).
C = Quasi-regulated output.
D = Fully regulated output, voltage adjustable, ±5% minimum. Factory set to ±1% of nominal.
E = The sum of the main +5V and AUX 1 load currents must not exceed 30A.
F = The sum of the main +5V and AUX 1 load currents must not exceed the main +5V current rating.
G = Maximum load is 10A or 120W.

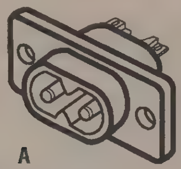
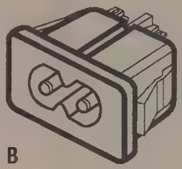
Low Current Inlet IEC 320

— NEW —



A



B

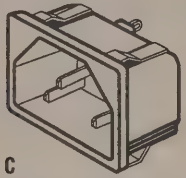
► **Max. Rating: 2.5 A/250 VAC**

Low Current Inlet. Male low current inlet with snap-in and screw mount version. Available with solder tab or PCB mount.

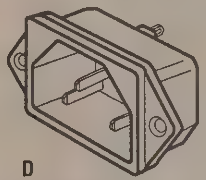
Stock No.	Mfr.'s Type	Fig.	Description	Terminals	EACH 1-24	EACH 25-99
689-3630	770W-00/01	A	Screw Mount	Solder Tab	**.96**	**.84**
689-3632	770W-00/02	A	Screw Mount	PCB Mount	**.96**	**.84**
689-3634	771W-X2/01*	B	Snap-In Mount	Solder Tab	**.96**	**.84**
689-3636	771W-X2/02*	B	Snap-In Mount	PCB Mount	**.96**	**.84**

*Universal snap-in feature to fit 0.8 mm-1.3 mm panel thickness.

AC Power Inlets IEC 320



C



D

► **Max. Rating: UL and CSA 15 A/250 VAC — VDE 10 A/250 VAC**

AC Power Inlets. Male power inlets includes snap-in and screw mount types with solder tab, .187 Q.D. and .250 Q.D.

Stock No.	Mfr.'s Type	Fig.	Description	Terminals	EACH 1-24	EACH 25-99
689-3480	701W-X2/02*	C	Snap-In Mount	Solder Tab	**.79**	**.68**

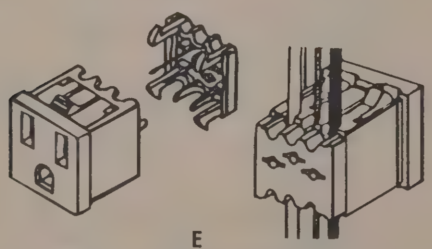
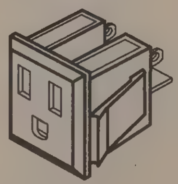
689-3505	703W-00/04	D	Screw Mount	.250 Q.D.	**.85**	**.73**

*Universal snap-in feature to fit 0.8 mm-2.0 mm panel thickness.

NEMA 5-15R Power Outlet



E



F

► **Max. Rating: UL and CSA 15 A/250 VAC**

NEMA 5-15R Power Outlet. Snap-in outlets with quick disconnect and IDC terminals.

Stock No.	Mfr.'s Type	Fig.	Description	Terminals	EACH 1-24	EACH 25-99
689-3343	738W-X2/03	E	Snap-In Mount	Q.D./Solder Terminals	**.83**	**.64**

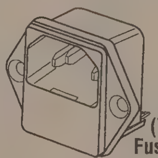
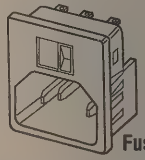
689-4101	723-15/63**	K	Snap-In Mount	.250 Q.D.	**2.62**	**2.05**
689-3514	723W-X2/02*	L	Snap-In Mount	Solder Tab	**2.21**	**1.74**
689-3516	723W-X2/03*	L	Snap-In Mount	.187 Q.D. Solder Tab	**2.21**	**1.74**
689-3518	723W-X2/04*	L	Snap-In Mount	.250 Q.D.	**2.21**	**1.74**

*Universal snap-in feature to fit 0.8 mm-2.0 mm panel thickness. **Panel Thickness = 1.5 mm — (1.0, 2.0, and 3.0 available).

IEC Inlet with Voltage Selector or Voltage Selector and Fuseholder IEC



M (Without Fuseholder)



N (With Fuseholder)

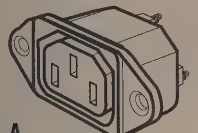
► **Max. Rating: UL and CSA 10 A/250 VAC — VDE 10 A/250 VAC**

IEC Connectors. Male power inlet with optional fuseholder and voltage selector switch with snap-in and screw mount types available.

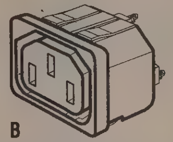
Stock No.	Mfr.'s Type	Fig.	Description	Terminals	EACH 1-24	EACH 25-99
689-3350	755-00/28*	M	Screw Mount	Solder Tab	**3.20**	**2.73**
689-3348	756-10/28†	N	Snap-In Mount‡	Solder Tab	**2.88**	**2.46**

*Voltage selector switch adapts to 110 V or 240 V. †Voltage selector switch adapts to 115 V or 230 V. ‡Panel thickness = 1.0 mm.

AC Power Outlet IEC 320



A



B

► **Max. Rating: UL and CSA 15 A/250 VAC — VDE 10 A/250 VAC**

AC Power Outlets. Female power outlets available in screw or snap-in mounting and varies terminals.

Stock No.	Mfr.'s Type	Fig.	Description	Terminals	EACH 1-24	EACH 25-99
689-3430	710W-00/01	A	Screw Mount	Solder Tab	.85	.73
689-3435	710W-00/02	A	Screw Mount	.187 Q.D./Solder Tab	.85	.73
689-3440	710W-00/03	A	Screw Mount	.250 Q.D.	.85	.73

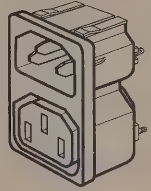
689-3425	716W-X2/03*	B	Universal Snap-In	.250 Q.D.	.85	.73

*Universal snap-in feature to fit 0.8 mm-2.0 mm panel thickness.

Multi-Function Module Inlet/Outlet IEC 320 — *NEW* —



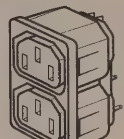
► **Max. Rating: UL and CSA 10 A/ 250 VAC — Others 10 A/250 VAC**

Multi-Function Module. Male/female module with solder tabs.

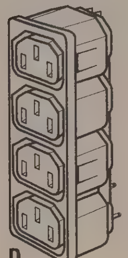
Stock No.	Mfr.'s Type	Description	Terminals	EACH 1-24	EACH 25-99
698-3600	773W-X2/01*	Universal/Snap-In	Solder Tab	2.15	1.87

*Universal snap-in feature to fit 0.8 mm-2.0 mm panel thickness.

Multiple Outlet Module IEC 320 — *NEW* —



C



D

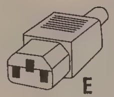
► **Max. Rating: 10 A/250 VAC**

Multiple Output Module. Two and four position snap-in type multiple outlets with solder tabs.

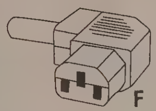
Stock No.	Mfr.'s Type	Fig.	Description	Terminals	EACH 1-24	EACH 25-99
689-3620	742W-15/03*	C	2 Position Outlet	Solder Tab	4.25	3.69
689-3622	742W-15/19*	D	4 Position Outlet	Solder Tab	6.77	5.89

*3, 5 and 6 position available. Panel thickness = 1.5 mm — (1.0, 2.0, and 3.0 mm available).

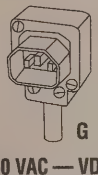
AC Power Plug Assemblies



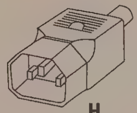
E



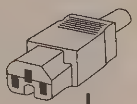
F



G



H



I

► **Max. Rating: UL and CSA 10 A/250 VAC — VDE 10 A/250 VAC**

AC Power Cord Plug Assemblies. Male and female rewirable plug connectors with straight and 90° angle cable entry. Easily converts a power cord into a detachable power cordset.

Stock No.	Mfr.'s Type	Fig.	Description	Terminals	EACH 1-24	EACH 25-99
689-3121	704-00/00	E	Straight Entry	Screw	2.73	2.41

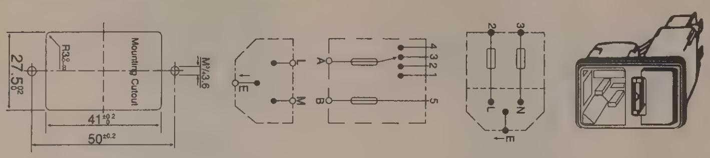
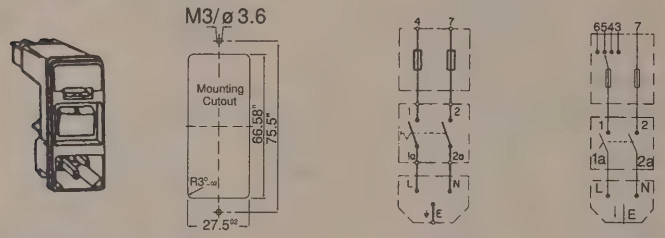
*Panel thickness = 1.0-1.6 mm. **Panel thickness = 1.0-1.8 mm. †Fuseholder for 5 × 20 mm or 6.3 × 32 mm (north american type).

Power Entry Modules

The Schurter IEC 320 power entry modules come in many variations combining AC connector,on/off switch, 1- or 2-pole fuseholder and voltage selector. These units are approved at 250 V by a multitude of international agencies including: UL, CSA, VDE, SEMKO and SEV. Fuses sold separately.

AC Inlet and 2-Pole Fuseholder/Switch





DPST, 35 A switch in-rush current. Terminals are 4.8 mm × 0.8 mm quick connect. Series KEC 4303/KD also available with series voltage selection, call for part numbers. Order fingergrip fuse drawers separately below.

Stock No.	Mfr.'s Type	Mounting	D × H × W (mm)	EACH

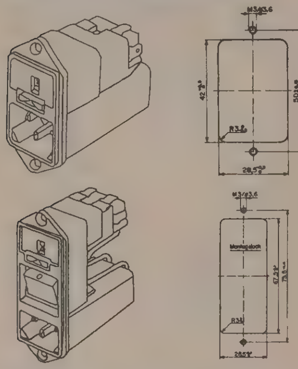
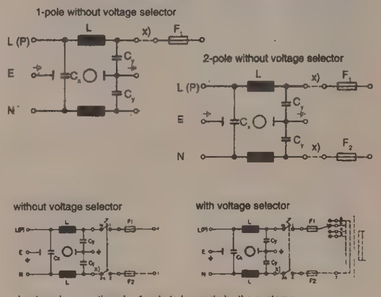
Power Entry Modules With Filters

The Schurter power entry modules with filters come in many variations: connector, on/off switch, 1- or 2-pole fuseholder, voltage selector, standard or medical RFI filter. These units are approved at 250 V by a multitude of international agencies including UL, CSA, VDE, SEMKO and SEV.

AC Inlet with Line Filter, 2-Pole Fuseholder, Switch and Interchangeable Fusedrawers for 1/4" × 1 1/4" or 5 × 20 mm Fuses





x) external connections for 1-pole to be made by the customer

Series 4303 and CD with single or double pole shocksafe fuseholder. Inlets available with or without series voltage selection. Series CD with DPST integral switch. Terminals are 4.8 mm × .8 mm quick-connect. Order fusedrawers separately below.

1 to 50 Watts

ISO9001 Registered Firm

Semiconductor Circuits DC to DC converters are well suited for a variety of Telecom, Industrial and Computer Equipment applications. They feature six sided shielding, high isolation, excellent regulation and a 5 year warranty. Please call Allied for other input or output configurations not listed below. Quantity pricing always available.

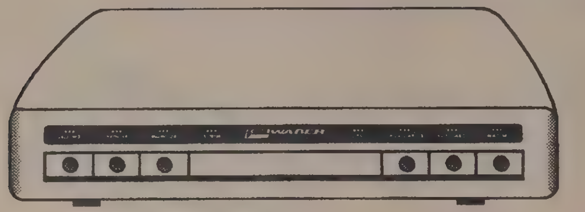
THE LEADER IN POWER TECHNOLOGY

Industrial Line/UPS Products/Surge Suppressors/Power Conditioners

UPSTART™ 5-in-1 Uninterruptible UPS System — NEW —



- **Maintains Computer Operations During Power Outages**
- **Electronic Bookmark™ Saves and Restores Your Data**
- **Dedicated Modem Protection**
- **Safeguards Your System From Power Surges**
- **Controls Your System More Conveniently**

UPSTART™ has dual 250 VA uninterruptible power outputs which support most MAC and PC systems. Reacts to power failures in less than 4 milliseconds; 5-minute back-up power keeps your computer running during power outages or voltage fluctuations, and is powerful enough to support a 166 MHz Pentium with a 17" monitor. Has status LED and audible alarm to signal power interruption. Electronic Bookmark™ software, effective with up to 32 MB of RAM, saves your files during a power interruption, and on power-up automatically reboots and restores your data. Power Sleep™ allows three simple keystrokes to initiate quickly the UPSTART™ Save and Restore feature manually. Gives your computer a true sleep function. (Electronic Bookmark™ and Power Sleep™ not available for Macintosh or DOS-only PCs). DataGard™ protection system has 1-billionth-of-a-second response time to stop surges, even when the master switch is off. Protects against EMI/RFI. Electrostatic discharge plate for quick and safe transfer of charge to ground. LEDs indicate surge protection and grounding status. Solid-state modem protection. Master ON/OFF switch. **Specifications. Input Voltage:** 120 V. **Input Current:** 12 amps. **Output Voltage:** 120 V. **Computer and Monitor Output Backup Power:** 250 VA/170 W. **CPU, Monitor, Printer, Aux. 1 and Aux. 2 Output Current:** 12 amps. **Cord Length:** 6'. **Max. Detection and Transfer Time:** ≤4 msec. **Low Voltage Detection Level:** 95 V (±2%). **Transfer Back to AC Level:** 105 V (±2%). **High Voltage Detection Level:** 137 V (±2%). **Transfer Back to AC Level:** 130 V (±2%). **Battery Type:** Sealed Lead Acid Battery. **Typical Life Expectancy:** 3-6 years. **Battery Rating:** 6 V, 4 Ah. **Recharge Time:** Less than 2 hours. **Number of Batteries Required For Operation:** 2.

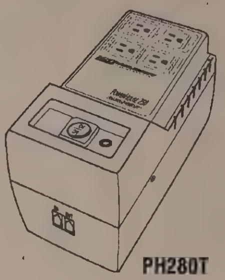
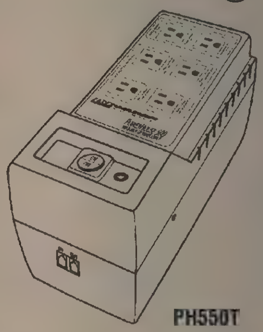
Powerhouse UPS Systems



PH280T



PH550T

- **Automatic Self-Testing Of Internal Circuitry and Load**
- **Backup Time: 5 Minutes At Full Load, 14 Minutes At Half Load**
- **True Step-Sine Wave Output**
- **Visual/Audible Indicators**
- **Weight: PH250/280T — 7 Lbs.; PH500/550T — 12 Lbs.**
- **Full Recharge Time of 2 Hours**
- **Field-Replaceable Recyclable Batteries**

The most advanced technology currently available in power backups. On-board computers constantly monitor the amount of power going to your computer, and warn you if you draw too much power during a brownout or a blackout. Field replaceable and recyclable batteries make it easy for you to keep your system safe at all times. MAC and PC compatible. Two year warranty and $25,000 Connected Equipment Guarantee. UL Listed, CSA Certified. **Telephone Line Protection (Models PH280T, PH550T). Phone Connection:** Type RJ11. **Lines Protected:** Pins 2 and 3 (tip to ground, ring to ground). **Lines Connected:** 4 (lines 1, 2, 3, 4). **Phone Cord Length:** 6'.

*Advanced solid state protection for modem lines (RJ11).

Wavetracker™ Surge and Noise Suppressors

Wavetracker Series features 3 stage surge protection (gas tube, avalanche diode, MOV) which provides a superior technology over surge protectors utilizing only MOVs. Units also feature sine wave tracking which exhibits a clamping envelope that molds to the shape of the sine wave and greatly reduces the magnitude of the spike. Models have achieved 1449 best rating of 330 V, and carries a Lifetime/Connected Equipment Guarantee. Applications include CAD stations, telecommunications equipment and multi-media systems.

Power Conditioner Series offers 5 models to choose from depending upon your system requirements. They feature both under voltage and over-voltage regulation and range from 300 VA to 2400 VA. Each model filters out unwanted noise and utilizes our patented 3-stage surge suppression design consisting of gas tube, avalanche diode, and MOVs, all providing protection against surges. Applications include computers, instrumentation, medical/laboratory, and industrial equipment.

Permanent Installation Series

Type 4413

These permanently mounted models install quickly with a minimum of effort. Ample room is provided inside the unit for greater ease in wiring and installation. Additional insulated wires can easily be run through the case. Time, labor, and total installation costs are significantly reduced. Outlets are pre-wired with leads included for quick wire nutting to your entry cable. Knockouts for a 1/2" connector are provided on both ends. 15 A/125 VAC, 60 Hz, 1875 watts continuous duty. **Outlets:** "U" ground. **Beige Internal Wiring:** 14 AWG insulated, beige steel case.

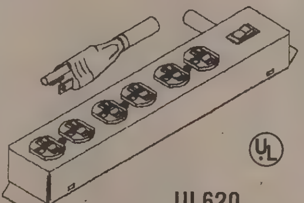
20 Amp Multiple Outlet Strips



UL620

Designed for applications where more than 15 amps are required. (Will accept 15 or 20 amps plug). **Maximum Rating:** 20 A/125 VAC, 60 Hz, 2500 watts continuous duty. 12/3 SJT power cord/molded plug. Circuit breaker protection, steel housing. Keyhole slot flush mounting on back. 10.313" centers. UL Listed.

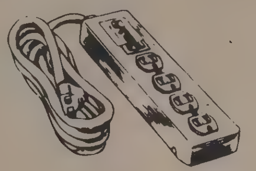
Datagard® Economical Series



DG204

Provides economical surge protection for general office equipment such as typewriters, word processors and calculators. Both models meet UL Standard 1449 with 330 volt rating. Units have visual surge indication and resettable circuit breaker. 15 A/125 V, 60 Hz, 1875 watts continuous duty. Cool grey in color and a 10 Yr./$2,500 Connected Equipment Guarantee.

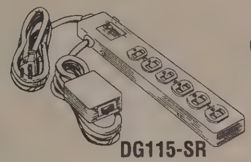
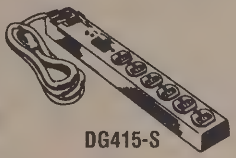
Datagard® Office Grade Series

DG115-SI



DG115-SR



DG415-S

Specifically designed to protect computers, P.O.S. terminals, sensitive instrumentation and other electronic equipment containing sensitive micro-processors. All three models meet UL Standard 1449 with 330 volt rating. Units have visual surge indication (except DG115-SR-Audible) and resettable circuit breaker. 15 A/125 V, 60 Hz, 1875 watts continuous duty. Cool grey color and a Lifetime/$10,000 Connected Equipment Guarantee.

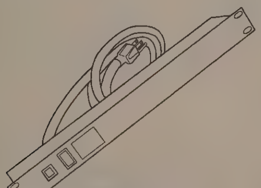
*Remote Switch Cord is 4/12'. **Comes with 2 RJ11 Phone Jacks.

Datagard® Industrial Series



DG315-R

Designed for large office and industrial applications specifically where noise is a critical factor. Both models meet UL Standard 1449 with 330 volt rating. Units have both audible and visual indication with resettable circuit breaker. 15 A/125 V, 60 Hz, 1875 watts continuous duty. Cool grey in color (except DG315-R which is black) and a Lifetime/$10,000 Connected Equipment Guarantee.

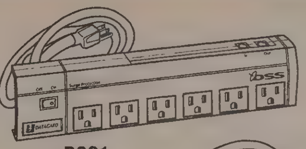
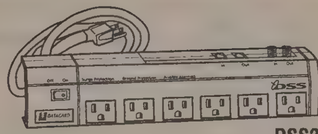
***Dimensions for 19" Rack Mount:** Front Plate — 19"L × 1 23/32"W; Back Cover — 17" L × 1 11/16"W × 2 3/8"D.

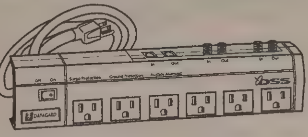
Datagard® Audio/Video Series



DSS1



DSS2



DSS3

Provides sophisticated surge protection for audio/video equipment, TVs, VCRs, modems, fax home theatre installations and computer systems. All models meet UL Standard 1449 with 330 volt rating (except DSS1 which is 400 V). Models have both audible and visual surge indication (except DSS1 which is visual only) and resettable circuit breaker. 15 A/125 V, 60 Hz, 1875 watts continuous duty. All models come with 6 outlets, 6' cord, black color and a Lifetime/$25,000 Connected Equipment Guarantee (except DSS1 which has a 5 Yr./$5,000 Connected Equipment Guarantee.

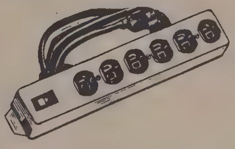
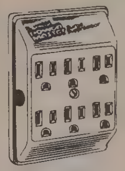
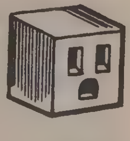
Power Master® Surge and Noise Suppressors



PM6-NS



PM6-NP



PM1-N

Provides protection against voltage surges and electromagnetic interference. Ideal for less sophisticated electronic equipment. All models meet UL standard UL 1449 with 400 volt rating (except PM6SE and PM6NS which are 500 V). Models have visual surge indication. 15 A/125 V, 60 Hz, 1875 watts continuous duty. N = Noise Protection.

*Surge Suppression Only.

Power Master® Whole House Surge Arrestor

Protects household electrical and electronic equipment from transient voltage surges entering via the main power supply line. The Whole House Surge Arrestor is designed to be hardwired into house circuitry and mounts easily on the circuit breaker panel box. Engineered to absorb maximum surge current of 32,000 amps. Clamping response time of less than 1 nsec, is UL Listed and carries a 3 Year Limited Warranty.

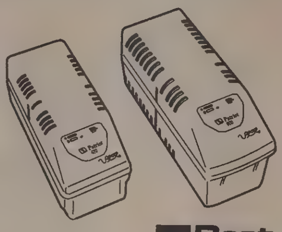
BEST On-Line Uninterruptible Power Systems

Patriot® Standby Power Systems

- Advanced Microprocessor Control for Faster Response and Better Battery Management
- Protection Against Both Low- and High-Voltage Conditions
- Fewer Parts for Greater Reliability
- 97% Efficiency On-Line
- Patriot Models Available Up to 920 VA*
- Nominal Input Voltage: 120 VAC (230 VAC)
- Output Voltage: 120 VAC ±5% (230 VAC ±5%)
- Output Waveform: On Inverter 34 Regulated Step-Wave, Optimized for Switch-Mode Power Supplies; On-Line 3/4 Sine-Wave (Matches Input Waveform)
- Safety: UL Listed, cUL Listed to Canadian Standards (TUV)
- Efficiency: SMT, >95% On-Line
- Battery Charger: SMT Typical Recharge Time to 90% Is Less Than 6 Hours

*Call Allied for details.



Patriot low-cost standby power systems feature advanced microprocessor control for fast response time. Microprocessor control also delivers better battery management to ensure optimum runtime when power fails — and the battery quickly recharges when power returns. In addition, the SMT 420 VA, 650 VA, and 920 VA Patriot models have a communications port that enables networking and communications capabilities. All Patriot models are compatible with BEST CheckUPS® and CheckUPS II power management, monitoring and shutdown products.

Fortress® Uninterruptible Power Systems (UPS)

- True On-Line UPS Protection from 360 VA to 3 KVA
- Prevent Any Break in Computer-Grade Power to Your Equipment
- Boost Voltage During Line-Power Sags without Drawing on Battery Power
- Intelligent and Convenient User Interface Keeps You Informed — Protects Against Exceeding UPS Capacity
- Automatic Battery Replacement Warning for Added Reliability
- Nominal Input Voltage: 120 VAC (230 VAC)
- Output Voltage: 120 VAC (230 VAC)
- Output Waveform: Pure Sine-Wave, Less than 5% THD on Inverter, Same as Input on AC Line
- Safety: UL Listed, cUL Listed, TUV Approved
- Efficiency: 95% (On-Line)
- Communications Port: Contact Closures (Inverter or Alarm) or RS232 Bidirectional Communication (User Selectable)
- Battery: Sealed, Maintenance-Free, UL 924-Recognized
- Battery Charger: Temperature-Compensated Charger; Typical Recharge Time to 85% Is 3-12 Hours (Depending on Model)

Adaptive power tracking continuously scans incoming power to protect LAN servers and critical network nodes, internetworking and telecommunications equipment, as well as midrange computers. A recent field study of users conducted by an independent agency reported Fortress as having a mean time between failure (MTBF) rate of over 300,000 hours. Intelligent, easy user-interface allows programming of various operating parameters to customize the system to individual requirements without additional software. All Fortress models are fully compatible with CheckUPS®, CheckUPS II and SNMP power management, monitoring, remote interface and control products.

Fortress® Rackmount UPS

Rackmount Fortress UPS models are ideally suited for the expanding number of users of servers, hubs, routers and other rackmounted equipment. Only 3.5 inches high, these compact units use less rack space, while offering the same outstanding features as the standard Fortress line. Rackmount units can be installed in relay-style or enclosed racks, and feature user-replaceable batteries with convenient front access. They are also equipped with a communications port, allowing for interactive local and remote power management and automatic shutdown.

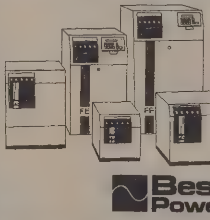
FERRUPS® Uninterruptible Power Systems

- Allows Orderly Shutdown of Systems During Power Failure
- Operating Times Can Be Extended with Optional Batteries; Call Allied for Details
- Filters Dirty Power
- CheckUPS® Software Included
- Patented Ferroresonant Design
- Fully Compatible with Power-Factor Corrected Loads
- Enhanced Communication Capabilities
- Comprehensive Self-Diagnostics
- Capacities from 500 VA to 18 KVA
- AC Input/Output Voltages: 120/208/240 (60 Hz) — Depending on Model
- Efficiency % (On-Line): 85-92%
- Battery Charger: Typical Recharge <18 Hours
- Regulation: ±3% for Input Voltages from +15% to –20% of Nominal; Under Any Line, Load or Battery Conditions — Exceeds Recommended CBEMA and ANSI Voltage Regulation Standards for Computing Equipment
- Sine-Wave Power: Sine-Wave, Computer-Grade Power with 5% or Less Total Harmonic Distortion (THD) at Rated KW Load; Meets or Exceeds CSA C22.2 No. 107.1 for Harmonic Distortion
- Overload Capability: 150% Surge and 125% for 10 Minutes On-Line; 150% Surge and 110% for 10 Minutes on Inverter
- Frequency: 60 Hz Nominal; On-Line 3/4 Output Frequency Tracks Input within Adjustable Limits (±0.01 Hz to ±3 Hz); On Inverter 3/4 ±0.005 Hz.; (50 Hz Systems Available, Call Allied for Details)



The FERRUPS ferroresonant UPS provides power protection for such demanding applications a central data processing, telecommunications/PBX, network hubs, manufacturing process control and 911 equipment. FERRUPS protects against sags, brownouts, surges, spikes and lightning strikes. Extended brownout range conserves battery voltage by correcting sags as low as 38% below normal voltage without drawing on the battery. Intelligent features Include automatic battery and inverter checks, and "runtime remaining" monitoring during power outages (all visually accessible with standard remote control panel on 4.3KVA versions and larger). Active voltage regulation feature enables power from almost any AC source to be converted into computer-grade power.

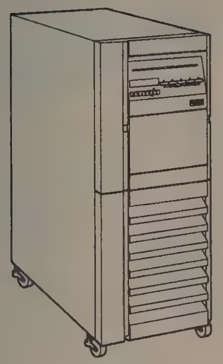
Free CheckUPS II Suite monitoring and shutdown software package standard with every BEST Power single-phase UPS! When you purchase a BEST Power UPS, you buy a complete power protection solution. There's no extra expense or confusion over selecting the right software and cable, because they're included with every single-phase UPS. Not just a few stripped-down packages, but a complete suite of our latest, most advanced monitoring and shutdown software. Inside every Fortress, FERRUPS, and Unity/I single-phase UPS product box, you'll find an interface cable and CD-ROM with on-line documentation and support for the following operating systems — Novell, Windows 95, OS/2, Windows NT, Windows 3.1, DOS and UNIX.

BEST Power Patriot UPS models with communications port (all except SMT 280) include a mail-in coupon for the same package.



UNITY/I™ Single-Phase Uninterruptible Power Systems — NEW —

- ► Redundant Circuitry for High Fault Tolerance, Maximum Uptime
- ► Intelligent Charging Protects Batteries, Extends Their Life
- ► Worldwide Voltage and Frequency Compatibility
- ► Quiet and Compact — Ideal for Offices
- ► Exclusive PhonTek™ Feature for Remote Diagnostics by Factory
- ► Plug "N" Play Models Available

- ► Output Connection: Hardwired Output Is Standard (Contact Allied for Receptacle Options)
- ► Safety: UL 1778, UL 1449, CSA (cUL), GS (TUV), CE
- ► Efficiency: 95% for UT3K; 96% for 4K, 5K and UT8K (On Line)
- ► Battery Charger: Typical Recharge <4-6 Hours

Advanced microprocessor offers improved response and reliability. A 96% efficiency rating minimizes system temperatures, stress on components, and daily cost-to-operate. Redundant safeguards against failure include a dual power track configuration — if one power path develops a fault, the second takes over to keep UPS loads protected. For power-factor corrected (PFC) applications, UNITY/I can be a cost-effective solution. As a full KW-rated system, UNITY/I can protect PFC, KW-rated equipment without oversizing, which means you pay only for the capacity that you need. Ideal for KW-rated computers such as Compaq System Pro, Sun 3/470, IBM AS/400, DEC 4000 AXP, and Hewlett Packard's F-, G-, H- and I-class servers.

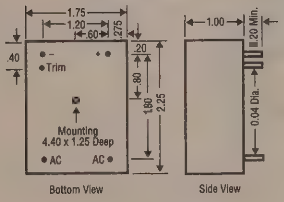
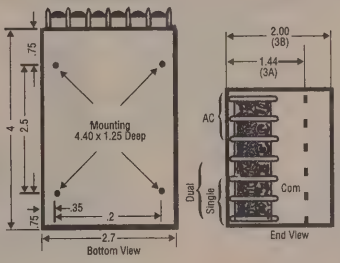
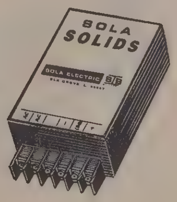
Case Size 2



Case Size 3





Printed Circuit Mounting

Series Regulated Solid Power Supplies are designed for printed wiring board mounting and point of use regulation. Single, dual or triple tracking outputs are available. Solid power supplies feature automatic overload protection. Operation at rated load from –25°C to 50°C ambient. Fully tested and 'burned-in' three times. **Specifications. Source (Input) Voltage:** 115 VAC ±10 VAC (50 to 400 Hz). **Output Voltage Accuracy:** ±1%. **Operating Ambient Temp.:** –25°C to 70°C. **Temp. Effect Coefficient:** 0.02% per °C. **Storage Temp.:** –25°C to 85°C. **Source (Input) Isolation:** 50 megohms. **Source (Line Regulation):** ± .05% or 2.5 mV. U.L. Recognized. CSA certified.

Linear Encapsulated Power Modules — Chassis Mount

The 85-Series Direct Chassis Mount Modular Power Supplies are designed for applications where printed circuit mounting is impractical or undesirable. Total epoxy encapsulation is an advantage where high vibration or adverse atmospheric conditions exist. The convenience of threaded insert mounting and terminal strip connections allows easy prototyping and efficient one-shot design work. Single, dual or triple outputs are available. 5 V outputs come with overvoltage protection, set to trip at 6.2 V nominal. Specifications for chassis mount models are the same as those for printed circuit mount models. Quantity pricing always available.

SOLA Silver Line Linears

Features
- ► Tight Regulation, 0.10% Line and Load Combined
- ► Full Output Ratings to 50C
- ► Built-In OVP on 5V Models (Optional on 12 V, 15 V, 24 V)
- ► Foldback Current Limiting
- ► 100% Four-Hours Burn-In
- ► Warranted for 2 Full Years
- ► UL Recognized, CSA and TÜV Certified
- ► These Models Are Form, Fit and Function Replacement for Most Major Manufacturers

Specification Summary
- ► Input AC Voltage Selectable 100/120/220/230/240
- ► Input Frequency: 47 to 63 Hz
- ► Ripple: 3.0 MV Maximum p-p
- ► D.C. Output Adjustment: ±5% Minimum
- ► Transient Response Time: 50 µSec. for 50% Load Changes
- ► Remote Sensing
- ► Operating Temperature: 0 to +50°C
- ► EM/RFI Meets FCC Class B and VDE 0871 for Class B
- ► Shock/Vibration Per Mil-STD-810C

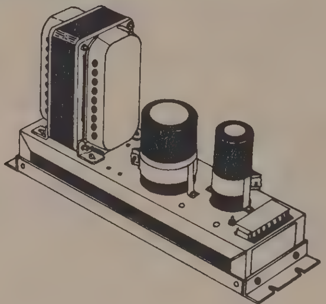
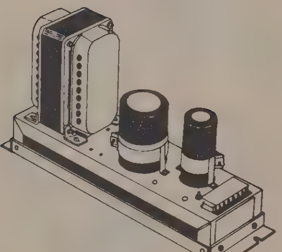
CVDC Series Regulated Constant Voltage Supplies





Features
- ► Isolated Output
- ► Short Circuit Protected
- ► Operating Temperature at 50°C
- ► MTBF Greater Than 300,000 Hours
- ► High Efficiency
- ► Warranted for One Full Year
- ► UL Recognized, CSA Certified

Applications
- ► Process Controls
- ► Drives
- ► Telecommunications

Rugged, simple and dependable power supplies in rack-mount styles. Units contain a constant voltage transformer, rectifier and filter circuit, and provide tight regulation, quick response isolation and current limiting.

Specifications

Input
Input Voltage: 100 to 130 VAC or 100 to 130/200 to 260 VAC 60 Hz.

Output
Source Frequency Effect: Actual variation is approximately 1.4 percent voltage change for a 1 percent frequency increase or decrease. **Line Regulation:** ±1%. **Load Regulation:** ±5% (1/2 FL to FL). **Periodic Deviations (Ripple):** 1% RMS of output. **Ripple — Telecommunications Models:** 35 dbrn C (15 mv RMS). **Response Time:** 25 msec.

General
Efficiency @ Full Load: 80% to 90%. **Operating Ambient Temp.:** 0°C to 50°C. **Current Limit:** 250% rated current.

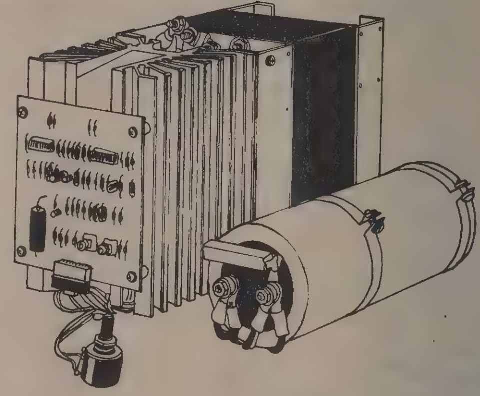
Copper-Line High Power Adjustable DC Power Supply



Features
- ► Universal 120/240 VAC, 50/60 Hz Input
- ► Single Supply for Multiple Applications
- ► Parallel Operation for Increased Power Output
- ► UL Recognized, CSA Certified
- ► Reliable SCR Design
- ► Warranted for One Full Year
- ► Adjustable Voltage From 2 to 50 Volts
- ► Can Be Paralleled for More Power
- ► Adjustable Constant Current From 0 to 100%

Applications
- ► Engineering Bench Supply
- ► Slot Power Supply
- ► Telecommunications
- ► Manufacturing Test Applicators
- ► Automotive Product Testing
- ► DC Motor Drives
- ► Relay and Solenoid Drives

Copperline supplies can be used in either a constant voltage or constant current mode. The Copperline offers such features as a single supply to be used in applications where separate supplies are required for each output voltage. Three phase operation for high current, low ripple operation may be achieved by connecting three Copperline power supplies to three different phases and connecting the power supply outputs in parallels. Large filter capacitors provide low noise operation over a wide line range. Panel mounted voltage control provided AC.

Specifications

Input
Input Voltage: 105-130/210-260 VAC (user selectable). **Input Frequency:** 47-63 Hz. **Input Protection:** Ext. slow-blow fuse required.

Output
Line Regulation: 0.1% or 50 mV. **Load Regulation:** 0.1% or 50 mV. **Output Ripple @ Full Rated Load:** 1.0% or 50 mV RMS max.

Controls
Current Limit Adjust: 0-100%. **Output Volt Adjust:** 10-100% coarse adjust (may be mounted remotely). Fine adjust fine tunes output for no load and full load conditions.

General
Operating Temp. @ Full Rated Load: 0 to 50°C. **Storage Temp.:** –20 to 70°C. **Efficiency @ Full Rated Load:** 75%. **Vibration:** Designed to meet MIL-STD-810D, Method 514.3, Category 1, Procedure 1. **Shock:** Designed to meet MIL-STD-810D, Method 516.3, Procedure III.

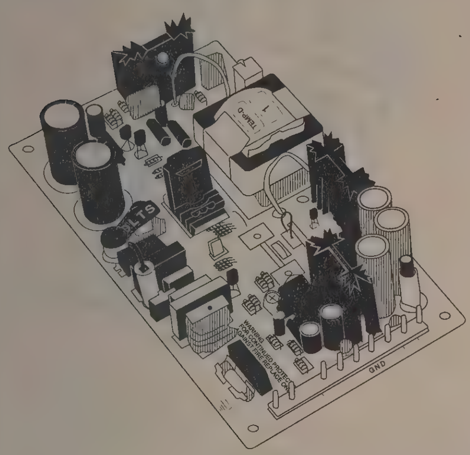
Sola DC Power Supplies

Low Wattage Multi Output Switchers



- ► High Efficiency
- ► Built in EMI Filter
- ► UL Recognized
- ► CSA Certified
- ► Industry Standard Packages

Applications

- ► CRT Monitors
- ► Disk Drives
- ► Terminals
- ► Peripheral Equipment
- ► Testing Equipment
- ► Microprocessor Based Systems

- ► Meets FCC and VDC Class A Emissions
- ► 100% Burn In
- ► Dual Input Voltage 115/230 VAC
- ► Over Voltage Protection
- ► Short Circuit Protection

Specifications Summary

- ► All Units Voltage Selectable 90-130 VAC/180-260 VAC
- ► AC Input Frequency 47-63 Hz
- ► 65% Efficiency Typical
- ► Overcurrent Protection on all Outputs
- ► 20 MS Hold Uptime @ Full Load
- ► MTBF Greater Than 50 k Hrs. @ Full Load
- ► In Rush Current: 60 Amps @ 115 VAC; 8 Amps @ 230 VAC Typical

Designed to provide the industry with a quality power supply at competitive prices.

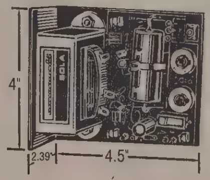
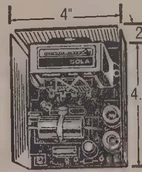
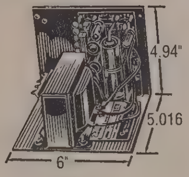
Regulated Linear Single Output



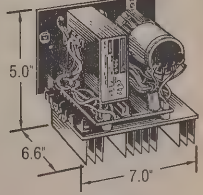
Style 1



Style 3



Style 2



Style 4

- ► Convection Cooled
- ► Complete Serviceability
- ► Constant Voltage
- ► Overvoltage Protection Available

Low cost DC power supplies give you a precise integrated circuit regulator with superior drift characteristics. Features short circuit protection, automatic foldback current limiting, automatic reset, and isolated, floating output. Low noise and ripple (pard). Designed for both bench and rack use.

Input

Input Voltage: Limit — 104-127 VAC, 208-254 VAC. **Input Frequency:** Limit — 50-60 Hz.

Output

Source and Load Effect Combined: Condition — Regulation Line and Load; Limit — ±0.1%. **Pard (Ripple and Noise):** Limit — 0.1% pk/pk. **Periodic Deviations (ripple):** Limit — 10 mv RMS. **Output Voltage Adjustment:** Limit — ±5% Minimum. **Overvoltage Protection:** Limit — Available for all models as an option. Provides both transient and power supply malfunction protection. **Transient Recovery Time:** Condition — (1/2 L to FL.); Limit — Less than 20 μ Sec.

General

Storage Ambient Temp.: Limit — –40°C to +85°C. **Operating Ambient Temp.:** Limit —0°C to +55°C. **Temp. Effect Coefficient:** Limit — 0.03%°C. **Polarity:** Limit — May be used positive or negative. **Short Circuit Protection:** Limit — Protected with automatic recovery. **Max. Allowable Lead Drop For Remote Sensing:** Limit — 5%. **Max. Output Current:** Limit — 120% rated current. **Max. Short Circuit Current:** Limit — 30% rated current. **Input/Output Isolation:** Limit — 1000 Megohms D.C., 2500 VAC. Specifications are typical, contact factory for more information.

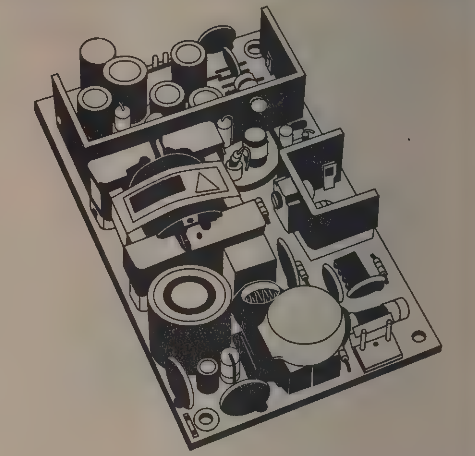
GL Series — Single and Multi Output Switchers



Features and Benefits
- ► Universal Input
- ► Compact Size
- ► On Board Input Fuse
- ► Automatic Overload Protection
- ► OVP on Output #1
- ► UL Recognized, CSA Certified
- ► IEC 950
- ► 100% Burn-In
- ► One Year Warranty
- ► Power Fail Signal on 110 and 200 Watt Models

Applications
- ► Personal Computers
- ► Control Circuits
- ► Instrumentation
- ► Drive Circuits
- ► CNC Machinery

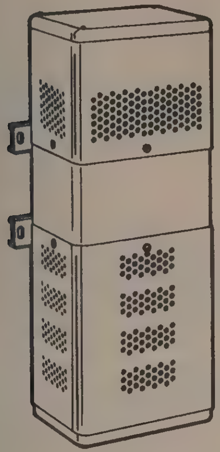
*With 25 CFM air flow, 80 W with convection cooling.

Sola Hardwired CVS 30 VA to 7.5 kVA



Applications

- ▶ Marine Navigation Equipment
- ▶ Analytical Laboratory Equipment
- ▶ Photographic Enlargers
- ▶ Photo Processing Equipment
- ▶ Closed Circuit TV Transmission
- ▶ Sound/Recording Systems

Features and Benefits

- ▶ Applications Requiring Precise Voltage Regulation Can Expect to Receive ±1% Output Regulation for Input Variation of +10 to –20%
- ▶ Protects Premise Wiring Since Non-Linear Loads are Reflected Back to the Utility as Near Sinusoidal
- ▶ Safety Agency Approved: All CVSs are UL Listed and CSA Certified
- ▶ Dual Function, Can Act as a Stepup or Stepdown Transformer in Addition to Providing Regulation
- ▶ Sinewave Output Even With a Distorted Source; Input Harmonics Are Eliminated
- ▶ Half Load Input Voltage Range of +15 to –50% Input for +5, –10% Regulation

Precise Voltage Regulation for Industrial Applications

The Sola CVS Series voltage regulators provide highly regulated sinewave voltage output with less than 3% harmonic distortion. CVS transformers are commonly used in industrial applications where voltage regulation is of primary importance. This unit is only available in the hardwired form and is recommended for installation at the distribution panel.

Specifications

Input

VA Ratings: 30 to 7,500 VA. **Input Voltage Range:** +10/–20% of nominal.

Output

Voltage Regulation: ±1% for an input line variation of +10/–20%. No loss of output for line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 40 dB common and normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 92% at full load.

Environmental

Operating Temperature: –20°C to +50°C. **Audible Noise:** 34 dB to 65 dB.

Approvals

Listed to UL 1012; Certified to CSA C22.2, No. 66.

Warranty

10 year limited warranty.

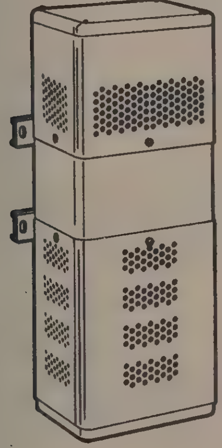
Sola Hardwired MCR 120 VA to 15 kVA



Applications

- ▶ Programmable Logic Controllers (PLCs)
- ▶ Machine Tools
- ▶ Computer Loads
- ▶ Robotics
- ▶ Industrial Panels
- ▶ Electronic Equipment

Features and Benefits

- ▶ Protects Facility Wiring From Odd-Order Harmonics (Excessive Currents in Building Wiring) Caused by Switchmode Power Supplies (Computer Loads); Non-Linear Load Currents Are Reflected Back to the Utility as Near Sinewave
- ▶ Regulates Voltage, Provides Surge Suppression, Isolation and Harmonic Filtering
- ▶ Acts as a Stepup or Stepdown Transformer
- ▶ Rugged Design Handles Hostile Industrial Environments
- ▶ Smooth ±3% Voltage Regulation for Input Variation of +10 to –20%
- ▶ 10-Year Warranty; 25-Year Typical Life

Permanent Protection Against Surges, Sags, Spikes, Brownouts, Harmonics and EMI/RFI Noise

The Sola Hardwired MCR Series protects equipment from nearly all power problems short of a total power failure. Hardwired MCR models are designed to be permanently wired into the user's system and are available in sizes from 120 VA to 15 kVA.

Specifications

Input

VA Ratings: 120 to 15,000 VA. **Input Voltage Range:** +10/–20% of nominal.

Output

Voltage Regulation: ±3% for an input line variation of +10/–20% (50 Hz units ±5%). No loss of output for complete line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 120 dB common mode; 60 dB normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 92% at full load.

Environmental

Operating Temperature: –20°C to +50°C. **Audible Noise:** 35 dB to 65 dB.

Approvals

60 Hz: Listed to UL 1012; Certified to CSA C22.2, No. 66. **50 Hz:** Models comply to VDE 0805, 0806, and 0550.

Warranty

10 year limited warranty.

Also Available; 60 V input models and 50 Hz models.

Sola Portable MCR — 70 VA to 3 kVA

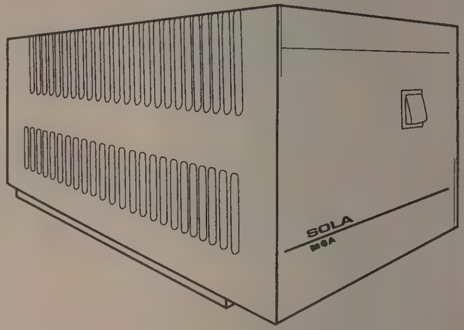
Applications

- PC-Type Computers
- POS Terminals
- Telephone Systems
- Facsimile Machines
- Small Printers
- Lab Equipment
- Security Systems
- PCs, LAN, WAN

Features and Benefits

- Portable, Quiet and Easy to Use, The MCR Is Ideal for Office and Home Use
- Sinewave Output Even With a Distorted Source; Input Harmonics Are Eliminated
- Smooth ±3% Voltage Regulation for Input Variation of +10 to –20%
- Lower Output Impedance Easily Powers Computers
- Reduces Wear on Components for Longer MTBF on Your Electronic Equipment
- 10-Year Warranty; 25-Year Typical Life

Cost-Effective Power Protection for the Office or Home
The Sola MCR Portable Series power conditioners provide excellent protection from surges, sags, spikes, brownouts, harmonics and EMI/RFI noise. Data-sensitive and microprocessor-based systems are susceptible to errors, damaged components and lost operating time caused by these voltage disturbances. These power-related problems vanish and your system's performance improves when it receives clean, regulated noise-free power from the Sola MCR.



Specifications

Input
VA Ratings: 70 to 3,000 VA. **Input Voltage Range:** +10/–20% of nominal.

Output
Voltage Regulation: ±3% for an input line variation of +10/–20% (50 Hz units ±5%). No loss of output for complete line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 120 dB common mode; 60 dB normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 90% at full load.

Environmental
Operating Temperature: –20°C to +40°C. **Audible Noise:** 34 dB to 49 dB.

Approvals
Listed to UL 1012 and designed to meet UL 478. Certified to CSA C22.2, No. 66 (all models except 3000 VA).

Warranty
10 year limited warranty.

Sola Portable MPC — 70 VA to 1 kVA

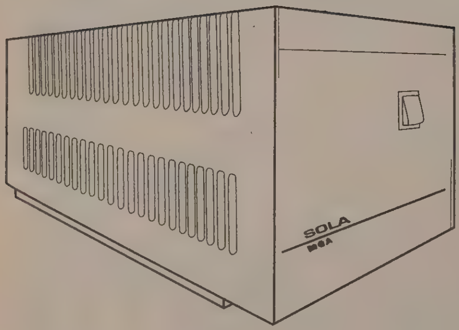
Applications

- Monitors
- Diagnostic Equipment
- Imaging Systems
- Any Data Sensitive Patient Care Equipment
- Medical Carts

Features and Benefits

- Exceptionally Low Leakage Current Exceeds the Requirement of UL 544
- Safe to Use; Units are UL Listed to 1012 and 544, Also Certified to CSA 22.2 and 100.66
- Orange Output Receptacles With Green Triangles Indicate the MPC has Isolated Ground Outputs and Is Safe for Hospital Grade Use
- Quiet, Portable and Easy-To-Use; Just Plug It In

Reliable Power Protection for Critical Medical Applications
The Sola MPC Series medical power conditioner is your prescription for effective protection from surges, sags, spikes, brownouts and noise. Imaging systems, monitors, diagnostic and patient-care equipment are prone to loss of data integrity, poor performance and increased downtime caused by electrical disturbances. Safely protect your vital equipment from power-related problems and increase performance with regulated, noise-free power from the MPC.



Specifications

Input
VA Ratings: 250, 500, 1,000 VA. **Input Voltage Range:** +10/–20% of nominal.

Output
Voltage Regulation: ±3% for an input line variation of +10/–20%. No loss of output for complete line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 120 dB common mode; 60 dB normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 87% at full load.

Environmental
Operating Temperature: –20°C to +40°C. **Audible Noise:** 43 dB.

Approvals
Listed to UL 1012 and UL 544. Less than 50 µA leakage current for indirect patient care products per UL 544. Designed to meet UL 478. Certified to CSA C22.2, No. 66.

Warranty
10 year limited warranty.

E Series Enclosed Variable Transformers

— NEW —

New enclosed, NEMA 1 drip-proof, with 100% front accessibility. Factory wired and assembled manual, motor driven, or motorized with a microprocessor controller. The "MP", voltage controller, provides for remote input and output sensing, rate of change ramping, RS-232 communications, and 1/2 volt setpoint output regulation.

Rack Mounted SVR Voltage Regulators

The new compact "SVR" is available in ratings from 2.5 kVA to 15 kVA as either a 19 inch rack unit or as floor mounted unit in a drip-proof, NEMA 1, enclosure. The "SVR" stepper driven variable transformer unit is microprocessor controlled and has been designed to provide from ±0.25% to ±1% output regulation with a full input range correction rate of less than one second. Custom designs that will provide less than ±0.25% output regulation are available for production testing and quality control applications.

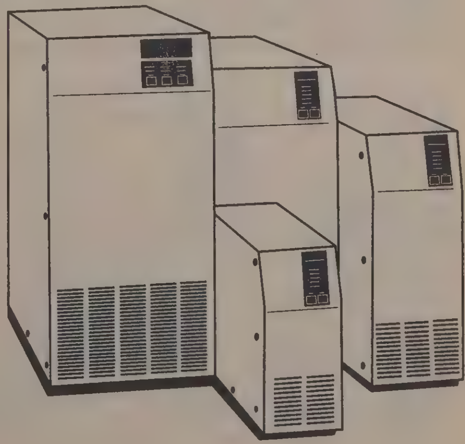
Staco True ON-LINE Uninterruptible Power Supplies

- ► **On-Line Protection from Sags, Surges, Spikes, Brownouts and Blackouts**
- ► **PMW Sinewave**
- ► **Dual Voltage Output (5 kVA and 10 kVA Only)**
- ► **Static Transfer Switch**
- ► **Fully Isolated**
- ► **No Switching Time**
- ► **Network Communication**
- ► **IBM AS400 Interface**



"U" Series are True On-Line, double conversion, regenerated, regulated uninterruptible power supplies. Additional external batteries can be added for extended run times and a remote status panel is available. Standard run time batteries included in all models. Rack mount available for 1 kVA. Manual bypass switch is optional.

PQI Series STABILINE® Power Quality Interfaces (Transient Voltage Suppressors/RFI Filters)

- ► **Attractive, Office/Home, Lightweight ABS Plastic Housings**
- ► **Choose from 29 Models**
- ► **Wall Mount, Desktop, 19-Inch Rack Mount, NEMA 12 and Industrial Hardwired Models Available**

PQI Series units are transient voltage suppressors/RFI filters that divert and attenuate all modes of power disturbances before they reach the circuitry of sensitive electronic equipment. All North American types are UL 1449 listed (clamping level 330 V) and CSA certified. All types are covered by a 10-year warranty.

The unique, performance-proven, multi-stage suppression and filtration design is state-of-the-art and utilizes MOVs, gas tubes, filter capacitors, inductors and silicon avalanche diodes depending upon the model selected. Users have a choice of "good" Series 1000, "better" Series 2000 and "superior" Series 3000 performance levels. Types with "D" suffixes have two RJ11 modular jacks with telephone line transient suppression for use with fax/modems.

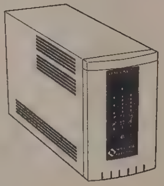
Power System Configurations:
1 — Designed for 120 V Line to Neutral connection. It is intended for use on power systems with 0 V Neutral to Ground and 120 V Line to Ground.
2 — Designed for 208-240 V Line to Line connection. It is intended for use on power systems with 120-140 V from each Line to Ground.
3 — Designed for 220-240 V Line to Neutral connection. It is intended for use on power systems with 0 V Neutral to Ground and 220-240 V Line to Ground.

SL Series STABILINE® Uninterruptible Power Supplies

- ► **Serial Communication Capabilities with Extensive (Optional) Power Monitoring Software**
- ► **UL 1778 Listed and CSA Certified**
- ► **95% On-Line Efficiency**
- ► **Unique "Battery Sleep" Feature for Prolonged Battery Life**

SL Series units are feature-rich, advanced solutions for today's demanding power quality requirements and provide ideal protection for every lind of mission-critical electronic load. They are offered in seven models with power ratings between 400 to 3000 VA for user selectable 110, 120 or 127 VAC, 60 Hz operation.



SL Series units are compact and manageable, easy to transport, install and operate. There are no complex instructions and few simple operations to perform. A "boost/buck" tap system is used for tight output regulation control over chronic low or high input voltage conditions. Bidirectional surge diverting/filtering circuitry is used for protection of electrical noise generated from either the AC input or the protected load. Advanced battery management technology is utilized to prolong battery life, speed recharge times and provide advance notice of impending battery service. The ergonomically designed front panel features a self-diagnostic routine of start-up and indicators for site wiring fault, battery service, communication operation, input line condition, battery and percent load levels. Models for 50 Hz operation are also available on request.

Input Voltage Range: ±20% of nominal with a user-selectable extended range of ±25% available. **Nominal Operation:** User selectable, 110, 120 or 127 VAC, via dip-switch selection. No power is drawn from the internal batteries as long as the utility is within the voltage range. **Output Voltage Range:** Utility operation — –10%, +6% of nominal; Battery operation — ±5%. In the extended operating input voltage range mode (±25%), the output voltage under utility operation is –15%, +10%.

SP Series STABILINE® Standby Power Supplies

SP Series STABILINE® Standby Power Supplies provide the most cost-effective, compact and efficient power quality solution for PCs, workstations, POS systems, cash registers and any other electronic device by instantly switching to battery power when an AC power outage occurs. North American types are UL 1778 listed and CSA certified. SP Series types utilize economical synthesized sine wave (step wave) output technology and come complete with audible and visual alarms and optional (420 VA model and above) computer interface software for Novell, UNIX and other platforms. Like the STABILINE® SL Series, all SP Series units incorporate advanced battery management features to ensure prolonged battery life, speedy recharge time and advance notification of impending battery service requirements. Models for 50 Hz operation are also available on request. Models are UL 1778 and UL 1449 Listed and CSA Certified. **Transfer Time to Inverter:** 2 mS typical, 4 mS max. **Transfer (Low Line) Voltage to Battery:** User selectable for 88, 93, 98 and 103 VAC operation. Units shipped for 103 VAC operation.

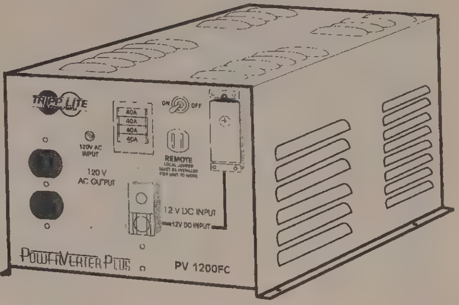
PowerVerter Series DC to AC Inverters



Solid state power inverters convert 12 V battery DC into 120 VAC (60 Hz). Simply plug your household appliances into your inverter for convenient power anywhere. **PowerVerter** models operate most household appliances and are an economical solution to your mobile power needs. **PowerVerter Plus** models are frequency-controlled to power sensitive equipment such as tape recorders, test equipment or computer systems. They also provide 200% of rated output for heavy start up loads.

Precision Regulated DC Power Supplies

These high quality power supplies efficiently convert 120 VAC to 13.8 VDC. Features include solid state circuitry, high quality filtering and electronic foldback for automatic over-current protection. Perfect for CBs and ham radios. Output voltage maintained up to 95% of no load value. Heavy-duty transformer for complete isolation. Crowbar protection prevents overvoltage damage to connected equipment (available on 15 amp units and larger). Lighted on/off switch, 3-conducted grounded cord also present.

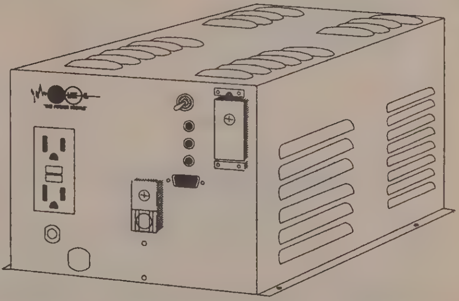
APS Series Systems For Extended Backup Times



APS units automatically sense and switch AC output between outside AC power and DC battery power. Perfect for phone systems, security systems or anywhere extended backup times are needed. A fully regulated battery charger maintains batteries while outside AC power is available. Add additional batteries for virtually unlimited run times. APS models feature a rugged metal case for use as a mobile battery power source. All models are peak power rated and frequency controlled. 2-year product warranty.

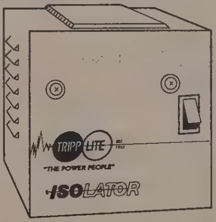
Isolation Transformers



The Isolator provides true line isolation to protect sensitive electronics. Clean, portable ground eliminates the need for dedicated lines. Efficient operation generates less heat than ferroresonant devices. Features exceptional, low frequency line noise rejection and external resettable circuit breaker. Comes with 6' cord. **Output Voltage:** 120 VAC.

ISOBAR® Surge/Noise Suppressors

- **All Metal Case Won't Break, Won't Burn and Won't Melt**
- **Exclusive Isolated Filter Banks Eliminate Interface**
- **Logical Outlet Configuration Lets You Use Every Outlet — Even with Bulky Transformers**
- **Advanced Diagnostic LEDs Alert You to Improperly Wired Outlets and Damage to Protection Circuitry**
- **Instantaneous (0 Nanosecond) Surge Response**
- **$25,000 Ultimate Lifetime Insurance**

The world's best known, best-selling surge suppressors. Isobar is the only surge suppressor with isolated filter banks to eliminate interference between connected equipment. "Cascade" circuitry offers increasing levels of protection for more sensitive equipment and instantaneous surge response suppression surges of up to 120,000 amp spikes. Up to $25,000 ultimate lifetime insurance covers Isobar and connected equipment for life!

DataShield™ Data Communications Line Surge Suppressors

As transmission rates continue to rise and vital processing power is decentralized, network file servers, hubs, routers, print servers and workstations are increasingly susceptible to power problems from dataline transient. Tripp Lite's DataShield™ dataline surge suppressors safely divert damaging dataline surges before they reach critical network equipment.

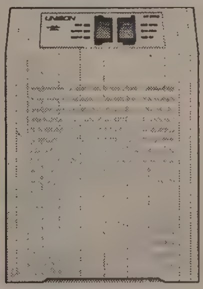
Unison® On-line, Sine Wave UPS Systems

$100,000 ULTIMATE LIFETIME INSURANCE



- ► Single Purchase Solution Includes Power Monitoring and Data Protection Software for Every Major OS on a Single CD-ROM
- ► On-Line, True Sine Wave Protection
- ► Zero Transfer Time
- ► Up to $100,000 Ultimate Lifetime Insurance
- ► Full 2-Year Product Warranty; SNMP Compatible

The ultimate in UPS protection SmartPro Unison systems are the on-line, pure sine-wave solution to sensitive systems. Unison on-line, sine-wave UPS systems produce a voltage regulated, frequency controlled sine-wave output to ensure perfect power regardless of line conditions.

Smart 700 RM

$50,000 ULTIMATE LIFETIME INSURANCE

Includes FREE Software

- ► Single Purchase Solution Includes Power Monitoring and Data Protection Software for Every Major OS on a Single CD-ROM
- ► Intelligent Microprocessor Control of All UPS Functions
- ► Automatic Voltage Regulation (AVR) Adjusts Incoming Voltages from 87 to 140 VAC Back to 120 VAC Nominal
- ► Rackmount and Expandable Run-Time Models Available
- ► $50,000 Ultimate Lifetime Insurance Connected Equipment Coverage
- ► Full 2-Year Product Warranty; SNMP Compatible

SmartPro Net units feature a line-interactive design to provide clean, 120 volt power during brownout or overvoltage conditions without using battery power. All units provide complete protection against blackouts, brownouts, surges and line noise and feature advanced LEDs to alert you to battery status and operating conditions. Smart datacenters include all of the above plus 14 receptacles to accommodate all of your connected equipment, Insured up to $75,000.

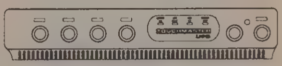
TM 420 Under Monitor UPS — *NEW* —



- ► 420 VA UPS System for Long Backup Times
- ► 6 Isobar Surge Protected Outlets; 2 with Battery Backup
- ► 1 Master and 4 Auxiliary Switches for Fingertip Control
- ► Internet-Ready with 2 Surge Protected RJ11 Phone Jacks
- ► Diagnostic LEDs Indicate Power/UPS Status and Detect Line Faults
- ► Provides Complete Surge Protection for Laser Printers

Take control of your computer system with TouchMaster's individual switches and work right through power problems with long-lasting battery backup power. TouchMaster UPSs feature complete protection against surges, spikes and line noise.

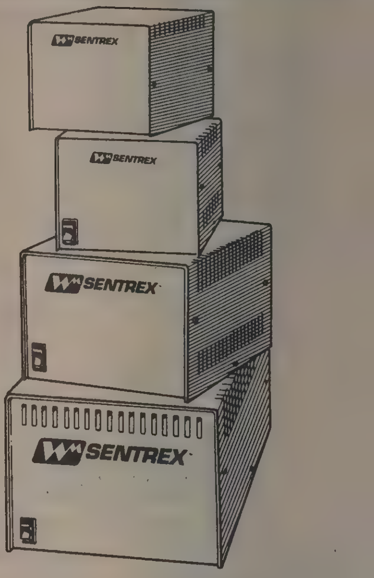
Sentrex™ Personal Computer Line Conditioners (PCLC)

Sentrex™ ferroresonant PCLC, CLC and CLT Line Conditioners provide completely regulated, computer compatible sinewave power to sensitive electronic equipment. They protect against brownouts, spikes, surges, harmonic distortion, noise...everything short of a complete blackout.



- Workstations
- Remote Computer Peripherals
- Micro Computers
- LANs
- FAX Machines
- Input Voltage: 96-132 VAC
- Output Voltage: 120 VAC, ±5%
- 6 Foot Line Cord
- Output Waveform: Sinewave, Approx. 5% THD
- Response Time: Instantaneous (No Measurable Delay)
- Safety: UL Listed and CSA Certified
- Three Year Warranty
- 50 Hz Units also Available
- Protection Against all Powerline Problems Short of a Blackout, Including: Brownouts, Harmonic Distortion, Noise, Voltage Spikes and Transients
- Protects against Power Interruptions up to 3 Milliseconds

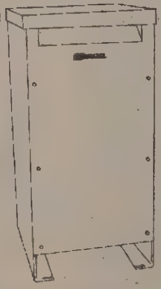
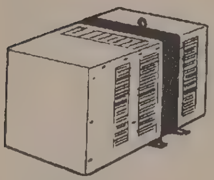
Sentrex™ Computer Line Conditioners (CLT), Hardwired

GTO, RTO Case





GTB, GTW, RTW Case

- Telephone and Security Systems
- Medical Equipment
- Mini-/Mainframe Computers
- Typesetters
- Process Control
- Multiple Voltages in One Unit: 90-132 VAC
- Input Voltage: 120/208/240/480 (140 VA through 5 kVA) 280/240/480 (7.5 kVA through 15 kVA)
- Output Voltage: 120/208/240, ±3%
- Response Time: Instantaneous (No Measurable Delay)
- 50 Hz Units Also Available
- Safety: UL Listed
- Warranty: 5 Years

How To Determine The Size You Need: 1. List all equipment to be protected, including terminals, printer and other peripherals. 2. Determine the VA (Volt Amp) required for each device by multiplying the amperes drawn (the number is usually found on the nameplate and/or in the owner's manual) by 120 volts, i.e. 120 V × 2.0 amps = 240 VA. 3. Consider an allowance for future system expansion. 4. Choose the appropriate Sentrex™ for the VA required. For further assistance, contact the factory directly at 1-800-367-5811.

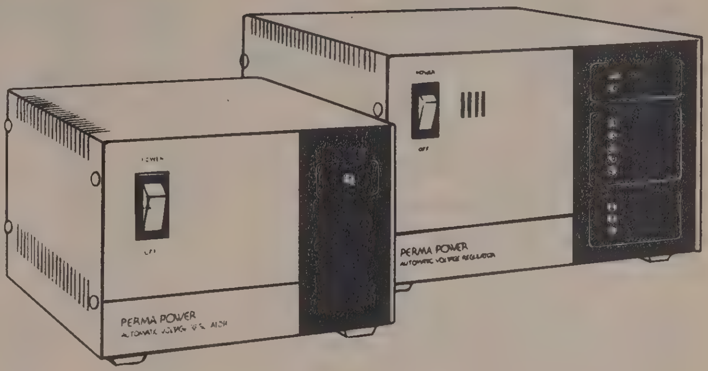
Automatic Voltage Regulators

- **Covers 95.3% of Power Problems**
- **Conditions Hi/Low Voltage, in 2 Cycles, RFI/EMI Noise, Surges**
- **Rack Mount with Accessory Bracket**
- **Two Year Warranty**



Perma Power Automatic Voltage Regulators protect your system from 95.3% of the problems that power lines encounter . . . transient surges, overvoltages, undervoltages and RFI/EMI noise. The Perma Power AVR responds instantly to voltage changes in the power line . . . whether created in the utility or in your facility. It supplies constant, safe 117 VAC (ANSI C84.1) power to your computer, even if the incoming voltage sags as low as 85 V or rises as high as 150 V. **Maintenance Free:** With its tap changer design, it costs less than other types and operates more quietly and efficiently. **Indicator Lights:** Model AVR-600 has surge suppressor failure light. Models AVR-1200 and AVR-1800 have LED indicator for AC voltage, reverse polarity, improper grounding and surge suppression status, and a warning buzzer sound for extremely high or low voltage or surge suppressor failure. **Appearance:** Heavy duty 18 gauge beige enclosure, 6' line cord from back panel; molded-on plug (NEMA 5-15P). **Response Time:** Approx. 2 cycles. **Noise Reduction:** Normal mode 15 dB, common mode 12 dB. **Short Circuit Protection:** Circuit breaker, manually reset. **Warranty:** 2 years.

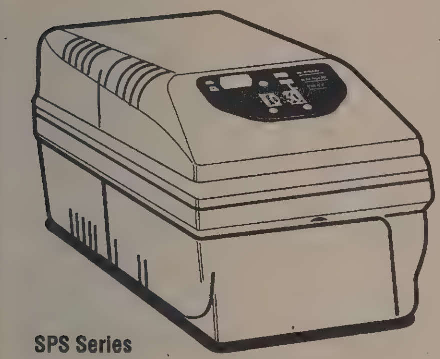
Stand-By Power Systems



SPS Series

Features

- **Back-Up Power When the Utility Power Fails; Gives You Time to Save Valuable Data Before Your Computer Shuts Down**
- **Ultra Fast Assured Transfer Time**
- **Output Voltage 120 VAC ±5% (On Battery)**
- **Receptacles on Rear**
- **Input Voltage Range 97-187 VAC**
- **Surge Suppression to Protect Equipment from Damaging Spikes on the Power Line and Reduces Data Errors**
- **Audible Alarms and LED Indicators**
- **UL Listed**
- **Two Year Warranty**

Standby Power Systems provide Blackout protection for many applications such as personal computers, terminals, work stations, small phone systems and point of sale terminals. These SPS systems offer the maximum performance at the lowest possible cost with many standard features.

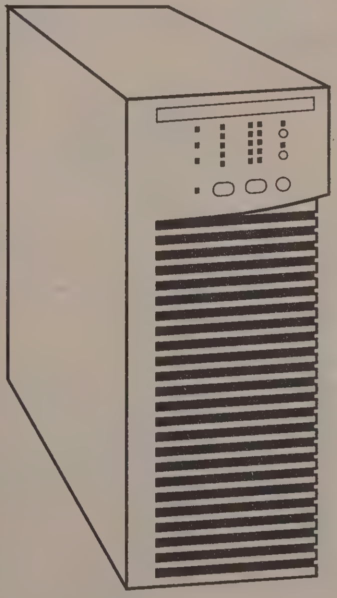
Sentrex® 2.1-10 KVA Uninterruptible Power Systems

- **Advanced Battery Management for Prolonged Battery Life**
- **Dual Conversion On-Line Technology, Quiet Operation (8 and 10 KVA Are Parallel On-Line)**
- **Advanced Power Insolation**
- **Power Management Software Capability**
- **Microprocessor Controlled Interface**
- **UL and CSA Listed**
- **Plug In and Hard Wired Units Available (Consult Factory For Distribution Options)**
- **2.1-6 KVA Come Standard with Four 5-15R Receptacles (10 On Plug In Units)**
- **Automatic By-Pass Transfer for Added Reliability**
- **Remote Power Off (REPO) Standard (2.1-6 KVA), Optional (8-10 KVA)**
- **50/60 Hz Auto-Sensing (2.1-6 KVA)**
- **Output Voltage Regulation: ±2%**
- **Extended Battery Time Available**
- **One Year Warranty**



Sentrex Uninterruptible Power Systems offer outstanding **No-Break Power** protection with plenty of power in a small package. Units are packed with features and deliver clean, computer-grade, uninterruptible power using advanced Parallel on-line technology. A variety of options are available offering flexibility to meet your specific application. **Applications Include:** IBM AS/400™, DEC VAX 3000, 11/750, MicroVAX II, HP 3000 and 9000 series, telecommunications and more.

Sentrex® High Performance Series
Plug in surge suppressors for maximum protection of critical computer network and electronic equipment. High performance units provide four stages of protection and clamp at 260 V with a 330 V UL 1449 rating and surge indicator light. Capable of up to 33,000 A maximum surge current. Rated at 15 A/120 V with circuit breaker. Units available with Fail-Safe™ shut down feature to cut off all power to equipment if surge protection fails. LIFETIME product and $30,000 connected equipment warranty

Perma Power® Computer Grade Series
Plug in surge suppressors offer substantial performance to protect stand alone PCs and electronic equipment in the office environment. Computer Grade units provide one stage of protection and clamp at 340 V with a 400 V UL 1449 rating and surge indicator light (SR10 and SRD10 include audible alarm). Capable of up to 13,000 A maximum surge current. Rated at 15 A/120 V with circuit breaker. Units available with Fail-Safe™ shut down feature to cut off all power to equipment if surge protection fails. Five year product and $10,000 connected equipment warranty.

Perma Power® Electronic Grade Series
Plug in surge suppressors offer economical surge protection for home and office equipment that is not mission critical. Electronic Grade units provide one stage of protection and clamp at 350 V with a 400 V UL 1449 rating (500 V for PR609) and surge indicator light. Capable of up to 4,500 A maximum surge current. Rated at 15 A/120 V with circuit breaker (PR609 has no circuit breaker). Two year product warranty.

Surge Suppressors for Power, Phone and TV Coax

— NEW —

These new Perma Power Computer Grade surge suppressors are engineered using the latest surge protection technology and provide power protection, phone line protection and coax protection for TV and residential satellite applications. The new slim line plastic design is an attractive fit into any office or home decor. Rated for 120 VAC, 15 amps and 60 Hz. The units are UL listed with 330 V (PX series — 400 V) clamping protection on the power outlets and come with a 10 year (PX series — 5 year) product and $10,000 protected equipment warranty against power related surge damage.

Industrial Surge®

Residential and Commercial Panel Protection

Panel Protection for home and commercial applications to be mounted at the breaker panel to provide surge suppression for all equipment fed from panel. Or mount at larger permanently wired equipment to provide suppression as close to these systems as possible. Single Phase protect a home or small office, and Three Phase units guard against surges generated by Three Phase manufacturing equipment. UL 1449 and CSA certified. **Clamping Voltage:** 480 V peak. EFI/RFI noise filtering. **Max. Surge Current:** 60,000 A per phase. Suppressor indicator light per phase. **Operating Temperature:** –40°C to +55°C. Compact NEMA 12 enclosure. 3/4" Conduit connection and 36" 14 AWG wire leads. Wall mounting bracket standard. Five year warranty.

CabinetMate® Power Strips with 20 Amp Current Carrying Capabilities

— NEW —

- **Unit Rating: 120 VAC with 20 A Resettable Circuit Breaker**
- **20 amp 12/3 SJT Power Cord with 20 Amp Plug**
- **12 Gauge Internal Wiring**
- **Outlet Rating: 15 Amp**
- **Aluminum Housing with Grey Finish**
- **UL Listed, CSA Certified, Meets UL1363**
- **2 Year Warranty**

Many applications are now packing more equipment into smaller spaces requiring up to 20 amps of total power (although each component is rated for 15 amps each or less). These new CabinetMate power strips are designed for use in relay racks, electronic cabinets, file server systems and are capable of powering up to 20 amps of total power.

Compact Models
Designed to provide power where space is limited. Aluminum housing in beige and gray, except for P6 which is plastic.

Industrial Models: 2 ft., 4 ft., and 6 ft.
Ideal for situations where many receptacles are needed. **Suggested applications include:** workbenches, electronic cabinets, computer rooms, **POP displays, and exhibits:** Silver gray aluminum housing. Outlet strips with "mounting ears" use "UL listed" or "UL recognized" components. Models are available with or without a circuit breaker, and has a maximum rating of 15 Amps-125 Volts. Features silver gray aluminum housing.

Compact Models BC=6ft.cord, BD=15 ft.

FIT®

HEAT SHRINKABLE TUBING

ALLIED ELECTRONICS Offers The Widest Variety Of The Electronic Industry's #1 Brand Call-Out.

Alpha's broad range of **FIT**® tubing offers you the precise product or your specific and unique applications. Insulate, seal and protect the component and connection.

Whether it's polyolefin, high temperature teflon, dual wall or specialty compound tubing, you can count on consistent product uniformity and integrity. You are assured reliable results with Alpha's precision processing techniques guaranteeing precise memory, uniformed wall thickness and premeasured encapsulant/adhesives or optimal field application performance. Most of Alpha's **FIT**® line meets the conformance/performance requirements of MIL-123053 and are both UL Recognized and CSA Certified.

You'll find these useful **FIT**® product options available in the Alpha Fit Heat Shrinkable Tubing pages of Section 17 in this Allied Catalog.

- Variety of shrink ratios (2:1 to 6:1)
- Assorted precut lengths (4 ft. to 1/2 inches)
- Assorted spool lengths (1000 ft. to 16 ft.)
- Multiple colors
- Surface marking options
- Preformed shapes
- Specialized kits designed for lab, R & D, MRO, marine, automotive and industrial environments

alpha
Hook-Up Wire Dispenser Kit

HOOK-UP WIRE DISPENSER KIT

A Unique Wire-Dispensing System

Alpha's Hook-Up Wire Kits contain an assortment of 100 ft. (30.5 m) spools of hook-up wire suitable for military or UL/CSA applications. These kits have been designed for use by technicians, engineers and designers in the R & D lab or maintenance shop.

Each kit contains five spools of hook-up wire in a unique, rack-mounted, transparent dispensing tube. The tube and rack system keeps hook-up wire neat, clean and conveniently at hand.

Allied Part # 708-9891 / Alpha Part # HU-KIT-10
Wire dispensing kit containing assorted colors of 22 AWG stranded Mil. Spec hook-up wire for use in the R & D Lab or Maintenance Shop.

Reorder Part No.: 1551
Contains: (5) Spools of Wire (100 Ft.) MIL-W-76B TYPE MW in the following colors, White, Black, Red, Green, Blue, plus (1) Cut and Strip Tool. **Each: 58.14**

Allied Part # 708-9892 / Alpha Part # HU-KIT-20
Wire dispensing kit containing assorted colors of 22 AWG stranded UL/CSA hook-up wire for use in the R & D Lab or Maintenance Shop.

Reorder Part No.: 3051
Contains: (5) Spools of Wire (100 Ft.) UL 1007, CSA TR64 in the following colors, White, Black, Red, Green, Blue, plus (1) Cut and Strip Tool. **Each: 58.14**

See Alpha Wire Corporation's complete line of wire, cable and heat shrinkable tubing products available in Section 17 of this Allied Catalog.

- Convenient Wire-Dispensing System
- Five assorted Hook-Up Wire Colors
- Includes cut & strip tool
- Uses standard Alpha Hook-Up Wire Spools when refills are required

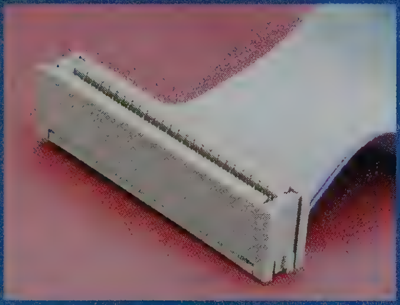
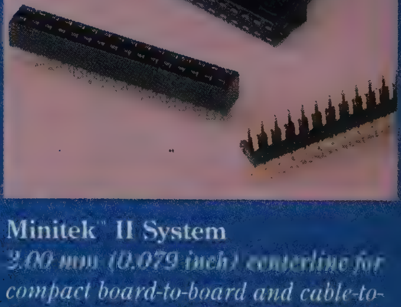
Berg Stik® Headers
2.54 mm (0.100 inch) centerline. Can be manually broken to desired length. Retention tails hold header firmly in place prior to soldering. High temperature plastic body.



Quickie® III IDC Receptacles and Headers
2.54 X 2.54 mm (0.100 X 0.100 inch) grid, IDC system. 4-walled shielding protects pins, keying prevents misalignment. Available in 6 to 64 positions. Latching system saves valuable board space. MIL-C-83503-7A compatible. UL recognized and CSA approved.



Minitek™ II System
2.00 mm (0.079 inch) centerline for compact board-to-board and cable-to-board connection. Available from 4 to 50 positions.

Our newest power supply is really a handful!

Introducing the world's smallest 20-watt D.C. switcher!

Good things come in small packages, and our new GSC20 proves it. With a footprint no bigger than a business card and output of 4 watts/cu. in., the GSC20 is ideal for overhead projectors, datacommunications devices and many other applications requiring compact, portable, reliable power sources.

The GSC20 has all the features you're looking for, including:

- Industry's smallest 20-watt switcher (2.00" x 3.50" x 0.68")
- 90-264VAC input
- EMI FCC Class B, CISPR22B
- Standard overvoltage protection
- Fixed-frequency operation
- Approved to UL1950, IEC950, CSA 22.2 No. 234 Level 3 and EN60950
- Medical configurations available (contact Condor for details)
- Full burn-in; 2-year warranty

The GSC20 is available in five models, with power levels from 5 to 28 volts. Why not call us today and put the world's smallest 20-watt switcher to work in your power-dense applications?

Send for our new catalog, or see us in EEM!

Rugged.

Reliable.

100 MHz scope.

But one new feature really stands out.

(Here's a hint.)

The new ScopeMeter® 99B test tool, now with a 10X brighter screen.

Daylight or darkness. Indoors or out. No matter where you're troubleshooting, it's easier with our new ScopeMeter 99B. It's the same rugged, dependable, hand-held scope you know, only it's much easier to read – thanks to a new cold cathode fluorescent screen that's literally 10 times brighter.

It's also much more accurate, with its 100 MHz bandwidth and 5 Gigasamples/second repetitive sampling rate. There's even 30k of deep memory, a new time and date clock feature, plus longer lasting performance with up to 4 hours of battery life.

It's time you saw the light yourself. To get your hands on the powerful new ScopeMeter 99B, contact your Fluke representative today. Or visit our web site at www.fluke.com.

FLUKE®

Discover The Fluke 860 Series GMM™ Graphical Multimeter: The World's Most Advanced Multimeter

The Fluke 860 Series Graphical Multimeter gives you the big picture.

The Fluke 860 Series is the ultimate, handheld tool for any application that demands real precision. Its 0.025% basic accuracy makes the 860 GMM tool an excellent choice for critical measurements. The 860 Series delivers the ultimate combination of functions and accuracy available in one handheld tool.

- The updated 867B features a bright, high-contrast screen for easier viewing from all angles. And both models feature a familiar, intuitive DMM interface that makes it easy to control multimeter and graphical functions.
- A display that is twice the size of most DMMs so you can view numeric displays and graphical waveforms simultaneously.
- Designed and certified for 1000V, Cat III (industrial, fixed installations) use per IEC 1010-1. UL listed to UL 3111; Licensed by TUV to EN61010-1; Approved by CSA to CAN/CSA C22.2 No.1010-1.

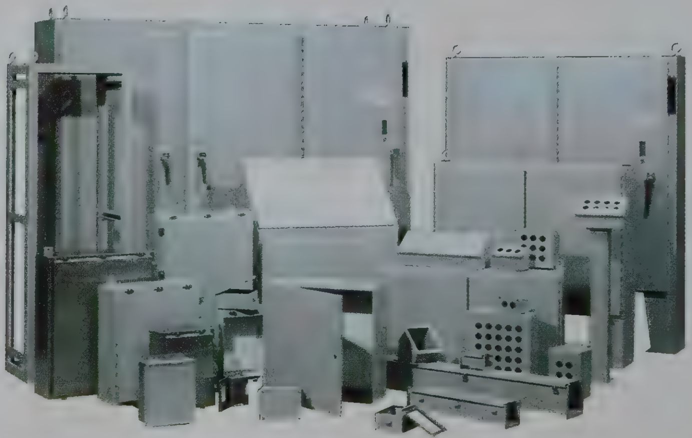
The Hammond Alternative For Small Cases, Rack Packaging and Transformers

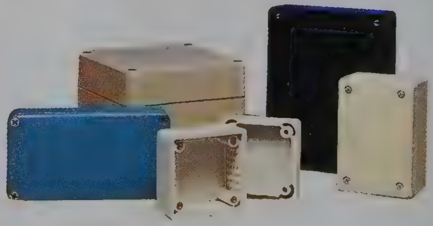
Contempra II Electronic Rack Systems
- Quick access side panels
- Standard leveling feet
- Heavy duty construction
- Adjustable bottom panels
- Built-in castor mount
- Attractive ID trim
- Plexiglass door

Economy Racks
- 19"or 24"rack mount panel widths
- Accessories include a variety of front and rear doors and a wide range of universal accessories
- Knockdown design for easy field assembly
- Standard leveling feet
- Two adjustable combination rails



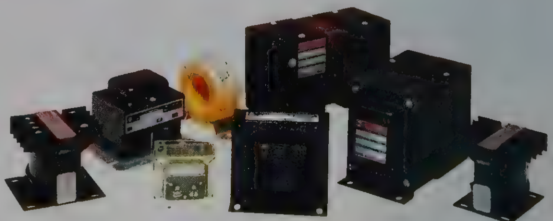
Electrical Enclosures
- Full range of Nema 1, 4, 4X and 12 enclosures
- Protect equipment from dust, oil and water
- Constructed in fiberglass, steel and stainless steel
- UL and CSA listed

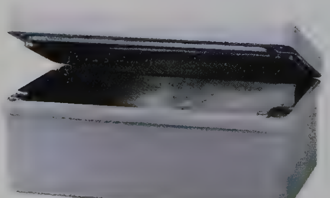
Plastic and Aluminum Diecast Boxes
- Over 50 models to choose from
- ABS plastic cases
- Aluminum diecast cases
- ABS Plastic consoles
- EMI/RFI shielded plastic or metal cases
- Water tight metal cases
- Available in a wide variety of colors and finishes
- Custom punching and screening



Hand Held Cases
- 'T' Case for Large Displays
- Standard sizes in various colours and materials

Control Transformers
- Broadest line in the industry
- Open Style with terminal blocks
- Primary and Secondary fusibility
- UL and CSA Listed





Rolec
- High quality ABS and diecasts
- Features patented RFI shielded Diecast Series

SIEMENS

Relays & breakers from Potter & Brumfield Products Division deliver the performance your toughest applications demand

Whatever your application requires, there is probably a Potter & Brumfield Products Division component that can meet your needs. The entire P&B line of quality switching components is designed to provide the kind of rugged dependability your toughest applications demand. Specify Potter & Brumfield Products Division relays and circuit breakers with confidence in appliances, HVAC systems, automobiles, industrial controls and more.

Stock relays offer ratings from dry circuit up through 125A, while stock circuit breakers are available in current ratings from 250mA to 50A. A broad range of termination and mounting options expand design-in flexibility for both relays and circuit breakers.

Allied Electronics carries an extensive inventory of relays, circuit breakers, time delays and other components from Potter & Brumfield Products Division. So, there is an excellent chance that the products you need are as near as the well-stocked shelves of Allied Electronics. Call today to place your order or request a quote.

- **Printed Circuit Board Relays**
- **General Purpose Relays**

This digital scope is a major breakthrough no matter how you measure it.

It's never been easier to pick up a Tektronix digital scope. Just $995 will get you the 60 MHz TDS 210, while $1695 will get you its 100 MHz big brother, the TDS 220. Both come loaded with dozens of great features like triggering and automatic setup. They'll even store or recall your measurements at the push of a button. Yet despite all that, the actual scopes are as diminutive as their price tags. Making them easy to pick up in more ways than one. For more information, call Allied Electronics at 1-800-433-5700.

Tektronix

Designed for all types of electronic enclosures. Power is available from front or back, or a combination of both. Features a combination ON/OFF switch pilot light, 15 amp, 125 volt, and black steel construction. Also available with surge and noise suppression. **Dimensions:** 19" × 1¾" × 2⅜"; Back cover — 17 × 1¾".

Special Application 19" Rack Mounted Power Strips — NEW —

- ► Designed to Fit All Standard 19" Cabinets, Carts and Racks
- ► Matte Black Steel Housing
- ► Black 14/3 SJT Cord
- ► UL Recognized, CSA Certified
- ► 120 V, 15 A, 60 Hz with 15 Amp Resettable Circuit Breaker
- ► 1.5" Receptacle Center to Center
- ► Dimensions: 19" W × 1.75"H × 2.75"D (1.25" Mounting Centers)

90° Rotated Outlet Units
- ► Outlets Are Rotated for Applications Using Plug In Power Supplies (Adjacent Outlets Are Not Covered Up)

No Switch Units
- ► No Power Switch Protects for Accidental Shut-Down of System

Medical Grade Units
- ► Hospital Grade Outlets
- ► 14/3 SJT Black Cord with Hospital Grade Plug

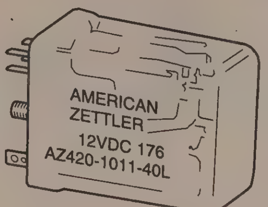
AZ420 Miniature General Purpose Relay



- Rugged Construction for High Reliability
- Life Expectancy Greater Than 100 Million Operations
- DC Coils to 115 V
- High Sensitivity at 25 mW Per Pole Available
- Current Sensitive and Voltage Sensitive Coils Available
- Round Core and Larger Coil Volume Provide Greater Pull Force
- Hydrogen Annealed Iron Magnetic Circuit
- Form A, B, C, and D Contacts Available
- Up to 6 Poles in Less Than One Cubic Inch
- Dry Circuit, 2 Amp, 3 Amp, or 7.5 Amp Contacts
- Printed Circuit or Solder/Plug-in Terminals
- Balanced Spring-Held Armature Allows Dependable Operation in Any Position
- Sealed Version Available (2 and 4 Pole)
- UL and CUR File E43203; VDE 0110 Gr. A

Polycarbonate enclosed general purpose relays. Plug-in terminals are gold plated copper alloy. PC terminals are tin plated copper alloy. **Contacts:** 4OLUS and 1OLUS, bifurcated crossbar in fine silver/gold plated. 4WLUS amd 1WLUS are single crossbar fine silver/gold plated. 4WHUS and 1WHUS are single crossbar, moveable, silver cadmium oxide/gold plated. Available in standard DC voltage, sensitive DC voltage (V), and sensitive DC current (C). Sealed version — AZ2428 and AZ2429 Series.

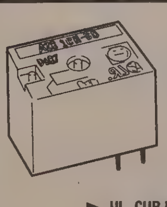
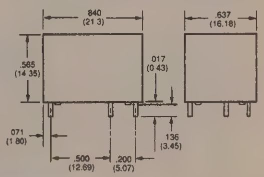
AZ8 Miniature PC Board Relay





- Subminiature Size
- High Sensitivity, 110 mW Pick Up
- Epoxy Sealed for Automatic Wave Soldering
- Life Expectancy to 20 Million Operations
- Extremely Low Cost
- Class B Insulation (130°C) Standard
- Class F Insulation (155°) Version Available
- UL, CUR File E44211
- VDE Approved Versions Available

Miniature PC Board Relay available in unsealed or epoxy sealed (E) version. **Contacts:** SPDT (1 form C) in 3 amp (silver) or 6 Amp (silver nickel). **Termination:** Tinned copper alloy, PC terminals. **Enclosure:** P.E.T. polyester. Available in sensitive coil (DSE).

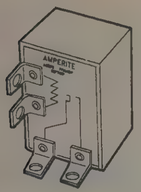
Delay on Operate



C Series

The C Series has solid state analog circuitry with SPST or SPDT relay output. Delay on operate timing mode. Compact Size. **Timing Selection:** Knob adjustable potentiometer or fixed. UL File #E96739(M). CSA File #LR62586. **Contact Rating:** 1/2 Amp @ 110-120V AC, 1 amp @ 32V DC. **Oper. Temp. Range:** -25°C to +60°C. **Mounting:** Single screw or optional 2-screw panel mount.

Ordering Information:

115	A	NO	.1	-60	S	C
A	B	C	D	E	F	G

A: Denotes nominal input voltage. Voltages available: 12, 24 and 115V AC; 12, 24, 48 and 110V DC. Custom voltages are available.
B: Denotes type of current required for operation: A = AC — Alternating Current. D = DC — Direct Current.
C: Denotes contact form: NO = SPST — 1 form A, C = SPST — 1 form B, SPDT = 1 form C.
D and E: Denotes range of knob adjustability for timing (in seconds) where: D = Minimum time delay. E = Maximum time delay for adjustable TDR's. **Note:** 1.) Ranges available: 0.1 - 60, 60 - 120, 120 - 180, 180 - 240 and 240-300 secs. Custom Timing is available. 2.) Both values (D and E) can be replaced by single value for a factory preset time delay in seconds from 0.1 through 300 secs.
G: Denotes form of termination - Blank = .110 male electro-plate solder terminals, X = .250 male quick connect terminals, S = screw terminals.
H: Denotes use of solid state analog circuitry of C Series.

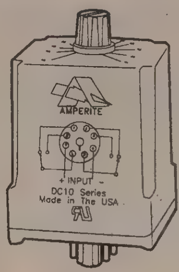
C: Denotes contact form: P = DPDT — 2 form C, S = SPDT — 1 form C.
D and E: Denotes range of knob adjustability for timing (in seconds) where: D = Minimum time delay. E = Maximum time delay for adjustable TDRs. **Note:** 1.) Ranges available: 0.1 - 60, 60 - 120, 120 - 180, 180 - 240, 240 -300 and 300 - 480 secs. Custom timing is available. 2.) Both values (D and E) can be replaced by a single value for a factory preset time delay in seconds from 0.1 through 480 secs.
F: Denotes use of solid state analog circuitry of C10 Series.



DC10 Series

The DC10 Series has CMOS digital circuitry with DPDT relay output. Delay on operate timing mode. **Timing Selection:** Knob adjustable potentiometer or fixed. UL File #E96739(M). CSA File #LR62586. **Contact Rating:** 10 Amps @ 240V AC res. **Oper. Temp. Range:** -45°C to +70°C. **Mounting:** 8-pin octal style plug.

Ordering Information:

120	A	P	1	-60	S	DC
A	B	C	D	E	F	G

A: Denotes nominal input voltage. Voltages available: 12, 24 and 120V AC; 12, 24, 48 and 110V DC. Custom voltages are available.
B: Denotes type of current required for operation: A = AC — Alternating Current. D = DC — Direct Current.
C: Denotes contact form: P = DPDT - 2 form C
D and E: Denotes range of knob adjustability for timing (in seconds, minutes or hours) where: D = Minimum time delay. E = Maximum time delay for adjustable TDR's. **Note:** 1.) Standard ranges are as follows: .1 - 6 seconds, .1 - 10 seconds, 1 - 60 seconds, 1.8 - 180 seconds, 5 - 300 seconds, 1 - 60 minutes, and 1 - 60 hours. Custom timing is available. 2.) Both values (D and E) can be replaced by a single value for a factory preset time delay in seconds, minutes or hours from 0.1 secs. through 1000 hours.
F: Denotes use of seconds, minutes or hours in timing value(s), S = seconds, M = minutes, H = hours.
G: Denotes use of solid state digital circuitry of DC10 Series.

Freedom 10 Time Delay Relay

- ► Voltage and Polarity Friendly From 24V to 240; AC or DC; and 50/60 Hertz
- ► 2 Calibrated Controls: 1-100 Seconds and 0-15 Minutes
- ► DPDT Relay, Rating 5 Amps, Resistive 1/10 HP @ 120/240VAC
- ► 1% Repeatability
- ► Time Delay Range of 1 Second to 15 Minutes
- ► CMOS IC Control Circuitry
- ► – 20°C to + 55° C Ambient
- ► Octal or Spade Termination
- ► UL Listed

The Freedom 10 Time Delay Relay operates from any supply voltage from 24 to 240 volts AC/DC, 50/60 Hz. DPDT output contacts rated 5 amps resistive or 1/10 HP motor load at 120/240AC. Timing is adjustable from 1 second to 15 minutes by using the two calibrated controls together in any combination desired. The Freedom 10 is available with either octal or spade termination.

Stock No.	Mfr.'s Type	EACH

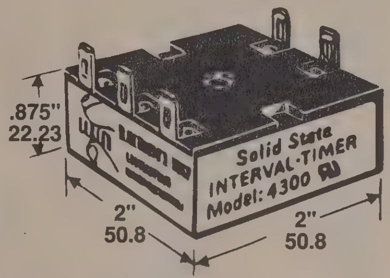
4300 Interval Timer

Model 4300 is an interval timer that permits operating voltage to be applied to a load circuit for a preset timing period. The load will operate only once for each application of power for the preset time and then turn off. Should the power be removed during the timing period the load would turn off, and the timing period reset to the start of another cycle. In order for the load circuit to see the full interval of operating voltage, the input voltage must be present for a duration that exceeds the preset timing interval. U.L./CSA listed. Other voltages and times available from factory.



Stock No.	Mfr.'s Type	Voltage	Adjustable Timing Interval	EACH			
				1-9	10-24	25-49	50-99

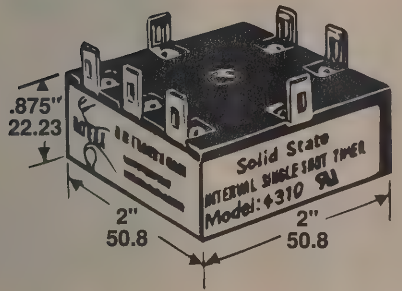
519-4312	4300A-8-2	120VAC	1-300 sec.	24.34	22.65	21.14	19.81
519-4313	4300A-8-3	120VAC	2-1000 sec.	24.34	22.65	21.14	19.81

Interval/Single-Shot Timer



Model 4310 can perform as an interval timer, or as a single-shot timer. The difference between interval and single-shot operation is the operation of the initiate switch. If the load is to operate from a continuous closure from the initiate switch, wire the timer with no jumper between terminals 6 and 7. In this mode the Model 4310 will function as an interval timer. If the load circuit is to operate for the entire timing period even if the initiate switch is closed for a short duration, connect terminals 6 and 7 and operate as a single-shot timer. In single-shot operation the power switched to the load cannot be removed with the initiate switch once the cycle has been initiated. **10 amp zero voltage switching.** UL/CSA Listed. Other voltages and times available from factory.

Stock No.	Mfr.'s Type	Operating Voltage	Output Rating	Adjustable Timing Interval	EACH

4710 Delay-On-Dropout Timer

The Model 4710 is a Delay-On-Dropout Timer which can control DC loads to 1 Amp or AC loads to 10 Amps with additional heatsinking. Closure of the initiate switch will energize the load. The timing period begins when the switch opens and resets to the beginning whenever it re-closes. To energize the load or reset the time delay, the switch must close for at least 100 milliseconds. All other specifications are identical to the Model 4310 above. UL/CSA listed. Other voltages and times available from factory.

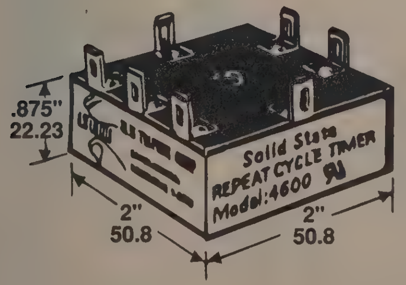
Adjustable Repeat Cycle Timers



Model 4600 can be used in most applications which require a load circuit to "turn-on" for a predetermined period of time, "turn-off" for a period of time, and then repeat the cycle for as long as operating voltage is applied. Can control loads up to one ampere. Controlled by external resistors which establish the "Repeat Cycle Time" and the "Energize Time". Provides a Non-Zero Voltage switching output. UL/CSA listed. Model 4610 is the high power version of the 4600 Repeat Cycle Timer. Can control loads up to 10 amperes and provides zero-voltage switching. Operates from AC voltage only. UL recognized. UL/CSA listed. Other voltages and times available from factory.

Universal Delay on Make and Universal Interval Solid State Timers and Universal Flashers

Artisan's Universal Series of Time Capsules is now available in three different timing modes: Delay On Make, Interval and Flasher.
All models are available in voltage ranges from 24 to 240 volts. They differ only in timing ranges and how the times are set. There is no need to observe polarity with any of this series. **Output:** 10 milliamps to 1 ampere inductive. Eight volt maximum drop across. **438, 438UI and 438UF**. The timing period is set by connecting a resistor across the middle two terminals. A jumper across the timing terminal produces a one second delay, add 10K per second to increase time. **438USA, 438USAI, 438USA-INT, 438USAF**. All timing is set by the binary coded DIP switch, which has ten programmable switches enabling the time to be easily set over the entire timing range. **438UP, 438PI, 438UPF**. Timing is controlled by a sealed potentiometer located between the terminals.

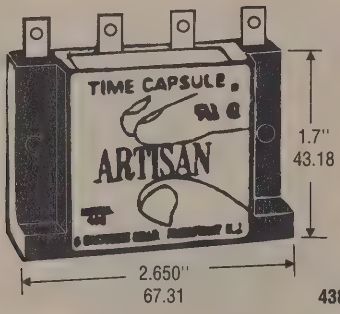
438A Time Capsule



438A

The 438A Time Capsule is an all solid-state timing module for DELAY ON MAKE control of any load device. The timing period is controlled by a fixed or variable resistor connected across the center two terminals of the Time Capsule. Supplied in three timing ranges: (-1) is adjustable from 0.1-30 seconds. (-2) is adjustable from 1-300 seconds. (-5) is adjustable from 30-8000 seconds. To use the 438A over its full timing range, a 10 megohm potentiometer must be connected across the center two terminals. U.L./CSA listed.

AC and DC Flashers

423 DC Flasher. Solid-state device intended for use in electrical and electronic equipment as a flasher for lamp, relay and solenoid circuits and in electronic systems as a power pulser or system clock-driver. Delivers one-half ampere at the operating voltage (24 VDC). Output is fixed at a 50% duty cycle at 1 pulse per second. (60 flashes per minute).

519-5001. Model 423-24-60. **1-9**	**EACH 22.14**

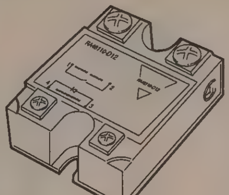
SCR Zero Switching Relays



- ► Direct Copper Bonding Technology
- ► Unique Raised Back Plate
- ► Optimum Heat Dissipation
- ► AC and/or DC Control Voltage
- ► Up to 90 Amps Switching Capability
- ► Up to 530 VAC Switching
- ► Up to 1200 Vp Non-Repetitive Voltage

Zero switching solid state relays are commonly used for resistive and small inductive loads. They provide high current carrying capabilities for operational voltages up to 530 VACrms. Normally open, back-to-back SCR outputs are utilized in the output circuitry to reduce leakage current. UL/CSA.

Peak Switching Relay for Transformers

Ideal for switching transformers/heavy inductive loads with iron remnant cores which create severe inrush currents. The power output is activated at the first voltage peak reducing the peak of the inrush current during the first half period. Back-to-back SCR output, controlled by 4-32 VDC. UL/CSA.

Phase Angle Fired Analog Switching Relays

Ideally suited for "phase angle" control of resistive loads, such as heater bands or incandescent lamps. The relay switches off every time the current crosses zero and switches the load voltage proportionally with the applied analog control current. Back-to-back SCR output, up to 530 VAC, controlled by 4-20 mA DC. LED illumination is proportional to the input signal. UL/CSA.

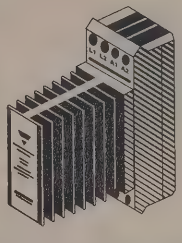
"Solitron" Solid State Contactor with Integrated Heat Sink

— NEW —



- ► User Friendly — Just Snap onto DIN Rail
- ► Ideal Alternative to Mercury Relays
- ► Front Mounted Heat Sink for Best Cooling
- ► One or Two Pole Switching
- ► Zero Switching for Resistive/Motor Loads
- ► Built-In MOV Protection
- ► LED Indication
- ► AC and/or DC Control Voltage
- ► Up to 50 Amps Switching @ 40°C
- ► 42-530 VAC Switching
- ► Up to 1200 Vp Non-Repetitive Voltage

The new solid state switching trend — solid state relays with heat sinks integrated directly onto the relay. Provides an excellent alternative to (environment hazardous) mercury relays. Front mounted heat sink cools more efficiently than rear mounted heat sinks, due to natural air convection within the panel. Higher surge current rated relays (90 A) for inductive loads are available.

*Based on 30°C panel temperature.

156 Series 4PDT 3 and 5 Amp Industrial Relays

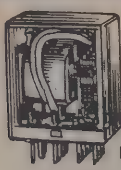

Fig. 1

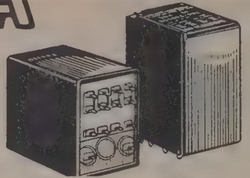

Fig. 2

For use in data processing and industrial control applications requiring 1/10 horsepower, 125 VA, 120/240 VAC. 4PDT relays are available with either solder/plug-in or printed circuit terminals, and either silver or gold flash or silver cadmium oxide with gold flash contacts. Silver contacts are rated 3 amps, 28 VDC, or 120 VAC, silver cadmium are rated 5 amps, 28 VDC or 120 VAC. All units are dust covered and UL recognized. **Operating Temperature Range:** –45°C to +75°C. **Size:** 1.281" L × 0.859" W × 1.109" H.

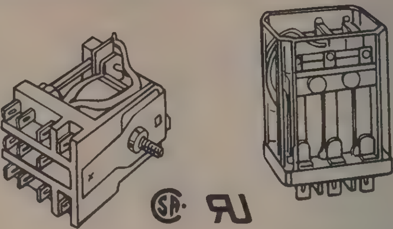
157 Series General Purpose Relays



Industrial design power driver. Cool running coil insures over-voltage and high ambient temperature performance. Maximum contact resistance 0.1 ohms. Coil rated 6 to 240 VAC 50/60 Hz. 6 to 110 VDC, continuous duty. 3/6" silver cadmium oxide contacts rated 10 amps for type numbers with 200 suffix; 15 amps for types with 300 suffix. 28 VDC/120/240 VAC, 80% pf. **Operate Make Time:** 20 MS maximum. **Operate Release Time:** 10 MS maximum. 0.187" quick-connect terminals. UL recognized.

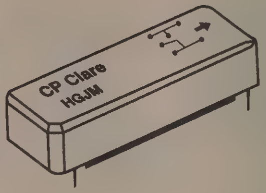
HGJ2MT Series Mercury-Wetted Reed Relays



2 form C, DPDT relays feature the same electrical characteristics as the HGJM series relays, except they are shielded and insulation resistance is 10,000 mΩ, minimum. **Common Open Time Durations:** 50 µ minimum at 100 Hz for capacitor transfer technique applications. Excellent input to output isolation and electrostatic shielding.

0.400" (10.16) High Sensitivity Single-Side Stable With Shield

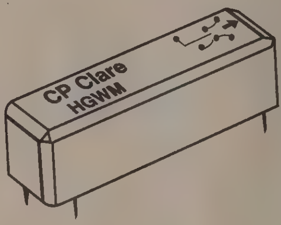
HGWM Series Mercury-Wetted Reed Relays



Feature maintenance-free long life for billions of bounce-free operations. **Contact Ratjng:** 100 VA maximum; 500 VDC or peak AC, maximum; 2 amp switched maximum, 5 amp maximum carry current. **Contact Circuit Resistance:** 30 mΩ maximum; stable with ±2 mΩ over life. **Life Expectancy:** greater than 20 × 109 operations at rated load with proper contact protection. **Operate and Release Time:** 1.25 ms, maximum. **Bounce Time:** None. **Breakdown Voltage:** Coil-to-contact and across contacts 1000 VAC, rms, minimum or 1400 VDC; 60 Hz between all mutually insulated terminals. **Insulation Resistance:** 1000 mΩ minimum. **Operating Temperature Range:** –38.8° to +85°C. No interruption of signal or processing of false signals. Excellent input to output isolation. Mount on standard 0.100" (2.54) grid pattern; upright within 30° of vertical. 1 Form C, SPDT. FCC 68 qualified.

Series CG, CG2 and PMT3 (310)

- Fastest Surge Arresting Response
- High Peak Surge Current Capability
- Lowest Interelectrode Capacitance
- Rugged Ceramic Construction
- Available on Tape and Reel for Automatic Insertion for Some Product Types
- Hermetically Sealed
- Meets the Requirements of REA PE-80, IEEE 587 and CCITT K-12
- UL Recognition on Some Products

Clare surge arrestors protect personnel and equipment from damaging high-voltage surges from lightning. Inductive switching, nuclear electromagnetic generation, or electrostatic discharge. Through ongoing research and engineering improvements, Clare has developed a family of surge arrestors that offer impressive characteristics for a variety of applications.

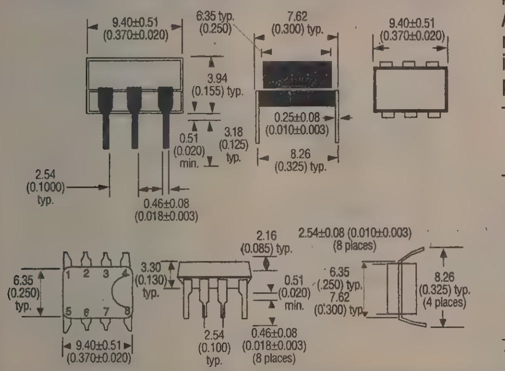
Optomos® AC/DC Solid-State Switches



Ideal for telecommunications, data acquisition, process and industrial control, alarm systems, automatic test equipment, instrumentation, electronic metering and office equipment. Typical applications include tip/ring interface, hookswitch/dial pulse, AC ring injection, groundstart, flying capacitor multiplexing, I/O modules, microprocessor interface and replaces optocouplers, mechanical relays. Feature AC/DC switching, optical isolation to 3750 V, FCC compatible, negligible offset voltage, 100% dv/dt immunity, no EMI/RFI generation, no snubber needed, no contact bounce, machine insertable, wave solderable, low drive power, long life and conserves PC board space. Available in a 6-pin or 8-pin design. BABT and BSI approved. UL recognized.

AC Solid-State Relays

Ideal for industrial control, vending machines, business equipment, gasoline pumps, temperature monitoring, process control, medical equipment, programmable controllers, appliance control and gambling machines. Typical applications include input/output modules, solenoid driver, motor, blower, heater and temperature controls, control of relays, switching fans, TTL-compatible driver for contactors and replacing TRIAC/TRIAC drivers. All versions feature optical-isolation and 1 Form A normally open contacts, as well as DC control/AC output. TTL- and CMOS-compatible, these units provide interface between logic and power systems, high transient immunity, high surge capability, and they save PC board space. No arcing, no contact bounce and long life. Type PM Power-MINI relays, Type PD PowerDIP and Type PS PowerSIP relays also feature 5 mA sensitivity, zero-crossing detection, low EMI and RFI generation, inherent noise immunity, are machine insertable, wave solderable and CSA, VDE compatible. Type OFA OptoFILM™ relays have all the features listed above with the exception of 5 mA sensitivity, machine insertable and wave solderable. Type PD, PS and OFA relays are UL recognized. Type MX and JTA PowerBLOC relays feature random turn-on and are UL recognized, CSA certified.

Din Rail Mountable Output Modules

- DIN Rail Mountable Single Point Output Modules
- UL Recognized/Horse Power Rated (E46203)/CSA Certified (38595)
- AC Output Rating 5 Amp at 12 to 280 VAC, with 250 Amp Single Cycle Surge Capability
- DC Output Rating 3 Amp at 3 to 60 VDC
- 3 to 32 VDC Input for AC Module, 5 V or 24 V for DC Module
- Zero Voltage Turn-/on for AC Module
- 4 KV Optical Isolation with LED Indicator
- Barrier Strips Accept 14 to 28 AWG Wire
- Configured for Panel Mounting

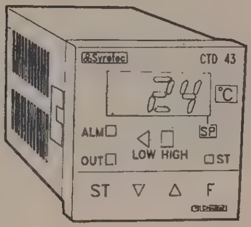
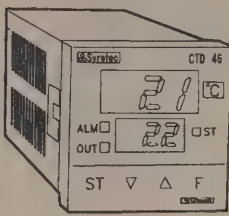
CTD 46 and 43 Series Temperature Controller





- ► 1/16 Din-Sized Enclosure
- ► 5 Temperature Control Modes
- ► Multiple Temperature Range (°F and °C)
- ► Auto-tuning
- ► Built-In Alarm
- ► Soft Start Function
- ► Nema 4X Front Panel

The CTD Series is a temperature controller available in two basic models — the CTD 43 is a single display unit and the CTD 46 is a dual display unit. Both models have a temperature range of –199 to 999°F or –199 to 999°C and will accept J, K, L, or N type thermocouples and RTDs as temperature sensors. Control modes include ON-OFF or proportioning action (PID, P, PL, PD). The main output can be programmed for direct (cooling) or inverse (heating) operations and the relay alarm output programmed to 16 different alarm configurations. The auto-tuning "Smart" function will calculate and set automatically the optimum values for the PID mode to insure the closest control of any heating or cooling load.

GA 3 Series Three-Phase Solid State Relays

- ► 10, 25 and 45 Amps Output Per Channel Available
- ► 24 to 600 VAC Output Voltage Range Suitable for Many Applications
- ► 1200 Volts Peak Blocking Voltage Helps Protect Against Transients in Harsh Electrical Environments
- ► Internal RC Snubber Network
- ► 4000 VAC Optical Isolation
- ► 4 to 32 Control Voltage for a Wide Variety of Logic Circuit Applications
- ► Zero Voltage or Random Turn-On
- ► Industry Standard Package

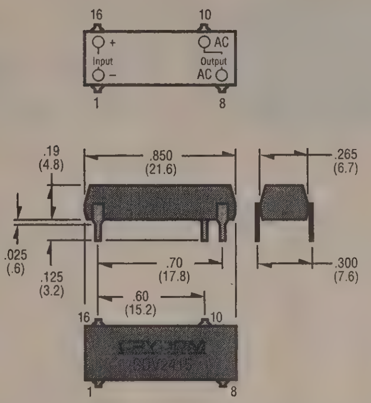
Series SDV, SDI

1.5 Amp, 120/240 VAC, 16 Pin DIP Package

- **DC Control**
- **SCR Output**
- **Compact for High Density PCB Mount**



The Series SDV and SDI solid state relays are rated at 1.5 amps RMS at ambient temperatures up to 40°C. The compact 16 pin DIP package is perfect for high density printed circuit boards. The SDV is voltage operated, and the SDI is current operated. Both are offered in either zero voltage or random switching (R) versions. **Output Specifications. Operating Voltage Range (47-63 Hz):** 12-280 Vrms. **Power Factor (Min.) with Max. Load:** .05.

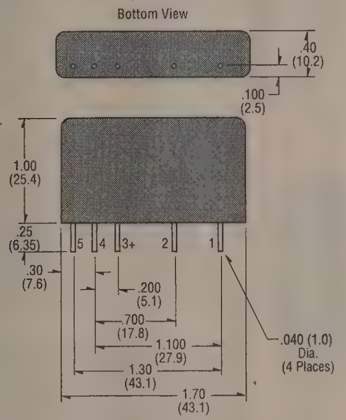
Mini-Pack I/O Modules

ISO 9002 CERTIFIED

Opto-Isolated Solid-State Modules



Solid state I/O switching modules deliver an electrically clean, photo-isolated, noise-free "output" interface from logic level control systems to external loads such as motors, valves, solenoids, etc. — or an "input" interface from the load or sensors to microprocessor or computer-based logic level systems. Designed for long, reliable service in demanding industrial environments. All this in the new compact mini-pack design

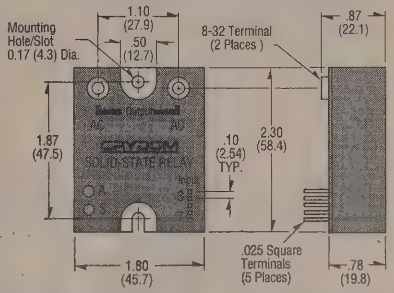
Series SMR

25-90 Amp, AC Output, 240 VAC

- **System Monitoring Solid State Relay**
- **LED Status Indicators**
- **Alarm Output Signal**



The SMR Series of System Monitoring Relays offer the user a number of fault condition alarms. Loss of voltage, open circuit load, damaged relay output and loss of DC supply current are constantly monitored by this unique Solid State Relay (SSR). **Dielectric Strength:** 50/60 Hz; Input/Output/Base — 4000 Vrms. **Temperature Range:** -40° to 80°C. **Input Connector (Locking):** Panduit MLSS100-5 or equivalent. **Mating Connector:** Panduit CT100F22-5 or equivalent.

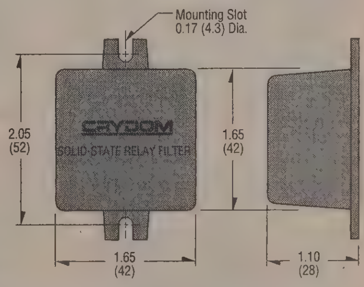
Solid State Relay Filters

For AC Solid State Relays

ISO 9002 CERTIFIED

- **Suppresses EMI Noise**
- **Simple Installation**
- **Crydom's Patented Design**



The Series F Solid State Relay Filters from Crydom are designed to significantly reduce EMI noise generated by Solid State Relays to meet EMC regulations. All AC Solid State Relays that use thyristor switching devices generate some low frequency noise, that may appear as conducted emissions on the main supply line connection. Crydom's patented design offers simple installation in new or existing equipment. SSR current is not required to pass through the filter, the only connections required are across the incoming supply line. Two models are available, the 1F25 for single-phase systems and 3F20 for three-phase.

Stock No.	Mfr.'s Type	Number of Phases	Maximum Operating Voltage	Operating Temp. Range	Attenuation (150 to 250 kHz) Typical	Current Drain at Vrms Max.	EACH

Series AO 241

- ► Compact Package for High Density PC Board Mounting
- ► TTL Logic Compatible Input
- ► 4000 Vrms Optical Isolation
- ► Both "Zero Voltage" and Phase Controllable "Random" Switching Versions

1.0 AMP, 24-280 VAC Triac Output, DC Output AC Mini-SIP

The CRYDOM A0241/R AC relays are 1.0 amp rated SPST-NO miniature SIP solid state relays. Utilizing the popular 100-mil. grid they occupy only 0.36 square inches of board space. These miniature relays have the same high technology and reliable design found in all CRYDOM products. UL, CSA pending.

Series DO 061

DC Mini-SIP

The DO 061 are miniature DC output modules in a conformally coated SIP package, measuring only 0.46 x 0.9 x 0.4 in. with pinouts on the popular 100-mil grid. The input-to-output isolation is 4000 VRMS with an isolation resistance of 1 x 109 ohms. The units are derated 10mA per degree C above 60°C ambient temperature. Operating temperature range is –30°C to +80°C. When used for inductive loads, diode suppression across the load is recommended.

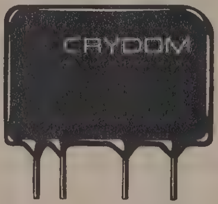
Series CX



- ► Extra High Surge Rating
- ► Extra Low Leakage (Off-state)
- ► Opto-Isolated 4000 Vrms
- ► Random And Zero Voltage Switching
- ► Compact Package for High Density
- ► PC Board Mounting
- ► 3-15 Vdc Logic Compatible Input

5.0 AMP, 12-280 VAC SCR Output, DC Control

The CX series is a group of solid state relays designed by CRYDOM to achieve the highest power switching capability in a PC mounted air cooled package. They feature exceptional steady state and high surge ratings by means of over sized inverse-parallel SCR chips, together with highly efficient thermal management for greatly increased cycle life. UL, CSA and VDE pending.

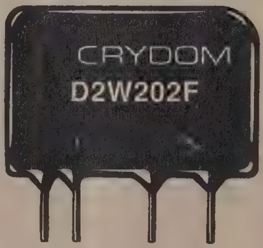
Series D2W



Solid State Relays Low Cost AC Output 80 to 280 VAC, 2 Amps

The D2W202F is designed to achieve optimum performance at a record low cost by means of completely automated assembly using labor saving robotics. The package has a hard skin-tight epoxy coating which provides excellent environmental protection and a pinout that matches the Series 6.

General Specifications. Control Signal Range: 3 to 28 VDC. **Must Operate Voltage, max.:** 3 VDC. **Must Release Voltage, min.:** 1 VDC. **Input Current @ 5 VDC max.:** 4 mA. **Input Impedance, min.:** 1500 OHMS. **Dielectric Strength 50/60 Hz:** 2500 VRMS. **Operating Temperature Range:** –20° to 80°C.

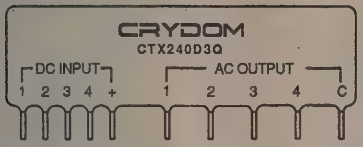
CTX240D3Q®



- ► Four AC Output Relays in One Package
- ► Extra High Surge Rating
- ► Extra Low Leakage (Off-State)
- ► Opto-Isolated 2500 Vrms
- ► Random and Zero Voltage Switching
- ► Compact Package for High Density PC Board Mounting
- ► 4-10 VDC Logic Compatible Input

The CTX240D3Q features four independently controlled solid state relays in one package. This model is an extension of Crydom's popular CX Series which is designed to achieve the highest power switching capability in a PC mounted air cooled package. The CTX240D3Q exhibits exceptional steady state ratings by means of highly efficient thermal management for greatly increased cycle life.

Input Specifications. Control Voltage Range: 4-10 VDC. **Nominal Input Impedance:** 270 Ohms. **Typical Input Current at 5 VDC:** 15 mAdc. **Must Turn On Voltage:** 4.0 VDC. **Must Turn Off Voltage:** 1.0 VDC. **Output Specifications. Nominal Line Voltage:** 240 Vrms. **Load Current Range Per Section:** 1 Section On — 0.1 - 6.0 Arms; 2 Sections On — 0.1 - 4.0 Arms; 3 Sections On — 0.1 - 3.0 Arms; 4 Sections On — 0.1 - 2.5 Arms. **Surge Current, 1 Cycle (Max.):** 120 Apk. **Load Voltage Range:** 24 - 280 Vrms. **Transient Over-Voltage:** 600 Vpk. **Frequency Range:** 47-63 Hz. **Off-State dv/dt (Min.):** 200 V/µsec. **Off-State Leakage Current (Max.) at 240 Vrms:** 0.1 mArms. **On-State Voltage Drop (Max.):** 1.4 Vpk. **I² t Max. at t = 8.3 msec:** 60 A² sec. **Turn-Off Time (Max). at 60 Hz:** 8.3 msec. **Turn-On Time (Max.) at 60 Hz:** Zero-Cross Switch — 8.3 msec; Random Switch — 0.02 msec. **Power Factor (Min.) with Max. Series MP — 3 - 4 Amp, AC Output, SIP

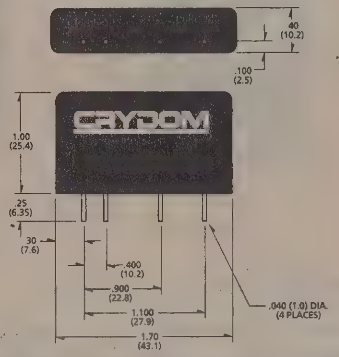
- ► High Packaging Density
- ► Compatible with 5 through 24 Volt Logic Systems



Available in 3 Arms and 4 Arms ratings, all are SPST-NO PC-mount relays that provide greater packaging density and compatibility with pinout of Series 6 and OAC output modules. Models include internal snubber for high dv/dt applications, together with zero-voltage switching to reduce high inrush currents and electrical noise. **Operating Temperature:** –30°C to 80°C. **Isolation Voltage:** 2500 Vrms. UL Approval E 116950, VDE.

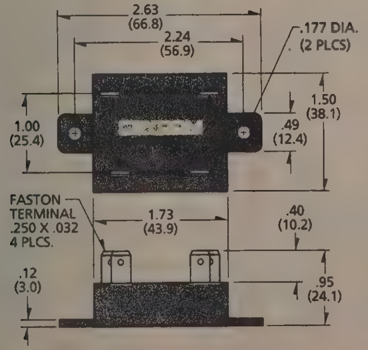
Series EZ — 12 - 18 Amp, AC Output

- ► Low Leakage
- ► SCR Output
- ► 24 Volt Control Available



The Series EZ SPST-NO AC output relays offer a low profile package with the convenience of quick connect terminals. 4000 Vrms opto-isolation and low off-state leakage are standard. The Series EZ is the preferred choice for replacement of 120V and 240V electro-mechanical relays. **Operating Temperature:** –30°C to 80°C. **Isolation Voltage:** 4000 Vrms.

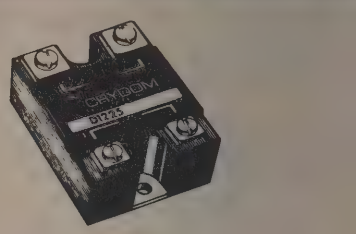
Series 1

- 2.5 to 90 Amp
- 120, 240 and 480 VAC
- Panel Mount
- Solid-State Relays
- SCR AC Output



These Crydom SSRs make it possible to switch AC power loads up to 47 kw. Output circuit consists of inverse-parallel (back-to-back) dual SCRs to meet the most demanding requirements. Features include zero voltage switching, phase control and normally closed models available.**General Specifications. Isolation Voltage:** 4000 VAC Std. (Input to Output). **Operating Temperature Range:** –30°C to 80°C. UL, CSA and VDE. **DC Input Control Models. Control Signal Range:** 3-32 VDC. **Must Operate Voltage:** 3 VDC Max. **Must Release Voltage:** 1 VDC Min. **Input Current:** 4 mA max. @ 5 VDC. Additional DC input models available upon special order: "Normally Closed" —B Suffix; "Non-Zero Switch" —10 Suffix; "400 Hz" —4 prefix. **AC Input Models. Control Signal Range:** 90-280 VAC. **Must Operate Voltage:** 90 VAC Max. **Must Release Voltage:** 10 VAC Min. **Input Current:** 2 mA max. @ 120 VAC.

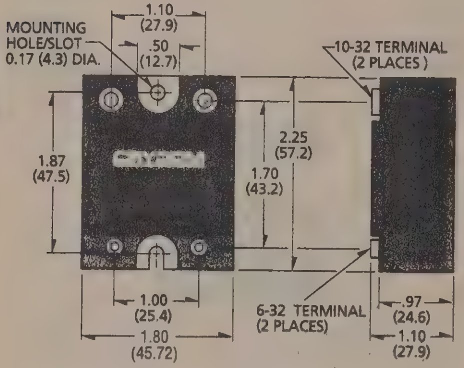
Series 1 — 110 - 125 Amp, 240 Volt AC Output



- **Zero Voltage and Random Turn-On Switching**
- **Panel Mount**

Featuring state-of-the-art Surface Mount Technology, these SPST- NO relays deliver proven reliability in the most demanding applications. Output consists of an SCR AC switch and is available in zero-cross, random turn-on (phase controllable) versions with either AC or DC input (coil) control.

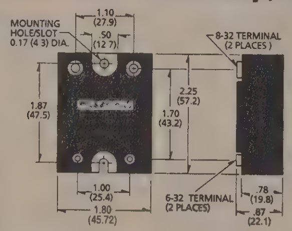
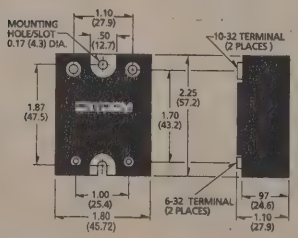
12-50A



75-90A



- **Zero Voltage and Random Turn-On Switching**
- **1200 Volt Blocking**
- **Panel Mount**

Crydom's new HA (AC Control) and HD (DC Control) relays incorporate the same proven technologies as the Series 1. All models come with 1200V blocking as standard. **Operating Temperature:** –30°C to 80°C. **Isolation Voltage:** 4000 Vrms. **Minimum Off-State dv/dt:** 500 V/µsec. **Approvals:** UL (E116949), CSA (LR81689), VDE (10104).

50 To 90 Amp, 48-530 and 48-660 VAC High Voltage AC Output Solid-State Relays 1000V-1200V Blocking

The highest power rated SSRs, up to 59kw. 4000V of isolation with the highs available blocking voltages (1.2 KV) below which the SSRs will not mistrigger. The wide margin between operating and blocking voltages permits the proper use of transient suppression (MOV) devices on the 480V line. Features include high dv/dt and zero voltage switching.

General Specifications
Control Signal Range: "WD" —4 to 32 VDC; "CA" —90 to 140 VAC. **Input Current @ 5 VDC:** 15 mA max. **Isolation Voltage 50/60 Hz:** 7000 VRMS. **Operating Temperature Range:** -30°C to 80°C. 1.2 KV Blocking Voltage.

5 Thru 25 Amp/120 and 240 VAC—Triac AC Output Solid State Relays

Crydom Triac SSRs are quality-made devices designed for general purpose switching applications where performance requirements are less demanding than those offered by SCR output types. **General Specifications. Control Signal Range:** DC Input — 3 to 32 VDC; AC Input — 90 to 280 VAC. **Input Current:** DC Input — 4 mA @ 5 VDC; AC Input — 2 mA @120 VAC. **Isolation Voltage:** DC Input — 4000 VRMS; AC Input — 4000 VRMS. **Oper. Temp. Range:** DC Input — –30°C to 80°C; AC Input — –30°C to 80°C.

- ► Opto-isolated Input-Output 4000V rms
- ► Electrically Isolated Mounting Base
- ► DC or AC Control Signal Option
- ► Zero cross-over load voltage turn-on standard; instantaneous turn-on option available

The Crydom 53TP range of three phase solid state relays is designed to switch line voltages of up to 530V rms directly to loads such as motors, transformers and heating elements. The use of power semiconductor technology ensures switch-on at close to the zero cross-over point of load voltage thus virtually eliminating the generation of r.f.i. and electrical noise. For switching of highly inductive loads, an instantaneous turn-on option (-10) is available. Power semiconductors generate heat energy during operation and a suitable heatsink must be used to keep the unit within its temperature ratings. The high current surge characteristics allow trouble-free switching of capacitive loads. UL Approved.

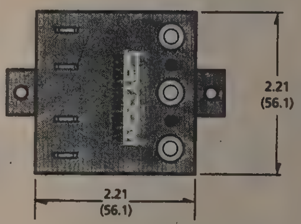
Form C Solid State Relay — True Break-Before-Make Device



The Form C Solid State Relay is a true break-before-make device. LEDs indicate the conducting side of the relay. Opto isolation, zero crossover and integral heatsink are standard. Units available with either DC or AC output.

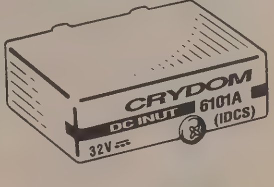
AC And DC Microprocessor Input/Output Modules—3.5 Amps, 60 VDC, 120 and 240 VAC



For electrically clean, photo-isolated, noise-free interfacing between logic level programmable controllers, microprocessors and computerized machine controls and power level loads. Input modules accept power level signals and convert them to logic level signals. Output modules accept logic level signals to switch AC or DC loads to 3.5 Amps.

General Specifications—All Models. Dielectric (Input/Output): 4000 VRMS. **Isolation Resistance (Input/Output) @ 500 V:** 10^{10} Ohms. **Capacitance (Input/Output):** 8.0pf. **Operating Temperature Range:** –40°C to 80°C.

Liquid Level Sensors/Float Switches

- ► Reliable Reedswitch Contacts
- ► Rugged Design
- ► Simple to Mount and Use

A range of reedswitch/magnet operated liquid level sensors suitable for a host of applications. Vertical or horizontal mounting styles are offered in a variety of plastics to suit most industrial applications. GFS Nylon is rated from –4°F to +167°F and suitable for use in organic chemicals, oils, fuel and diesel. GFS Polypropylene is rated –4°F to +212°F and suited for use in hot water applications. Polysulfone, rated from 14°F to +185°F is manufactured in FDA approved material and recommended for use in food grade applications. On vertical devices NO or NC operation may be achieved by removing the circlip and reversing the float chamber; on horizontal devices, simply rotate through 180°.

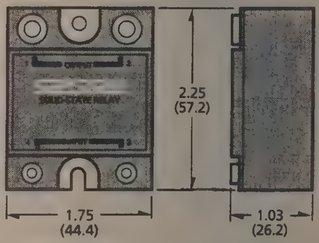
Series RPC Proportional Controllers

- ► Uses Standard Potentiometers
- ► Manual Power Control



The R family of proportional controllers provide a stable yet less expensive method of controlling power. An inexpensive potentiometer connected to the input provides the proportional control. All models come with KS100 safety cover.

Series 2—8 Amps, 120 and 240 VAC AC Output, Panel Mount Solid-State Relays

General Specifications. Control Signal Range: 3.5 to 8 VDC. **Control Signal Range "221C":** 3.5 to 7 VDC. **Must Operate Voltage:** 3.5 VDC max. **Must Release Voltage:** 1 VDC min. **Must Operate Current:** 12 mA max. **Isolation Voltage:** 2500 VAC. **Operating Temperature Range:** –30° to 80°C. **Snubber:** Internal.

The Crydom Series 2 solid-state relays combine small size, zero voltage switching and high current rating in a package designed for heat sink or panel mounting. Standard 0.187" push-on terminals allow quick connection and are positioned to provide maximum isolation between control and power circuits.

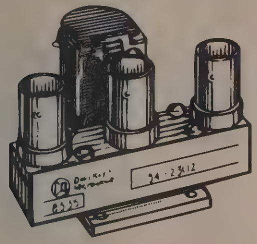
54 Series SPDT 318 Series



At a 150W maximum power rating, these medium size switches accomplish a variety of switching functions. With BNC, TNC or N connectors on the same plane as the power coil, this switch is suited for mounting in various positions. The switches are manufactured to the requirements of MIL-S-3928 with gold-plated silver contacts and two-bladed construction allowing 50 dB isolation at 50 MHz and 30 dB at 4 GHz.

Series 60 SPDT Remote Coaxial Relays

Remotely operated, ruggedly constructed, SPDT coaxial relays for operation to one kW. Specifications following for use in a 50-ohm transmission line. UHF connectors not recommended above 400 MHz. Operating time, 25 ms max. Gold plated silver contacts. *Has two Form C5A, 115VAC auxiliary contacts.

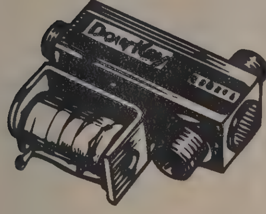
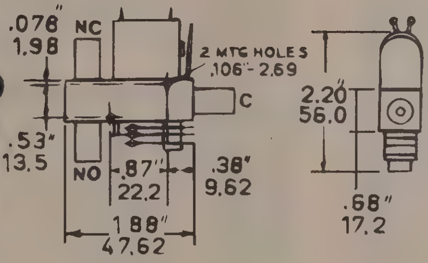
Series 77
SPDT Remote Coaxial Relay





Medium size, lightweight relay for industrial and less critical military applications. The "T" shaped connector configuration has the common connector at one end and the NO and NC connectors 180° apart at the other end. Operating time 15ms max. BNC connector type except †. Gold plated silver contacts. **Weight:** 3 oz.

*One Set Form C Auxiliary Contacts. † F Type Connector.

164 Series SPDT 315 Series

The 164 series is a small compact relay that has all connectors mounted opposite the mounting plane. Gold-plated contacts provide excellent low-level RF performance (50 dB isolation, .03 dB insertion loss, VSWR 1.03:1). With good performance to 1 GHz, these switches have many general purpose applications.

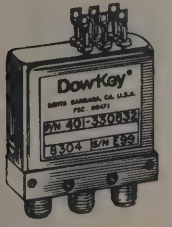
401 Series SPDT



The 401 SPDT switch with SMA connectors operates DC-18 GHz with minimum isolation of 60 dB (85 dB below 1 GHz), maximum VSWR of 1.5:1, and maximum insertion loss of 0.5 dB. Handles up to 200 W CW (25W at 18 GHz). Standard coils on failsafe relays are 12VDC (42 ohms), and 28VDC (260 ohms). Operate time at 20°C is 15mS max. Type 401-2208 is standard. Type 401-230832 has a set of form C indicator contacts. **Dimensions (exclude connectors):** 1.40"H × 1.34"L × .50"W (35.6 × 34.0 × 12.7mm). **Weight:** approximately 2 oz.

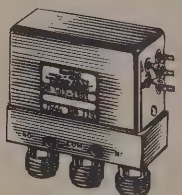
402 Series SPDT



The 402 series SPDT failsafe switches operate DC-12.4 GHz with minimum isolation of 60 dB (85 dB below 1 GHz). **Maximum VSWR:** 1.5:1. **Maximum Insertion Loss:** 0.5 dB. Handles up to 1KW continuous power (100W at 12.4 GHz). Operate time at 20°C is 20mS maximum. N type connectors. Type 402-220132 is with a set of Form C indicator contacts. **Dimensions (excluding connectors):** 2.20"H × 2.64"L × 1.09"W (55.9 × 67.1 × 27.7mm). **Weight:** approximately 9 oz.

Gentron's solid state relays are designed to handle loads from 10 amps to 250 amps and voltage as high as 1200 volts in standard industry package. Many of the recent developments in superconductor technology such as MOSFETS, IGBTs, and other types of newer devices, offer some interesting choices and performance advantages. Some of the vast advantages are selective on and off control, reduced RFI, alterable switching slopes, reduced off state leakage, higher immunity to false triggering, latch free operation, absolute zero cross firing (with options to switch on voltage or current for either on or off switching) and PWM availability. Available intelligence options are Current Sense™, thermal shutdown, load fault and current limit.

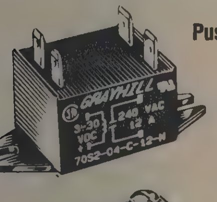
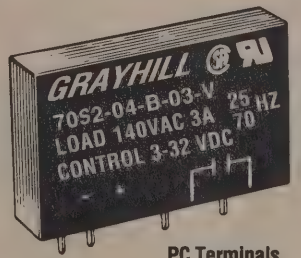
*Accommodates Negative or True Logic. † Suffix: HS Header, short Ejectors; HL-Headers, long Ejectors; EC or none-Edge Connector.

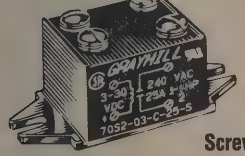
70S2 Series Solid State Relays



Push-on Terminals



PC Terminals



Screw Terminals

- ► UL Recognized, CSA Certified
- ► Miniature Size, High Performance
- ► High Surge Current Protection
- ► Built-in Transient Protection
- ► Zero Crossing Switching
- ► High Thermal Conductivity

Panel Mount Mini-Puck Relays
- ► Fit/Replacement for Hockey Puck Relays
- ► Switch Up to 25A in About 1/2 the Space

PC Mount SIP Relays
- ► Board Area 680 Sq. In.
- ► Switches 3A With No Additional Heat Sink

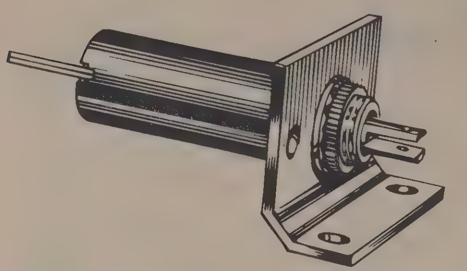
T and TP Series Tubular Solenoids



Tubular solenoids are available in either pull (T series) or push (TP series). TP series dimensions are identical to T series. Notched assembly of shell and bushing permits tightening of mounting nut without damaging coil. **Insulation Material:** Class "A" (110°C). **Termination:** 6" leads. Mounting hardware included. T and TP series recognized under the Component Program of Underwriters' Laboratories, Inc.

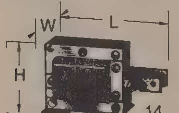
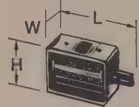
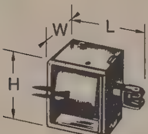
Industrial AC and DC Solenoids



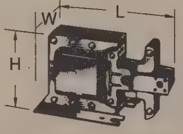
14



4,11



28



16, 18

Solenoids in a wide selection of sizes for AC or DC applications. Types 11 and 28 are for either AC or DC voltages. Laminated solenoids Types 14, 16 and 18 are for AC operation only. Tubular pull/push are for DC operation only. Intermittent-duty coils should not be energized for more than 3 consecutive minutes or be permitted to rise more than 85°C above 25°C ambient without time for cooling between cycles; continuous-duty types will not have a temperature rise of more than 85°C at rated voltage and ambient.

Relays, Sockets, Solid State Relays

idec
CORPORATION

RSS Series Solid State Relays

- ► DC/AC and AC/AC Models
- ► Photo Isolation
- ► 600 Volt Blocking Voltage
- ► 4000 Volt Isolation
- ► Zero Voltage Turn-On
- ► Built-In Snubber
- ► 100% Tested at Rated Current
- ► High Surge Capability
- ► UL Recognized (File No. E59804)
- ► Dual SCR Output (40 A)

RSS series relays provide highly reliable means of switching AC loads. Available in both AC and DC input voltage. **Dimensions:** 2.23" x 1.74" x .90".

Snap-Mount DIN Rail Sockets

Snap-mount sockets are designed to mount on BNDN-1000 mounting rail. The built-in mounting clip eliminates mounting hardware and reduces mounting time by eighty percent. For spacing between adjoining sockets, use SA-406 DIN rail spacer. Spacers are .197" in width. Spacing can be adjusted according to the amount of spacers added. To prevent sideward movement, use BNL-5 end clip at each end of socket row.

To Mount: Place socket on mounting rail and press down.

To Remove: Pull clip out with screwdriver and lift socket.

Delay DPDT GT3 Series

Features

- ▶ Compact Spacing-Saving Size: 1.42" (36 m) Wide
- ▶ Choice of Four Basic Series: Multi-Mode — On-Delay, Interval-On, Single-Shot and Cycle (Available with Optional Input Controls). OFF-Delay — "True Off-Delay" Requires No External Control Switch to Initiate Timing Sequence. Sequence — Dual Knob Control Provides Separate Time-Delay Settings. Variable Duty Sequence — Solid-State Outputs (AC/DC), Duty Sequence Variable from 0 to 100%
- ▶ Repeat Accuracy ±0.2%, ±10 msec
- ▶ POWER On and Timing OUT LED Indicators
- ▶ Choice of Power Voltage Range: 100 V to 240 VAC, 12 V AC/DC, and 24 V AC/DC
- ▶ All Timers Compatible with IDEC's 8-Pin and 11-Pin DIN Rail, Panel Mount Sockets. Optional Panel-Mount Adapter Available
- ▶ UL Recognized and CSA Certified

Specifications

Input Voltages: 100 V to 240 V AC; 12 V AC/DC; 24 V AC/DC. **Contact Configurations:** Delayed SPDT, Delayed DPDT, Delayed SPDT + Instan. SPDT, solid state. **Contact Load Ratings (Maximum):** 250 V AC/5 A, 30 V DC/5 A. **Insulation Resistance:** 100 MΩ, minimum. **Time Ranges:** 0.05 seconds to 180 hours (GT3A), 0.05 seconds to 10 minutes (GT3F), 0.1 seconds to 6 hours (GT3W), 0.01 to 10 minutes (GT3P). **Reset Time:** 60 msec., maximum. **Life Expectancy:** Electrical — 100,000 operations, mechanical — 20,000,000 operations. **Termination:** 8- and 11- pin.

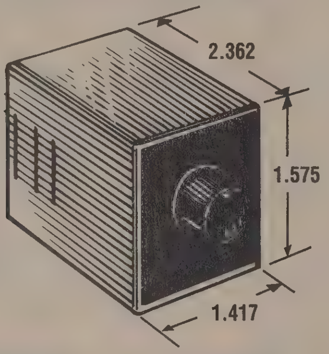
RTE Series

Multi-Function/Time Range Electronic Timer



Features

- ▶ Redesigned Compact Housing
- ▶ Multi-Function Operation: On-Delay/Interval or Off-Delay/Single-Shot
- ▶ Multi-Time Range Settings from 0.1 Second to 10 Minutes and 0.1 Minute to 10 Hours
- ▶ High Repeat Accuracy of ± 0.25%
- ▶ Standard Pin and Blade Termination
- ▶ UL Recognized and CSA Certified

Specifications

Input Voltages: 120 V AC + 10% to –20% (50/60 Hz)
12 V AC/DC, ±10%
24 V AC/DC, +10% to –15%
Contact Configuration: 2 Form C, DPDT (Delay outputs)
Contact Load Ratings: 10 A Resist @ 240 V AC, 30 V DC
7 A Inductive @240 V AC, 30 V DC
1/6 HP @ 120 V AC
1/3 HP @ 240 V AC
Power Consumption: 2.2 VA, maximum
Repeat Accuracy: ±0.25% maximum, 10 ms
Reset Time: 0.1 second, maximum
Dielectric Strength: 1500 V AC, 1 minute (Bet. power and output terminal, except bet. contacts of the same pole)
Life Expectancy: Mechanical — 50,000,000 operations
Electrical 250,000 operations

Time Ranger™ III — Digital-Set Multi-Function/Multi-Range

— NEW —

File No. 701134

File No. E170213

- 8 Field-Selectable Functions in One Unit
  - — On Delay
  - — Flasher
  - — Interval/Off Delay
  - — Off Delay (2 Versions)
  - — Interval
  - — Delayed Interval
  - — On Delay/Off Delay
- Universal AC/DC Input Voltage
- LCD Display with Output Status Indicator and Percent of Time Remaining Bar
- Pushbutton Thumbwheels for Accurate Digital Setting of Time Delay
- 0.1 Second to 9,990 Hour Programmable Timing Range
- ±0.3% Repeat Accuracy
- 3 A @ 250 VAC SPDT Contacts
- 1/16 DIN Style Case
- Panel, Track or Surface Mounting

Specifications. Input Voltage: 24-240 VAC, 50/60 Hz, 12-240 VDC. **Load (Burden):** 3 watts. **Repeat Accuracy:** ±0.3%. **Setting Accuracy:** ±0.5%. **Temperature Range:** –10° to 55°C (14° to 131°F). **Output Contact Rating:** 3 A resistive @ 250 VAC; 5 A resistive @ 28 VDC.

Compact Plug-In Time Delay Relays

File No. E109466

- Compact Economical Design
- Standard 8 Pin Octal Socket
- 5 A @ 120 VAC SPDT Contacts

Output: SPDT 5 A resistive @ 120 VAC/28 VDC, 1/6 hp @ 120 VAC. **Repeat Accuracy:** ±2%. **Temperature:** 0° to 60°C (32° to 140°F). **Power Required:** 2.5 VA.

Time Ranger™ Programmable

- ► 16 Timing Ranges in a Single Timer
- ► User Sets Time Ranges — No Math Required — Just Flip Switches
- ► Fine Tune Knob for Precision Timing
- ► Pin for Pin Interchangeable with Most Timers in the Field
- ► All Timers Operate on Either AC or DC
- ► 0.1% Repeat Accuracy

Timing range on non-cycle timers is 0.1 seconds to 2 hours and 0.6 seconds to 24 hours on repeat cycle and delayed interval timers. **Output:** DPDT 10 A resistive @ 240 VAC/30 VDC, 1/3 hp @ 240 VAC. **Repeat Accuracy:** ±0.1%. **Temperature:** –28° to 65°C (–20° to 150°F). **Power Required:** 3 VA.

Repeat Cycle (Off Time Followed By On Time)

Upon application of input voltage, "Off" time begins. When the "Off" time is completed, the "On" time begins. The sequence repeats until the input voltage is removed. The "Off" time and "On" time are independently adjustable.

819-6001	SS-63122	120 VAC/VDC	8 Pin Octal	**59.71**	**55.67**	**53.15**	**50.11**

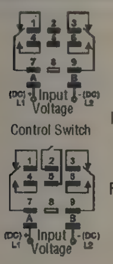
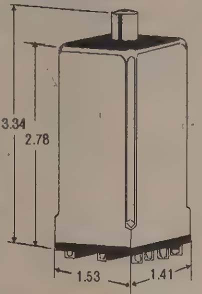
Time Delay Relay with Quick Connect Terminals



File # LR45565

File # E109466



- ► Standard .187" Quick Connect Terminals
- ► 12 A at 240 VAC DPDT Contacts
- ► Operates on Both AC and DC

Output: DPDT 12 A resistive at 240 VAC/30 VDC, 1/2 hp at 240 VAC. **Repeat Accuracy:** ±0.1%. **Temperature:** –28° to 65°C (–20° to 150°F). **Power Required:** 3 VA.

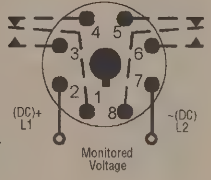
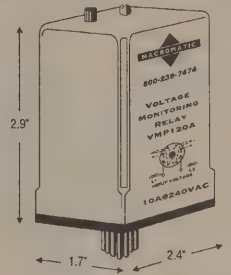
Voltage Monitoring Relay

- ► Monitors AC Single Phase or DC Voltages
- ► Pick-Up Voltage Setting Is Adjustable From 85-115% of Nominal
- ► Drop-Out Voltage Is Fixed at 3% Below Pick-Up Setting
- ► LED Indicates Relay Status





Output: DPDT 10 A resistive at 240 VAC/30 VDC, 1/2 hp at 240 VAC. **Response Time:** 50 ms for both pick-up and drop-out. **Temperature:** –28° to 65°C (–20° to 150°F). **Power Required:** 3 VA.

Relay energizes when the monitored voltage is above the pick-up setting. The relay de-energizes when the monitored voltage is below the drop-out setting.

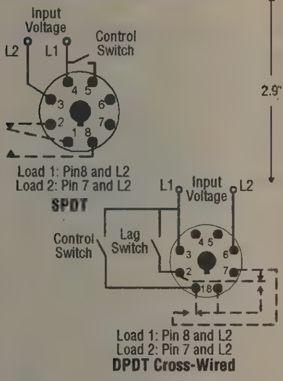
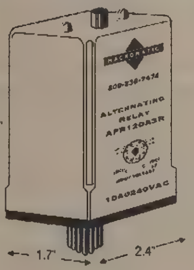
10

Alternating Relay





- ► For Systems Requiring Equal Run Time of Two Loads
- ► Choice of SPDT or DPDT Cross-Wired Output
- ► Selector Switch Electrically Locks in One Sequence: Alternate, Load 1, or Load 2
- ► DPDT Cross-Wired Output Allows Either Alternating Loads, or Simultaneous Operation of Both Loads
- ► 2 LEDs Indicate Relay Status

Output: SPDT or DPDT cross-wired 10 A resistive at 240 VAC/30 VDC, 1/2 hp at 240 VAC. **Response Time:** 50 ms. **Temperature:** –28° to 65°C (–20 to 150°F). **Power Required:** 3 VA.

Each time the control switch is opened, the output relay contacts change state, thus alternating the two loads. On a unit with DPDT cross-wired output, a second lag switch can be used to simultaneously control the other load.

Phase Monitoring Relay

- ► Protects Against Phase Loss, Phase Reversal, Phase Unbalance, and Undervoltage
- ► User-Selectable Phase Unbalance (2-10%) and Undervoltage Settings
- ► Adjustable Time Delay Drop-Out (0.1-20 Seconds) On Undervoltage
- ► Choice of Plug-In or Surface-Mounted Enclosures
- ► LED Indicates Both Normal and Fault Conditions

Output: SPDT (PMP240 and PMP480) or DPDT (PMD240 and PMD480) 10 A resistive at 240 VAC/30 VDC, 1/2 hp at 240 VAC. **Temperature:** –28° to 65°C (–20° to 150°F). **Power Required:** 3 VA. **Reset:** Automatic.

Relay is energized when the phase sequence and all voltages are correct. Any one of the four fault conditions will de-energize the relay.

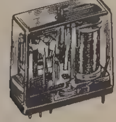
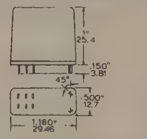
*Internal Clamping Diode.

Class 76 Miniature Printed Circuit Relays—Epoxy Sealed





5, 10, and 16 amp general purpose, high-current, printed circuit relays. They are versatile, provide long life and reliable performance. Minimum mechanical life of 5,000,000 operations. After soldering and washing process, pierce the hole in the cover.

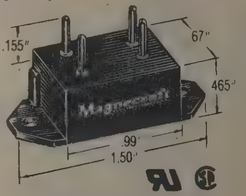
Series 226 Solid State Miniature Relays



Low cost solid state relay designed to switch low to medium current AC loads from low level logic signals. Can be chassis mounted and connected with standard push on connectors. Compatible with TTL logic. Unit is completely potted to resist shock and moisture effects. DC input versions have LED activated optoisolator input. **Operate time:** 8 msec typ. **Release time:** 25 msec typ. **Dielectric strength:** 2500 VAC rms from input to output and case. Units have continuous current rating without heatsink of 0.05 to 1.5 amps; 0.05 to 7 amps with heatsink.

*PC Mount.

Class 67 Miniature Industrial Relays

Plug-in or solder terminal mount relays with 3-48 NC stud. Single and bifurcated crossbar contacts of silver alloy rated 3 to 5 amps at 32DC or 120VAC resistive load. All relays with plastic dust covers. Voltage specified relays pull-in at 80% of nominal or less. **Resistance values:** ±10% measured at 25°C. **Size:** DPDT, 0.734 x 0.938 x 1.88"; 4PDT, 0.734 x 1.156 x 1.188"; 6PDT, 0.734 x 1.375 x 1.188"; 8PDT, 0.734 x 1.592 x 1.188". U.L. File No. E52197. CSA File No. LR41729. **CSX or RCSX:** Solder terminals. PCX or RPCX: P.C. terminals.

*Accepts all Class 388 plug-in relays.

Class 389 General Purpose Relays

Class 389 General Purpose Relays are designed to switch larger contact loads without increasing overall size. It is similar in design to Class 388 relays and features a flange mounted cover. **Contact Materials:** silver cadmium oxide, gold flashed. **Temperature Range:** Operating, – 30°C to + 50°C AC; – 30°C to + 65°C DC. **Enclosure:** Clear polycarbonate. Quick connect terminals are $^1/_4$ × .032" and suitable for soldering. **Size (max.):** $2\frac{29}{32}$"L × $1\frac{17}{32}$"W × $1\frac{13}{32}$"H. **Weight:** 3.3 oz UL/CSA E436 41/LR37547

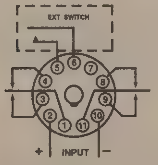
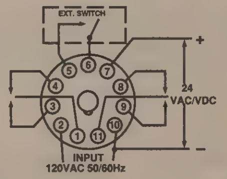
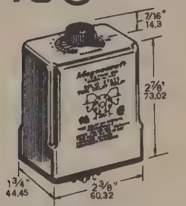
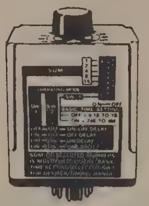
Class 211 Time Delay Relays









The Class 211CP Time Delay Relay makes use of hybrid circuitry, combining solid state circuitry for timing function with an EMR for DPDT 10 amperes output switching. Features nylon dust covers, and reverse polarity protection on DC models. **Repeat Accuracy:** ±.1% of setting at nominal voltage at 25°C. **Contact Combination:** DPDT standard. **Reset Time:** 100 mS max. **Temperature Range:** Operate, –10°C to +55°C; Storage, 55°C to +85°C. Transient protection of 2000 V for 8 mS standard.

Class W6 Solid State Relays

All models incorporate opto-isolation between input and output, and zero-voltage switching. Features high transient capability. DC controlled models have an input impedance of 1500 ohms min.; AC models, 60 K ohms typical.

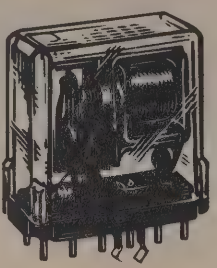
219 Series General-Purpose Relays

- ► **10 Amp Rating**
- ► **U.L. and CSA Listed**



Type 219 relays provide long reliable contact life. They are designed for machine and process control applications requiring up to 20 million cycles of miss-face-operation. 12 pin models use socket #27390; 14 pin models use socket #33377. **Specifications. Insulation:** 1/4" surface, 1/8" air. **Dielectric:** 1500 Volt Test. **Operating Time:** 20 MS max. **Release Time:** 20 MS max. **Temperature Range:** –10°C to +60°C. **Cover:** Clear Polycarbonate. **Contacts:** Fold Diffused SCO. **Life:** 20 million Mech Operations.

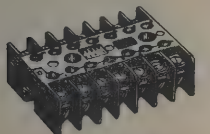
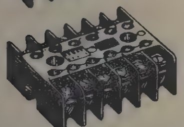
12 and 14 Pin Sockets

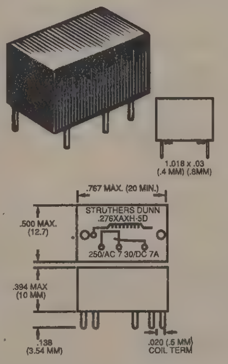


Type 27390. Twelve terminal socket accepts types 311, 219, 236, 237, 255, 349, and RSX alarm relays. **Overall Dimensions:** 2 21/32 x 2 3/16 x 27/32".
929-2030 ....**EACH 11.63**



Type 33377. Fourteen terminal socket for 219 series 4 and 6 pole relays. **Dimensions:** 2 5/64 x 2 3/16 x 27/32".
929-2035 ....**EACH 13.57**

Type 276 Miniature Power Relays



1 Form A contact @ 7 A; 1 Form C contact @ 10 A. Low power coil-40 MA @ 5 VDC. Terminals on 0.1" grid. Silver alloy contacts. Permanent magnet polarized single-sided stable design. Sealed PBT case for wave soldering and immersion cleaning. 4 mm spacing coil to contacts. 5 KV surge resistance. **Temperature Range:** –40° to +70°C. **Dielectric:** 1000 VAC between contact. **Operating Time:** 10 ms on loss. **Release Time:** 10 ms on loss. **Weight:** 0.2 oz.

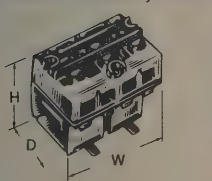
Type A275KXX, Reversing Control Relay (15 Amp)



Compact reversing contactors consisting of a pair of 3-pole contactors mounted on a common frame and mechanically interlocked to prevent simultaneous closure. Designed for continuous operation in heavy-duty service. Vertical operating condition. Over 10 million mechanical operations. U.L. and CSA listed. **Weight:** 1 lb.

Type B255, 12 Pin Latching Relays

B255

This is a two-coil latching version of the Type 219 relay. When the operate coil is momentarily energized the relay mechanically latches in the energized position even if power is interrupted. The second coil provides electrical reset. All contacts operate from a common armature to prevent contact overlapping, coils are rated for continuous duty. **Insulation:** 1/4" surface; 1/8" air. **Dielectric:** 1500 Volt test. **Oper. Time:** 25 ms max. **Release Time:** 20 ms max. **Temp. Range:** –10°C to +60°C. **Life Expectancy:** 10 million mechanical operations. **Cover:** Clear Polycarbonate. Uses socket #27390. **Dimensions:** 2 5/8 x 1 15/32 x 3 3/4".

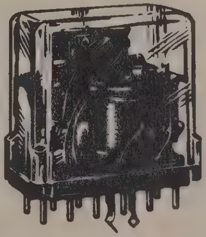
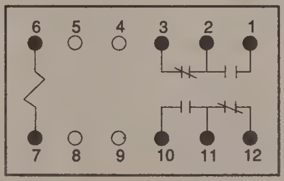
Type A311, Sequencing Relay



A311XBXP
A311XBXPR



A sequencing version of the Type 219 relay. Contacts transfer on each impulse. XBXP type transfers contacts when coil is energized. XBXPR type transfers contacts when coil is de-energized. 5 amp coil. Gold diffused SCO contacts. Uses base #27390. **Insulation:** 1/4" surface; 1/8" air. **Dielectric:** 1500 Volt test. **Temp. Range:** –10°C to +60°C. **Dimensions:** 2 5/8 x 1 15/32 x 2 19/32".

- ► Suitable for 5 mm Grid Pattern
- ► Immersion Proof

Electrical Specifications
- ► Operating Time: 8mS Approx.
- ► Release Time: 5mS Approx.
- ► Switching Rate: 20 Operations Per Second (Max.)
- ► Operating Temperature: –40° to +70°C

AC Operated

General Purpose DIP Reed Relays, DC Operated

Features
- ► Standard Industry Packaging
- ► Internal Clamping Diode Version (D-Suffix)
- ► Separate Time: 330 µs Max.

Electrical Specifications
- ► Release Time: 75 µs Max.
- ► Max. Current: 0.50 A
- ► Operating Temperature: –45° to +85°C

DC Operated

Stock No.	Mfr.'s Type	Nominal Voltage	Contact Arr.	Coil Res. Ω (Typ)	Max. Pickup VDC	Min. Drop Out VDC	EACH

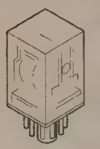
General-Purpose Relays with LED Indicator and Sockets



Super MK Series

Reliable, high quality, long life. Silver contact rated at 10 amps. UL, CSA rated. LED indicator lets you monitor relay operation at a glance: red LED for AC version; green LED for DC version. Quality sockets and mounting rail complete your installation.

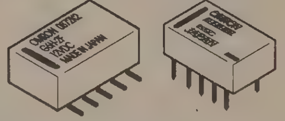
Compact, Low Profile G6H Series PC Board-Use Relays: 1 Amp Load



Low power consumption 1 amp, 30 VDC relay. Low magnetic interference allows high-density mounting. Just 5 mm profile. **Standard:** G6H-2. **Latching:** G6HK-2. **Surface Mount:** G6H-2-F. Surge withstand voltage of 1500 VDC meets FCC Part 68 requirements. DPDT bifurcated contacts. **Specifications. Rated Load:** 0.5 A 125 VAC (p.f.=1) and 1 A 30 VDC. **Pick-Up Voltage:** 75% max. **Dropout Voltage:** 10% min. Surface mount version can be soldered by VPS, IRS and DWS methods.

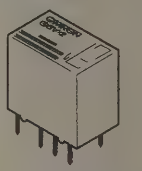
G5V-2 Series PC Board Use Relays: 2 Amp Load



DPDT. Bifurcated contacts. Designed for telecommunications, computer peripherals, security equipment; low level to 2 amps maximum. **Standard:** G5 V-2. **High-Sensitivity:** G5V-2-H. **Ultra-Sensitive:** G5V-2-H1. **Specifications. Contact Resistance:** 50 mΩ. **Operate Time:** 7 mS max. **Release Time:** 3 mS max. Fully sealed case allows automatic soldering and cleaning. UL and CSA approved. Meets FCC part 68 1500 V surge withstand. **Pick-Up Voltage:** 75% max. **Dropout Voltage:** 5% min.

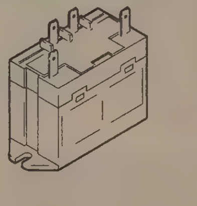
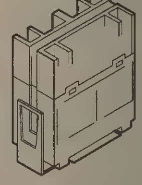
Model G7L Power Relays Offer Quick-Connect or Screw Terminal Versions





High capacity 25-30 amps. Low cost. Relay test button. Replaces G5D series. Upper bracket mounting. High dielectric strength: TUV, UL and CSA approved. VDE approval pending. Nonflammable insulating materials satisfying UL94V-0. **Quick Connect Terminals:** G7L-TUB. **Screw Terminals:** G7L-BUB.

G6A Series PC Board-Use Relays

Plastic sealed relay with high surge dielectric for use in telecommunication equipment. High sensitivity. Low profile design for use in 1/2" PC board rack. Surge withstand voltage of 1500 VDC meets FCC Part 68 requirements. Unique moving loop (permanent magnet) armature reduces relay size, magnetic interference, and contact bounce time. DPDT or 4PDT bifurcated crossbar AgPd contacts (Au clad). Rated 2 amps carry current.

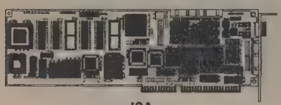
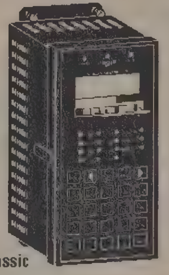
Controllers



ISA



Classic

Modular

Modular controllers deliver flexibility, power, and communications by design. Modular controllers take advantage of the Opto 22 distributed, intelligent I/O architecture and run Opto 22's new Windows 32-bit FactoryFloor software suite. The M4 bus supports a variety of communications interfaces with Ethernet, Arcnet, RS485, RS232, and fiber optic cards. The Modular Controller line includes a general purpose controller, an I/O controller for data acquisition and control, and a powerful remote telemetry unit/distributed automation system. All Modular controllers provide rugged industrial packaging and include an M4 processor, Opto 22's M4 Expansion Bus, and accommodate one of the various plug-in power supply options.

ISA

ISA controllers are PC bus based and are compatible with Opto 22's FactoryFloor software. Acting as a slave or bus master, the ISA controller can be used with either active or passive backplanes. Battery-backed RAM starts at 256K and is expandable to 2MB. A hardware math co-processor is available as an option.

Classic

Classic controllers include all the options required to meet the most sophisticated control challenges. Classic controller performance is based on state-of-the-art 32-bit technology. The G4LC32 includes four high-speed serial ports, an ARCnet port, a 4-line backlit LCD display, 25-key membrane key pad, LED status indicators for diagnostics, and 512K battery-backed RAM for program and data storage. The Classic G4LC32SX controller is a low-cost alternative to the Classic G4LC32 for applications that do not require a key pad, display, or a floating point math co-processor. The SX controller is equipped with 256K of battery-backed RAM that is expandable to 1 MB. The SX is supplied with two RS232/485 serial ports. Additional ports can be added using either of the two available adapters.

Single Board

The Opto 22 LC4 family of controllers are powerful 8-bit single board computers intended for use with Optomux and Pamux I/O systems. The LC4 uses the EX1 interface for Pamux compatibility, while the EX2 provides two additional serial ports and a 24-line parallel port for direct connection to Classic or SNAP mounting racks. The LC4 is not FactoryFloor or Cyrano compatible. Programming is accomplished with interpretive BASIC or FORTH.

Software

FactoryFloor

Opto 22's FactoryFloor is a tightly-integrated suite of Windows 32-bit software that delivers a Total Control Solution for industrial automation. FactoryFloor is made up of OptoControl, OptoDisplay, and OptoServer. OptoKernel and OptoUtilities are included with FactoryFloor and each of the FactoryFloor components.

Optocontrol

OptoControl is a graphical, flowchart based, multitasking control language that operates with Windows '95 and Windows NT. OptoControl takes advantage of Microsoft's 32-bit Windows graphical interface to make it easy to understand, configure, design, and troubleshoot your control environment. Some of OptoControl's key features include the following — OptoControl's "Strategy Tree," which provides a graphical tree-like view of your control system configuration; OptoControl's flowchart programming environment, which provides a precise, graphical view of your control process; OptoControl's animated debugger which makes it easy to step through your process and see what's happening at every point in your control program; OptoControl's subroutine builder provides extensive code reusability by packaging flowcharts for re-use; OptoControl's built in integration allows connectivity to third-party software and custom applications.

Optodisplay

OptoDisplay is a Windows 32-bit graphical multimedia operator interface package that is tightly integrated with OptoControl. OptoDisplay gives operators, technicians, and engineers the information that they need at a glance. Displays can mix pictures, symbols, bitmaps, sounds, and 3-D graphics from OptoDisplay's extensive library. OptoDisplay allows you to construct controller-driven animation and operator-driven commands. Operators can also utilize real-time data for trend plotting. Advanced features enable you to animate any graphical control object and to associate it with real-world events by choosing a tagname from the shared OptoControl database. OptoDisplay is easy to program — just point, click, and associate.

Optoserver

OptoServer is the 32-bit Windows-based client-server application that gathers and serves requested data from the Opto 22 controller network and the PC-based FactoryFloor network. Combined with Microsoft's communication-enabling technologies, OptoServer becomes the universal I/O server for Opto 22 I/O systems. OptoServer is fully integrated with OptoControl and OptoDisplay, either as stand-alone applications or within a complex client/server architecture. OptoServer can also be integrated with Microsoft products, third-party packages, and/or user-developed custom applications created with tools such as Microsoft Visual Basic®.

Optoconnect

OptoConnect introduces a new dimension of data management to manufacturing and makes FactoryFloor information available to the entire enterprise. OptoConnect allows the bi-directional flow of information between manufacturing and your Microsoft SQL server or JET database. Access to this information in an understandable format makes it possible to manage your manufacturing and business environments as never before. With OptoConnect, timely access to accurate manufacturing information is as easy as point-and-click — literally. Just use your mouse to select the items you want from the OptoControl strategy tree and associate them with your OptoConnect database. From there, data transfer is automatic. You can choose historical or snapshot data with data snapshots taken at user-defined intervals. OptoConnect utilizes standard infrastructure and communications technologies and is available with or without Microsoft SQL Server.

Optointegration Software

Optodriver Toolkit Software

OptoDriver Toolkit helps you build custom solutions for Opto 22 I/O systems. Programmers using high-level languages, such as Microsoft C++ or Microsoft Visual Basic, can use the OptoDriver Toolkit to write Microsoft Windows and DOS software applications that can access the brain board, rack, and I/O combination that best fits their application. The OptoDriver Toolkit includes new 32-bit Windows-compatible drivers. Windows 16-bit drivers, and Opto 22's classic DOS drivers.

Classic Software

Classic Software-Cyrano-MMI-MDS-Opto 22 Classic software was Opto 22's first visual flowchart-based programming and graphic MMI environment for industrial automation. Opto 22's classic software products run as 16-bit applications and have a large installed base. Opto 22 is committed to supporting this installed base and to make these products available for those customers who have not moved to the Windows 32-bit platform. Opto 22 has also provided utilities to assist customers in migrating to FactoryFloor.

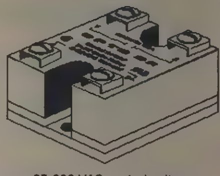
Power Series Relays



Opto 22 provides a full range of Power Series relays with a wide variety of voltage and current options. All Power Series SSRs provide 4000 VRMS of optical isolation and provide a wide operating temperature range of –40°C to +100°C. Part numbers with a D are TTL compatible, with a 3-32 VDC control voltage. Part numbers with an A use an 85-280 VAC control voltage.

DC Switching Series

The DC Series delivers isolated DC control to large OEM customers worldwide. DC Power Series SSRs switch DC voltages between 5-60 volts. They have nominal current ratings of 3 and 5 amps.

691-0501.	DC60S3. 60 VDC, 3 Amp, DC Control	**EACH**	**9.60**
691-0502.	DC60S5. 60 VDC, 5 Amp, DC Control	**EACH**	**15.00**

AC Switching Series

The AC Series offers the ultimate in solid-state reliability. AC Power Series SSRs switch voltages between 120 and 575 VAC with nominal current ratings from 3 to 45 amps. All AC Power Series SSRs feature a built-in snubber and a maximum zero voltage turn-on time of 1/2 cycle. All models are UL recognized and CSA certified. Relays with a -17 extension on the part number are VDE approved, while a -12 indicates a transient proof model.

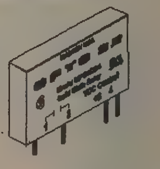
Printed Circuit Series



Opto 22's Printed Circuit Series allows OEMs to easily deploy solid-state relays on printed circuit boards with switch loads up to 4 amps.

MP Series

The MP Series packaging is designed with a minimum footprint to allow maximum relay density on the circuit board. Z Series SSRs switch nominal voltages of either 120 or 240 VAC with nominal current ratings of 2 and 4 amps. All MP Series SSRs provide 4000 VRMS of optical isolation and provide a wide operating temperature range of –40°C to +100°C. MP Series SSRs are TTL compatible, with a 3-32 VDC control voltage. All MP Series SSRs feature a built-in snubber and a maximum zero voltage turn-on time of 1/2 cycle. All models are UL recognized and CSA certified. Relays with a -17 extension on the part number are VDE approved.

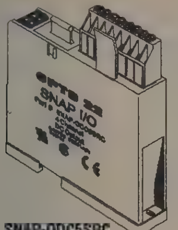
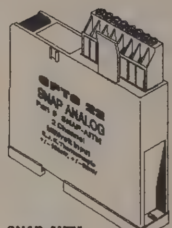
SNAP I/O Modules



SNAP-ODC5SRC



SNAP-AITM

SNAP I/O is Opto 22's newest and highest density I/O packaging. SNAP I/O includes 4-channel AC and DC digital modules and intelligent analog modules. SNAP's compact design delivers an overall space savings of 60 percent over traditional I/O, while innovative new packaging allows modules to simply snap in place. All SNAP modules have removable top-mounted connectors to provide easy access for field wiring. Digital modules include a built-in LED status indicator for each channel. Digital output modules use a standard fuse with a convenient handle for easy replacement. DC output modules are available in either current sinking or current sourcing versions. SNAP analog modules are software-configurable and offer both optical and transformer isolation. Each analog input module offers 15-bit resolution for high accuracy. All analog modules include a serial interface for easy programmability and integration into OEM applications.

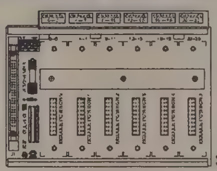
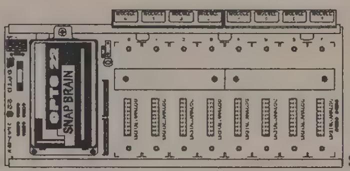
Snap I/O Mounting Racks



SNAP-D6M



SNAP-B8M

SNAP racks come in two model types — D Series (digital only) and B Series (brain board). All SNAP racks use a single 5-volt power source, are configured for standard panel mounting, and offer a DIN rail mounting option. B Series racks are designed for integration with the B3000 SNAP I/O processor (brain board) and allow a combination of analog and digital modules on the same rack. D Series racks use the same 50-pin connector as Opto 22 Classic racks and are therefore compatible with Opto 22 Classic digital brain boards and interfaces. D Series racks provide an ideal direct connect solution for OEM applications.

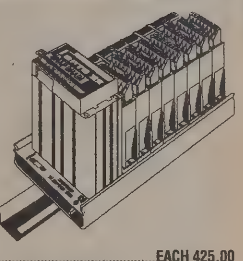
SNAP Brain Board



With SNAP I/O, a single processor does it all. SNAP controls analog, digital, or mixed I/O modules on the same compact SNAP B series mounting rack. Both Optomux and Mistic protocols are supported for easy integration into existing Optomux or Mistic installations. SNAP I/O processors offer a variety of high-speed serial communications options and can be daisy-chained on a simple serial link over very long distances. SNAP I/O processors feature flash-based firmware for easy upgrades and maintenance. The Mistic protocol provides seamless integration with Opto 22's FactoryFloor software.

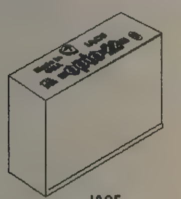
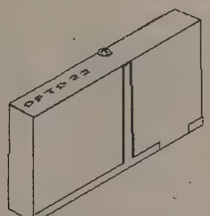
Standard I/O Modules



IAC5



AD6

Both analog and digital modules are available in Opto 22's standard packaging. Standard digital modules offer a wide range of voltage and speed combinations and are available for 5, 15, or 24-volt logic. Analog modules offer 12-bit resolution. Analog input modules include voltage, current, thermocouple, RTD, ICTD, and frequency. Both voltage and current analog outputs are available.

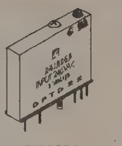
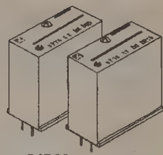
G4 I/O Modules



G4IAC5A



G4DA9

G4 I/O includes both digital and analog modules. Each G4 module offers high-density single-channel packaging. Each digital module includes an LED status indicator and is also available with manual switching capability for field wiring and control logic testing. Digital modules support 5, 15, or 24-volt logic. G4 digital output modules feature a top-mounted replaceable fuse. G4 analog modules are factory-calibrated, offer 12-bit resolution, and require a single 24-volt power supply. All current loop modules include an isolated loop power supply for added flexibility and reduced instrumentation costs. Input types include voltage, current, thermocouple, RTD, ICTD, frequency, and velocity. Outputs include voltage, current, and time-proportional output.

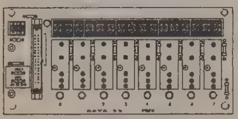
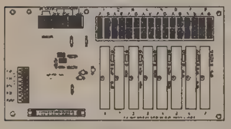
Classic Standard Mounting Racks



PH8H



PB8AH

Standard mounting racks include both digital and analog. Standard digital racks are available in 4, 8, 16, and 24-channel models and feature LED status indicators and plug-in replaceable fuses for each channel. Standard digital input and output modules can be combined on any Standard mounting rack. A Standard digital rack, with screw terminals for both field and logic connections, is available for custom application development targeted at isolating non-isolated devices such as PLCs. Standard digital racks are available for both direct connection and connection to Opto 22 Classic brain boards. Standard analog racks in 4, 8, or 16-channel models accept Opto 22 Standard analog I/O modules. Standard analog racks are compatible with all Classic analog brain boards.

Classic Integral Mounting Racks

Integral mounting racks provide 16 channels of low cost, high-density I/O on the rack. Integral racks are compatible with all Classic digital brain boards and 5-volt TTL direct connect application. Integral mounting racks have pluggable field wiring connections for increased serviceability and are available in either 16-channel DC input or 16-channel DC output models.

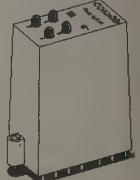
Quad Pak I/O Modules



Quad Pak modules each contain four single channels of digital I/O in one high-density package. Each Quad Pak module includes an integral LED for each channel on the module.

Quad Pak Digital Modules

Quad AC Inputs

691-0231.	IAC5AQ. 4-Channel 180-280 VAC, 5 VDC Logic	EACH	35.00
691-0232.	IAC5Q. 4-Channel 90-140 VAC, 5 VDC Logic	EACH	35.00

Quad DC Inputs

691-0233.	IDC5BQ. 4-Channel 4-16 VDC, 5 VDC Logic, High Speed	EACH	45.00
691-0234.	IDC5Q. 4-Channel 10-32 VDC, 5 VDC Logic	EACH	35.00

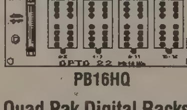
Quad AC Outputs

691-0235.	OAC5Q. 4-Channel 12-280 VAC, 5 VDC Logic	EACH	35.00

Quad DC Outputs

691-0236.	ODC5AQ. 4-Channel 5-200 VDC, 5 VDC Logic	EACH	50.00
691-0237.	ODC5Q. 4-Channel 5-60 VDC, 5 VDC Logic	EACH	35.00

Classic Quad Pak I/O Racks



PB16HQ

Quad racks provide a high-density digital I/O solution and accept Opto 22 Quad Pak modules. Both 50-pin header and card edge connectors are available.

Quad Pak Digital Racks (Brain Board Compatible)

691-0238.	PB16HQ. Quad 4-Module Position Rack	EACH	69.00
691-0239.	PB32HQ*. Quad 8-Module Rack For B4 Brain	EACH	120.00

Quad Pak Digital Racks for Direct Connect

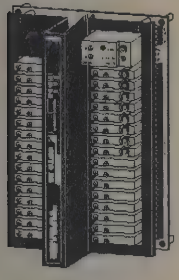
691-0240.	PB24HQ*. Quad 6-Module Position Rack	EACH	115.00
691-0241.	PB24Q. Quad 6-Module Position Rack	EACH	108.00
691-0242.	PB32DEC. Quad 8-Module Position Rack	EACH	125.00

Quad Pak I/O Rack Accessories

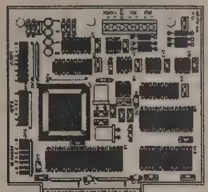
691-0243.	STRAP2Q. 2-Position Strap Quad Rack R0432	EACH	1.00
691-0244.	STRAP4Q. 4-Position Strap Quad Rack R0431	EACH	1.65

*With Header Connector.

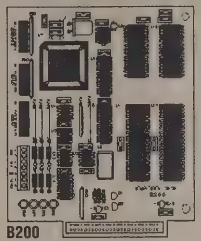
Brain Boards



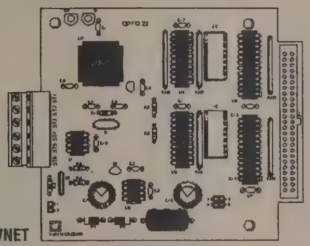
G4D32RS



B100



B200



BD-DEVNET

Opto 22's brain board technology creates a truly distributed and scalable, intelligent I/O system. Opto 22's brain boards (I/O processors) connect to I/O mounting racks to form intelligent I/O units, because each brain board has its own on-board microprocessor and custom multi-function ASIC chip. Brain boards communicate with a computer in a command response mode as a slave device, and provide the local intelligence necessary to perform basic control functions such as on/off control, counting and latching, or complex tasks such as PID control, temperature conversion, time proportional output, and emergency shutdown. Opto 22 brain boards have two distinguishing factors: the form factor of the racks that they support and the protocol(s) that they utilize. Pamux protocol brain boards utilize a parallel interface to a computer and provide very high-speed communications for distances up to 500 feet. Brain boards that communicate serially support one or both of Opto 22's open industry-standard protocols (Mistic and Optomux) and support multifunction capabilities such as PID, latching, high-speed counting, and programmable event reactions.

Bricks

Bricks offer a unique packaging scheme for G4 digital or G4 analog I/O and support either Mistic or Optomux protocols. Bricks combine I/O with a mounting rack and a brain board to form an I/O unit in a dead-front package with an enclosed wire way. The Mistic protocol provides seamless integration with Opto 22's FactoryFloor software. Bricks operate from a single 24-volt DC power supply and provide on-board voltage regulation.

Remote Digital

691-0250. G4B1. Remote Digital 16 Channel I/O Unit Optomux Protocol	EACH	435.00
691-0251. G4D16R. Remote Digital 16 Channel Multifunction I/O Unit Mistic Protocol	EACH	615.00
691-0252. G4D32RS. Remote Digital 32 Channel I/O Unit Mistic Protocol	EACH	450.00

Remote Analog

691-0253. G4A8R. Remote Analog 8 Channel Multifunction I/O Unit Mistic Protocol	EACH	615.00
691-0254. G4B2. Remote Analog 8 Channel I/O Unit Optomux Protocol	EACH	225.00
691-0255. G4RAX. Remote Analog 8 Channel I/O Unit Extender	EACH	335.00

Brick Brain Boards

Remote Digital

691-0273. G4TERMR. Remote Brick Terminator	EACH	35.00
691-0274. REMOTE CABLE200. Remote Brick Interpanel Cable	EACH	45.00
691-0275. SBTA. Single Brick Terminal Adapter	EACH	25.00

Classic Brain Boards

Classic brain boards are distinguished by the protocol that they support. Mistic protocol brain boards include the B100 (digital) and B200 (analog). The Optomux protocol is supported by the B1 and B100 (digital) and B2 and B200 (analog) brain boards. Pamux brain boards include B4 (32-channel digital), B5 (16-channel digital), and B6 (16-channel analog). The Mistic protocol provides seamless integration with Opto 22's FactoryFloor software.

Mistic Brain Boards

691-0276. B100. 16-Channel Digital Brain Mistic/Optomux Protocol	EACH	240.00
691-0277. B200. 16-Channel.Analog Brain Mistic/Optomux Protocol	EACH	250.00

Optomux Brain Boards

691-0278. B1. 16-Channel Digital Brain Optomux Protocol	EACH	221.00
691-0279. B2. 16-Channel Analog Brain Optomux Protocol	EACH	225.00

Pamux Brain Boards

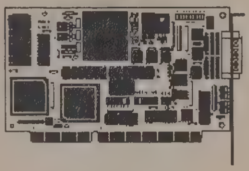
691-0280. B4. 32-Channel Digital Brain Pamux	EACH	158.00
691-0281. B5. 16-Channel Digital Brain Pamux	EACH	151.00
691-0282. B6. 16-Channel Analog Brain Pamux	EACH	310.00

DeviceNet Brain Boards

The Opto 22 DeviceNet brain board allows DeviceNet customers to take advantage of Opto 22 I/O. The DeviceNet brain board, operating as a Group 2 slave, can be integrated with Opto 22 Classic and SNAP digital mounting racks.

691-0283. BD-DEVNET. 16-Channel Digital Brain DeviceNet	EACH	295.00

Interfaces



AC37 PC Adapter Card

Opto 22's interface layer is divided into two segments: Interface Cards for Opto 22 controllers and Traditional adapter cards that support a wide variety of communication options. Traditional adapter cards include PC adapter cards and standalone adapter cards to facilitate communication between Opto 22's control system and a wide range of third-party computers, devices, and protocols. Opto 22 offers a variety of bus-based adapters to fully harness the power of the PC in industrial control.

Traditional Adapter Cards

PC Adapter Cards

PC adapter cards provide a direct connection from the PC to Opto 22 serial addressable intelligent I/O and parallel addressable I/O as well as direct connection to I/O mounting racks. PC adapter cards are designed to provide high-speed, noise-immune communications to many third-party devices.

691-0301. AC5. ISA Bus to Card Edge I/O Rack with 6-Ft Cable	EACH	140.00
691-0302. G4AC5. ISA Bus to Header I/O Rack with 6-Ft Cable	EACH	140.00
691-0303. AC24AT. ISA Bus Serial Port RS422/485, Isolated	EACH	190.00
691-0304. AC28. ISA Bus to Pamux Bus Adapter	EACH	170.00
691-0305. AC37. ISA Bus High Speed Serial Co-Processor, RS485	EACH	550.00
691-0306. AC39. ISA Bus to Local Bus Adapter — AT	EACH	395.00
691-0307. AC42. ISA Bus Fiber Optic Serial Co-Processor	EACH	550.00
691-0308. AC422AT. ISA Bus Serial Port RS422/485, Non-Isolated	EACH	155.00

Stand Alone Adapter Cards

Standalone adapter cards include the latest in fiber optic repeaters, and provide RS232 to RS485 conversion, modem support, and addressability for RS232 devices.

691-0309. AC7. RS232 to 422/485 Converter	EACH	85.00
691-0310. AC7A. RS232-RS422/485 Converter 120 V	EACH	105.00
691-0311. AC7B. RS232-RS422/485 Converter 220 V	EACH	105.00
691-0312. AC8. Half Duplex Modem Interface	EACH	170.00
691-0313. AC8A. Half Duplex Modem Interface 120 VAC	EACH	250.00
691-0314. AC8B. Half Duplex Modem Interface 220 VAC	EACH	250.00
691-0315. AC30A. RS485 Multidrop Repeater 120 VAC	EACH	105.00
691-0316. AC30B. RS485 Multidrop Repeater 220 VAC	EACH	105.00
691-0317. AC31A. Addressable RS232 Interface 120 VAC	EACH	295.00
691-0318. AC31B. Addressable RS232 Interface 220 VAC	EACH	295.00
691-0319. AC31C. Addressable RS232 Interface DC	EACH	295.00
691-0320. AC36. Multibus to Pamux Bus Adapter	EACH	120.00
691-0321. AC38A. High Speed RS485 Repeater 120 VAC	EACH	365.00
691-0322. AC38B. High Speed RS485 Repeater 220 VAC	EACH	365.00
691-0323. AC40A. Fiber Optic Repeater, 120 VAC	EACH	550.00
691-0324. AC40B. Fiber Optic Repeater, 240 VAC	EACH	550.00
691-0325. AC40C. Fiber Optic Repeater, 24 VDC	EACH	590.00
691-0326. TERM 1. Pamux Bus Termination Card	EACH	30.00
691-0327. TERM 2. Pamux Bus Termination Card Shielded Cable	EACH	30.00
691-0328. UCA4. General Purpose Pamux Interface	EACH	120.00

Controller Interfaces

Modular Controller Interfaces

Opto 22's interface products for Modular controllers include plug-in cards that provide Ethernet, Arcnet, RS485, and Fiber Optic communications. The Ethernet interface provides TCP/IP support, allowing the Opto 22 Modular controller network to be integrated into enterprise networks.

691-0329. M4SARC. M4 Arcnet Adapter	EACH	210.00
691-0330. M4SARCF. M4 Arcnet Adapter Fiber Optic	EACH	350.00
691-0331. M4SARCFR. M4 Arcnet Repeater Fiber Optic	EACH	450.00
691-0332. M4SENETC. M4 Ethernet Adapter Coaxial Cable	EACH	595.00
691-0333. M4SENETU. M4 Ethernet Adapter Unshielded Twisted Pair	EACH	595.00
691-0334. M4SSER. M4 Serial Adapter Card	EACH	210.00

ISA Controller Interfaces

ISA controller interface cards come in two types, one with an Arcnet port and the other with three serial ports. ISA interface cards and the ISA controllers plug into a PC backplane.

691-0335. G4LC32ISAARC. ISA Arcnet Adapter For G4LC32ISA	EACH	210.00
691-0336. G4LC32ISASER. ISA Serial Adapter For G4LC32ISA	EACH	210.00

Classic Controller Interfaces

Opto 22's Classic SX controller offers two types of interface cards. One features two RS232/485 serial ports, the other offers two RS485 ports and an Arcnet port.

691-0337. G4LC32ARC. Classic Arcnet Adapter For G4LC32SX	EACH	270.00
691-0338. G4LC32SER. Classic Serial Adapter For G4LC32SX	EACH	270.00

Single Board Controller Interfaces

691-0339. EX1. Pamux Adapter for LC4	EACH	140.00
691-0340. EX2. Serial/Pamux Adapter for LC4	EACH	140.00

Cables and Miscellaneous Accessories

Cables

691-0351. CA10. 10-Ft Cable Edge to Edge.	EACH	60.00
691-0352. CA2. 2-Ft Cable Edge to Edge	EACH	36.00
691-0353. CA4. 4-Ft Cable Edge to Edge	EACH	42.00

Ruggedly constructed relay offered with silver contacts, code "Y", rated 5 Amps; and silver-cadmium oxide contacts, code "G" rated 10 Amps. Contact arrangements are available up through 3 form (3PDT). Expected life exceeds 100,000 operations at rated load. Mechanical life is 10 million operations, minimum. Enclosed in a clear dust cover. U.L. recognized under file E22575. Low cost version of the KRP relay.

KRPA-N Series has an indicator lamp wired in parallel with its coil, making this model ideal for voltage or current monitoring applications. Silver-cadmium oxide contacts are rated 10 Amps. KRPA-N specifications are identical to those of other models in the KRPA series.

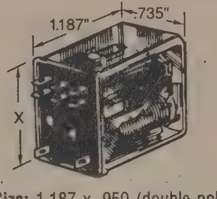
R10 Series
DC Industrial Relays



Transparent enclosures. Solder terminals for stud or plug-in mounting. **Mechanical Life:** 100 million operations/ Y series contacts are fine silver. X series contacts are silver-cadmium oxide. **Operating Temperature:** –55° to 75°C. **Size:** 1.187 x .950 (double pole models only) x .735" (3.02 x 2.41 x 1.85cm) max. **Wt.:** 1 1/2 oz. (42.5gm). **Contact Rating:** Y Series 3A; X Series 5A.

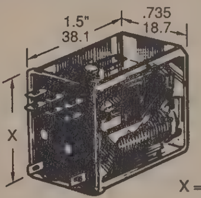
R10S Series
CMOS-TTL Compatible Relays



X = 1.0"/25.4 (2 PDT)

Will accept drive directly from many CMOS and TTL ICs–no interface needed. Contacts are .078" in dia. made of fine silver. **Resistive Load Rating:** 28VDC or 115VAC form. 0.1 to 3A max. **Insulation Resistance:** 10,000 meg. at 25° C and 50% R.H. **Typical Capacitance:** Contact-contact, 2 picofarads; coil frame, 30 picofarads; Coil-contacts, 2 picofarads. **Temperature Range:** -55°C to 75°C. Has pierced solder terminals. **Weight:** 0.8 to 1.4 oz. **Rated:** 2 Amps Typ. (3 Amps max.).

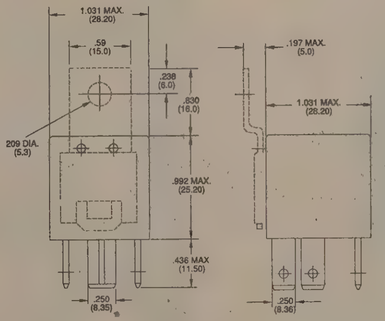
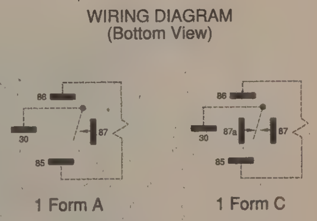
VF4 Automotive Relays





Plastic enclosed relay. 40 Amp contact rating with 1 Form A and 1 Form C contact arrangements. Quick connect or P.C. board terminals. Standardized design for many automotive applications in the United States. **Contacts:** 1 Form A (SPST-NO) and 1 Form C (SPDT). **Contact Material:** Silver-Nickel. **Operating Voltage:** 12 VDC. **Weight:** approx 1.1 oz.

KUHP Series

KUHP Series relays are an extension of the KUP product line, offering 30 amp switching capability in a 1 Form C (SPDT) configuration and 20 amp switching capability in a 2 Form C (DPDT) configuration. This relay has been designed to meet the requirements of international regulatory agencies such as BSI and VDE for many applications. Enclosed KUHP relays are equipped with slotted flanges for bracket mounting to a chassis. Termination to this relay is normally facilitated by .250" (6.35 mm) push-on terminals or by solder connection. Contact material for the KUHP is silver-cadmium oxide.

KUMP Series

► **UL File E22575**

► **CSA File LR15734**

KUMP Series relays offer higher current ratings than those available in the KUP series but relay dimensions, wiring diagrams and operating characteristics are the same. Relay types ending with "18" mount in the same sockets as the KUP series relays. Relay types ending with "5G" have a side-flange mount case for surface mounting and have .250" (6.35mm) by .032" (0.8mm) quick connect terminals.

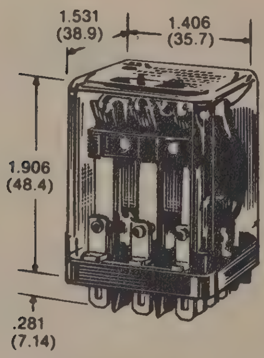
KUP Series Enclosed Relays



KUP Series relays are U.L. recognized under File E22575 and CSA certified under File LR15734. They are ideally suited for many diverse applications. "A" in the manufacturer's type number denotes 50/60 Hz coil; "D" denotes DC coil. Relays are socket mountable with these exceptions: types KUP11A25, KUP14A25 and KUP14D25 are socket mountable with push-to-test button for manually actuating contacts. KUP14A35, KUP14D35, KUP11A35 and KUP11D35 types are socket mountable with highly visible neon lamps which indicate the presence of coil power. KUP14A45 is socket mountable with neon indicator and push-to-test button. KUP5A55, KUP5D55, KUP11A55, and KUP11D55 have flange mount cases. Relays have silver-cadmium oxide, 10 amp contacts with .187" (4.8mm) by .020" (0.5mm) quick connect/solder terminals except for types KUP11A11, KUP11D11, KUP14A11, and KUP14D11, which have fine silver, 5 amp contacts with .187" (4.8mm) by .020" (0.5mm) quick connector/solder terminals.

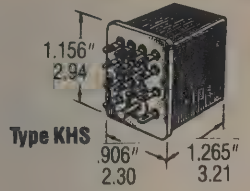
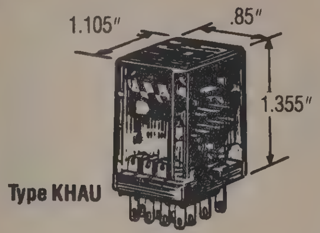
KH Series Miniature 4PDT Relays

Small, Rugged Relays for AC and DC Operations.



Type KHS



Type KHAU

KHAU relays are manufactured using automated techniques to provide dependable, low cost switching in a package only slightly larger than a cubic inch. KHAU has smoke-grey polycarbonate dust cover. KHS, hermetically sealed with metal cover. All models U.L. Recognized. KHS is recognized for class 1 division 2 hazardous environments. Silver contacts, rated 3 amps at 28VDC, or 120VAC res. Solder term, 3-48 mtg. stud. 2 oz. (57gm). All fit KH Series sockets.

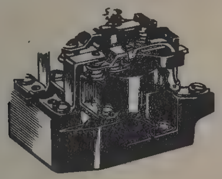
PRD Type Heavy Duty Power Relays



PRD relays are interchargeable with PR relays; same size and mounting holes. Improved design allows use of power screwdrivers on terminals. All models are U.L. and CSA listed and have silver contacts. Model PRD-3AYO is rated 40 amps, all other rated 25 amps. **Mounting:** two .188" dia. holes on 1.875" centers. **Weight:** 11 oz.

PM17 4DPT 25-Amp Power Relays

4PDT for polyphase and heavy-duty switching. Contacts are silver-cadmium-oxide. Rated at 25 amps, 240V, 50-60 Hz, non-inductive. 1 HP per moveable arm at 120 or 240V single-phase. Mount by keyhole and 2 channels for 8-32 screws on 2 x 2$^1/_2$" triangular centers. Screw term. 2$^{45}/_{64}$ x 2$^{31}/_{32}$ x 3$^{23}/_{64}$." **Weight:** 1 lb. UL, CSA listed.

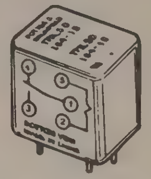
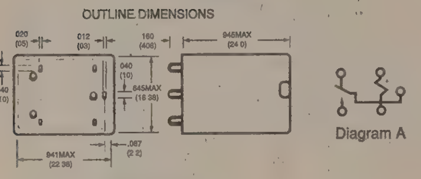
T70 Series Miniature Printed Circuit Board Relays





Wiring Diagrams
(Bottom View)

- **10 Million Mechanical Operations**
- **Low Power Consumption**

T70 Series relays are for printed circuit board mounting. Feature sealed, immersion-cleanable case. **Two Contact Materials Available**: Type number with code 31 are fine silver with gold flash, type numbers with code 64 are silver cadmium oxide. Contact arrangement 1 form C (SPDT). **Nominal Coil Power**: 360 mW. SPDT 1 form XX 10 amps. UL recognized, CSA certified.

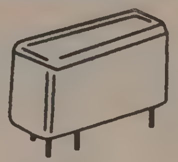
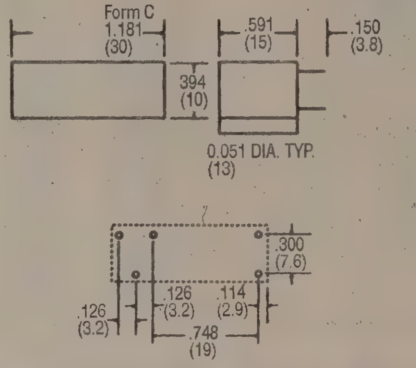
T75 Series Miniature DIP Relays





T75 Series relays feature high sensitivity for HVAC, appliance, security, and industrial applications. Nominal coil power requirement is as low as 212 mW. Low profile 0.591" (15.01) tall case uses only 0.465" (11.81) square of PC board for high-density circuit design. **Power Switching Capability:** 1 form C (SPDT) contacts rated 14 amps. **Coil Voltage:** 5-48 VDC. **Normal Power at 25°C:** 230 mW, typ. Continuous duty cycle.

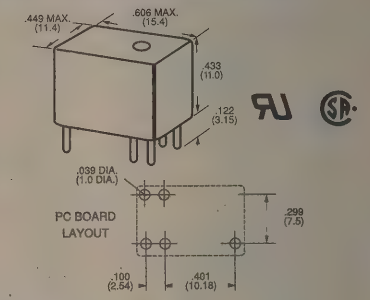
T81 Series Miniature High Density Printed Circuit Board Relays



- **High Dielectric**
- **Standard Coil and Sensitive Coil Models Available**
- **Ideal for Office Machines, Logic and Process Control**

T81 Series relays are ultra-miniature devices for printed circuit board mounting. Permit high density packaging for savings in equipment size and cost. SPDT contacts are silver-palladium alloy with gold overlay provide load handling of 1 amp @ 24 VDC or 0.5 amp at 120 VAC, resistive. 81N Series are standard coil models and 81H Series are sensitive coil models. T81 relays are enclosed in an immersion cleanable polycarbonate case. Printed circuit terminals are on .100" × .300", DIP compatible grid layout. UL recognized, CSA certified. **Temperature Range:** –40°C to +55°C (standard coil); –40°C to +75°C (sensitive coil).

T84 Series 4 Pole High Dielectric Strength Miniature DIP Relays

- **Standard 28-Pin DIP**
- **Meets FCC Part 68 Isolation**
- **UL Recognized**
- **CSA Certified**

T84 Series relays designed for telecommunication applications. Dielectric strength between open contacts is 1000 Vrms. DIP termination allows direct PC board mounting or plugging into 28-pin IC socket. **Available Three Types:** Single coil non-latching, single coil latching and dual coil latching. All have polarized coils. Enclosed in permanently sealed plastic case backfilled with inert gas. Designed to withstand automatic wave soldering and immersion cleaning. **Contact Ratings Maximum Switching Voltage:** 250 VDC, 220 VAC. **Maximum Switching Power:** DC — 35 watts resistive load; AC — 60 VA resistive. **Maximum Switching Current:** 2 amps DC or AC. **Minimum Switching Current:** Dry circuit. **Maximum Carrying Current:** 2 amps DC or AC.

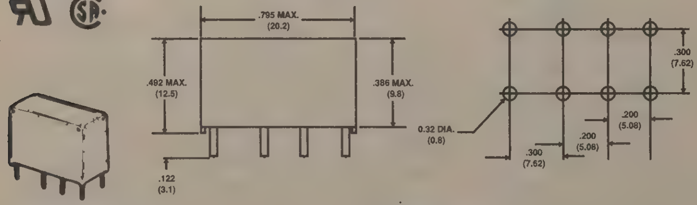
T85 Series High Sensitivity Dual In-Line Ultra-Miniature PC Board Relays



- **Ultra-Sensitive Coils**
- **Switch Up To 1.25 Amp**
- **UL Recognized**
- **CSA Certified**

T85 Series DIP relays are 2 form C DPDT and feature terminals on a .100" × .300" grid layout. This configuration permits terminal mating with a 16-pin-DIP socket. Relays are enclosed in PBT polyester dust cover designed for immersion cleaning applications using freon, alcohol or water. Contacts are bifurcated. Suitable for applications in telecommunications equipment, audio equipment and business machines. **Contact Ratings Maximum Switched Current:** 1.25 A, AC or DC with contact style "4"; 2 amp AC or DC with contact style "5". **Maximum Switched Voltage:** 60 VDC, 120 VAC with contact style "4"; 150 VDC, 125 VAC with contact style "5". **Maximum Switched Power:** 24 W or 60 VA with contact style "4"; 30 W or 62.5 VA with contact style "5". **Maximum Carry Current:** 2 amps. **Minimum Switched Current:** 10 µA, AC or DC. **Minimum Switched Voltage:** 50 µV, AC or DC. **Minimum Switched Power:** 25 µW, AC or DC.

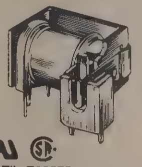
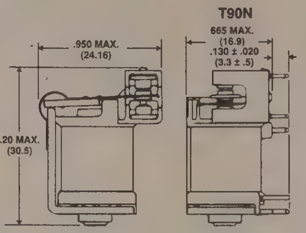
T90 Series Low Cost, 30 A, DC Coil PC Board Relay

T90 printed circuit board relays provide an inexpensive means of switching loads up to 30 A. While these small, low-cost relays are designed primarily for the appliance industry and heating, ventilating and air conditioning markets, they are also well suited for load management automotive and other applications. The T90 is available with silver-cadmium oxide contacts in 1 Form A or C arrangements. A plastic, snap-on dust cover is available for the open-style T90, but must be ordered separately. See below. Mechanical life expectancy of T90 relays is 10 million operations. Electrical life expectancy is 100,000 operations at rated loads. T90S is sealed version.



UL File E22575
CSA File LR15734



Coil Data. Temperature, Max.: 130°C. **Insulation Class:** B. **Insulation Resistance, Initial:** 1000 megohms, minimum, at 25°C, 500 VDC and 50% relative humidity. **Breakdown Voltage, Initial:** 1500 V rms, contact to coil. **Operate Data. Must-Operate Voltage:** Less than 75% of nominal voltage at 25°C. **Must-Release Voltage:** More than 10% of nominal voltage at 25°C. **Operate Time (Including Bounce):** 15 milliseconds, maximum. **Release Time (Including Bounce):** 15 milliseconds, maximum. **Environmental Data. Ambient Temperature Range:** Storage — –55°C to +105°C; Operating — –55°C to +85°C. **Vibration:** .065" maximum excursions from 10 to 55 Hz. **Resistance, Initial:** 50 milliohms, maximum. **Breakdown Voltage, Initial:** 1500 V rms, contact to contact. **Expected Life:** 10 million operations, mechanical; 100,000 operations at rated load.

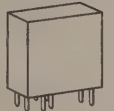
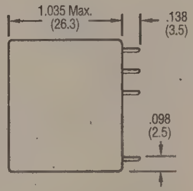
RKA Series 5 to 10 A PC Board Miniature Relays

- **Immersion Cleanable, Plastic Sealed Case.**
- **Designed To Meet VDE 8 mm Spacing, 4 kV Dielectric**
- **UL Recognized File E22575, CSA Certified LR72171**
- **VDE Licensed 1661, 1662**





RKA Series miniature relays designed for printed circuit board mounting. Relays are enclosed in plastic immersion cleanable case. Contacts are silver-nickel alloy except for types RKA-xDT-xx which are silver-cadmium oxide. All contact ratings are at 24 VDC or 240 VAC. **Initial Dielectric Strength From Coil To Contacts:** 5,000 V rms. **Maximum Power:** 1.4 W at +25°C. **Operating Temperature:** –40°C to +65°C. **Operating Time Excluding Bounce:** 14 ms typical. **Release Time Excluding Bounce:** 5 ms typical.

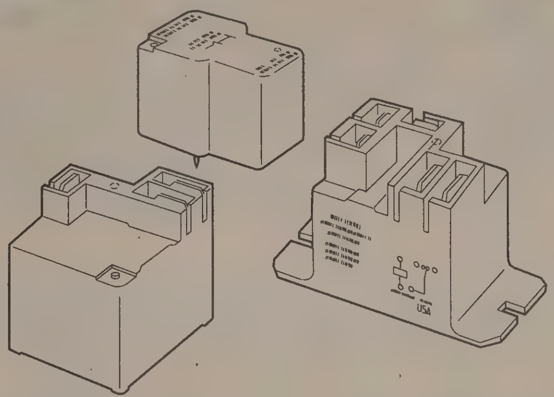
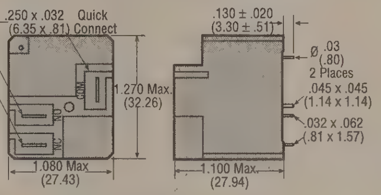
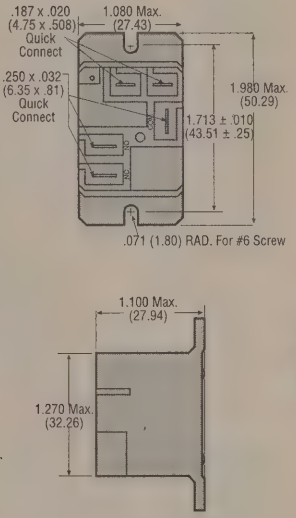
T9A Series



T9AS — Mounting and Termination Code 2

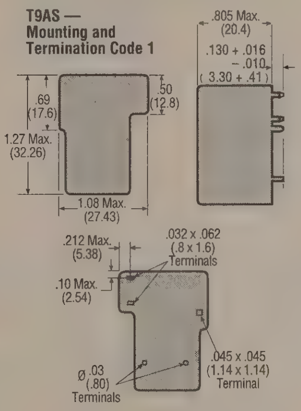


T9AP — Mounting and Termination Code 5

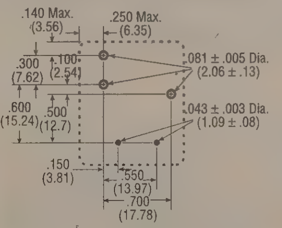


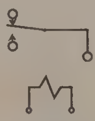
NOTE: Recommended mounting screw torque is 4.0-5.0 lbs.in when #6 screw is used.

T9AS — Mounting and Termination Code 1



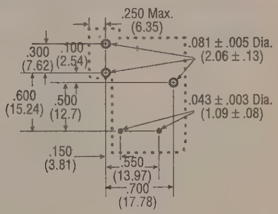
T9AS — Mounting and Termination Code 2





1 Form C
(Unused Terminals
Are Not Present)

T9AP/S — Mounting and Termination Code 1



T9A Series are low cost, printed circuit board or panel mount relays. Up to 30 A switching in SPST and 20 A in SPDT arrangements. Silver-cadmium oxide contacts in 1 Form A (SPST-NO) and 1 Form C (SPDT). Available in unsealed, plastic dust cover (T9AP) or immersion cleanable, sealed plastic case (T9AS). UL Class F insulation system standard. Well suited for various industrial, commercial and residential applications.

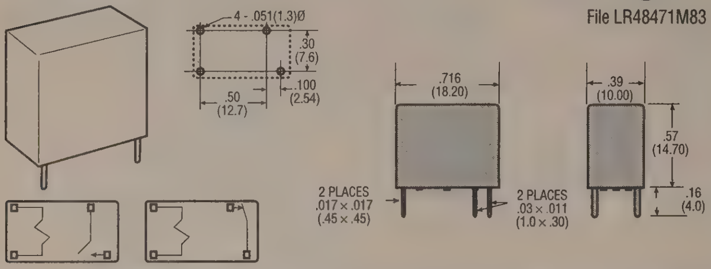
T77 Series

File LR48471M83



Up to 10 AMP miniature PCB Relay. Small size for high density PC Board mounting. 1 form A (SPST-NO) contact arrangement. Creepage spacings of 6.5 mm between contact and coil. **Contact Material:** Contact Rating 3 — Silver; Contact Rating 10 — Silver alloy. **Enclosure:** V = Vented (flux-tight not suitable for immersion cleaning); 5 = Plastic epoxy resin sealed. Ideal for appliance and office equipment.

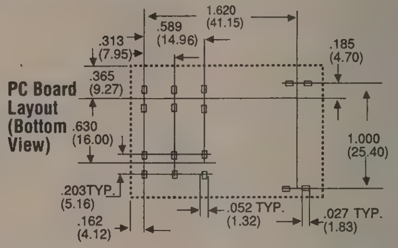
T92 Series P.C. Board Relays



T92 Series relays are DPDT configuration with 30 amp switching capabilities, immersion cleanable, tape sealed plastic case. Designed to control compressor loads to 3.5 tons, 25.3 FLA, 110 LRA. Meets requirements of UL873 and UL508 spacings. Meets requirements of VDA 8 mm spacing, 4 KV dielectric coil-to-contacts. Meets requirements of UL class F Construction. **Contact Material:** Silver cadmium oxide. Printed circuit terminals. **Weight:** 2.95 oz. approximately.

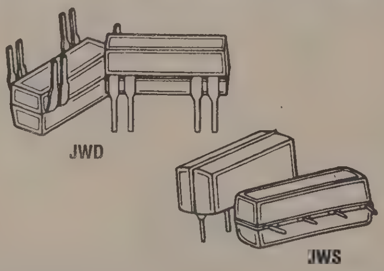
Multifunction DIN Mount Time Delay Relay

- ▶ **5 Programmable Timing Modes**
- ▶ **0.5 Sec. To 100 Min. Programmable Timing Range**
- ▶ **Universal Input (24-240 VAC/VDC)**
- ▶ **10 A Output Relay With SPDT Contacts**
- ▶ **Timing Range and Timing Function Switch Selectable**
- ▶ **Time Adjust Is Potentiometer Adjustable**
- ▶ **Fits 35 mm DIN Track**

Universal input model, 24-240 VAC/VDC, screw termination. Plastic DIN Case. Silver-cadmium oxide alloy, 1 form C (SPDT) contacts. **Contact Rating:** 10 A @ 28 VDC or 240 VAC, Resistive; 1/2 HP @ 480 VAC; 1/3 HP @ 240 VAC; 1/4 HP @ 120 VAC. Transient protection and reverse voltage protection. **Timing Adjustment:** Potentiometer adjustable within selected range.

886-2150. Type CND ....**EACH 91.53**

JWD Series DIP and JWS Series SIP Dry Reed Relays



JWD Series DIP units and JWS Series SIP units are designed not only to accommodate automatic component insertion but to permit high density packaging of components on printed circuit boards as well. Relay's mounted height is only 0.315" (8.00), allowing PC board spacing on 0.500" (12.70) centers. Molded epoxy package with terminals on 0.100" (2.54) centers compatible with automatic wave soldering, and can be immersion or spray cleaned. Will withstand 100g shock and vibration to 20g between 10 and 5000 Hz. **Operating Temperature Range:** –35°C to +85°C.

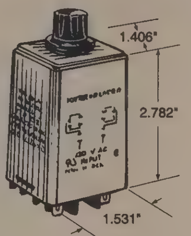
CUB51 Time-Delay Relays



Knob-adjustable delay-on-operate time delay relays. DPDT contacts 10A at 28VDC resis., or 120V, 60 Hz AC. 80% power factor. **Tol.:** adjust., –0, + 20% of max. specified at high end; min. specified or less at low end. **Release:** 150 msec. **Recycle:** 150 msec. **Transient Protection:** Yes. Polarity protected. Operate room temp. Timing intervals adjust, over timing ranges *1 to 10 secs. or † 1 to 120 secs. 1.53 x 1.406 x 2.78" (3.87 x 3.57 x 7.07mm) (including knob). 120VAC. 3¹/₂ oz.

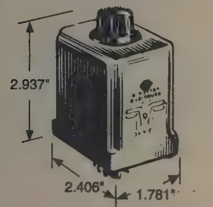
CB Series Relays



CB series relays are economy, octal-type plug-in models with CMOS integrated circuits. Available in delay-on-operate, delay-on-release or interval on timing modes, all units are knob-adjustable. Molded enclosure houses the timing circuit and an internal relay. All models are DPDT, except type **CB-1022B78** which is SPDT. Contacts rated 10 amps at 240VAC, 6Hz. Power requirements typically less than 3VA for AC types; 3 watts for DC types. **Operating temperature range:** -10°C to + 55°C. Polarity protection. UL recognized, CSA certified.

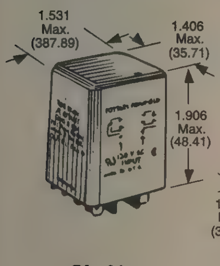
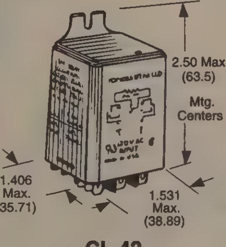
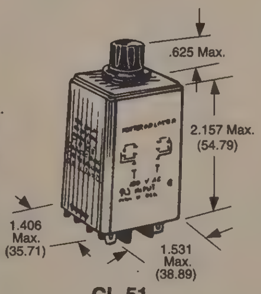
CL Series Time Delay Relays



CL-41



CL-42



CL-51

Delay on operate. Similar to the CU Series except they don't have timing cycle interrupt transfer and will time to .1 second. DPDT rated at 10 amps. CL relays are enclosed in yellow polycarbonate dust covers. Plug-in/quick connect terminals. Uses KU Series sockets. Available in fixed, resistor adjustable and knob adjustable. **Weight:** Approx. 3.5 oz. External resistor not included.

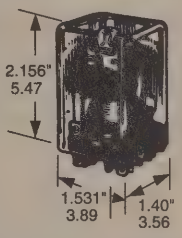
KUL Magnetic Latching Relays



Continuous duty single coil types. Uses a permanent magnet in parallel with normal magnetic circuit, requires only half the space of mechanical interlock types. Continuous latch condition even during loss of power. Contacts rated 10 amps at 28VDC or 120VAC, 80% power factor. **Temp. range:** –45° to 70°C. All are DPDT. **Av. wt.:** 3¹/₂ oz.

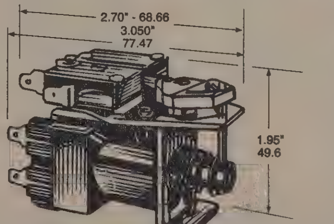
Impulse Relays



The S89R is a bistable, impulse relay that can affect a savings of power in applications where the load is on for long periods of time. Contact rating is 15 amps, ¹/₂HP, 125/250VAC amps, 125VAC tungsten filament lamp load; ¹/₂ amp, 125VDC; and ¹/₄ amp, 250VDC. Life expectancy at full load is 50,000 operations minimum; 100,000 operations, mechanical. Operating temperature range is –10°C to +60°C. Mounting is by two #8-32 tapped holes on 1.844" (46.83 mm) centers. "ACI" indicates .187" (4.75 mm) quick connects. S90 relay is identical to the S89 Series except that terminals are .250" (6.35 mm) quick connect and contacts are rated at 20 amps. Coil for both series are rated for continuous duty operation.

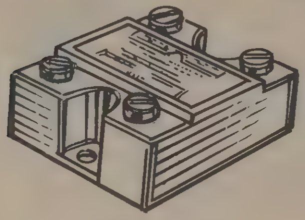
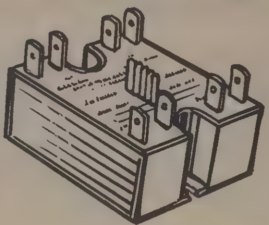
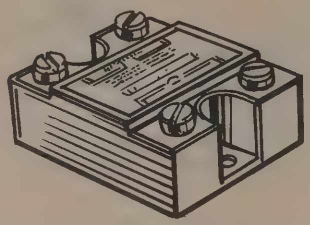
Solid State Relays



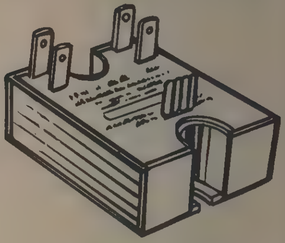
SSR Series



SSRQ Series



SSRT Series



SSRD Series

SSR Series

SSR Series is a medium/high power, 120/240 VAC, 47-70Hz inverse parallel SCR output solid state relay that is controlled by an opto-electronic coupler intended for use as On/Off switch for loads through 110 amps. Ideal for interfacing between logic output of TTL, HTL, or MOS and AC loads such as solenoids, motors and transformers.

*R = Random Voltage Turn-on.

SSRQ Series

SSRQ series relay comprises four totally independent, optically isolated, triac output solid state relays in one standard package. Designed to be used as four On/Off switches for loads through 20 amps.

Stock No.	Mfr.'s Type	Line Voltage	Input Voltage	Max. Switching Rating/Output	EACH

886-7024	SSRQ-240D20	24-280VAC	4-15 VDC	20A rms	94.13	89.14

SSRT Series

SSRT series relay ia a triac output solid state relay that is controlled by an opto-electronic coupler. Intended for use as an On/Off switch for loads through 25 amps. EMI and RFI are greatly reduced due to zero voltage turn-on and zero current turn-off of the load. 1 Form A (SPST-NO). Plastic case is UL rated self-extinguishing.

Input/Output Modules

Slim Line Input/Output Modules

Slim line input/output modules provide interfacing between microprocessor- or computer-based control systems and external input devices and loads such as switches, sensors, valves and motor starters. Offered in four photo-isolated versions: AC input, AC output, DC input, DC output. Units are color-coded and have high isolation and noise immunity. Packaged in a 0.4" enclosure for replacement without disturbing wiring. On modules of the same voltage, output is compatible with input of the input module. Ideal for series operation. 1 Form A (SPST-NO).

Solid State Input/Output Modules

A reliable interface between microprocessor- or computer-based control systems and external input devices and loads, these photo-isolated modules feature excellent isolation and transient immunity. On modules of the same voltage type, AC or DC, the output of the output modules is compatible with the input of the input modules, making them ideal for series operation. Modules are color-coded and packaged in industry standard plug-in enclosure. Units interchange easily without disturbing wiring. UL recognized, CSA certified. Order mounting boards separately below.

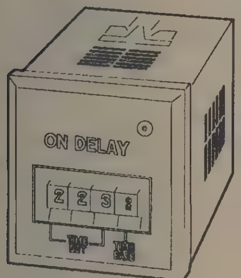
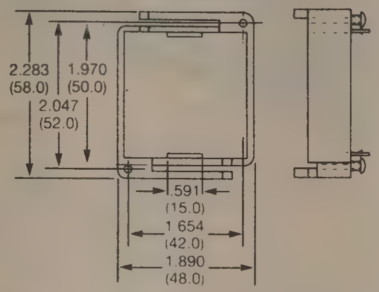
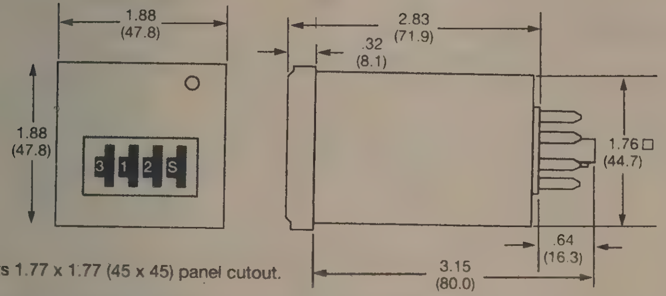
CN1 Series



SSA-24C667
MOUNTING CLIP





Fits 1.77 x 1.77 (45 x 45) panel cutout.

On Delay, Time Delay Relay for Plug-in or Panel Mounting. Output relay turns on at the end of a programmed time interval which is started by applying input voltage. LED flashes when output relay is off and is on continuously when the output relay is on. Removal of input voltage turns off output relay. Reapplying input voltage resets the unit. **Timing:** 0.1 sec. to 9,990 hr. Adjustable with thumbwheel switches. **Contacts:** 2 form C (DPDT) silver-cadmium oxide alloy. **Input Voltage:** 120 VAC ±15%, 60 Hz. **Rating:** 10A @ 30 VDC or 277 VAC, resistive; 1/2 HP @ 250 VAC. **Termination:** 8-pin octal style plug. **Enclosure:** Black plastic 1/16 DIN (48mm x 48mm) case. **Sockets:** Fits either 27E122 or 27E891 (snap-on) screw terminal sockets. **Weight:** 4.3 oz.

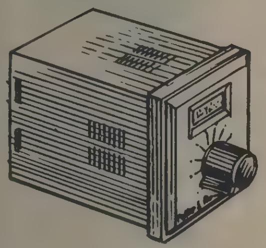
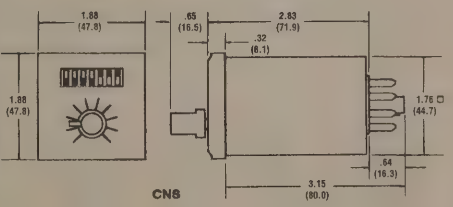
CNS Type Multi-Function, DIP Switch Programmable, Knob Adjustable, Time Delay Relay





CNS

CNS series are economical, multi-functional, programmable, time delay relays housed in 1/16DIN style enclosures. Available programmable functions in units with 8-pin octal-style bases are delay on operate, interval on, recycler – initially on and recycler – initially off. Units with 11-pin octal-style bases provide those timing functions plus delay on release, interval off, inverted delay on release and an additional interval on function. Timing function and range is selected by a DIP switch, and actual delay time is set with an adjustment knob and calibrated dial. Delay is selectable on all units from .1 sec. to 100 min. All models have DPDT output contacts rated 10 amps @ 240VAC/30VDC. Operating temperature range is –10°C to +55°C.

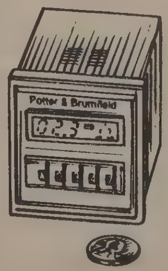
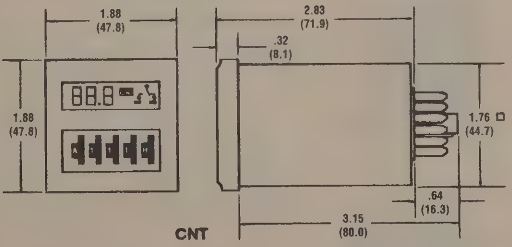
CNT Type 12-Function Digitally Programmable Time Delay Relay/Counter





CNT

CNT series are multi-functional, programmable, time delay relays/counters housed in 1/16 DIN style enclosures with an octal-style 11-pin plug-ins. The units feature thumbwheel switches for digital programming. An LCD digital readout permits easy monitoring of status. Available programmable functions are delay on operate, delay on release, three interval on functions, delay on operate and release, cumulative delay on operate, 50% duty cycle recycler, output pulsing, single cycle, up counter and down counter. Delay is selectable from .1 sec. to 9990 hours. Counter range is selectable from 1 to 99,900 counts. All models have DPDT output contacts rated 10 amps @ 240VAC/30VDC. Operating temperature range is –10°C to +55°C.

Track and Mounting Accessories

Mounting track and holding clips for screw terminal sockets. The Track 24A110 is available in three foot length with mounting holes on 6" centers. Track can be cut to shorter lengths for small chassis assemblies or full sections can be used end-to-end in larger installations. Made of lightweight, sturdy extruded aluminum, track accepts several styles of screw terminal sockets: KU Series 27E121, 27E867 and 27E893; Octal Type 27E122, 27E123, 27E891 and 27E892; KH Series 27E166 and 27E894; R10 Series 27E460, 27E461 and 27E462; and K10 Series 27E487 and 27E895. The track will also mount the following relays: EOTZ, KUB, PM, PRD, SSR, SSRD, SSRQ and SSRT.

Multifunction Model GLR2U

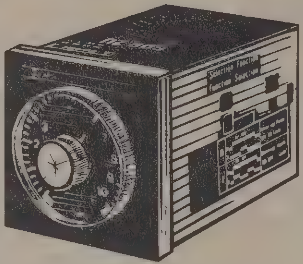
- ▶ 4 Functions in One Unit
- ▶ Multi Time Range (0.1 Sec. to 10 Hrs.)
- ▶ DPDT 10 Amp Relay Output
- ▶ LED Indicators — Power/Relay Status

Four Function Timer: Delay on make, single shot, delay on break, interval timer. Slide switch selects time range in seconds, minutes, or hours. Easy to set dial for direct reading. Fits standard 11-pin sockets. Also available in DIN-rail version (FLR2U). Other voltages available on special order.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5004	GLR2U	110 VAC	61.34

Repeat Cycle Timer Model DR2U

- ▶ Large Dial Face with Independently Adjustable "ON" and "OFF" Time Range
- ▶ 10 Amp DPDT Relay Output
- ▶ LED Relay and Power Status Indicators
- ▶ Dual Voltage



Selection of the time ranges (.1 sec. to 10 hrs.) is made by slide switch on the front of the case. "On" or "Off" time first is also switch selectable. Inner dial selects "On" time; outer dial selects "Off". 48 × 48 mm size for easy panel mounting. Dual voltage feature is identical to CHRONOS series. 110 VAC.

Delay on Make Model MAXR2U

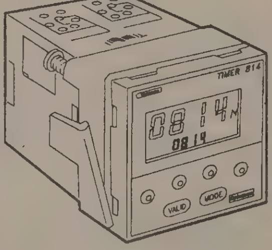
- ▶ 2 Delayed SPDT or 1 Delayed SPDT and 1 Instantaneous SPDT
- ▶ Multi Time Range (0.1 Sec. to 10 Hrs.)
- ▶ 48 × 48 mm
- ▶ LED indicators — Power/Relay Status

Selection of the two functions is programmed by a slide switch on the side of the timer. Easy to set dial for direct reading. Fits standard 8-pin sockets. Also available in DIN-rail (FAXR2U), or 11-pin plug-in (GAXR2U). Other voltages available on special order.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5006	MAXR2U	110 VAC	58.40

814 Series Multifunction Timer

- ▶ 6 Modes of Operation
- ▶ LCD 0.3" Display
- ▶ Multirange Timing
- ▶ Din-Sized (48 × 48 mm) Housing
- ▶ Up or Down Timing
- ▶ SPDT 10 Amp Relay Output
- ▶ NEMA 12 Front Panel



The 814 timer is a multifunction timer with multi-time ranges (0.01 sec. to 999.9 hours) housed in a 1/16 Din (48 × 48 mm) style enclosure. Easy programming from the front panel push buttons allows selection of up or down timing. 6 different timing functions (delay on make, delay on break, interval, single shot, repeat cycle on time first and repeat off time first) and 11 different timing ranges. A large 4 digit LCD display indicates current and preset values as well as relay output, power input, and initiate switch status. Load such, as light bulb or contactor, can be connected to the start switch.

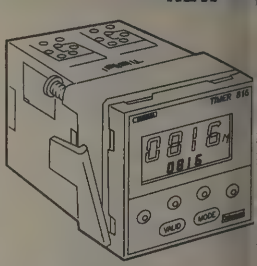
816 Series Multifunction Timer

— NEW —

- ▶ Red Backlit LCD Actual Display
- ▶ Multirange Timing
- ▶ DIN Sized (48 × 48 mm) Housing
- ▶ Up or Down Timing
- ▶ NEMA 12 Front Panel



The 816 series timer is a multifunction timer with dual display. A red backlit LCD display shows actual process time and a high contrast LCD display shows setpoint time. The 816 timer has eleven selectable time ranges (.01 sec. to 9999 hrs.) and is housed in a 1/16 DIN (48 × 48 mm) style enclosure. Front panel rating is NEMA 12. Relay output is SPDT, 8 amp. Side slide switch provides front panel lockout. Units accept multiple voltage inputs.

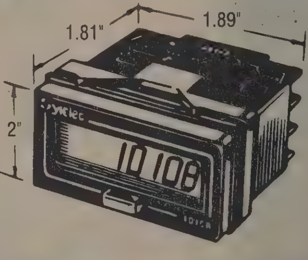
10108 Series Totalizing Counter, 10108H Elapsed Time Indicator and 10506 Programmable Elapsed Time Indicator



- ▶ 8 Digit 0.3" High LCD Display
- ▶ Totalizer or Elapsed Time Indicator
- ▶ Replaceable Battery Supply
- ▶ Custom CMOS Technology

The 10108 series consists of two models — the 10108 totalizer and the 10108H elapsed time indicator for recording time in hours and hundredths of hours (0.01 Hr.). Count input or time enable can be a contact closure. NPN or PNP open collector transistor, 2 or 3 wire proximity switch, or voltage pulse 24 VDC max. In addition, a voltage converter module, p.n. 10,000, will accept voltage inputs from 6 to 240 VAC/DC. Input speed is 40 Hz (low) or up to 5 KHz (high).

Count total or time is displayed on 0.3" high (7 mm) liquid crystal displays, LCDs. Power for the internal logic and displays is provided by two (2) Size N alkaline batteries with a projected four (4) year life. Mercury batteries, with an estimated eight (8) year life, can also be used. Two (2) of the alkaline batteries are included with each unit.

Stock No.	Mfr.'s Type	Description	EACH

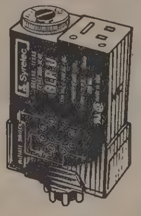
Syrelec
A Crouzet Company

The new CHRONOS series of Timers is now available from Syrelec that will make ordering a much simpler process. Time setting and testing is simplified by the dial face and direct reading capability. Featured below are the five models including, Multifunction, Repeat Cycle, Delay on Make (two versions), and Delay on Break. CHRONOS Timers feature dual voltages in the following combinations: 48 VAC/DC or 24 VAC/DC.110 VAC or 24 VAC/DC.220 VAC or 24 VAC/DC. 12 VDC is also available on all CHRONOS models on special request. SPDT or DPDT relay outputs available on all models.

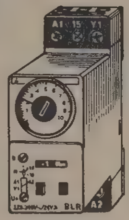
CHRONOS Multi-Function Model OLRU

- 4 functions in one unit
- Multi time range (0.1 sec to 10 hrs.)
- SPDT or DPDT 10 Amp Relay Output
- LED Indicators – Power/Relay Status

Four Function Timer: delay on make, single shot, delay on break, interval timer. Slide switch selects time range in seconds, minutes, or hours. Easy to set dial for direct reading. Fits standard 8-pin sockets. For DIN-rail mounting, order Model BLRU. TLR2U fits standard 11-pin socket.

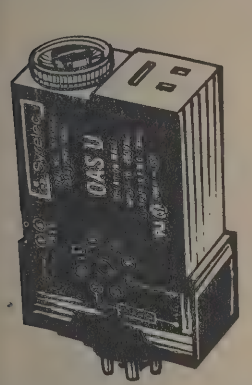


OLRU



BLRU

Stock No.	Mfr.'s Type	Voltage	EACH
793-5000	OLRU	110VAC/24VAC/DC	51.90
793-5001	BLRU	110VAC/24VAC/DC	53.39
793-5025	TLR2U	110VAC/24VAC/DC	48.00



CHRONOS Delay on Make Model OARU/OASU

- Multi Time Range (0.1 sec. to 10 hrs.)
- SPDT or DPDT 10 Amp Relay Output OARU/OAR2U or SCR Solid State Output OASU
- LED Indicators – Power/Relay Status OARU/OAR2U

For the relay output version OARU, when input power is applied, the relay delays the preset time period prior to energizing. The model OASU, delays the solid state output for the preset time period prior to turning on. Next timing cycle begins when the input power is reapplied. Fits standard 8-pin sockets.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5500	OARU	110VAC / 24VAC/DC	36.58
793-5501	BARU	110VAC / 24VAC/DC	35.11
793-5502	OASU	10-260VAC/DC	32.50

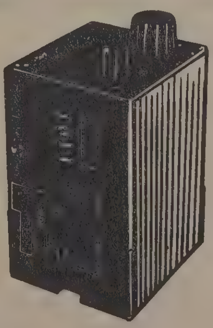
793-5026	OAR2U	110VAC	35.20

Current Control Relays IR.T and IAR.T Series

- Automatic or Manual Control
- Start-Up Inhibit
- Adjustable Hysteresis
- Multiple Voltages
- LED Relay Status Indicator



IR.T Series will monitor current ranges of 5 mA up to 10 A, and can be set for latching or non-latching operation. The IAR.T series monitors 5 A to 100 A (Peak to Peak) with the addition of a TIXP3 Current Transformer. All are 110 VAC. Other voltages available from factory upon request.

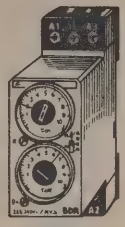
Stock No.	Mfr.'s Type	Description	EACH
793-5519	LIR.T	11 Pin Plug-In	62.36
793-5520	DIR.T	DIN Rail Mount	65.48
793-5521	LIAR.T/TIXP3	1 Pin Plug-In w/current transformer	95.00
793-5522	DIAR.T/TIXP3	DIN Rail Mount w/current transformer	95.00
793-5523	TIXP3	Additional current transformer	32.50

CHRONOS Repeat Cycle Model ODRU

- Multi Time Range (0.1 sec to 10 hrs.)
- SPDT or DPDT 10 Amp Relay Output
- LED Indicators – Power/Relay Status
- Individual "on" and "off" settings

Time range selection is made by dip switches on the case. T1 is the adjustable "off time" for relay R and T2 is the adjustable "on time". When input power is applied, the relay will alternate between "off and on" according to the preset times selected. For DIN-Rail mounting, order Model BDRU.

ODRU



BDRU

Stock No.	Mfr.'s Type	Voltage	EACH
793-5002	ODRU	110VAC	60.16
793-5003	BDRU	110VAC	59.58

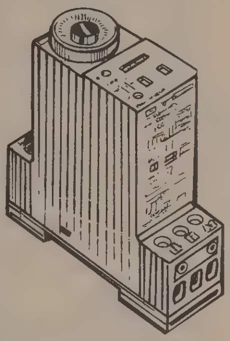
793-5029	TDR2U	110VAC / 24VAC/DC	59.00



CHRONOS Delay on Break Model OCRU

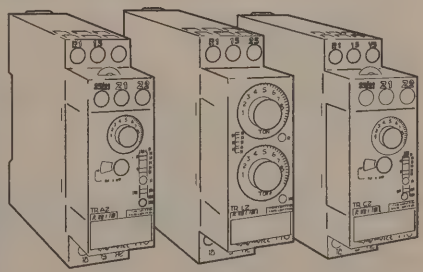
- Multi Time Range (0.1 sec. to 10 hrs.)
- SPDT or DPDT 10 Amp Relay Output
- LED Indicators – Power/Relay Status

Input power is continuously supplied to the timer. When an external initiate switch is closed, the output relay is energized. Timing begins when the initiate switch opens. At the end of the delay time, the output is de-energized and the timer is ready for another cycle. Fits standard 8-pin sockets.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5504	OCRU	110VAC /24VAC/DC	42.48
793-5505	BCRU	110VAC /24VAC/DC	41.58

TR 2 Series DIN Rail Timers

- Slimline 22.5 mm Enclosure
- Multi-Time Ranges
- 2 SPDT Output Ranges



The TR 2 Series are timers in a slimline DIN rail mount enclosure. TR2 timers are available in Delay on Make, Delay on Break, and Repeat Cycle operating modes. The TR Series features multiple supply voltage ranges, LED timing and output indication and a remote panel mount potentiometer option. Output relay can be programmed either as 2 SPDT delayed outputs or 1 SPDT instantaneous output and 1 SPDT delayed output.

RF Relays Series RF170 and Series RF300 and RF303

- Hermetically Sealed
- Gold Plated Contacts
- Frequency RF170 DC to 4 GHz
- Frequency RF300, RF303 DC to 3 GHz

The RF170 series are DPDT magnetic latching relays designed to optimize isolation across contacts and poles.

The RF300 and RF303 relays are DPDT relays designed to provide RF signal repeatability over the frequency range by balancing the aggregate insertion loss of the relays' design.

General Purpose Armature Relays Series 172, 712, and 722

- Hermetically Sealed
- Surface Mount (S172 Series)
- Gold Plated Contacts
- Dry Circuit to 1 A 28 VDC
- Excellent RF Performance, DC to 1 GHz

Commercial versions of Teledyne Relays' DPDT, Established Reliability, T²R® relay line. Hermetic sealing, uni-frame design, all welded construction and gold plated, precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low inter contact capacitance provide excellent RF switching capability well into the UHF spectrum.

Solid State Computer Input/Output Interface Modules

C76 DIP I/O™ System Optically Isolated — TTL/CMOS Logic Compatible Control

Teledyne Solid State C76 DIP I/O™ Modules are designed for use in computerized control systems for noise-free isolation interfacing of computer logic to harsh industrial environments. Eliminates mounting tracks for low per point cost. Features CMOS and TTL compatibility, optical isolation, high noise immunity and function on input modules. For use in robotics, computerized process control, programmable controllers and ATE.

601 Series

- ► Optically Isolated
- ► Zero Voltage Turn-On
- ► 5 and 10 Arms
- ► PC or Rack Mount Options
- ► TTL Compatible, Control Voltage 3.0 to 32 VDC
- ► Operating Temperature Range: –40°C to 80°C
- ► Plastic Package, 2.0" × 1.0" × 0.97"
- ► UL and CSA Registered

281-0010	C15-32	3-32 VDC	25 A	250	600	**18.35**

Inductive Proximity Sensors

Inductive Proximity Sensors are used to detect metal objects in many applications including automotive, automation systems, machine tools, conveyor systems, metal working, knitting industry, etc. Altech offers a broad line of sensor products in four packaging styles; cylindrical, limit style, block and ring. Sensors are available with a wide variety of quick disconnect connectors or 2 meter (6 ft., 6 in.) cables. Other cable lengths are available. Inductive Proximity Sensors are available in AC, DC and AC/DC, 2 wire and 3 wire systems, flush and non-flush mounting, PNP and NPN versions, Normally Open (NO) and Normally Closed (NC) configurations. Most sensors listed feature IP67 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13) protection, total circuit protection (short circuit, overload, reverse polarity and wire break) and temperature range of –20 to 70°C (–4 to 158°F). Additional products not shown include weld immune, extended temperature range, NAMUR and mini sensors (4.0, 5.0 and 6.5 mm (0.16, 0.20 and 0.26 in.)). All sensors are manufactured in a certified ISO9001 facility and most have the CE mark (European Directive 93/68/EEC).

DC Cylindrical Proximity Sensors

- **Brass, Nickel Plated (BN) Housing**
- **LED (1 for L and Standard, 2 for GL)**
- **Normally Open (NO) Contacts**
- **2 Meter (6 ft., 6 in.) PVC Polyvinylchloride Cable or Quick Disconnect Connectors**
- **Total Circuit Protection (Short Circuit, Overload, Reverse Polarity and Wire Break)**
- **3 Wire Sensors**

L-Series

10-30 VDC, 200 mA (8 mm (.31 in.)); 18-30 VDC, 120 mA (12 mm (.47 in.), 18 m (.71 in.) and 30 mm (1.18 in.)), IP67 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13) Protection, 1 LED.

Remove Cover For Access To Wiring Terminations

These Programmable Controllers program two separate relays to turn ON or OFF up to 56 times during a 7 day period. Once a pattern of events is programmed, they will operate on a continuous basis, remembering the program, time of day and day of week even during a power failure. **Operating Voltage:** 105-135 VAC, 50-60 Hz. **Operating Temperature:** 0° to + 70°C. **Accuracy:** + 2 minutes per month. **Display:** 4 digit, LED type, 0.5" high. **Output:** Two (2) SPDT sets of programmable contacts. 4950 — rated at 5 amperes, 4950H — rated at 15 amperes. **Construction:** 4950 — open P.C. Board with screw terminals. 4950H — Metal enclosure with a 9 pin terminal strip to accommodate 12 AWG or smaller wiring. Two standard electrical knockout provided. **Other Voltages Available.**

4608 ON/OFF Repeat Cycle Timer. The model 4608 is a solid state timing module that operates a set of high power 20 Amp contacts on a repeat cycle basis. The on and off times of the cycle are set with DIP switches. The on and off time can be set from 1-1024 seconds in one second increments. The output contacts are closed for the portion of the cycle which always starts first on initial application of operating voltage. SPST normally open contacts rated at 20 amps. **Terminals:**(Input/Output) .250 Quick Connect. **Voltage:** 115 VAC.

519-6003. Model 4608..**EACH 62.00**

4980 Repeat Cycle Timer. The 4980 is a microcontroller based on-off timed with digital display of timing. The 4980 controls a set of high current output contacts in accordance with a preprogrammed on-off schedule which continues for as long as power is applied. The on and off time can be programmed to be any time from 1 second to 99 minutes and 59 seconds in 1 second increments. Sealed tactile front panel; large 1/2" LED display; audible alarm; 20 Amp output. **Wiring:** 3, 1/4" quick connect terminals supplied for contacts, 2, 18 AWG Stranded Wires, 12" long supplied for operating voltage.

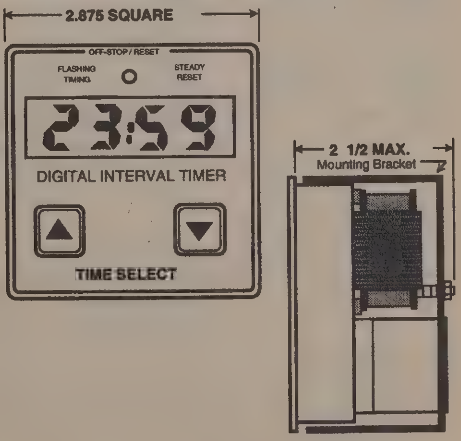
Operating Voltage



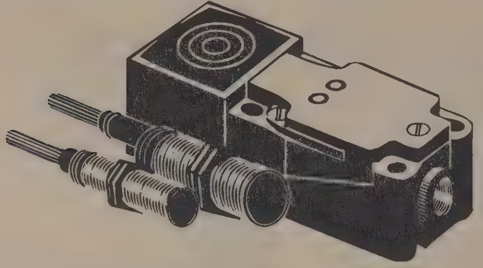
The **Model 4970** is a microcontroller-based interval timer with digital display of timing. High power 20 amp, SPDT output contacts. Preset time kept in non-volatile memory. Countdown can be stopped in middle of countdown cycle. Always remembers last time selected and resets to that time. Front panel overlay provides protection. Easy setting with two buttons. **Operating Voltage:** 105 VAC- 130 VAC. **Timing Range:** The time base can be programmed to countdown the time in the following ranges — 000.1-999.9 seconds, 0001-9999 seconds, 00:01-59:59 minutes:seconds, and 00:01-23:59 hours:minutes. **Display:** 4 digit red LED, 0.5" characters. **Timing Accuracy:** Better than 1% over operating temperature and voltage. **Operating Temperature:** 0 to 70°C. **Audible Indicator:** A solid state alarm will sound for 5 seconds at the end of a timing cycle. **Front Panel Switches:** 3 momentary push-buttons behind front panel label overlay, 2 for setting the time and 1 for starting and stopping the timer. **Mounting:** 2.62" square cutout accepts timer. Timer secured with rear attached bracket. **Wiring Terminals:** .25" quick connect terminals.

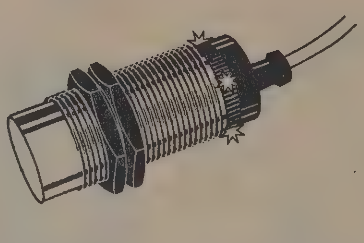
519-1276. Model 4970-2..**EACH 146.66**

4972 Count Down Interval Timer. The 4972 is a digital countdown timer with remote start, and provides 20 Amps High Capacity output contacts.The time base can be programmed to countdown the time in one of four selectable ranges — 000.1-999.9 seconds, 0001-9999 seconds, 00:01-99:59 minutes:seconds, and 00:01-23:59 hours:minutes. The 4972 has a selection switch which allows the user to select 115 or 230 VAC, 50/60 Hz input voltages. Large 1/2" LED display; microcomputer control; time memory retention; tactile front panel; remote start operation.

519-6004. Model 4972..**EACH 172.00**

Proximity/Photoelectric Sensors





EI Inductive Sensors

- ► For Sensing of All Ferrous Metals
- ► 12, 18 and 30 mm Diameters
- ► Stainless Steel Housing or Polyester Housing
- ► Sensing Distances Up to 25 mm
- ► Easy to View LED Indication

Common Applications Include:

- ► End of Travel Detection
- ► Broken Drill or Saw Blade Detection
- ► RPM/Zero Speed Detection

EC Capacitive Sensors

- ► For Sensing of Granulates, Plastics and other Ferrous/Non-Ferrous Materials
- ► 18 and 30 mm Diameters Polyester Housings
- ► NEW Patented TRIPLESHIELD™ Protection with Ring LED Indication†
- ► Easy to View LED Indication
- ► Adjustable Sensitivity

Common Applications Include:

- ► Grain/Plastic Pellet Hopper Level Detection
- ► Level Control Through Sight Glass
- ► Detection Inside of Cardboard/Plastic Containers

EO Photoelectric Sensors

- ► For Sensing of Light Colored/Reflective Objects
- ► Detects up to 16 Inches (400 mm)
- ► Rugged 18 mm Nickel Plated Brass Housing
- ► Easy to View LED Indication
- ► Adjustable 270° Potentiometer

Common Applications Include:

- ► Material Detection on a Conveyor
- ► People and/or Vehicle Detection Through Doorway/Aisle
- ► Detection of Parts in an Automation Process

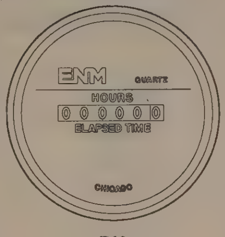
T40A and T50A Quartz Hour Meters



T40

ENM's Series T40/T50 hour meter is the answer to applications requiring a low power, economical, and a reliable hour meter. This compact, tamper-resistant meter is sealed against the environment to provide years of service. A quartz crystal time base insures supersilent operation and accurate time keeping. This AC voltage model is also frequency insensitive.

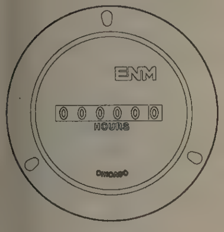
Power: Less than 0.4 watts.

207-0038. T50A1. 230 AC	**EACH 27.00**
207-0039. T50A2. 115 AC	**EACH 27.00**
207-0040. T50A4. 24 AC	**EACH 27.00**

Power: .03 watts at 12 VDC; .70 watts at 48 VDC.

207-0037. T40A45. 10-80 DC	**EACH 27.00**

T40B and T50B Quartz Hour Meters



T50

ENM's Series T40B and T50B in a large 3-hole flange. This unit has all the standard features which includes a quartz crystal time base in a sealed and tamper-resistant case. NEMA 4X, 12 rated gasket for corrosion and water resistant panel mounting is available (see accessories). This AC voltage model is also frequency insensitive.

Power: Less than 0.4 watts.

207-0001. T50B1. 230 AC	**EACH 27.00**

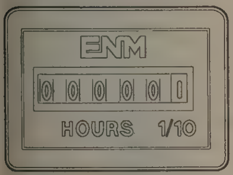
T41D and T51D



This is the panel mount version of the T41/T51 Series is secured with an easy to install spring clip. No fasteners are required. This unit has all the standard features which includes a 6-digit display, low power design, and a water sealed case. The DC voltage model is also polarity insensitive. AC voltage is frequency insensitive.

Power: .03 watts at 12 VDC; .70 watts at 48 VDC.

207-0033. T41D45. 10-80 DC	**EACH 27.00**

Power: .50 watts.

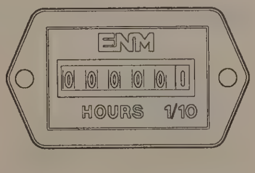
T41E and T51E Quartz Hour Meters



The Series T41E/T51E hour meter is ideal for applications requiring a low power, reliable, and economical hour meter. The solid state electronic circuit is a low power design that insures accurate time keeping over a large voltage range. The high impact plastic case is sealed against the environment. The DC voltage model is polarity insensitive. AC voltage is frequency insensitive.

Power: .03 watts at 12 VDC; .70 watts at 48 VDC.

207-0007. T41E45. 10-80 VDC	**EACH 27.00**

Power: .50 watts.

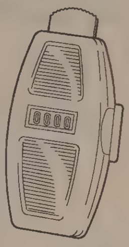
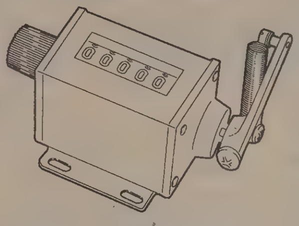
M24 Series Hand Tally



This hand held plastic tally is perfect for personal counting of events or operations. Unit comes with a reset knob on the side. A black unit is included with a base for desk mounting. A blue unit includes a 36" neck cord.

207-0015. M24Z01. Black Case with Base	**EACH 29.00**
207-0016. M24Z04. Blue Case with Neck Cord	**EACH 29.00**

M39 Series Miniature Ratchet Driven Counter



The M39 is a mechanical counter in a case designed for rugged and corrosive environments. Easy base mounting and manual reset coupled with the long life design make this counter ideal for use on machine tools, vending machines, and many industrial applications. Lever is returned to original position by an internal spring. Standard unit is 5 digits. Also available in 3 and 4 digit counters by special order.

207-0011. M39CA50A. 5 digit, RH, Top Coming	**EACH 30.00**
207-0012. M39CA50B. 5 digit, RH, Top Going	**EACH 30.00**

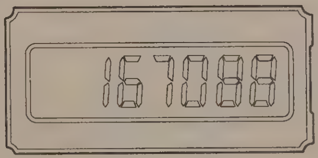
1101 Series DC Pulse PCB Counter



The ENM Series 1101 PCB pulse counter features a 6-digit, 7 segment LCD display with powerless data backup using CMOS EEPROM technology. These modes are ideal for applications where small space and high speed counting are required. An external reset is also available. **Memory:** EEProm. **Count Speed:** 500 Hz.

207-0017. LCD1111. 5-12 DC with Reset	**EACH 25.00**

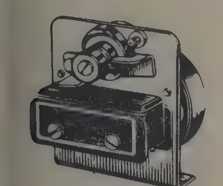
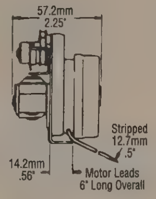
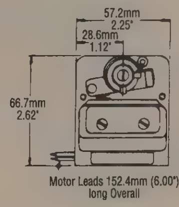
90 Series Delay Timers







The 90 Series is a basic time delay timer designed for remote surface mounting where infrequent adjustment of the time delay setting is anticipated. It features automatic reset upon removal of power. These timers are designed for applications that do not require high repeat accuracy, fast reset or long time cycles. Isolated SPDT load switch rated at 10 amps. **Wiring:** Motor, 6-inch leads; switch, screw terminals. 120 VAC, UL and CSA approved.

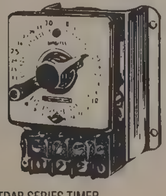
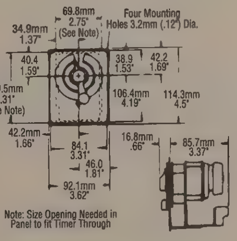
TDAB and TDAF Series Timers

TDAF SERIES TIMER



TDAB SERIES TIMER



Note: Size Opening Needed in Panel to fit Timer Through

The TDAB and TDAF timers are rugged, high precision time delay timers. They feature automatic reset and an infinite-resolution clutch. The TDAF is designed for panel mounting while the TDAB is designed for back or surface mounting. On both units, wiring connections are made on the screw type terminal block. Both have isolated SPDT load switch rated at 15 amps, 120 VAC. UL and CSA approved.

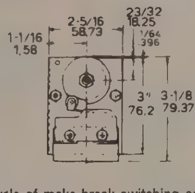
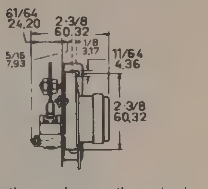
Series RG21, Single Switch





Designed to run continuously, repeating a set cycle of make-break switching operations as long as the motor is energized. This unit may be applied to operations requiring only a single time cycle. The unit's timing motor drives the cam to actuate a SPDT snap-action switch in a definite make-break sequence at predetermined speeds. Switch cams adjustable from minimum notch of 7° to a maximum notch of 169° (±3°). **Cam Shaft Speed for One Complete Revolution (360°):** RG21-093: 1 minute; RG21-096: 15 minutes; RG21-098: 60 minutes. 120V, 60 Hz. U.L. recognized and CSA listed.

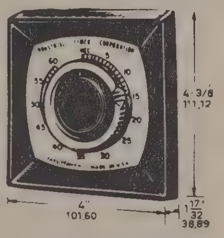
Type MPB Interval Timers



Depressing pushbutton in center of selector ring engages synchronous motor and closes SPDT snap action isolated load switch. At end of cycle, timer automatically resets to zero and opens load switch. Contact rated 15 amps non-inductive at 115 volts, 60 Hz AC. Double load operation possible. Specify timing range desired. **Shpg. wt.:** 3 lbs.

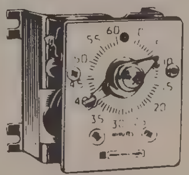
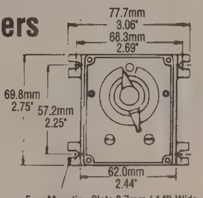
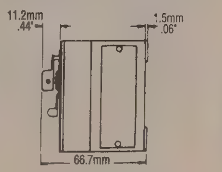
SF and CSF Series Timers





Four Mounting Slots 3.7mm (.14") Wide



†CSF Models 73.9mm 2.91"

These standard time delay timers are designed for remote surface mounting where infrequent adjustment of the time delay setting is anticipated. The SF timers are in the 6, 15, and 30 second ranges and use a clutch motor. The CSF timers operate in ranges of 1 minute and above and use an external clutch to provide fast reset. Both units feature automatic reset upon removal of power, and isolated SPDT load switch. The CSF also features a motor control switch to protect the motor at the end of the time cycle. **Repeat Accuracy:** SF—±1%; CSF—±1.5%. 10 amp load switch contacts, screw terminal wiring. 120 VAC. UL and CSA approved.

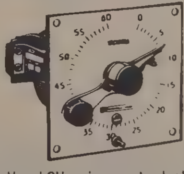
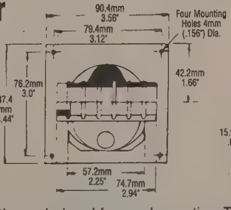
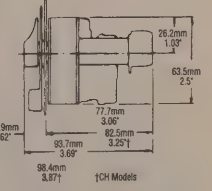
H and CH Series Timer







†CH Models

The H and CH series are standard time delay timers designed for panel mounting. They are designed for applications that require medium repeat accuracy and reset time and that may require the operator to change the time delay cycle. The H timers cover the 6, 15, and 30 second time ranges and have a clutch motor. The CH timers are available in 1, 3 and 5 minute time ranges and feature and external clutch to enable fast reset. It also features a motor control switch to protect the motor at the end of the time cycle. Both have isolated SPDT load switch rated at 10 amps, screw terminal block wiring, 120 VAC. UL and CSA approved.

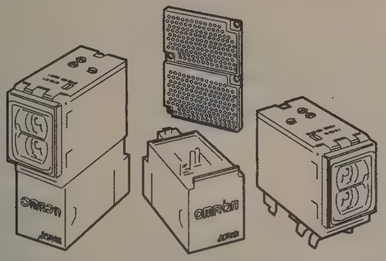
E3B2 Series



General purpose photoelectric sensor with plug-in terminal for easy maintenance and installation. Replace sensing head without rewiring. Detect shiny objects with polarized retroreflective models and dark objects at long distances with the high-gain diffuse reflective models. Includes built-in ON-delay and OFF-delay timers, switch selectable light-ON/dark-ON operation, and mutual interference protection. Ready to use with 3 A relay and mounting brackets. Supply voltages of 24 to 240 VAC, 50/60 Hz; 12 to 240 VDC. Output of 3 A, 250 VAC.

High-Gain Diffuse Reflective

Stock No.	Mfr.'s Type	Features	EACH
834-6009	E3B2-D2M4-US-N	No timer, 3 m (9.84 ft.) sensing distance	179.00

E3JU Series

Compact limit switch style universal AC/DC photoelectric sensor with choice of Relay or FET output. FET allows for Solid State switching of AC or DC. Includes universal AC/DC Power Supply, flexible M30 or direct body mounting, sensitivity adjustment, and switch selectable timer operations of ON-delay, OFF-delay, ON/OFF delay, one-shot, and delayed one-shot. Supply voltages of Universal, 24 to 240 VAC, 24 to 240 VDC. UL/CSA certified and NEMA 4x, IP67 rated.

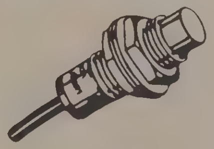
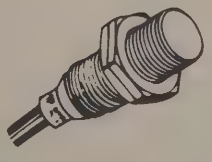
Inductive Proximity Sensors



E2E-XY



TL-X-GE

Omron's 100% performance-tested proximity sensors detect ferrous metal objects. AC sensors have an LED indicator; DC sensors have high-visibility LED ring indicator.

Compact, Prewired Photomicrosensors with 30cm Range

Through-beam (transmissive) sensor with in-line remote DC amplifier and compact sensing heads fit into space-confin locations. Prewired amplifier has 2m (6.6 ft.) of three-conductor cable. Sensor includes two pair of aperture decals reduce beam width for smaller object detection. Modulated infrared light source reduces external light, dust and humidi interference. Operation indicators on both amplifier body and sensing head simplify alignment and monitoring.

Stock No.	Mfr.'s Type	Output Type	Head to Amp Cable Length	Sensing Method	Sensing Distance	Power Requirements	Control Output	EACH
821-8100	EE-SPW321	Dark-ON	0.5 m (1.64 ft.)	Transmissive	30 cm with 2mm dia. opaque object	10.8 to 26.4 VDC	Transistor, 100 mA load	112.92
821-8101	EE-SPW321-A	Dark-ON	1.0 m (3.28 ft.)		20 cm with 1mm dia. object using 1 × 3 mm aperture	30 mA current consumption	1 V max. residual voltage	115.29
821-8102	EE-SPW421	Light-ON	0.5 m (1.64 ft.)		10 cm with 0.5mm dia. object using 0.5 × 3 mm aperture		1 ms max. response time	145.91

Sensing Heads Detect Objects in Front of Mirror-Like Backgrounds

Convergent beam reflective sensors with built-in amplifier offers 5mm sensing distance to solve these tough detection problems: objects in front of highly reflective backgrounds at least 20mm away; dark colored objects; small, thin objects such as 0.05mm diameter pure copper wire. Modulated infrared light source reduces external light interference. Choose top or side sensing models. Operation indicator allows monitoring. Wire directly to sensor or use optional EE-1001 unwired or EE-1006 prewired connectors for convenience in servicing. **Output Specifications:** 80 mA load with 1.0V residual voltage; 10 mA load 0.4V residual voltage when driving TTL. **Response Frequency:** 100 Hz.

5 mm Slot Sensing Heads in Wide Variety of Configurations

Transmissive sensing heads in standard, L-shaped, T-shaped and close-mounting configurations match mos applications. Wide 5-24 VDC operating voltage range makes these photomicrosensors compatible with TTLs, relays an programmable controllers. Wire selectable Light-ON/Dark-ON output operation. Operation indicator for easy monitorin Wire directly to sensor or use optional EE-1001 unwired or EE-1006 prewired connectors for convenience in servicin **Output Specifications:** 100 mA load with 0.8 V residual voltage; 40 mA load with 0.4 V residual voltage when driving TTL **Response Frequency:** 1 kHz (3 kHz typical).

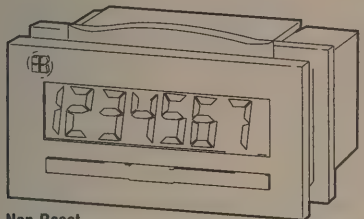
Reset



Non-Reset

"Eagle" Self-Powered, Digital Counters and Tachometer

Small size and large numerals make this LCD device ideal for control panels, business machines and instrumentation designed to monitor operational cycles and functions. All models are 7 Figure, with .315" high numerals. Requires only 1.79" × .89" panel cutout. Inputs available include non-voltage (switch, 3-30 VDC or 20-250 VAC/VDC; remote only or manual and remote reset; and termination by either a terminal block or an optional connector with wire leads. UL Recognized, CSA Certified. 20 year typical life with lithium battery. Weighs 2 ozs.

Series 5300, 5301: Electronic, Dual-Speed Counter

Stock No.	Mfr.'s Type	Description	EACH		
			1-9	10-24	25-49

Electromechanical AC Hourmeters

Series 711 “Blackbird” AC Hourmeters. Lightweight, low power, rugged electromechanical design, with .138" high figures. Records to 99,999.99 hours. Available in both round or square bezel with retainer clip or 3-hole round versions (with mounting hardware), sealed front bezel and tell-tale operation indicator. UL Recognized, CSA Certified, CE Approved.

Series 711 “Bullseye” AC Minimeters. Compact, low-cost, synchronous motor controlled AC hourmeters, .138" magnified figures, records to 99,999.99 hours. **Panel Cutout:** 1.45" × .87". UL Recognized, CSA Certified, CE Approved.

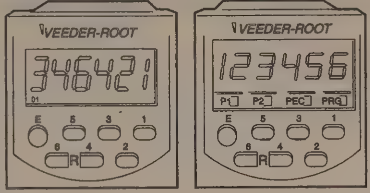
Veeder-Root brand Series C346 Preset Counter

— NEW —



Simple button per digit setting and choice of single line 6 digit LED or LCD display allow optimum operator interface. Very flexible input circuit with scaling feature accepts signals from encoders, NPN (sinking), PNP (sourcing), and contact-closure inputs. The right choice for most preset counting applications. **Size:** 1/16 DIN (48 mm × 48 mm). **Display:** 6 Digit, LED or LCD. **Power:** 120 VAC standard, optional 240 VAC, 24 VDC. **Preset Levels:** 1 or 2, 5 amp relay and NPN transistor per output. **Input Scaling:** X0.001 to 9.999. **Input:** Sinking; sourcing, contact closure, add/subtract, add/add, quadrature. **Max. Count Speed:** 5 kHz.

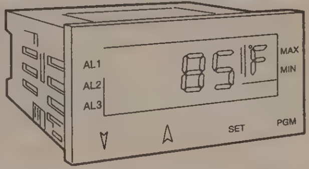
Dynapar brand Series S428 Intelligent Process Meter

— NEW —



Housed in an industry standard 1/8 DIN case, the S428 process meter can display a wide variety of process input signals including DC current or voltage, as well as most thermocouples and RTDs. 0.56" high LED display is available in red or green, and easily scaled to display in engineering units. Standard with 1, 2, or 3 relay alarm outputs that can be field configured for high or low operation. Other functions can be installed at the factory or later in the field. **Dimensions:** 48 mm × 96 mm, 110 mm deep. **Mounting:** Panel mount (mounting bracket supplied) 45 mm × 92 mm cutout. **Power Supply:** 90-264 VAC, 50/60 Hz; 4 watts. **Operating Temperature:** 0° to 55°C, 32° to 131°F.

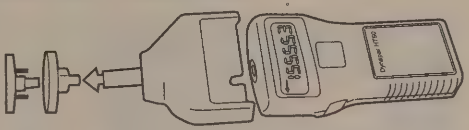
Dynapar brand HT50 Hand Tachometer System

— NEW —



Series HT50 hand tachometer provides a convenient, accurate means of measuring rotary or surface speeds on all types of machinery. For non-contacting measurement, the tachometer optically detects a reflective target on the rotating object. Where in-contact measurement is desired, an accessory adapter is used with the appropriate device — a wheel for surface speed or rubber tip for shaft rotation. **System Includes:** Hand tachometer; in-contact adapter; rubber tips (3 pcs.); reflective tape (10 sheets); surface speed wheels (1/10 m/min. and 1/10 yd./min.); carrying case; dry batteries (4-AAA size, 1.5 V); instruction manual.

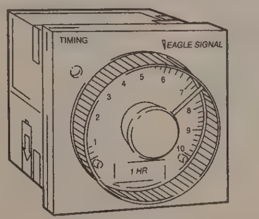
Eagle Signal brand Series B846 Timer

— NEW —



Housed in a compact 1/16 DIN package, changing the set time is as simple as turning a dial. Selectable time ranges from 0.06 seconds to 10 hours. Field configurable to operate in on-delay, off-delay, interval, or repeat cycle timing modes. A unique on-delay/interval model performs two timing functions in one unit. In addition to working as an on-delay timer, an independent output interval time is provided. Industry standard 8 or 11 pin socket connection. DIN rail mounted, or with optional hardware, panel mounted. NEMA 4 front panel and IEC 801 level 4 noise immunity. Universal power supply for 90-240 VAC or 24 VDC operation. **Time Ranges:** Field selectable — 1, 10 seconds; 1, 10 minutes; 1, 10 hours. **Operating Modes:** On-delay, off-delay, interval, repeat (B846-500/511), delay interval (B846-100). **Setting Accuracy:** ±5%. **Repeat Accuracy:** ±5%.

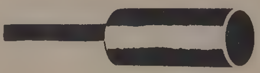
DYNAPAR brand Series 54Z Sensor



The 54Z Sensors operate over a wide range of air gaps making them suitable for parts counting and speed sensing applications. The wide operating voltage makes them compatible with most counters, indicators or controllers. The 54Z Series does not require a minimum target speed and can operate from zero up to 20,000 targets per second. **Power Requirements:** 5-18 VDC, 10 mA plus load. **Weight:** 2 oz. **Operating Temperature:** –40° to +105°C. **Vibration:** 15 G, 10 to 2000 Hz. **Speed Range:** 0 to 20,000 targets/second. **Output:** 1 sink 17 mA. At 18 V supply; 1 sink 23 mA @ 5 V supply; 1 source 2200 Ω pull-up. **Cable:** 105°C PVC insulation, 10 feet long.

VEEDER-ROOT brand Series 7990 Tachometer/Totalizer/Running Hourmeter/Elapsed Time Indicator

Low-cost, combined unit, the Series 7990, Model 200 is programmable as tachometer, totalizer, running hourmeter, or precise elapsed time indicator. 8 digit LCD display; 5 digits in tachometer mode, 0.35" high characters. Rugged die-cast metal housing, sealed, meets NEMA 4 standards. **Power:** 3 volt Lithium battery. Fits 2.6" × 1.3" panel cutout, 1" depth. Series 7990 is available without the tachometer mode. Accessories include three snap-on modules, a panel adapter and panel adapter with key-lock reset. Panel adapters retrofit popular electro-mechanical general purpose totalizers. The Screw Terminal Module provides for the convenience of screw terminal connection. The High Voltage AC/DC Input Module features the above, plus provides for input of AC or DC signal of 25 to 270 volts. The TRIAC Input Module features the above, plus provides for AC-type, solid state input devices such as TRIAC switching devices.

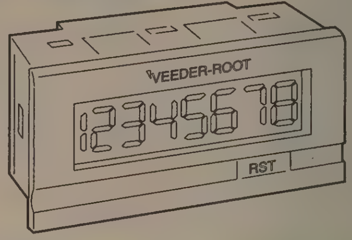
Veeder-Root brand Totalizing and Preset Counters

— NEW —



The A103 totalizing and preset counters are compact and cost-efficient. Features include a supertwist LCD with .47 (12 mm) high digits and green illumination display backlight capability. 3-volt lithium battery eliminates need for externa power. Accepts input signals from dry contact, PNP, or NPN sensors and encoders. High and low speed count inputs Reset on front panel or remotely. Fits 68 × 33 mm cut-out. Order quick-attach option modules separately on this page Front panel rated NEMA 4/IP65.

DYNAPAR brand Tachometers and Rate Indicators

— NEW —

A103 tachometers provide readout of motor, machine shaft or other RPM. Rate indicators provide a readout of virtually any rate: gallons/minute, parts/hour, feet/minute, etc. LCD with backlighting capability. All units use an internal 3-vol single or dual battery. Magnetic input is capacitative coupled; 10 kHz (50% duty cycle); 0.2 V peak (28 VVDC max.). Fits 68 × 38 mm cutout. **Ranges and Resolution:** seconds, minutes to 1/10, hours to 1/10, and hours: minutes: seconds. **Weight:** 2.25 oz. (64 g). Order matching totalizing and preset counters, elapsed time indicators, and quick-action option modules separately on this page. Front panel is rated NEMA 4/IP65 for use in washdown environments.

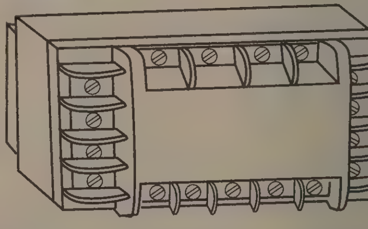
A103 Series Option Modules

— NEW —



These quick-attach option modules provide a power supply for sensors, display backlighting, timing signals, and mechanical relay output. They accept high or low voltage AC or DC input signals. Low voltage input accepts 15 to 30 VAC or VDC for count input. High voltage input accepts 100 to 260 volt AC/DC for count input. Mechanical relay output is SPDT (Form C); 120/240 VAC, 30 VDC contacts.

Manufacturer's Code Log

ADI	Analog Devices Inc.
AMD	Advanced Micro Devices
COL	Collmer Semiconductors, Inc.
DLS	Dallas Semiconductor
HAR	Harris Semiconductor
ITL	Intel
LAT	Lattice
MXM	Maxim
MOS	Mosel-Vitelic
MOT	Motorola Semiconductor
NSC	National Semiconductor
NTE	NTE Electronics
PHI	Philips Semiconductors
SEM	Semiconductors Inc.
SIE	Siemens Components, Inc
TIS	Texas Instruments
THO	Thomson Conusumer Electronics
UNI	Unitrode Integrated Circuits
XLX	Xilinx

AD7512DIKD

[1]MONOLITHIC CMOS CHIPS IN THE AD75XX SERIES WERE FORMERLY DESIGNATED AD75XX/COM/CHIPS AND AD75XX/MIL/CHIPS AND MAY APPEAR ON PRICE LISTS WITH THOSE DESIGNATIONS. CONSULT ALLIED FOR CURRENT PRICING OF AD75XX CHIPS

Figure 1 — Model-Number Designations for Standard Analog Devices Monolithic and Hybrid IC Products. S, T and U Grades Have the Added Suffix /883B for Devices that Qualify to the Latest Revision of MIL-STD-883, Level B.

Two model numbering schemes are used by Analog Devices. The first model numbering scheme is used for designating standard Analog Devices monolithic and hybrid products. The second scheme is used by our Precision Monolithics Division (formerly PMI) as designators for its product line. Figure 1 shows the form of model number used for our proprietary standard monolithic ICs and many of our hybrids. It consists of an "AD" (Analog Devices) prefix, a 3-to-5 digit number*, an alphabetic performance/temperature-range designator and a package designator. One or two additional letters may immediately follow the digits ("A" for second-generation redesigned ICS, "DI" for dielectrically isolated CMOS, e.g., AD536AJH, AD7512DIKD).

Figure 2 — Precision Monolithics Division's Product Designations

Figure 2 shows a different numbering scheme used by our Precision Monolithics Division. This numbering scheme starts with a prefix which designates the device type and model number. It is then followed a suffix consisting of alphabetic designators (as applicable) to indicate additional functional designations or options and packaging options.

*For some models, the combination (digit) (letter) (two or three digits) is used instead of ADXXXX, e.g., 2S80.

ADSP-2100 Family EZ-KIT Lite Development Kit

Evaluation Tools

- MPEG Audio Decode
- Echo Cancellation
- ADPCM and LPC Speech Compression
- Filtering

DSP Board

- Full 16-Bit Stereo Audio I/O
- ADSP-2181 16-Bit DSP
- 32 K Words On-Chip RAM
- 128 K × 8 Socketed EPROM

Code Development Tools

- Assembler
- Linker
- Algorithm Source Code

Prototyping Tools

- Simulator
- PROM Splitter Utility
- I/O and Memory Expansion Ports

The EZ-KIT Lite is a powerful, inexpensive development tool that not only helps get your DSP design started, it includes the tools you need to get it prototyped and ready for market. This kit is specifically designed to support both evaluation and development. It takes you beyond the starter phase into serious DSP development. Unique features such as a socketed EPROM, PROM splitter utility and simulator let you plug in your own custom EPROM and fully prototype a sophisticated DSP-based solution. Packaged demonstration programs highlight the performance of the ADSP-2100 architecture, providing a clear picture of how well Analog Devices' DSPs meet your application requirements.

16-Bit Stereo Audio I/O Capability
The EZ-KIT Lite development board provides full, 16-bit stereo audio I/O capability for evaluating and developing a range of audio applications from digital filtering to MPEG audio decode. The onboard AD1847 codec is user programmable from 5.5 to 48 kHz with convenient programmable gain. Although the board is based on the highly integrated ADSP-2181 DSP, ADSP-2100 Family code compatibility assures that the EZ-KIT Lite can be used for development with any family member. The ADSP-2181 is a 16-bit, fixed-point DSP featuring 32 K words of on-chip RAM, DMA ports and low power modes. Running the EZ-KIT Lite's MPEG audio decode demonstration, the ADSP-2181 DSP plays approximately 7 seconds of audio without the use of external RAM. The closest competitor's DSP has 10 K words of internal memory and limited DMA support which translates to only about 0.7 seconds of audio playback. The ADSP-2181's performance is equally impressive in many other applications.

Supports Custom Code Download
A monitor program running on the DSP in conjunction with a host program running on the PC lets you interactively interrogate the onboard ADSP-2181. You can upload and download segments of data memory and program memory as well as download and run programs. A socketed EPROM gives the user the flexibility to run the monitor program and demonstrations provided or plug in an EPROM containing custom code. A custom EPROM coupled with the EZ-KIT Lite tools creates an evaluation and development platform for developing your own application.

Full-Function Simulator and Assembler
Designers can prototype their target application using the EZ-KIT Lite simulation tools. The instruction-level simulation lets you inspect all ADSP-2181 operations on a cycle-by-cycle basis. A user-configurable windows interface lets you see all registers in memory. You can also set breakpoints, single step and perform functions such as plotting data memory. The EZ-KIT Lite's Assembler is a full-function code development tool. This algebraic syntax-based assembler supports all ADSP-2181 instructions. It also supports a number of assembler directives and macros, as well as allowing flexible use of constants, labels and variables.

Something Must Be Missing
The EZ-KIT Lite is a complete and ultralow-cost DSP development system. The only necessary elements not included are the speakers, signal source and the PC — which you have to supply. Analog Devices even includes the RS-232 cable to connect to the PC and a power supply. If you require the high-level language support of a C-Compiler, C-source level debugger, C runtime library, librarian and simulations for other ADSP-2100 family members, you can upgrade your EZ-KIT Lite. In this case, you'll want to purchase the ADDS-21xx-SW Package to complete your design.

In-circuit emulators (ICE) are also available for all ADSP-2100 products.

Order Part No. ADDS-21XX-EZLITE

ADSP-2115 Code Example

```
        AR=DM (Error);                                        {Get Err Value From Mem    }
        MY1=Beta;                                             {Load Beta Value           }
        MF=AR*MY1(RND), AY0=PM(I4,M4), MX0=DM(I0,M0);         {MF=Beta*Err, Get Ck, A    }
        MR=MX0*MF(RND);                                       {MR=Beta*Error*A(n)        }

        CNTR=A;                                               {Set Loop Counter          }
        DO uloop UNTIL CE;                                    {Tap Update Loop           }
              AR=MR1+AY0, AY0=PM(I4,M6), MX0=DM(I0,M1);       {AR=Ck+Beta*Error*A(n)     }
uloop:        PM(I4,M7)=AR, MR=MX0*MF(RND);                   {Store CK+1, Do Next       }
        RTS;                                                  {Return}
```

TMS320C50 Code Example

```
              LT        ERR                 ;  T=Err
              MPY       BETA                ;  P=Beta*Err(i)
              PAC                           ;  errf(i)=Beta*Err(i)
              ADD       ONE, 14             ;  Round The Results
              SACH      ERRF, 1             ;  Save errf(i)

              LACC      #126
              SAMM      BRCR                ;  127 Coeffs To Update In The Loop
              LAR       AR2, #COEFFD        ;  Point To The Coefficients
              LAR       AR3, #LASTAP        ;  Point To The Data Samples
              LT        ERRF
              MPY       *-,AR2              ;  P=Beta*Err(i)*x(i-255)

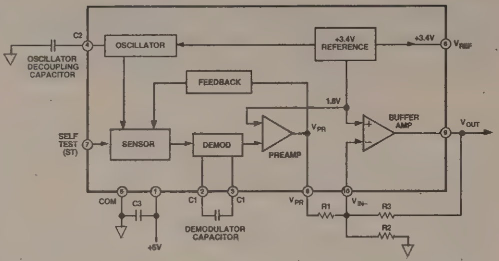
              RPTB      LOOP-1              ;  For I=0, I<=126, I++
ADAPT         ZALR      *,AR3               ;  Load ACCH With Ak(i)
              MPYA      *-,AR2              ;  P=Beta*Err(i)*X(i-k-1),
                                               ACC=ak(i)+Beta*err(i)*x(i-k)
              SACH      *+                  ;  Store ak(i+1)

LOOP          ZALR      *,AR3               ;  Final Update Last Coefficient a0(i)
              RETD                          ;  Delayed Return
              APAC                          ;  ACC=a0(i)+Beta*Err(i)*x(i)
              SACH      *+                  ;  Save a0(i+1)
```

The LMS adoption of FIR filter coefficients code examples shown above illustrate how the ADSP-2100 Family's algebraic syntax and processor architecture yield significant improvements in ease-of-use and efficiency. In this example, the ADSP-2115 completes the calculation in 35% fewer cycles.

Accelerometers

- Full Scale Measurement Range: ADXL05 — ±5 g; ADXL50 — ±50 g
- Self-Test on Digital Command
- Single Supply Operation
- Sensitivity Precalibrated to 200 mV/g (ADXL05), to 19 mV/g (ADXL50)
- Internal Voltage Reference
- Internal Output Buffer Amplifier for User Adjustable Span and Zero-g Levels
- Post Filtering with External Passive Components
- Complete Acceleration Measurement System on a Single Monolithic IC
- Frequency Response: ADXL05 — DC to 4 kHz; ADXL50 — DC to 10 kHz
- High Shock Survival: ADXL05 — >1000 g; ADXL50 — >2000 g
- Internally Temperature Compensated



ADXL05 ±1 to ±5 g Single Chip Accelerometer with Signal Conditioning

Low g designed for ±1 and ±2 g applications. **Tilt Measurement:** Virtual reality headsets, pointing devices/joysticks, compass correction. **Inertial Measurement:** GPS navigation systems, missile guidance and control, stabilized platforms. **Vibration and Shock:** Machine health, instrumentation. **Resolution:** 0.005 g.

Mfr.'s Type	Measurement Range	Typical 0 g Bias Drift*	Temperature Range (°C)	Package Type
ADXL05JH	±1 to ±5 g	±0.5	0 to +70	10 Lead Header (TO-100)
ADXL05AH	±1 to ±5 g	±0.5	–40 to +85	10 Lead Header (TO-100)
ADXL05SP†	±1 to ±5 g	±0.5	0 to +70	10 Lead Header (TO-100)

ADXL50 0 to ±50 g Monolithic Accelerometer with Signal Conditioning

Mfr.'s Type	Measurement Range	Typical 0 g Bias Drift*	Temperature Range (°C)	Package Type
ADXL50JH	0 to ±50 g	±15 mV	0 to +70	10 Lead Header (TO-100)
ADXL50AH	0 to ±50 g	±35 mV	–40 to +85	10 Lead Header (TO-100)
ADXL50SP‡	0 to ±50 g	±35 mV	–40 to +85	10 Lead Header (TO-100)

*% of reading, specification refers to the maximum change in parameter from its initial at +25°C to its worst case value at Tmin. to Tmax. †Sample Pack: Contains two ADXL05 plus circuit boards and application notes. ‡Sample Pack: Contains two ADXL50AH and application notes.

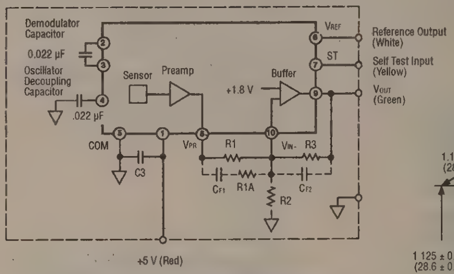
ADXL Accelerometer Evaluation Kits

- Simplify System Development, Reduce Design Time (ADXL-EM)

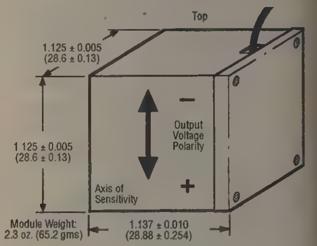
Analog Devices has evaluation boards and pre-packaged evaluation modules for their industry-standard family of low-cost single-chip accelerometers. Either kit can be used to evaluate the popular ADXL50 (±50 g device) or the new ADXL05 (±5 g device). The ADXL-EM evaluation module is a pre-packaged accelerometer subsystem designed for users who require immediate evaluation of either ADXL05 or ADXL50. These modules are preset to convenient gains and bandwidths and operate from a single 5 V supply — no external components are required for fully specified operation. The ADXL-EM is available in three versions. The single-axis ADXL05-EM-1 and tri-axial ADXL05-EM-3 are factory preset with ±4 g output spans; the ADXL50-EM-1 is a single-axis module with a ±25 g span.

The ADXL-EB evaluation board comes complete with non-resonant surface-mount resistors and capacitors and allows users to configure and customize the accelerometer's scale factor, 0 g bias level, and bandwidth; with either ac or dc coupling. This compact (0.8" × 0.8") board provides access to every pin, including output, self-test and reference terminals — perfect for initial evaluation and introductory operation.

Mfr.'s Type	Description
ADXL05EB	ADXL05 Evaluation Board with Resistors and Capacitors
ADXL05EM-1	ADXL05 Single Axis Evaluation Module
ADXL05EM-3	ADXL05 Triple Axis Evaluation Module
ADXL50EB	ADXL50 Evaluation Board with Resistors and Capacitors
ADXL50EM-1	ADXL50 Single Axis Evaluation Module



ADXL-EM Evaluation Module Schematic



Dimensions shown are in inches and (mm).
NOTE: The metal case of the evaluation module is isolated.

ADXL-EM Module Mechanical Dimensions

Analog-to-Digital Converters

This section contains selection guides for stand alone, general — and special purpose — analog-to-digital converters (ADCs), including many sampling types.

Ext. (M) indicates external reference with multiplying capability. Int. indicates reference is internal. A voltage value is given if the reference is pinned out.

Digital-to-Analog Converters

A Digital-to-Analog (DAC) Converter accepts a digital input and produces an analog output. The basic DAC consists of a voltage or current reference, binary weighted precision resistors, a set of electronic switches and a means of summing the weighted currents. Three important criteria are required for selecting the right DAC — resolution, accuracy and speed. Other requirements to be considered are temperature stability, input coding, output format, reference requirements and power consumption.

Single DACs, Current Output

Analog Switches and Multiplexers

Analog Devices offers a complete line of monolithic analog multiplexers and switches which are well suited for a wide range of applications including data acquisition, process control, instrumentation, video systems and telephone systems. Solid-state analog multiplexers and switches provide the ability to control and select a specified transmission path for an analog signal. In selecting analog multiplexers and switches attention must be paid to several key specifications which affect system performance, including ON Resistance (Ron) and Analog Input Leakage Current (Isoff).

AD210 Precision, 3-Port Input and Output Isolation Amplifier
Input, output power ports. **Isolated Power:** ±15 V at 5 mA.

AD210AN	3500	1-100	±0.025	20.0
AD210BN	2500	1-100	±0.012	20.0
AD210JN	1500	1-100	±0.012	20.0

Sample/Track-and-Hold Amplifiers

A sample/track-and-hold amplifier (SHA/THA) is a device that samples an analog input signal then holds the instantaneous value upon the command of a logic control signal. This device is basically an analog memory where a capacitor serves as the storage element.

Popular applications utilizing the sample-and-hold function include data acquisition in which the SHA is used to capture the last instantaneous sampled analog input voltage prior to a conversion and hold this sample with minimal degradation during the conversion process. SHAs/THAs are also popular in signal processing applications using ADCs with a subranging or successive approximation architecture.

Significant improvement in dynamic performance can be made by placing fast SHAs with low aperture jitter ahead of flash ADCs. SHAs are also useful in applications including D/A deglitchers, simultaneous sampling systems, peak detectors, pulse stretchers, delay lines and data distribution systems.

Mfr.'s Type	Nonlinearity (% FS Max.)	Acquisition Time (to 0.01%)	Aperture Time (ns Typ.)	Aperture Jitter Typ.	Droop Rate (µV/µs Max.)

Low Current Noise Amplifiers
These amplifiers offer both low current noise and low input bias current specs. Products are available in single and dual configurations.

Low/Micro Power Amplifiers
Low power amplifiers are typically 0.1 mA<ISY<1 mA while micropower amplifiers are ISY<0.1 mA. Analog Devices, Inc. has a complete offering of single, dual and quad amplifiers to meet your needs.

Audio Amplifiers

ADI offers a full line of products for high-end audio applications. Below are listed a sampling of the audio amplifier products. Other listings show audio switches, matched transistors, DACs, and others. Featured here are the OP176 and OP275 with excellent noise specs, low power consumption and small packaging.

Mfr.'s Type	Description
OP176GP	The OP176 is a low noise, high output drive op amp with a combination bipolar and JFET front end
OP176GS	Noise = 6 nV√Hz, SR = 25 V/µs, ISY = 2.5 mA, GBW = 10 MHz — excellent for high performance applications
OP275GP	The OP275 is a dual, bipolar/JFET amplifier featuring low distortion (0.0006%) at low supply current (5 mA). Noise = 6 nV√Hz, SR = 22 V/µs, GBW = 9 MHz
OP275GS	The OP275 is a dual, bipolar/JFET amplifier featuring low distortion (0.0006%) at low supply current (5 mA). Noise = 6 nV√Hz, SR = 22 V/µs, GBW = 9 MHz
SSM2017P	The SSM2017, ultra low noise audio preamplifier features 0.95 nV/√Hz at 20 kHz BW and low cost
SSM2018P	The SSM2018 Voltage Controlled Amplifier has the highest performance available. No external amp required
SSM2024P	The SSM2024 quad is a low cost current controlled amplifier
SSM2120P	The SSM2120 dual VCA also encompasses 2 level detectors on board for dynamic range processing
SSM2135P	The SSM2135 is a dual, single supply amplifier offering high output drive capability with excellent sonic characteristics. 5.2 nV/√Hz, 0.001% THD+N
SSM2135S	The SSM2135 is a dual, single supply amplifier offering high output drive capability with excellent sonic characteristics. 5.2 nV/√Hz, 0.001% THD+N
SSM2141P	The SSM2141 is a high CMR differential Line receiver complementing the SSM2142 line driver
SSM2142P	The SSM2142 is a balanced differential line driver, capable of driving 10 V RMS into a 600 Ω load
SSM2143P	The SSM2143 is a –6 dB differential line receiver. CMR = 90 dB typ. with ultra low THD (0.0006% typ.)

Analog Multipliers/Dividers

Analog Multipliers/Dividers are devices that can accept analog voltages and multiply, divide, square and/or square-root them. These devices can process signals over a wide frequency range, from DC to over 500MHz, and with varying degrees of accuracy, from 0.4% full scale to 2% full scale, depending on the device selected. Most of these devices are referred to as "4-quadrant multipliers," meaning that these devices can accept any combination of input signal polarity and provide output signals of appropriate polarity. Analog Multipliers can be used to implement a wide variety of signal processing functions including modulation and demodulation, fixed and variable remote gain adjustment, power measurement and mathematical operations in analog computing, curve fitting and linearizing.

Mfr.'s Type	BW Typ. (MHz)	Total Error Max. (% FS)	Supply Voltage Range	Output Voltage Swing Min.

Modulator/Demodulator

This category is unusual in that it includes a single product, the AD630. The AD630 is a fast, flexible switched dual-input op amp with an on-chip comparator. The AD630 is intended to operate in wide-band, low level and wide-dynamic range instrumentation applications and coherent systems. The AD630 is capable of many analog signal processing functions such as balanced modulation and demodulation, phase detection, square-wave multiplication, absolute-value amplification, and two-channel precision multiplexing. It can also be used as a lock-in amplifier, synchronous detector, rectifier, and much more. The AD630 essentially provides a complete, solution, with on-chip scaling resistors and requires little or no additional circuitry.

Mfr.'s Type	Unity Gain Channel BW Typ. (MHz)*	Open Loop Gain Min./dB	Input Offset Voltage Max./µV	Output Voltage Swing Min.

AD630AD	2	90	500	±10 V
AD630BD	2	100	100	±10 V

*Unity gain small signal bandwidth.

RMS-to-DC Converters

RMS-to-DC converters continuously compute the instantaneous square of an input signal, average it, and take the square root of the result, to provide a dc voltage proportional to the rms of the input. Some of these devices, like the AD536A and the AD636, also provide an auxiliary dc output voltage that is proportional to the logarithm of the the rms value, for dB measurements.

True rms devices like these are widely used for the measurement of electrical signals derived from mechanical phenomena, such as strain, stress, vibration, shock, expansion, bearing noise, thermal noise and acoustical noise. The electrical signals produced by these mechanical actions are often noisy, nonperiodic, nonsinusoidal, and superimposed on dc levels, and require true rms measurement for consistent, valid and accurate measurements. RMS converters are also useful for accurate measurements on low-repetition-rate pulse trains having high crest factors (ratio of peak to rms value), and for the measurements of Silicon Controlled Rectifier waveforms at different firing angles.

These devices provide excellent pre-trimmed performance, improvable by simple optional trims, making them ideal for all types of laboratory and OEM rms instrumentation where amplitude measurements must be made with high accuracy and independent of waveshape.

Signal Compression

Signal compression products fall into two categories: variable gain amplifiers and logarithmic amplifiers. Logarithmic amplifiers like the AD606 and the AD640 provide an output voltage proportional to the logarithm of the input voltage for signals from dc to 120 MHz. Variable gain amplifiers like the AD600/602 and AD603 use a patented X-AMP technology which allows the amplifier gain to be varied as the dynamic range of the input signal changes.

Logarithmic amplifiers are excellent in all applications that require compression of wide-range analog input data. Variable gain amplifiers are typically employed as fast-response automatic gain control (AGC) elements in RF and IF systems. Alternatively, they can be used to provide time gain control (TGC) in applications such as commercial sonar.

Variable Gain Amplifiers

Mfr.'s Type	Gain Range	Gain Accuracy Max.	Bandwidth Typ. (MHz)

Special Function

Analog RGB-to-NTSC/PAL encoders like the AD720 encode red,green and blue (RGB) component video signals into National Television Standards Committee (NTSC) or Phase Alternating Line (PAL) luminance (brightness), chrominance (color), and composite (luminance summed with chrominance) baseband signals. This device can be used to perform video signal encoding in many OEM systems including personal computers, CATV converters, flight simulators, CD ROMs and medical ultrasound systems. The AD720 is a highly integrated, cost-effective video encoding system, which offers substantially better video picture quality than that of other analog video encoders available today.

Mfr.'s Type	Video Output Typ. (BW)	Supply Voltage	Power Consumption (mW)
AD720JP	5 MHz	±5 V	200

Interface Products

The ADM2XXL family is designed to meet the EIA-232E specifications while operating from a single +5 V power supply. This is achieved by the use of an on-chip voltage doubler. Older generation RS-232 drivers required three separate power supplies: +5 V, +12 V, and –12 V, resulting in large bulky power supply units. Linear voltage regulators tend to be inefficient and are wasteful of power. This is especially a problem in today's portable equipment which operates with battery powered supplies. Ideally the single power supply should be used which can easily be derived from a battery pack. A new design, Analog Devices' process for the 5 V RS-232 market offers lowest ICC, lowest I shutdown and the highest speed in its class. Our ADM23XL series of line drivers/receivers are major upgrades.

Voltage-to-Frequency/Frequency-to-Voltage Converters

Voltage-to-Frequency Converters (VFCs) convert analog voltage or current levels to pulse trains or square waves in logic compatible form (usually TTL) at frequencies that are accurately proportional to the analog quantity. The output continuously tracks the input signal, responding directly to changes in the input signal. Frequency-to-Voltage Converters (FVCs) perform the inverse operation; they accept a wide variety of periodic waveforms and produce an analog output proportional to frequency. Combining adjustable threshold, gain and output offset with low linearity error, F/V converters offer economical solutions to a wide variety of applications where it is required to convert frequency to an analog voltage. Applications of both forms of conversion, as appropriate to specific device types, are illustrated with varying degrees of detail on the individual product datasheets.

Voltage-to-Frequency Converters

Frequency-to-Voltage Converters

Mfr.'s Type	Linearity Input Range (kHz)	Response Time Max. (%)	Comments
AD650JN	0-1000	0.005	Low Nonlinearity, Multiple Input Ranges F-V Converter
AD650KN	0-1000	0.005	Low Nonlinearity, Multiple Input Ranges F-V Converter

Power Management Products

µProcessor Supervisory Circuits

The ADM69X series are CMOS Microprocessor Supervisory Circuits that operate from a single 5 V supply. This family of parts are monitor circuits that take emergency action when the main VCC supply or other system monitors to the µprocessor drop below a precisely defined level. These products are superior upgrades to other manufacturers, with five times less supply current to deliver twice the output current. Chip Endable (CE) propagation delay an order of magnitude faster, a V_{CC} to reset comparator response time an order of magnitude faster and a guaranteed valid reset down to 1 V V_{CC}. These benefits over other manufacturer's products will extend battery life, allow for a wider application base and offer faster response times allowing for more accurate system supervision at competitive prices.

Mfr.'s Type	Operating Voltage Range	V_{CC} Timeout Delay (ms)	Reset Max. (mA)	I_{DD} (Norm. Oper.)	R_{ON}* (Battery B.U.)	Output Current Drive	Valid RESET @ 1 V	Specified Over Temp.	CE Propagation Delay	Comments
ADM690AN	4.75 V to 5.5 V	35 to 70	1.95	1.5 Ω	20 Ω	100 mA	50 mA	Yes	9 ns	4-Function, 8-pin, 4.65 V Reset, 50 ms Reset Pulse Width
ADM691AN	4.75 V to 5.5 V	35 to 70	1.95	1.5 Ω	20 Ω	100 mA	50 mA	Yes	9 ns	5-Function, 16-pin, 4.4 V Reset
ADM691AR	4.75 V to 5.5 V	35 to 70	1.95	1.5 Ω	20 Ω	100 mA	50 mA	Yes	9 ns	5-Function, 16-pin, 4.4 V Reset
ADM692AN	4.50 V to 5.5 V	35 to 70	1.95	1.5 Ω	20 Ω	100 mA	50 mA	Yes	9 ns	4-Function, 8-pin, 4.4 V Reset, 50 ms Reset Pulse Width

Modular DC/DC Converters

- ► Inaudible >20 kHz Converter Switching Frequency
- ► Continuous, Six-Sided EMI/RFI Shielding Except on 1 Watt and 1.8 Watt Models
- ► Output Short Circuit Protection; Either Output to Common
- ► Automatic Restart after Short Condition Removed
- ► Automatic Starting with Reverse Current Injected into Outputs
- ► Low Output Ripple and Noise
- ► High Temperature Stability
- ► Free Air Convection Cooling; No External Heat Sink or Specification Derating Is Required over the Operating Temperature Range

Analog Devices' line of compact dc/dc converters offers system designers a means of supplying a reliable, easy to use, low cost solution to a variety of floating (analog and digital) power applications. These devices provide high accuracy, short circuit protected, regulated outputs with very low output noise and ripple characteristics. **Specifications:** Typical @ +25°C at nominal input voltage unless otherwise noted.

Mfr.'s Type	Output Voltage (Volts)	Output Current (mA)	Input Voltage (Volts)	Input* Voltage Range (Volts)	Input Current Full Load	Output Voltage Error Max.	Temperature Coefficient /°C Max.	Efficiency Full Load Min.	Dimensions (Inches)
958	5	100	5	4.50/5.50	200.00 mA	±5.0%	±0.010% typ.	50%	1.25 × 0.8 × 0.400

*Models 940 and 941 will deliver up to 120 mA output current over an input voltage range of 4.65 V dc and 5.5 V dc. †Single-ended or unbalanced operation is permissible such that total output current load does not exceed a total of 120 mA.

Modular AC/DC Power Supplies

- ► Current Limit Short Circuit Protection
- ► PC Mounted and Chassis Mounted Versions
- ► Single (+5 V), Dual (±15 V), and Triple (±15 V/+5 V) Output Supplies
- ► Current Outputs: 100 mA to 500 mA for Dual and Triple Output Supplies; 1000 mA to 5000 mA for Single Output Supplies
- ► Wide Input Voltage Range
- ► Low Output Ripple and Noise
- ► Excellent Line and Load Regulation Characteristics
- ► High Temperature Stability
- ► Free Air Convection Cooling; No External Heat Sink Required

Analog Devices offers a broad line of modular ac/dc power supplies that provide both OEMs and designers a reliable, easy to use, low-cost solution to their power requirements. Models are available in PC mountable and chassis mountable designs with 5 volt to 15 volt (single, dual, triple) outputs and current ratings from 100 mA to 5 amps. Since these modular supplies are fully encapsulated, no trimming or external component selection is necessary; simply mount the unit, connect power and output leads, and you're on the air! **Specifications:** Typical @ +25°C and 115 V ac 60 Hz unless otherwise noted.

PC Board Mounted — Dual Output

Notes: *Single phase; half sine wave at ambient temperature 25°C. **½ cycle, 50 Hz at full load. **†Epoxy Package. Reverse Recovery Time:** T_a = 25°C, I_F = 2 mA, I_R = 1 mA, 100 nsec max. **Maximum Junction Capacitance:** V = 0, T_a = 25°C, @ 1 MHz, 2 pF. **Storage and Operating Junction Temperature, T_j:** –65°C to +150°C.

Z-Trap Metal Oxide Varistors

Features

- ► **Excellent Clamping Characteristics**
- ► **High Discharge Current Capability — Up to 4000 Amps**
- ► **Fast Response Time — Under 50 Nanoseconds**
- ► **Wide Operating Temperature Range**
- ► **Eliminate Follow-On Current**
- ► **Improve Product Safety**
- ► **Protect Circuit Insulation and Improve System Reliability**
- ► **Low Installation Cost**
- ► **UL Recognized (UL1414, UL1449)**
- ► **Lead Wire: High Temperature Solder Plated Mild Copper Wire**
- ► **Molded Material: Flame Resistant Epoxy Resin (UL, 94V0 Equivalent)**

*Indicates UL listed.

Notes: [1]The waveform of the maximum DC applied voltage is flat. When a ripple voltage as from a rectifier source is applied, make sure that the peak voltage is within the Vdcm rating.
The AC applied voltage (50/60 Hz) is sine waveform.
When waveform distortion is extensive, make sure that the peak voltage is less than √2 times the Vacm rating.

[2]**Energy:** Wtm.
Transient energy ratings are given in the Wtm column in Joules (watt-second). The rating is the maximum allowable energy of a single 2 ms square-waveform impulse current continuously applied. Energy ratings are based on a shift of Vnom of less than ±10% of the initial value.

[3]**Nominal Varistor Voltage:** Vnom.
Indicates the varistor terminal voltage measured with 1 mA DC applied.

[4]**Maximum Clamping Voltage: Vc.**
Indicates the peak terminal voltage.

Operating Ambient Temperature: –40°C to +85°C.
Storage Temperature: –40°C to +125°C.

Prism™ Chipset, Microprocessors, Peripherals, and Data Communications

Harris Semiconductor brings full design support to our Internet World Wide Web site. You can access everything from technical literature on our products, to downloadable design software, to updates on recently and soon to be introduced products. **http: / / www.semi.harris.com**

Harris AnswerFax®: (407) 724-7800

AnswerFax® is Harris' new automated facsimile response system. AnswerFax® allows users access to data sheets and application notes on the latest Harris Semiconductor products, 24 hours a day and 7 days a week.

To access AnswerFax® from any touch-tone phone: Call (407) 724-7800 and touch-tone your way through the simple instructions. Then enter the AnswerFax® order numbers from the selection guide and you'll have the information you requested at your facsimile machine in minutes.

Harris Application Hotline: 1-800-442-7747

Call the Applications Hotline to obtain technical assistance on designing in Harris semiconductors.

Harris Semiconductor Product Selection Guide

This product selection guide offers key product information on all Harris Semiconductor Devices. Sectioned (Analog, Data Acquisition, Digital, Application Specific, Power, Hi-Rel and Rad-Hard, ASIC) for easy use and includes cross references and alphanumeric part number index. To obtain you copy, simply fax you name and mailing address to: Harris Fulfillment, FAX# (610) 265-2520, Attn: Laurie Malantonio. Request Publication Number: PSG201.23.

Prism™ 2.4 GHz Radio Chipset

— NEW —

Features
- ► **IEEE802.11 (Draft) Compliance**
- ► **Provides Complete Antenna-to-Bits Solution**
- ► **Low Voltage Operation**
- ► **2.4 GHz to 2.5 GHz Operation**
- ► **Programmable Data Rates from 256 Kbps up to 4 Mbps**

Benefits
- ► **Interoperability**
- ► **Reduced Design Time/Development Costs**
- ► **Extended Battery Life**
- ► **Free Air Time, Unlicensed Band**
- ► **Flexible Data Rate Transmission**

Features
- ► **10 MHz to 400 MHz IF Operation**
- ► **DBSK and/or DQPSK Modulation**
- ► **Dual Antenna Diversity Option**
- ► **Programmable 16 PN Code**
- ► **Low Profile Surface Mount Packaging**

Benefits
- ► **Wide Choice of IF Bandwidth**
- ► **Quick Synchronization, Efficient Modulation**
- ► **Reduces Multipath Interference**
- ► **Higher Processing Gain**
- ► **Meets PCMCIA Form Factor**

The Harris PRISM™ chipset is a highly integrated solution for RF modems employing Direct Sequence Spread Spectrum (DSSS) signaling. The RF, IF and baseband functions are highly integrated for maximizing board space, designed and targeted toward IEEE802.11 compatibility , and packaged to allow for PCMCIA type II form factor.

Mfr.'s Type	Description	Package Type	Doc. #
HFA3424IB	Low Noise Amplifier	8 Lead	FN4131
HFA3524IA	2.5 GHz / 600 MHz Dual Frequency Synthesizer	20 Lead	FN4062
HFA3624IA	Combined LNA / Mixer	28 Lead	FN4066
HFA3724IN	Quadrature Modulator	80 Lead	FN4067

CDP18xx Microprocessors, 8 Bit Microprocessors with 64 K Memory Addressing

16 × 16 matrix of registers for use as multiple program counters, data pointers or data registers. Single phase clock; optional on chip crystal controlled oscillator. Flexible programmed I/O mode. 8 bit parallel organization with bidirectional data bus and multiplexed address bus.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)

Microprocessor Peripherals (82Cxx)

82C54, CMOS Programmable Interval Timer

Fully compatible with NMOS 8254, enhanced version of NMOS 8253. Three independent 16 bit counters. Six programmable counter modes. Binary or BCD counting. Status read back command. **Static CMOS Design For Low Power:** ICCSB = 10 µA, ICCOP = 10 mA at 8 MHz.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CP82C54	8.0	5.0	24 Lead PDIP	0 to +70	2970

IS82C54-12	12.5	5.0	28 Lead PLCC	–40 to +85	2970

82C55A, CMOS Programmable Peripheral Interface

Fully compatible with NMOS 8255A. 24 programmable I/O pins. High speed, no wait state operation with 5 MHz and 8 MHz 80C86 and 80C88. Direct bit set/reset compatibility. Enhanced control word read capability. 2.5 mA drive capability on all I/O ports. **Static CMOS Design For Low Power:** ICCSB = 10 µA. Fully TTL compatible.

CP82C55A	8.0	5.0	40 Lead PDIP	0 to +70	2969
CS82C55A	8.0	5.0	44 Lead PLCC	0 to +70	2969

IS82C55A	8.0	5.0	44 Lead PLCC	–40 to +85	2969

82C59A, CMOS Priority Interrupt Controller

Fully compatible with the NMOS 8259A. Eight level priority controller, expandable to 64 levels. Programmable interrupt modes, individual request mask capability. **Static CMOS Design For Low Power Operation:** ICCSB = 20 µA max., ICCOP = 1 mA/MHz max. Fully TTL compatible.

CP82C59A	8.0	5.0	28 Lead PDIP	0 to +70	2784

IS82C59A-12	12.5	5.0	28 Lead PLCC	–40 to +85	2784

82C84A, CMOS Clock Generator Driver

Fully compatible with the NMOS 8284A. Generates the system clock for CMOS or NMOS microprocessors.Up to 25 MHz operation. Uses a parallel mode crystal circuit or external frequency source. Provides read synchronization. Generates system rest output form schmitt trigger input. TTL compatible inputs/outputs. Very low power consumption.

CP82C84A	25	5.0	18 Lead PDIP	0 to +70	2974

Data Communications

HS-3182, ARNIC 429 Bus Interface Line Driver Circuit

TTL and CMOS compatible inputs. Adjustable rise and fall times via two external capacitors. Programmable output differential voltage via VREF input. Operates at data rates up to 100 KBits/s. Output short circuit proof and contains overvoltage protection. Requires 3 power supplies.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
HS1-3182-8	—	+15, –15, +5	16 Lead CDIP	–55 to +125	2963
HS4-3182-8	—	+15, –15, +5	28 Lead LCC	–55 to +125	2963

Data Communications (Continued)

HS-3282, CMOS ARNIC Bus Interface Circuit

ARNIC Specification 429 compatible. Data rates of 100 KBits or 12 KBits. Separate receiver and transmitter section. Dual independent receivers, connecting directly to ARNIC bus. Serial to parallel receiver conversion. Parallel to serial transmitter conversion. Word lengths of 25 or 32 bits. Parity status of received data. Generate parity of transmitted data. Automatic word gap timer. Single 5 volt supply.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
HS1-3282-8	—	5.0	40 Lead CDIP	–55 to +125	2964
HS4-3282-8	—	5.0	44 Lead LCC	–55 to +125	2964

HD-4702, CMOS Programmable Bit Rate Generator

Provides 13 commonly used bit rates. Uses a 2.4576 MHz crystal/input for standard frequency Output (16 times bit rate). Conforms to EIA RS-404. One HD-4702 controls up to eight transmission channels. Initialization circuit facilitates diagnostic fault isolation. On chip input pull-up circuit.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
HD1-4702-9	—	5.0	16 Lead CDIP	–40 to +85	2954

—	—	—	—	—	—

CDP6402, CMOS Universal Asynchronous Receiver/Transmitter (UART)

Low Power CMOS Circuitry: 7.5 mW (typ.) at 3.2 MHz (max freq.) at VDD = 5V. Baud Rate: DC to 200 KBits/s (max.) at 5 V, DC to 400 KBits/s (max.) at 10 V. Automatic data formatting and status generation. Fully programmable with externally selectable word length (5-8 bits), parity inhibit, even/odd parity, and 1, 1½, or 2 stop bits. Replaces industry type IM6402.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
CDP6402CE	3.20	5.0	40 Lead PDIP	–40 to +85	1328
CDP6402E	3.20	10.0	40 Lead PDIP	–40 to +85	1328

HD-6402, CMOS Universal Asynchronous Receiver/Transmitter (UART)

Low power CMOS design. Programmable word length, stop bits, and parity. Automatic data formatting and status generation. Compatible with industry standard UARTs. Single 5 V power supply. CMOS/TTL Compatible inputs.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
HD1-6402B-9	8.00	5.0	40 Lead CDIP	–40 to +85	2956

—	—	—	—	—	—

HD-6408, CMOS Asynchronous Serial Manchester Adapter (ASMA)

Low bit error rate. **Data Rate:** 1 MBits/s. Sync identification and lock-in. Clock recovery. Manchester II encoder, decoder. Separate encode and decode. **Low Operating Power:** 50 mW at 5 V. Single power supply.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)
HD1-6408-9	1.25	5.0	24 Lead CDIP	–40 to +85	2952
HD3-6408-9	1.25	5.0	24 Lead PDIP	–40 to +85	2952

HD-6409, CMOS Manchester Encoder/Decoder

Converter or repeater mode. Independent manchester encoder and decoder operation. Static 1 MBits/s data rate guaranteed. Low bit error rate. Digital PLL clock recovery. On chip oscillator. **Low Operating Power:** 50 mW (typ.) at 5 V.

Mfr.'s Type	Operating Frequency (MHz)	Operating Voltage (V)	Package Type	Temperature Range (°C)	AnswerFax® (Doc. #)

HIP2030EVAL
Isolated MCT/IGBT Gate Driver Evaluation Board

The Harris HIP2030EVAL is a printed circuit board developed to help evaluate the performance of the HIP2030 in power switching circuits. The component layout of the HIP2030EVAL circuit enable the user to conveniently utilize either photocoupled or fiber-optic receivers. In addition, the PCB layout has provisions for "on board prototyping" and special function components.

The HIP2030 is a medium voltage integrated circuit capable of driving large capacitive loads at high voltages slew rates. This device is optimized for driving 60 nF of MOS gate capacitance at 30 Vp-p in less than 200 ns. The half bridge gate driver is ideal for driving MOS Controlled Thyristor and IGBT modules.

HIP2030EVAL. AnswerFax® Doc. # 3918

HSP50016-EV
DDC Evaluation Platform

The HSP50016-EV is the evaluation board for the HSP50016 Digital Down Converter (DDC). It provides a mechanism for rapid evaluation and prototyping. The HSP50016-EV consists of a series of busses which provide input, output, and control to the DDC. These busses are brought out through dual 96 Pin connectors to support daisy chaining HSP50016-EVs with other Harris evaluation boards for multichip prototyping and evaluation.

The HSP50016-EV was built into a 3U Euro-Card form factor with dual 96-pin Input/Output connectors. The I/O connectors conform to the VME J2/P2 connector standard.

HSP50016-EV. AnswerFax® Doc. # 3637

HIP5600 Evaluation Boards

The HIP5600IS used on the HIP5600 evaluation boards is an adjustable 3-terminal positive linear voltage regulator. Protection within the HIP5600 is provided by the on chip thermal shutdown and output current limiting circuitry. Evaluation boards are fused to protect board when improperly connected.

HIP5600EVAL1
High Voltage DC to DC Evaluation Board

- **Operates from 50 VDC to 400 VDC**
- **Adjustable Output Voltage 1.2 VDC to V_{IN} — 50 VDC**
- **Output Current to 10 mA at 400 VDC Input**

HIP5600EVAL1. AnswerFax® Doc. # 3747

HIP5600EVAL2
High Voltage AC to DC Evaluation Board

- **Operates from 80 VRMS to 132 VRMS**
- **Adjustable Output Voltage 1.2 VDC to V_{IN} — 50 VDC**
- **Output Current to 10 mA at 400 VDC Input**

HIP5600EVAL2. AnswerFax® Doc. # 3748

HIP5600EVAL3
High Voltage AC to DC Evaluation Board

- **Operates from 80 VRMS to 320 VRMS**
- **Adjustable Output Voltage 1.2 VDC to V_{IN} — 50 VDC**
- **Output Current to 10 mA at 400 VDC Input**

HIP5600EVAL3. AnswerFax® Doc. # 3749

ML Series. Operating Ambient Temperature (without Derating): –55° to +125°C. **Storage Temperature:** –55° to +150°C. **HiPot Encapsulation:** NA. **Voltage Temperature Coefficient (Vc at Specified Test Current):** <.01%/°C. **Insulation Resistance (MΩ):** NA.

LA, ZA Series. Operating Ambient Temperature (without Derating): –55° to +85°C. **Storage Temperature:** –55° to +125°C. **HiPot Encapsulation:** 2500. **Voltage Temperature Coefficient (Vc at Specified Test Current):** <.01%/°C. **Insulation Resistance (MΩ):** >1000.

ZA Series

- **Average Power Dissipation of Transients Not to Exceed 0.2 W, 0.25 W, 0.4 W, 0.6 W, or 1 W for Model Sizes 5 mm, 7 mm, 10 mm, 14 mm, and 20 mm Respectively**
- **ZA Series Varistors Are Listed Under UL File No. E135010 as a UL Recognized Component**

"C" III Series

Radial Lead Metal-Oxide Varistors for the TVSS Environment

- ► **Recognized as "Transient Voltage Surge Suppressors" to UL 1449; File #E75961**
- ► **Recognized as "Transient Voltage Surge Suppressors" to CSA C22.2, No. 1; File #LR91788**
- ► **High Energy Absorption Capability W_{TM}: 45 J to 240 J (2 ms)**
- ► **High Peak Pulse Current Capability I_{TM}: 6000 A to 9000 A (8/20 µs)**
- ► **Wide Operating Voltage Range $V_{M(AC)RMS}$: 130 V to 300 V**
- ► **Available in Tape and Reel for Automatic Insertion; Also Available Crimped and/or Trimmed**

The expanded version of the LA series of metal-oxide varistors, designation "C" III series, consists of AC line voltage rated MOVs with extremely high current and energy handling capabilities. This new "C" III series of MOVs were primarily designed for the transient voltage surge suppressor (TVSS) environment. They provide the increased level of protection now deemed to be necessary for the transients expected in this environment. The occurrence of high voltage transients in the AC power network can be detrimental to the associated line equipment. Such transient occurrences may cause product failure and the subsequent faulty operation of the electrical systems. This new expanded version of the Harris 20 mm LA series of metal oxide varistors is also available with 10 mm lead spacing, in tape and reel and in a variety of distinctive crimped and trimmed offerings.

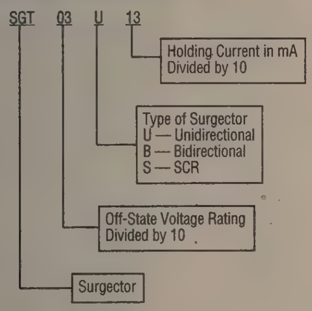
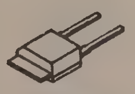
***Note:** Average power dissipation of transients not to exceed 0.6 W and 1 W for model sizes 14 mm and 20 mm, respectively.

Surgector Products



PACKAGE A



PACKAGE B

- ► **High Input Impedance Until Breakdown (i.e., Low Leakage)**
- ► **Repeatable Breakdown/Threshold Voltage**
- ► **High Surge Current Handling Capability**
- ► **Withstand and Respond to Rapidly Recurring Surges**
- ► **Fast Recover to High Impedance State (Turn Off)**
- ► **Dual Polarity Protection**
- ► **No Degradation of Essential Characteristics with Use**
- ► **Zener (Avalanche) Diode and SCR-Type THyristor**
- ► **Zener Provides Continuous Low Voltage Protection**
- ► **Thyristor Provides Instantaneous Protection Against Fast Rising Transients**

Provide transient protection for central office equipment, repeaters, supervisory equipment, line concentrator, switchgear equipment, receivers, data transmission, headsets, handsets, modem, EPABX, PABX, PBX, and PCM. Two bidirectional Surgector devices are placed between the tip and ring lines just after lines enter the telephone to protect delicate telecommunications equipment.

NOTES: [1] Dependent on trigger circuit. [2] Devices UL recognized to 497B — File Number E135010.

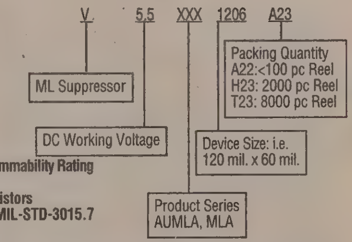
ML Series

Features

- ► **Leadless Chip Form – "Zero" Lead Inductance**
- ► **Multilayer Construction Technology**
- ► **–55°C to +125°C Operating Temperature Range**
- ► **Wide Operating Voltage Range $V_{M(DC)}$ = 3.5 V to 68 V**
- ► **Broad Range of Energy Handling Capabilities**
- ► **Low Profile, Compact Industry Standard Chip Sizes**
- ► **Inherent Bidirectional Clamping**
- ► **Low Capacitance Models Available**
- ► **No Plastic or Epoxy Packaging Assures Better than 94V-0 Flammability Rating**

Applications

- ► **On-Board Transient Voltage Protection for ICs and Transistors**
- ► **ESD Protection for Components Sensitive to EIC 801-2, MIL-STD-3015.7**
- ► **Replace Larger Surface Mount Zener Diodes**



ML Series transient surge suppressors are designed to protect sensitive electronic devises from destruction by high voltage transients. These suppressors are designed to fail short when overstressed and protect the associated equipment. The ML suppressor is manufactured from semiconducting ceramics which offer rugged protection, excellent transient energy absorption and increased internal heat dissipation. The devises are in chip form, eliminating lead inductance and assuring fast speed of response to transient surges. These transient suppression devices have significantly smaller footprints and lower profiles than traditional TVS diodes or radial MOVs (metal oxide varistors), thus allowing designers to reduce size and weight while increasing system reliability.

MCS® 251, MCS® 151 and MCS® 51 Microcontrollers

Intel's 8-bit MCS 251, MCS 151 and MCS 51 Microcontrollers have become an industry standard for embedded control. The architecture is optimized for control oriented applications.

MCS® 251, MCS® 151, and MCS® 51 Microcontrollers (Continued)

Intel's 8-bit MCS 251, MCS 151, and MCS 51 Microcontrollers have become an industry standard for embedded control. The architecture is optimized for control oriented applications.

MCS® 51 Microcontrollers Classic (Continued)

Generic Gate Array Logic

GAL16V8 and GAL20V8, High Performance E2CMOS PLD Generic Array Logic™

Performance ranges from the industries fastest at 5 ns Tpd to the popular 25 ns versions. Low power consumption with Low Power versions rated at 75 mA typical and Quarter power versions rated at 45 mA typical. Eight powerful Output Logic Macrocells (OLMCs) with eight Product Terms each. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

GAL16VP8B and GAL20VP8B, High Speed E2CMOS PLD Generic Logic Array™

High output drive versions of the GAL16V8 and GAL20V8. **IOL:** 64 mA vs. standard 24 mA. Combines GAL architecture with high drive of 74XX244 buffer families. Fast 15 ns/80 MHz performance. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

GAL22V10, High Performance E2CMOS PLD Generic Array Logic™

Available in industry leading 5 ns/200 MHz versions through 25 ns versions. Low power consumption with Low Power versions at 90 mA and Quarter Power versions at 45 mA typical. 10 OLMCs with variable Product Terms per OLMC ranging from 8 to 16 for increased logic capability. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

ispGAL22V10C, In-System Programmable E2CMOS PLD Generic Gate Array Logic™

Offers in-system programmability. Popular GAL22V10 architecture. Same 28-pin PLCC as the GAL22V10. Fast 7.5 ns/111 MHz performance. Unprecedented design and manufacturing flexibility. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

GAL18V10B, High Performance E2CMOS PLD Generic Array Logic™

20-pin space saving subset of the popular GAL22V10. Eight to 10 Product Terms per OLMC. Ideal for printed circuit board area constrained designs. This is the only 20-pin PLD on the market. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

GAL26CV12, High Performance E2CMOS PLD Generic Array Logic™

Expanded logic density in a 28-pin DIP/PLCC. 28-pin superset of the popular GAL22V10. World's fastest 28-pin PLD at 7.5 ns. 26 inputs and 12 outputs. Flexible 22V10 OLMC. Fully utilized 28-pin PLCC package gives added functionality over the 22V10 at no space premium. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

GAL20RA10, High Speed Asynchronous E2CMOS PLD Generic Logic Array™

Performance ranges from 10 ns Tpd to 20 ns versions. Faster and lower power than bipolar PALs. Low power consumption with Low Power versions rated at 75 mA typical. Ten powerful Output Logic Macrocells (OLMCs) with independent product term clocks. Ten independently programmable clocks. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

GAL20XV10, High Speed E2CMOS PLD Generic Logic Array™

Utilizes powerful XOR function for efficient implementation of arithmetic functions. 10 ns/100 MHz performance significantly outperforms bipolar PALs. Perfect for fast counters,decoders, comparators, video, multimedia, and graphics applications. **Replaces:** PAL20L10, 20X10, 20X8, 20X4, and 20L10. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

GAL6001 and GAL6002, High Performance E2CMOS FPLA Generic Array Logic™

The logic density of an FPLA architecture, unprecedented in a 24/28-pin DIP/PLCC. Functional equivalent of 2 GAL22V10s. **38 Macrocells:** 10 Input, 10 Output, 10 I/O, and 8 Buried Logic. 15 ns/75 MHz performance. Ideal for register intensive applications. The GAL6002 has Active Pull-Ups on all pins. **VCC:** 5 V ±5%. **Temperature Range:** 0 to +75°C.

High Density Programmable Logic

The Lattice programmable Large Scale Integration (pLSI)® and in-system programmable Large Scale Integration (ispLSI)® families are the logical choice for your next design project. They're the first programmable logic devices to combine the performance and ease of use of PLDs with the density and flexibility of FPGAs. And at 135 MHz system speed, and up to 14000 PLD gates, they're the worlds fastest and highest density programmable logic devices!

pLSI and ispLSI1000: The Premier High Density Family

isp-SK2 — isp™ Starter Kit

The isp Starter Kit is designed to make Lattice's innovative in-system programmable device technology available in a single, complete package. The ispStarter Kit contains all the software, hardware, device samples, and information needed to begin designing with Lattice isp products. The ispLSI devices are the fastest High Density Programmable Logic devices in the industry, at 154 MHz, as certified by PREP™ Benchmarks: LSC's 7.5 ns ispGAL22V10 device has all the advantages of In-System Programmability and maintains the familiar 22V10 architecture and 28-pin PLCC pinout. The ispGDS is a unique family of devices that offers the ability to configure its programmable switch matrix to connect signals arbitrarily between two banks of I/O pins or to force pins to fixed high or low logic states:

Features
- **Easy To Use Kit Contains Everything Needed for In-System Programmable™ Device Design-In**
- **Supports Lattice's ispLSI 1016/E and 2032 Devices — The Industry's Fastest High Density Programmable Devices at Up to 154 MHz**
- **Supports Industry Standard 22V10 Architecture Coupled with LSC's Innovative In-System Programmable Design Capability**
- **Supports ISP Generic Digital Switch for Applications such as Software Driven Hardware Configuration and Multiple DIP Switch Replacement**
- **E²CMOS Technology**

Software
- **ispStarter™ Design Development System for ispLSI 1016/E and 2032 Device Design**
- **ipsGDS™ (Generic Digital Switch) Compiler and Download Software**
- **ispCODE™ ANSI C Source Programming Routines**
- **ISP Daisy Chain Download Software**
- **Lattice Semiconductor Corporation (LSC) Data Book**
- **LSC ISP Manual**

Samples
- **ispLSI2032-80lj Device In 44 Lead PLCC**
- **ispGAL22V10B-15LJ Device In 28 Lead PLCC**
- **ispGDS14-7LJ Device In 20 Lead PLCC**

Hardware
- **ispDOWNLOAD™ Cable**

Order Part number isp-SK2.

isp Synario System — NEW —

The Lattice Semiconductor ISP Synario System contains everything needed to design and program with Lattice Semiconductor ispLSI and GAL devices. The full version of Data I/O's Synario Entry tools for schematic capture and ABEL-HDL language logic design, a functional simulator and Data I/O's PRoject Navigator for easy design and logic debugging are included. The ISP Synario System supports high density design for Lattice Semiconductor's ispLSI and pLSI 1016, 1024, 2032, 2064 and 2096 devices. The tools included also support the full range of Lattice Semiconductor's industry standard ispGAL and GAL devices, including the ispGAL22V10, GAL16V8, GAL20V8 and GAL6001 devices, and others. In addition, the ISP Synario System includes device samples of the ispLSI 2032, ispGAL22V10 and ispGDS™, as well as an ispDOWNLOAD™ Cable to download designs to the PC board.

Features
- **Easy-to-Use Kit Contains Everything Needed for In-System Programmable™ Device Design-In**
- **Data I/O Synario-Entry Software — Schematic Entry; ABLE HDL Entry; Functional Simulator with Waveform Viewer; Synario Project Navigator**
- **Supports LSC's ispLSI 1016, 1024, 2032, 2064, 2096 Devices — The Industry's Fastest High Density Programmable Devices at Up to 154 MHz**
- **Supports all Lattice Semiconductor GAL Architectures Including the ispGAL22V10**
- **Supports ISP Generic Digital Switch for Applications Such as Software Driven Hardware Configuration and Multiple DIP Switch Replacement**
- **Keyless for Easy Portability**

Software
- **Data I/O's Synario Entry and Functional Simulation Software**
- **pDS+™ Synario Fitter for ispLSI and pLSI Devices**
- **ispGDS™ (Generic Digital Switch) Compiler Software**
- **ISP™ Programming Software**

Samples
- **ispLSI 2032 Device in 44-Pin PLCC Package**
- **ispGAL22V10 Device in 28-Pin PLCC Package**
- **ispGDS14 Device in 20-Pin PLCC Package**

Hardware
- **ispDOWNLOAD™ Cable**

Order Part Number isp-SYN.

Interface Products

Maxim's RS-232 and RS-485 transceivers are designed for communication interfaces where ±12 V supplies are not available. For our RS-232 devices, on board charge pumps convert the +3 V or ±5 V input to the ±10 V needed for RS-232 levels. For our RS-485 devices, Maxim uses a proprietary low dropout output stage to provide output voltages of 2 V into 110 ohms from either 3 V or 5 V. Maxim has also upgraded the original MAX232 and MAX485 solutions, providing ±15 KV ESD protection, +3 V and +5 V interoperability, Isolation and Autoshutdown. Maxim continues to provide value added solutions that offer the highest performance and quality. For samples or literature call Maxim at 1-800-998-8800.

Analog-to-Digital Converters

Maxim offers a wide range of analog-to-digital converters that provide benefits in many applications, including instrumentation, industrial, medical and telecommunications. The resolutions range from 8-bits to 18-bits, and the speeds range from DC to 500 MHz. Each device has features that add value, such as high-accuracy, a high level of integration, low-power, shutdown, a serial interface, etc. Evaluation kits are also available for most of these ADCs.

Mfr.'s Type	Resolution (Bits)	Speed (ksps)	Interface	Input Channels	Features
MAX148BCAP	10	133.00	Serial	8	2.7 V-5.25 V, <1 mA supply current, 1 µA shutdown, SSOP
MAX148BCPP	10	133.00	Serial	8	2.7 V-5.25 V, <1 mA supply current, 1 µA shutdown, DIP
MAX192ACPP	10	133.00	Serial	8	Low power, low cost, available in small (SSOP) package
MAX192BCAP	10	133.00	Serial	8	Low power 10-bit ADC "B" grade, SSOP
MAX192BCPP	10	133.00	Serial	8	Low power 10-bit ADC "B" grade, DIP
MAX147BCAP	12	133.00	Serial	8	2.7 V-5.25 V, <1 mA supply current, 1 µA shutdown, SSOP
MAX147BCPP	12	133.00	Serial	8	2.7 V-5.25 V, <1 mA supply current, 1 µA shutdown, DIP
MAX180ACPL	12	100.00	µP/8 or 12	8	Complete data acquisition system
MAX186DCAP	12	133.00	Serial	8	Low power (7 mW) with 10 µA power-down, internal reference, relaxed performance grade, SSOP
MAX186DCPP	12	133.00	Serial	8	Low power (7 mW) with 10 µA power-down, internal reference, relaxed performance grade, DIP
MAX187ACPA	12	75.00	Serial	1	7 mW, 8-pin package
MAX196BCAI	12	100.00	µP/12	8	Range-switching provides 14-bits effective dynamic range, fault-protected inputs, SSOP
MAX196BCNI	12	100.00	µP/12	8	Range-switching provides 14-bits effective dynamic range, fault-protected inputs, DIP
MAX111BCWE	14	0.05	Serial	2	Sigma-Delta, no external components, single +5 V supply, SOIC package
MAX132CNG	18	0.10	Serial	1	Integrating ADC, <1 mW, 3 LSBs used for averaging

The parts listed above are the plastic DIP package devices, unless otherwise specified, but the devices are also available in surface mount (SO) CERDIP, and some are available in a shrink-small outline (SSOP). Many are available in more than 1 performance grade.

Digital-to-Analog Converters

Maxim's digital-to-analog converters provide the required performance with minimum power usage. The DACs range from low-power devices (less than 1 µA supply current) to high-speed (4 ns settling time) and high-integration (eight 13-bit DACs in a single package) devices. The resolutions range from 8-bits to 16-bits.

Mfr.'s Type	Resolution	Settling Time (µs)	Interface	Output Type	Reference*	Features
MAX506ACPP	8	6	µP/8	MDAC	Voltage	Quad, rail-to-rail outputs, single reference input
MAX512CPD	8	60	Serial	MDAC	Voltage	Triple, +5 V supply, low power with shutdown
MAX517BCSA	8	6	Serial (2-wire)	ext	Voltage	Single +5 V DAC with 2-wire interface, 8-pin SO package
MAX518BCSA	8	6	Serial (2-wire)	V_{REF}=V_{DD}	Voltage	Dual +5 V DAC with 2-wire interface in 8-pin SO package
MAX520BCPE	8	6	Serial (2-wire)	ext	Voltage	Quad, +5 V DAC with 2-wire interface, 4 µA supply current, DIP
MAX520BCWE	8	6	Serial (2-wire)	ext	Voltage	Quad, +5 V DAC with 2-wire interface, 4 µA supply current, SO
MAX522CPA	8	70	Serial	ext	Voltage	Two V_{OUT} DACs in 8-pin DIP package, single 2.7 V to 5.5 V supply
MAX522CSA	8	70	Serial	ext	Voltage	Two V_{OUT} DACs in 8-pin SO package, single 2.7 V to 5.5 V supply
MAX528CPP	8	5	Serial	ext	Voltage	µP-selected buffered and unbuffered output
MAX504CSD	10	25	Serial	int/MDAC	Voltage	Serial version of MAX503, SO package
MAX514ACNG	12	1	Serial	MDAC	Current	Quad, current output
MAX532ACPE	12	4	Serial	MDAC	Voltage	Dual DAC, ±15 V supplies, 16-pin SO
MAX543ACPA	12	1	Serial	MDAC	Current	8-pin DIP/SO

*MDAC=4-quadrant multiplying capacity. The parts listed above are the plastic DIP package devices, unless otherwise specified, but the devices are also available in surface mount (SO) CERDIP and some are available in a shrink-small outline (SSOP). Many are available in more than 1 performance grade.

µP Supervisory Circuits in PDIP and SOIC Packages

Maxim has the largest µProcessor Supervisory family available — over 50 unique ICs. These products signal a µProcessor or µController when the power is on and holds the µProcessor or µController in reset when the power is low. Other functions include watchdog timing, chip enable gating, battery back-up switches, and manual reset.

Mfr.'s Type			Reset Trip Threshold Min./Max. (V)	Minimum Reset Pulse Width (ms)	Active Low Reset	Active High Reset	RESET Valid to V_{CC} = 1 V	Nominal Watchdog Timeout Period (Sec.) 5 V and 12 V Flash Memory Programming Supplies

Maxim makes the world's smallest 5 V and 12 V flash memory programming supplies, fitting in spaces as small as 0.1 in2. Their small size, low supply currents, low input voltage ranges, and high efficiency permit use in applications ranging from host machines to solid state disk drives to PCMCIA applications and memory cards. Flash-memory power supplies are commonly specified in multiples of 30 mA — the worst-case IPP current drawn by a typical byte-wide flash EEPROM chip during its erase cycle.

Mfr.'s Type	Min. VIN (V)	IOUT (mA)	Package	Comments
MAX619CSA	2.00	50	8 SOIC	Uses only 4 capacitors, small size, 12 V out
MAX606EUA	2.80	140	8 µMAX	1 MHz, very small size, 1.1 mm high
MAX662ACSA	4.75	40	8 SOIC	Uses only 4 capacitors, small size, 12 V out
MAX761CSA	4.75	225	8 SOIC	200 µA supply current, 1 µA shutdown
MAX782CBX	5.50	150	36 SSOP	3-output Pentium supply with dual PCMCIA slots
MAX607ESA	3.00	70	8 SOIC	Lower IQ than MAX606

Charge-Pumps: Voltage Converters without Inductors

Maxim's charge-pump devices use only capacitors to boost or invert input voltages to useful output voltages. These small circuits save space and cost over inductor-based solutions. They are also free of EMI noise. They provide convenient and economical circuits to bias small LCD panels, boost low voltages in back-up circuits, bias GaAsFET power amplifiers in RF applications, and program flash memories. Their outputs are either regulated or unregulated.

Mfr.'s Type	VIN Range (V)	VOUT (V)	IOUT (mA)	Package	Comments
MAX1044CSA	1.5 to 10	–VIN or 2 VIN	20	8 SOIC	60 kHz osc. boost mode
MAX660CSA	1.5 to 5.5	–VIN or 2 VIN	100	8 SOIC	6.5 ohm output impedance
MAX860CUA	1.5 to 5.5	–VIN or 2 VIN	50	8 µMAX	1.11 mm high, 130 kHz switch freq.
MAX861CSA	1.5 to 5.5	–VIN or 2 VIN	50	8 SOIC	250 kHz switch freq.
MAX680CSA	2.0 to 6	–2 VIN and 2 VIN	10	8 SOIC	Dual-output
MAX662ACSA	4.5 to 5.5	12	45	8 SOIC	Flash memory programmer
MAX850CSA	4.5 to 10	–4.1 or Adjust.	5	8 SOIC	GaAsFET bias
MAX864EEE	1.75 to 6	–2 VIN and 2 VIN	20	16 QSOP	Dual-output, shutdown, selectable fosc.
MAX865EUA	1.5 to 6	–2 VIN and 2 VIN	20	8 µMAX	Very small package
MAX828EUK	1.5 to 5.5	–VIN	25	5 SOT23	Better than ICL 7660
MAX829EUK	1.5 to 5.5	–VIN	25	5 SOT23	Better than ICL 7660

Battery Chargers

Maxim's battery-charging products provide convenient, economical ways to charge and monitor Nickel Metal Hydride (NiMH), Nickel Cadmium (NiCd), and Lithium Ion (Li+) cells. Product offerings include intelligent chargers with built-in termination algorithms, current-sources that can be used in conjunction with microprocessors, and monolithic charge counters for measuring energy flow into and out of batteries.

Mfr.'s Type	Function	Package	Description
MAX2003CPE	Intell. Charger	16 PDIP	3 A switch-mode charger; 5 term. methods: temp. slope, volt slope, max. volt, max. temp., max time
MAX2003ACPE	Intell. Charger	16 PDIP	3 A switch-mode charger; 5 term. methods: temp. slope, volt slope, max. volt, max. temp., max time, includes pulse-trickle charging
MAX2003ACSE	Intell. Charger	16 N SOIC	3 A switch-mode charger; 5 term. methods: temp. slope, volt slope, max. volt, max. temp., max time, includes pulse-trickle charging

LCD Power Supplies

Maxim makes compact, high-efficiency LCD bias supplies for every size screen — from low-cost single-line pager displays to the newest TFT color screens used in notebook computers. Maxim offers both digital and potentiometer adjustable supplies for both positive and negative voltage screens. Choose from higher-power switch mode devices for large screens or low-power charge-pump based circuits for smaller pager-size displays.

Mfr.'s Type	VIN Range (V)	VOUT (V)	Type	Package	Comments
MAX860CUA	1.5 to 5.5	–VIN or 2 VIN	Small LCD	8 µMAX	No inductors, 1.11 mm high, 4.7 µF caps
MAX1044CSA	1.5 to 10	–VIN or 2 VIN	Small LCD	8 SOIC	No inductors, 60 kHz osc. boost pin
MAX608ESA	1.8 to 16.5	Adjust. Positive	Pos. LCD	8 SOIC	Drives ext. N ch., high efficiency
MAX828EUK	1.5 to 5.5	–VIN	Small LCD	5 SOT23	No inductors, very small
MAX829 EUK	1.5 to 5.5	–VIN	Small LCD	5 SOT23	No inductors, very small

Low-Voltage Boost Converters

Maxim's step-up DC-DC converters provide the best combination of low quiescent current, high efficiency, and small size. They are the perfect choice for battery powered applications. Maxim offers a broad range of low-voltage step-up DC-DC converters that operate from single-battery-cell inputs (0.9 V start-up) to regulated 3.3 V system supply inputs. They are used to generate main system supplies, 5 V flash supplies, or low-current back-up supplies. They can also be used as local 5 V supplies in otherwise 5 V-only systems.

Mfr.'s Type	VIN (Min.) (V)	VOUT (V)	IOUT (mA)	Package	Comments
MAX756CSA	1.8	3.3 or 5	250	8 SOIC	High efficiency and low supply current
MAX757CSA	1.8	Adj.	250	8 SOIC	High efficiency and low supply current
MAX608ESA	1.8	5 V or Adj.	1000	8 SOIC	Drives ext. N ch., 0.65 mA supply current

Low Dropout Linear Regulators

Maxim's linear regulators combine low-dropout voltages with very low quiescent currents to give longer battery life. Maxim's MAX603 and MAX882 families save space and permit wide operating ranges by using special high-power packaging that has the same form factor as a standard 8-lead SOIC. They also maintain extremely low supply currents (even at high output currents) because they use P-channel MOSFET pass transistors. Unlike PNP regulators, these CMOS devices do not draw large base currents (especially in dropout) and permit longer battery life. The MAX8863/4 come in ultra-small 5-lead SOT23 packages and feature low-noise outputs for wireless applications.

Mfr.'s Type	VIN (Max.) (V)	VOUT (V)	Dropout Voltage (mV)	Package	Package PDISS (Watts)	Quiescent Current (µA)	Comments
MAX663CSA	16.5	5.0 or adj.	900 at 40 mA	8 SOIC	0.47	6	—

Data Books

RF Device Data Rev. 6 Q1/95

The RF Device Data book presents technical information on Motorola's RF products. The RF portfolio includes bipolar, LDMOS, MOSFET RF Power, RF Integrated Circuits, and gallium arsenide chip technologies. This publication also includes a cross reference, selector guide information, case dimensions, and a list of devices not recommended for new design.
504-9800. DL110/D

Bipolar Power Transistor Data Rev. 6 Q2/92

Motorola produces more than 1100 off-the-shelf power transistors covering a very wide range of applications. Their electrical, thermal and mechanical characteristics are presented here in the form of data sheets, with a competitor cross-reference and a selector guide showing devices by package, produce category and major application.
504-9801. DL111/D

Optoelectronics Device Data Rev. 4 Q3/93

In the optoelectronics field, Motorola has concentrated on infrared GaAs and GaAlAs emitters, silicon detectors, high-technology optocouplers/isolators, and an innovative approach to fiber optics. This data book contains up-to-date information on the complete product line. A selector guide and industry cross-reference follow a general introduction and quality/reliability data. Data sheets are grouped in sections covering Discrete Emitters/Detectors, Fiber Optic Components, Optoisolators/Optocouplers, Slotted Optical Switches and Opto Chips. Includes 82 pages of application notes.
504-9802. DL118/D

FAST and LS TTL Data Rev. 5 Q2/92

Low Power Schottky (LS TTL) has become the industry-standard logic in recent years, replacing the original 7400 TTL with lower power and higher operating speeds. In addition to producing the standard LS TTL circuits, Motorola also offers the FAST™ Schottky TTL family. Complete specifications for both LS and FAST families are provided here in data sheet form. Functional selector guide provides an overview of the principal characteristics of the two families.
504-9803. DL121/D

MECL Device Data Rev. 5 Q1/93

Presents full technical data for Motorola's monolithic Emitter Coupled Logic families, including MECL 10H, MECL 10K and MECL III, plus MECL memories and Phase-Locked Loop products. MECL offers very high speeds — with propagating delays down to 1.0 ns — for use in computer systems, high-performance ATE and process control systems, signal processors and navigation systems. The families also offer other advantages which combine to reduce package count and simplify system design. This book includes a technical introduction to MECL and a detailed discussion of system design considerations.
504-9804. DL122/D

Small-Signal Transistors, FETs and Diodes Rev. 5 Q4/94

Presents technical information for the several families that make up Motorola's small-signal semiconductor produce range, including bipolars, FETs and diodes. Complete device specifications and typical performance curves are given on individual data sheets, which are grouped by families and by their metal can and plastic/surface mount packages. A selector guide provides a quick comparison of performance characteristics. Additional sections describe package outline drawings and tape and reel specifications, and clarify the Hi-Rel processing and testing procedures.
504-9805. DL126/D

Linear/Interface Integrated Circuits (2 Volume Set) Rev. 4 Q3/93

Presents detailed technical information in the form of data sheets on Motorola's broad range of linear and interface ICs. Products are divided into 10 sections, including Amplifiers and Comparators, Power Supply Circuits, Motor Control, Voltage References, Data Conversion, Interface Circuits, Communications, Consumer and Automotive. Each section includes its own comprehensive selector guide, while an industry cross-reference lists over 3000 products with their Motorola direct or similar replacements. Full mechanical data is provided, plus a listing of device availability for surface mount.
504-9806. DL128/D

High Speed CMOS Logic Data Rev. 5 Q2/93

For many years, CMOs devices have been used in applications where low power consumption, wide power supply range and high noise immunity are the important factors. For higher speed applications, designers were forced to sacrifice the CMOS benefits and choose families such as LS TTL. Motorola's High Speed CMOS family is fast enough for such applications, while retaining the CMOS features. The HSCMOS Data Book includes a selector guide by function, a discussion of design and handling considerations, and full electrical and performance data in the form of data sheets.
504-9807. DL129/D

CMOS Logic Data Rev. 3 Q4/91

Presents technical data for Motorola's broad line of Metal-Gate CMOS Logic ICs. Complete specifications are provided in the form of data sheets. In addition, a produce selector guide and a handling and design guidelines chapter are included for further information. Includes data on all the logic circuits from the MC14000 series.
504-9808. DL131/D

TMOS Power MOSFET Transistor Data Rev. 6 Q2/96

Power MOSFETs offer unique characteristics and capabilities that are not available with bipolar power transistors. They have high switching speeds, simpler gate drive requirements, reduced need for snubber circuits, and low ON-voltages. This book provides a comprehensive selector guide by package, and full data on all Motorola's TMOS® Power MOSFETs in the form of data sheets. It contains more than 200 pages of theory and applications information in 15 chapters, including Gate Drive Requirements, Paralleling and Characterization, plus a number of specific designs.
504-9809. DL135/D

Communications Device Data Rev. 3 Q4/93

Motorola is a major supplier of semiconductors to communications equipment manufacturers worldwide. This book includes complete specifications for a wide variety of devices designed for this market, in the form of over 1300 pages of data sheets. A selector guide is included to simplify the task of choosing appropriate devices for a system. Applications information, handling and design guidelines, and quality and reliability overviews provide additional support for users of these circuits.
504-9810. DL136/D

Thyristor Device Data Rev. 5 Q3/93

Thyristors are extremely useful across a broad range of control applications. Compared to a mechanical switch, a thyristor has a long service life and fast switching times; its regenerative action and low ON-resistance allow it to be used to control AC loads as well as for simple switching tasks. Thyristor Device Data presents data sheet information plus a comprehensive selector guide and industry cross-reference on Motorola's thyristor families, including SCRs, Triacs, TGTOs and trigger devices. It includes 252 pages of theory and applications information.
504-9811. DL137/D

FACT Data Rev. 3 Q4/93

FACT utilizes a sub 2 micron silicon gate CMOs process to attain speeds similar to that of Advanced Low Power Schottky while retaining the advantages of CMOS logic, namely, ultra lower power and high noise immunity. As an added benefit, FACT offers the system designer superior line driving characteristics and excellent ESD and latchup immunity. This data book describes Motorola's produce line with device specifications and a selector guide, plus over 30 pages of design considerations and comparisons with previous technologies.
504-9812. DL138/D

ECLinPS Device Data Rev. 2 Q1/94

This data book contains device specifications in the form of data sheets for Motorola's ECLinPS advanced Emitter Coupled Logic family. ECLinPS (ECL in picoseconds) was developed in response to demand for an even higher performance logic family of standard logic functions, especially for the computer, ATE, instrumentation and communications industries. ECLinPS offers a maximum signal gate delay of 500 ps including package delay, and a flip-flop toggle frequency up to 800 MHz. Each function is available with either MECL 10H or 100K compatibility.
504-9813. DL140/D

ECLinPS Lite Rev. 2

ECLinPS Lite™ is a family of single, essential logic primitives — gates, muxes, flops, etc. — housed in a space-efficient, cost-effective standard package, the 8-lead SOIC. Packaged gates switch in 250 ps type., with flops toggling at over 2 GHz. Being a single gate family, ECLinPS Lite offers better AC specs and higher skews than even the ECLinPS™ family. At the same time the family provides superior isolation over multiple gate logic. Its small package size makes it ideal for pin cards and other applications that require density, but not at the expense of signal integrity. This book contains device specifications in the form of data sheets as well as applications information for Motorola's ECLinPS Lite family.
504-9814. BR1330/D

Commercial Plus and Mil/Aero Applications Memory Products Q2/93

This book presents technical data for a broad line of Motorola (Commercial Plus and Mil/Aero Applications) Memory products. Complete specifications for the individual circuits are provided in the form of data sheets.
504-9815. DL144/D

TVS/Zener Device Data Rev. 1 Q2/94

Presents technical data for Motorola Transient Voltage Suppressors and Zener Diodes. Complete specifications for the individual devices are provided in the form of data sheets. A comprehensive selector guide and industry cross-reference are included to simplify the task of choosing the best of components required for a specific application. For the first time, this data book includes theory and applications information in addition to the actual product-specific data. The actual layout has been revised to be more user friendly with sections on the three major categories of Zener Diodes — Regulation, Temperature Compensation, and Transient Voltage Protection.
504-9816. DL150/D

Rectifier Device Data Rev. 2 Q1/95

This book presents technical data for Motorola's broad line of rectifiers. Complete specifications are provided in the form of data sheets, and accompanying selection guides provide a quick comparison of characteristics to simplify the task of choosing the best device for a circuit. Continuing investment in research and development for discrete products has led to a rectifier manufacturing facility that matches the precision and versatility of the most advanced integrated circuits. As a result, Motorola's silicon rectifiers span all applications categories with quality levels capable of passing the most stringent environment tests — including those for automotive under-hood applications.
504-9817. DL151/D

Dynamic RAM Data Rev. 1 Q3/94

Motorola offers a broad range of reliable dynamic RAMs and DRAM modules for virtually any digital data processing system application. Complete specifications for the individual circuits are provided in the form of data sheets. A selector guide and a cross-reference are included.
504-9820. DL155/D

FAST Static RAM BiCMOS, CMOS and Module Data Rev. 2 Q1/95

Motorola offers a broad range of fast SRAMs for virtually any digital data processing system application. This data book contains complete specifications for individual FSRAM circuits in data sheet form, as well as an explanation of Motorola's reliability and quality program and an application's section.
504-9821. DL156/D

Pressure Sensor Device Data Rev. 1 Q1/94

Motorola is pleased to introduce their first Pressure Sensor Data Book. This data book provides technical information on Motorola's Pressure and Temperature Sensor products. Specifications are provided in the form of data sheets for individual devices and application notes describe interface circuitry to assist the end user. Additional sections provide reliability information, advanced new product information, package outline drawings, and information on sensor evaluation boards.
504-9822. DL200/D

FPGA Data Fields Programmable Gate Arrays

This data book discusses implementing your design with the Motorola MPA1000 family of FPGAs. These series of high performance, high density, reconfigurable arrays and high quality software meet the multiple demands of ever shrinking development cycles, system emulation, early prototyping and applications that exploit field reconfiguration to competitive advantage.
504-9823. DL201/D

8-Bit MCU Application Manual Rev. 1

This manual is a compilation of Application Notes, Article Reprints and other applications literature relating to Motorola's range of 8-bit Microcomputer Units (MCUs). Specific data on all Motorola products, including the 8-Bit MCU devices mentioned in this manual, can be obtained from Allied.
504-9824. DL408/D

16/32-Bit Applications Manual Rev. 1

This manual is a compilation of Application Notes, Article Reprints and other applications literature relating to Motorola's range of 16- and 32-bit microprocessors and peripherals. Specific data on all Motorola products, including the power devices mentioned in this manual, can be obtained from Allied.
504-9825. DL409/D

Power Applications Manual Rev. 1

This manual is a compilation of 60 Application Notes, Article Reprints and other applications literature relating to Motorola's range of power semiconductors. A Device Cross-Referenced indicates where specific components are featured in applications documents in the manual; in addition to the index, an abstract of each document is provided as an aid to the location of particular topics.
504-9826. DL410/D

Communications Applications Manual Rev. 1

This manual is a compilation of 44 Application Notes, Article Reprints and other applications literature relating to Motorola's semiconductors for Communications and related applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics range from Speakerphones and Key Systems to FM Receivers, from Fiber Optics to DSP, from RS232 to MAP and ISDN.
504-9827. DL411/D

Industrial Control Applications Manual Rev. 1

This manual is a compilation of 42 Application Notes, Article Reprints and other applications literature relating to Motorola's semiconductors for Industrial Control Applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics include temperature and pressure measurement, A/D conversion for industrial applications, motor control and industrial interfacing.
504-9828. DL412/D

Radio, RF and Video Applications Manual Rev. 1

This manual is a compilation of 37 Application Notes, Article Reprints and other applications literature relating to Motorola's semiconductors for Radio, RF and Video applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics include RF amplifier designs, the application of Motorola's TV ICs, designing for very high speed logic, and PLL fundamentals.
504-9829. DL413/D

FET Applications Manual

This manual is a compilation of 34 applications documents concerned with Motorola's FETs for small signal, audio and power applications. A Device Cross-Reference indicates where specific components are featured in applications documents in the manual, and an abstract of each document is provided in addition to the index. Topics include MOSFET/bipolar comparisons, the application of MOSFETs in motor control and switching power supplies, driving MOSFETs from logic and other sources, and audio and VHF MOSFET-based amplifiers.
504-9830. DL414/D

DSP56100, Digital Signal Processor Family Manual Q3/93

The DSP56100 Family Manual provides a description of the components that are common to all DSP56100 family processors and includes a detailed description of the basic DSP56100 family instruction set.
504-9831. DSP56100FM/AD

Timing Solutions Rev. 4

With frequencies regularly reaching 33 MHz and approaching 40-50 MHz in today's CISC and RISC microprocessor systems, well controlled and precise clock signals are required to maintain a synchronous system. Many microprocessors also require input clock duty cycles very close to 50%. These stringent timing requirements mandate the use of specially designed, low skew clock distribution circuits or clock drivers. This book contains device specifications in the form of data sheets as well as applications information for Motorola's low skew timing circuits.
504-9832. BR1333/D

Hipercomm Rev. 1

This book contains device specifications in the form of data sheets as well as applications information for Motorola's high performance frequency control products. Motorola's portfolio of state-of-the-art low power prescaler includes over 40 different combinations of frequency, divide ratio and power to meet the needs of most designs. Information is also included about Motorola's integrated single chip synthesizers which provide significant savings in power dissipation, Making them ideal for hand-held, battery-operated applications. Of course, the world of RF does not depend on prescalers and synthesizers alone. Motorola's current and future efforts include integrated communication VCOs, as well as higher levels of integration for the transmit and receive sections of various wireless applications.

DSP56002EVM Evaluation Module

The DSP56002EVM Evaluation Module (EVM) is a low-cost platform designed to familiarize the user with Motorola's DSP56002 Digital Signal Processor (DSP). The 24-bit precision of the DSP combined with the on-board 32 K words of external SRAM and stereo CD-quality audio codec makes the EVM ideal for implementing and demonstrating many audio processing algorithms as well as for learning the architecture and instruction set of the DSP56002 processor. The user need only supply a 7-9 volt calculator-style power supply and an RS-232 serial cable.

The DSP56002EVM comes with Motorola's DSP56000 cross assembler and Domain Technologies' debug software with windowed user interface. The software runs under MS-DOS on an IBM PC-compatible computer (–386 class or higher) and communicates with the EVM over an RS-232 serial port.

Hardware. Fully assembled and tested printed circuit board containing:

- ► 24-Bit DSP56002 Digital Signal Processor Operating at 40 MHz
- ► Up to 20 Million Instructions Per Second (MIPS) — 50 ns Instruction Cycle at 40 MHz
- ► Up to 120 Million Operations Per Second (MOPS) at 40 MHz
- ► Executes A 1024-Point Complex Fast Fourier Transform (FFT) in 59,898 Clocks
- ► Four 24-Bit Internal Data Buses and Three 16-Bit internal Address Buses for Simultaneous Accesses to One Program and Two Data Memories
- ► 512 × 24-Bit On-Chip Program RAM with Bootstrap ROM
- ► Two 256 × 24-Bit On-Chip Data RAMs
- ► Two 256 × 24-Bit On-Chip Data ROMs Containing Sine, A-Law and μ-Law Tables
- ► External Memory Expansion with 16-Bit Address and 24-Bit Address and 24-Bit Data Buses
- ► Byte-Wide Host Interface (HI) with Direct Memory Access Support
- ► Synchronous Serial Interface (SSI) to Communicate with Codecs and Synchronous Serial Devices
- ► Serial Communication Interface (SCI) for Full-Duplex Asynchronous Communications
- ► 24-Bit Timer/Event Counter also Generates and Measures Digital Waveforms
- ► On-Chip Emulation (OnCE™) Port for Unobtrusive, Processor Speed-independent Debugging
- ► Software-Programmable, Phase-Locked Loop-based (PLL) Frequency Synthesizer
- ► 32 K × 24-Bit Zero-Wait-State External Static RAM for Expansion Memory
- ► Option for 32 K × 8 Bits of Flash EEPROM for Program Bootstrapping and Stand-alone Operation
- ► Crystal Semiconductor's CS4215 Stereo CD-Quality Sigma-Delta Analog-to-Digital and Digital-to-Analog Converter for High Quality Audio
- ► 24.576 MHz Crystal for Audio Sampling Rates Of 48, 32, 16, 9.6, Or 8 KHz
- ► 16-Bit Linear, 8-Bit μ-Law, 8-Bit A-Law, and 8-Bit Linear Data Formats
- ► Option for other Crystals/Frequencies for other Sample Rates, Such As 44.1 KHz
- ► MC7805ACT Voltage Regulator
- ► RS-232 Interface to OnCE™ Controller and Serial Communications Interface (SCI)
- ► Option for A Second RS-232 Connector for Access to The DSP56002 Processor's Serial Communications Port (SCI)
- ► MC68HC705K1 Microcontroller Performing RS-232-to-OnCE™ Command Conversion
- ► MC33078 Pre-Amp for Analog Buffering
- ► Strip Connectors for External Access to the DSP56002's Memory Expansion, Host Interface, and Serial Communications Ports
- ► Jacks for Stereo Inputs, Outputs, and Headphones
- ► 2.1 mm Jack and Two Screw Terminals for Power Connection
- ► Documentation for The DSP56002, CS4215, Assembler, and Debugger, Plus Board Schematics

Software

- ► Motorola's DSP5600x Cross Assembler
- ► DSP56002 Binary Code From Source Code Using Labels, Line Numbers, Definitions, and Titles Incorporating the Architecture's Complete Instruction Set and Addressing Modes, Memory Spaces, and Parallel Data Transfers
- ► Macros, Expression Evaluation, and Functions for Strings, Data Conversion, and Transcendentals
- ► Reports for Cross-References, Instruction Cycle Count, and Memory use
- ► Extensive Error Checking and Reporting
- ► Domain Technologies' Debug Software with Windowed User Interface
- ► Symbolic Debugging
- ► Four Independent Windows for Data, Disassembly, DSP Register, and Commands
- ► Data and Registers Displayed as Fractions, Decimals, or Hexadecimals
- ► Symbolic Addressing and Animated ASCII Graphical Display of Memory Segments
- ► Up to 8 Simultaneous Breakpoints
- ► Built-in Assembler and Disassembler
- ► Installation Instructions and User Notes on Disk
- ► Demo Software Showing the Advantages of 24-Bits Over 16-Bits in Audio Processing
- ► Self-Test Files — Executable and Source Code

Requirements. The user must have the following:

- ► Power Supply (7-9 VAC or DC, 700 mA)
- ► RS-232 Cable with DB-9 Connectors
- ► IBM PC-Compatible Computer (–386 Class or Higher) Running MS-DOS with a Serial Port Capable of Operation at 19,200 Baud

Options. The EVM easily accommodates the following user additions:

- ► 32 K × 8-Bit Flash EEPROM for Program Bootstrapping and Stand-Alone Operation
- ► A Second Crystal for Other Sample Rates, Such as 44.1 KHz
- ► A Second RS-232 Connector to Access the DSP56002's Serial Communications Port (SCI)

Universal Hardware

Mfr.'s Type	Description
DSPPCHOST	PC Compatible Host Board and Interface Software
DSPMACHOST	Macintosh II™ Host Board and Interface Software
DSPSUN4HOST	SUN-4™ Host Board and Interface Software
DSPCOMMAND	16-, 24-, 32-Bit Command Converter Board

DSP Product

DSP56100 Family General-Purpose 16-Bit Fixed Point

Ideal for high end speech coding, telecommunications and control applications. The DSP56166 combines the high speed core with 8 K bytes RAM, two serial ports, and one parallel port, codec, phase-locked loop (PLL) and On-Chip Emulation (OnCE™).

Mfr.'s Type	Speed (MHz)	Program ROM/RAM	Data ROM/RAM	Package Type	Peripherals	Comments
XC56156FE60	60	64/2048	0/2048	112 Lead CQFP	SSI × 2, Host, Timer	Codec, OnCE™ and PLL
XC56166FE60	60	64/2048	0/4096	112 Lead CQFP	RSSI × 2, Host, Timer	Codec, OnCE™ and PLL

DSP56002, HCMOS Low Power 24-Bit DSP

With its triple Harvard architecture of seven internal buses and three parallel execution units — Data ALU, Address Generation Unit (AGU) and Program Controller — has set the standard for high end DSP devices. These products are used extensively in telecommunications, control and audio. the DSP56000 family's unique 24-bit architecture has made these products the industry standard for CD-quality sound. The DSP56002 provides clock speeds up to 66 MHz, a phase locked loop (PLL) and an On-Chip Emulation (OnCE™). The DSP56L002 is a low voltage implementation of the DSP56002. Its 3.3 V operation effectively extends the battery life of portable applications up to three times longer than 5 V systems.

Mfr.'s Type	Speed (MHz)	Program ROM/RAM	Data ROM/RAM	Package Type	Peripherals	Comments
DSP56002RC40	40	64/512	2 × 256/2 × 256	132 Lead PGA	Host, SSI, SCI, Timer	OnCE™ and PLL

*3.3 Volt.

DSP56004, HCMOS Low Power 24-Bit DSP

The DSP56004 contains audio peripherals specially designed for consumer and automotive audio applications. The Serial Audio Interface (SAI) provides two stereo inputs and three stereo outputs with I2S Sony or Matsushita formats. The External Memory Interface (EMI) supports a byte-wide data port to DRAM or SRAM. The Serial Host Interface (SHI) provides a low cost microcontroller interface using SPI or I2C.

Mfr.'s Type	Speed (MHz)	Program ROM/RAM	Data ROM/RAM	Package Type	Peripherals	Comments
DSP56004FJ50	50	64/512	2 × 256/2 × 256	80 Lead PQFP	SAI, SHI, EMI	OnCE™ and PLL

DSP56ADC16S	16-Bit Sigma-Delta Analog to Digital Converter	20 Lead CERDIP

OnCE™=On Chip Emulator. OnCE™ is a Trademark of Motorola. PLL= Phase Locked Loop. PWM=Pulsewidth Modulator. WDT=Watchdog Timer.SSI=Synchronous Serial Interface. SCI=Serial Communication Interface.

Motorola M68000 Family Upward Compatible 16-/32-Bit Microprocessors

MC68HC000, 16-/32-Bit HCMOS Micropower Microprocessor

Completely pin and timing compatible and gives all the functions and performance of the MC68000 at one-tenth the operating power requirements, 0.175 watts. It is designed for large multiprocessing systems and realtime applications with vectored interrupts, seven priority levels and a 16 megabyte addressing space. It offers mainframe-like performance, supporting high-level languages and sophisticated operating systems.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	MFLOPS	Address Range (Bytes)	Data Bus (Bit)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Mode	General Purpose Registers	Address Modes	On-Chip MMU	Floating Point Solution

Motorola M68000 Family Upward Compatible 16-/32-Bit Microprocessors (Continued)

MC68020, 32-Bit HCMOS Microprocessor

The 020 has a full 32-bit internal and 32-bit external, regular, symmetrical architecture. It offers all the functionality of the M68000 Family MPUs and maintains software user-code compatibility. The unique on-chip instruction cache helps provide burst-mode operation to 12.5 MIPS. The 020 is the proven leader in high performance systems in office automation, engineering workstations, fault tolerant computers, parallel processors, telephone switching systems, and intelligent controllers.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	MFLOPS	Address Range (Bytes)	Data Bus (Bit)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Mode	General Purpose Registers	Address Modes	On-Chip MMU	Floating Point Solution

MC68030, Second Generation 32-Bit HCMOS Microprocessor

The 030 contains two independent 32-bit address buses and two 32-bit data buses which allows the the CPU, caches, MMU, and the bus controller to operate in parallel. This makes it possible for the 030 to simultaneously access an instruction from the instruction cache, data from the data cache and instruction/data from external memory. Performance is further enhanced by on-chip 256 byte instruction and data caches, on-chip MMU, and enhanced bus controller.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	MFLOPS	Address Range (Bytes)	Data Bus (Bit)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Mode	General Purpose Registers	Address Modes	On-Chip MMU	Floating Point Solution

MC68040, Third Generation 32-Bit HCMOS Microprocessor

The 040 is a virtual memory microprocessor employing multiple, concurrent execution units and a highly integrated architecture. On a single chip, the 040 integrates a MC68030 compatible integer unit, an IEEE 754 compatible floating point unit (FPU) and fully independent instruction and data demand-paged memory units (MMUs), including independent 4 K-byte instruction and data caches. A high degree of parallelism is achieved through use of multiple independent execution pipelines, multiple internal buses, and a full Harvard architecture, including separate physical caches for instruction and data accesses. The 040 also directly supports cache coherency in multimaster applications with dedicated on-chip bus snooping logic.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	MFLOPS	Address Range (Bytes)	Data Bus (Bit)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Mode	General Purpose Registers	Address Modes	On-Chip MMU	Floating Point Solution

MC68882, Enhanced Floating Point Coprocessor

The MC68882 is pin-to-pin hardware and software compatible with the MC68881 Floating Point Coprocessor and implements a variety of performance enhancements including dual-ported registers and an advanced pipeline. Additional enhancements allows execution of multiple instructions in parallel for 2-4 times the Floating Point performance of the MC68881.

High Performance 68K Embedded Controllers

For technical assistance on Motorola's High Performance 68K Embedded Controllers call the High Performance Embedded Systems Phone Helpline: (512) 891-4524.

MC68EC000, 8-/16-/32-Bit HCMOS Embedded Controller

Low cost embedded control MPU with 8-/16-bit selectable data bus. The EC000 has a flexible data bus that can operate in either 8- or 16-bit modes and a 24-bit address bus that provides 16 Mbytes of memory addressing capability. The EC000 represents the lowest cost entry point to any 32-bit architecture.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	Address Range (Bytes)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Fill Caches (Bytes)	General Purpose Registers	Address Modes	Floating Point Hardware

MC68EC020, 32-Bit Embedded Controller

The EC020, with a complete 32-bit internal implementation, has a 32-bit data bus and an on-chip instruction cache to provide dramatically increased performance over 8- and 16-bit microprocessors. Upward migration to the EC020 is made simple with dynamic bus sizing, allowing 8-, 16-, and 32-bit peripherals to communicate with the microprocessor.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	Address Range (Bytes)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Fill Caches (Bytes)	General Purpose Registers	Address Modes	Floating Point Hardware

MC68EC030, 32-Bit Enhanced Embedded Controller

32-bit MPU for embedded applications. On-chip 256 byte instruction and data cache provide high speed access for control routines and data. The EC030 utilizes a low cost DRAM bus interface and a burst mode bus interface is provided for efficient DRAM access. Dynamic bus sizing is available for interfacing to 8-, 16-, and 32-bit devices.

Mfr.'s Type		Operating Frequency (MHz)	MIPS	Address Range (Bytes)	Instruction Cache (Bytes)	Data Cache (Bytes)	Burst Fill Caches (Bytes)	General Purpose Registers	Address Modes	Floating Point Hardware

High Performance 68K Integrated Processors

MC68306, Integrated 68EC00 Processor

The 68306 includes a 68EC000 core processor, a 68681 Dual Universal Asynchronous Receiver Transmitter (DUART), system integration functions and a DRAM controller. The on-chip DRAM controller gives the 68306 the simplest interface to DRAM based designs. The DRAM controller easily accommodates 64 Mbytes of memory. The 68306 saves time in the design cycle by providing valuable 68000 system components in one chip.

Mfr.'s Type		Operating Frequency (MHz)	Core Processor	DMA	Serial Processor	Time Processor Unit	Flash EEPROM	Serial I/O	Timers	A/D Converter	SRAM	DRAM Controller	Glue Logic (SIM)

MC68340, Integrated Multiprotocol Processor with DMA

The 68340 features a CPU32 core and a high speed two channel, 32-bit Direct Memory Access (DMA) controller that eliminates the usual bus arbitration and synchronization delays, maximizing data throughout (25-Mbytes per second on a 16-bit bus. It also contains a SIM, a 68681/2681 compatible DUART, two identical counters/timers each with a 16-bit counter and an 8-bit prescaler with 80 ns resolution.

For technical assistance on Motorola's High Performance 68K Integrated Data Communication Processors, call the Data Communications Phone Helpline: (512) 891-3417.

MC68302, Integrated Multiprotocol Processor

The 68302 is a three channel communications device that may be configured to support a number of popular industry interfaces, including those for the Integrated Services Digital Network (ISDN) basic rate and terminal adapter applications. Through a combination of architectural and programmable features concurrent operation of different protocols (HDLC/SDLC, UART, BISYNC, DDCMP, or transparent modes) can easily be achieved. The 68302 contains on-chip DMA, RAM, timers, I/O, chip select and a wait state interrupt controller.

MC14000: Metal Gate CMOS Logic Integrated Circuits

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC14001BCP	MC14001BD	Quad 2-Input NOR Gate	14
—	MC14001UBD	Quad 2-Input NOR Gate, Inverting/Non-Buffered	14
MC14002BCP	—	Dual 4-Input NOR Gate	—
MC14006BCP	—	18-Bit Static Shift Register	14
MC14007UBCP	MC14007UBD	Dual Complementary Pair Plus Inverter	14
MC14008BCP	—	4-Bit Full Adder	16
MC14011BCP	MC1411BD	Quad 2-Input NAND Gate	14
MC14011UBCP	MC14011UBD	Quad 2-Input NAND Gate, Inverting/Non-Buffered	14
MC14012BCP	—	Dual 4-Input NAND Gate	14
MC14013BCP	MC14013BD	Dual Type D Flip-Flop	14
MC14014BCP	—	8-Bit Static Shift Register, Synchronous Parallel Input/Serial Output	16
MC14015BCP	MC14015BD	Dual 4-Bit Static Shift Register, Serial Input/Parallel Output	16
MC14016BCP	MC14016BD	Quad Analog Switch/Quad Multiplexer	14
MC14017BCP	MC14017BD	5-Stage Johnson Decade Counter with Code Converter, Divide by N	16
MC14018BCP	—	Presettable/Resettable Divide By N Johnson Counter	16
MC14020BCP	MC14020BD	14-Bit Binary Counter	16
MC14021BCP	MC14021BD	8-Bit Static Shift Register, Asynchronous Parallel Input/Serial Output	16
MC14022BCP	—	4-Stage Johnson Octal Counter	16
MC14023BCP	MC14023BD	Triple 3-Input NAND Gate	14
MC14024BCP	MC14024BD	7-Stage Ripple Counter	14
MC14025BCP	—	Triple 3-Input NOR Gate	14
MC14027BCP	MC14027BD	Dual J-K Flip-Flop	16
MC14028BCP	MC14028BD	BCD to Decimal Decoder, Binary To Octal Decoder	16
MC14029BCP	—	Binary/Decade Up/Down Counter	16
MC14035BCP	—	4-Bit Parallel-In/Parallel-Out Shift Register	16
MC14040BCP	MC14040BD	12-Bit Binary Counter	16
MC14042BCP	—	Quad Transparent Latch	16
MC14043BCP	MC14043BD	Quad NOR R-S Latch	16
MC14044BCP	—	Quad NAND R-S Latch	16
MC14046BCP	MC14046BDW	Phase Locked Loop	16
MC14049BCP	MC14049BD	Hex Inverter/Buffer	16
MC14049UBCP	MC14049UBD	Hex Inverter/Buffer	16
MC14050BCP	MC14050BD	Hex Non-Inverting Buffer	16
MC14051BCP	MC14051BD	8-Channel Analog Multiplexer/Demultiplexer	16
MC14052BCP	MC14052BD	Dual 4-Channel Analog Multiplexer/Demultiplexer	16
MC14053BCP	MC14053BD	Triple 2-Channel Analog Multiplexer/Demultiplexer	16
MC14060BCP	MC14060BD	14-Bit Binary Ripple Counter and Oscillator	16
MC14066BCP	MC14066BD	Quad Analog Switch/Quad Multiplexer	14
MC14067BCP	—	16-Channel Analog Multiplexer/Demultiplexer	24
MC14068BCP	—	8-Input NAND Gate	14
MC14069UBCP	MC14069UBD	Hex Inverter	14
MC14070BCP	MC14070BD	Quad Exclusive OR Gate	14
MC14071BCP	MC14071BD	Quad 2-Input OR Gate	14
MC14072BCP	—	Dual 4-Input OR Gate	14
MC14073BCP	—	Triple 3-Input AND Gate	14
MC14075BCP	—	Triple 3-Input OR Gate	14
MC14076BCP	—	4-Bit D-Type Register with Three-State Outputs	16
MC14077BCP	—	Quad Exclusive NOR Gate	14
MC14078BCP	—	8-Input NOR Gate	14
MC14081BCP	MC14081BD	Quad 2-Input AND Gate	14
MC14082BCP	—	Dual 4-Input AND Gate	14
MC14093BCP	MC14093BD	Quad 2-Input NAND Schmitt Trigger	14
MC14094BCP	MC14094BD	8-Bit Shift/Store Register With Three-State Outputs	16
MC14099BCP	MC14099BDW	8-Bit Addressable Latch	16

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC14106BCP	MC14106BD	Hex Schmitt Trigger	14
MC14161BCP	—	Synchronous Presettable 4-Bit Binary Counter	16
MC14174BCP	—	Hex D-Type Flip-Flop	16
MC14175BCP	—	Quad D-Type Flip-Flop	16
MC14490P	MC14490DW	Hex Contact Bounce Eliminator	16
MC14500BCP	—	1-Bit Industrial Control Unit	16
MC14502BCP	—	Strobed Hex Inverter/Buffer	16
MC14503BCP	MC14503BD	Hex Non-Inverting Three-State Buffer	16
MC14504BCP	MC14504BD	Hex Level Shifter For TTL To CMOS Or CMOS To CMOS	16
MC14508BCP	—	Dual 4-Bit Latch	24
MC14510BCP	—	BCD Up/Down Counter	16
MC14511BCP	—	BCD To Seven Segment Latch/Decoder/Driver	16
MC14512BCP	—	8-Channel Data Selector	16
MC14513BCP	—	BCD To Seven Segment Latch/Decoder/Driver With Ripple Blanking	18
MC14514BCP	—	4-Bit Transparent Latch/4 To 16 Line Decoder, Active High Output	24
MC14515BCP	—	4-Bit Transparent Latch/4 To 16 Line Decoder, Active Low Output	24
MC14516BCP	—	Binary Up/Down Counter	16
MC14517BCP	MC14517BDW	Dual 64-Bit Static Shift Register	16
MC14518BCP	—	Dual BCD Up Counter	16
MC14519BCP	—	4-Bit AND/OR Selector	16
MC14520BCP	—	Dual Binary Up Counter	16
MC14521BCP	MC14521BD	24-Stage Frequency Divider	16
MC14522BCP	—	Presettable 4-Bit BCD Down Counter	16
MC14526BCP	—	Presettable 4-Bit Binary Down Counter	16
MC14527BCP	—	BCD Rate Multiplier	16
MC14528BCP	—	Dual Monostable Multivibrator	16
MC14529BCP	MC14529BD	Dual 4-Channel Analog Data Selector	16
MC14532BCP	—	8-Bit Priority Encoder	16
MC14534BCP	—	5 Cascaded BCD Counters	24
MC14536BCP	MC14536BDW	Programmable Timer, 24 Stage Binary Ripple Counter	16
MC14538BCP	MC14538BDW	Dual Precision Retriggerable/Resettable Monostable Multivibrator	16
MC14539BCP	—	Dual 4-Channel Data Selector/Multiplexer	16
MC14541BCP	MC14541BD	Programmable 16 Stage Timer with Oscillator	16
MC14543BCP	MC14543BD	BCD To Seven Segment Latch/Decoder/Driver For LCDs	16
MC14544BCP	—	BCD To Seven Segment Latch/Decoder/Driver For LCDs With Ripple Blanking	18
MC14547BCP	—	High Current BCD To Seven Segment Decoder/Driver	16
MC14549BCP	—	8-Bit Successive Approximation Register, Cascadeable	16
MC14551BCP	MC14551BD	Quad 2-Channel Analog Multiplexer/Demultiplexer	16
MC14553BCP	—	Synchronous 3-Digit BCD Counter	16
MC14555BCP	—	Dual Binary To 1 Of 4 Decoder/Demultiplexer, Active High Outputs	16
MC14556BCP	—	Dual Binary To 1 Of 4 Decoder/Demultiplexer, Active Low Outputs	16
MC14557BCP	MC14557BDW	1 To 64-Bit Variable Length Shift Register	16
MC14559BCP	—	8-Bit Successive Approximation Register With Feed Forward	16
MC14560BCP	—	Dual 4-Bit NBCD Adder	16
MC14562BCP	—	128-Bit Static Shift Register	14
MC14566BCP	—	Industrial Time Based Generator	16
MC14568BCP	—	Phase Comparator and 4-Bit Presettable Up Binary Counter	16
MC14569BCP	—	Programmable Divide By N Dual 4-Bit Binary/BCD Down Counter	16
MC14572UBCP	—	Quad Inverter, 2-Input NOR Gate, 2-Input NAND Gate	16
MC14583BCP	—	Dual Schmitt Trigger	16
MC14584BCP	MC14584BD	Hex Schmitt Trigger	14
MC14585BCP	—	4-Bit Magnitude Comparator	16
MC14599BCP	—	8-Bit Addressable D Latch	18

MC74ACT and MC74ACT: FACT, Very High Speed, Low Power Advanced CMOS Logic Integrated Circuits

MC74F: FAST Schottky TTL Logic Integrated Circuits

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC74F00N	MC74F00D	Quad 2-Input NAND Gate	14
MC74F02N	MC74F02D	Quad 2-Input NOR Gate	14
MC74F04N	MC74F04D	Hex Inverter	14
MC74F08N	MC74F08D	Quad 2-Input AND Gate	14
MC74F109N	MC74F109D	Dual JK Positive Edge Triggered Flip-Flop	16
MC74F10N	MC74F10D	Triple 3-Input NAND Gate	14
MC74F112N	MC74F112D	Dual JK Negative Edge Triggered Flip-Flop	16
MC74F11N	MC74F11D	Triple 3-Input AND Gate	14
MC74F1245N	—	Octal Bidirectional Transceiver With Three-State Inputs/Outputs	20
MC74F125N	MC74F125D	Three-State Quad Buffer, Enable Low	14
MC74F126N	MC74F126D	Three-State Quad Buffer, Enable High	14
MC74F132N	—	Quad 2-Input NAND Schmitt Trigger	14
MC74F138N	MC74F138D	1 Of 8 Decoder/Demultiplexer	16
MC74F139N	MC74F139D	Dual 1 Of 4 Decoder	16
MC74F148N	MC74F148D	8-Line to 3-Line Priority Encoder	16
MC74F14N	MC74F14D	Hex 2-Input Schmitt Trigger Inverter	14
MC74F151N	MC74F151D	8-Input Multiplexer	16
MC74F153N	MC74F153D	Dual 4-Input Multiplexer	16
MC74F157AN	MC74F157AD	Quad 2-input Multiplexer	16
MC74F158AN	MC74F158AD	Quad 2-Input Multiplexer	16
MC74F160AN	—	Synchronous Presettable BCD Decade Counter	16
MC74F161AN	MC74F161AD	Synchronous Presettable 4-Bit Binary Counter	16
MC74F163AN	MC74F163AD	Synchronous Presettable 4-Bit Binary Counter	16
MC74F164N	MC74F164D	8-Bit Serial-In, Parallel-Out Shift Register	14
MC74F169N	MC74F169D	4-Stage Synchronous Bidirectional Modulo-16 Binary Counter	16
MC74F174N	MC74F174D	Hex D Flip-Flop With Master Reset	16
MC74F175N	MC74F175D	Quad D Flip-Flop	16
MC74F194N	MC74F194D	4-Bit Bidirectional Universal Shift Register	16
MC74F20N	MC74F20D	Dual 4-Input NAND Gate	14
MC74F21N	MC74F21D	Dual 4-Input AND Gate	14
MC74F240N	MC74F240DW	Octal Inverting Buffer/Line Driver With Three-State Outputs	20
MC74F241N	MC74F241DW	Octal Buffer/Line Driver With Three-State Outputs	20
—	MC74F243D	Quad Bus Transceiver With Three-State Outputs	14
MC74F244N	MC74F244DW	Octal Buffer/Line Driver With Three-State Outputs, Enable Low	20
MC74F245N	MC74F245DW	Octal Bidirectional Transceiver With Three-State Inputs/Outputs	20
MC74F251N	MC74F251D	8-Input Multiplexer With Three-State Outputs	16
MC74F253N	MC74F253D	Dual 4-Input Multiplexer With Three-State Outputs	16
MC74F257AN	MC74F257AD	Quad 2-Input Multiplexer With Three-State Outputs	16
MC74F258AN	MC74F258AD	Quad 2-Input Multiplexer With Three-State Outputs, Inverting	16
MC74F259N	MC74F259D	8-Bit Addressable Latch	16

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC74F269N	MC74F269DW	8-Bit Bidirectional Binary Counter	24
MC74F280N	MC74F280D	9-Bit Parity Generator/Checker	14
MC74F283N	MC74F283D	4-Bit Binary Full Adder with Fast Carry	16
—	MC74F299DW	8-Input Universal Shift Register with Common Parallel I/O Pins	20
MC74F32N	MC74F32D	Quad 2-Input OR Gate	14
MC74F350N	—	4-Bit Shifter with Three-State Outputs	16
—	MC74F365D	Hex Buffer/Driver Gate Enable Non-inverting, Three-State	16
MC74F367N	MC74F367D	Hex Buffer/Driver 4-Bit Plus 2-Bit Non-Inverting, Three-State	16
MC74F373N	MC74F373DW	Octal Transparent Latch with Three-State Outputs	20
MC74F374N	MC74F374DW	Octal D-Type Flip-Flop with Three-State Outputs	20
MC74F377N	MC74F377DW	Octal D-Type Flip-Flop with Enable	20
MC74F378N	MC74F378D	Parallel D Register with Enable	16
MC74F379N	—	Quad Parallel Register	16
MC74F38N	MC74F38D	Quad 2-Input NAND Buffer, Open Collector	14
MC74F399N	MC74F399D	Quad 2-Port Register	16
MC74F51N	—	Dual 2-Wide 2-input, 2-Wide 3-Input AND-OR-Invert Gate	14
MC74F521N	MC74F521DW	8-Bit Identity Comparator	20
MC74F533N	MC74F533DW	Octal Transparent Latch with Three-State Outputs	20
MC74F534N	—	Octal D-Type Flip-Flop with Three-State Outputs	20
MC74F543N	MC74F543DW	Octal Registered Transceiver, Non-inverting, Three-State	24
MC74F544N	MC74F544DW	Octal Registered Transceiver, Inverting, Three-State	24

MC74F569N	MC74F569DW	Synchronous 4-Bit Bidirectional Binary Counter with Three-State Outputs	20
MC74F574N	MC74F574DW	Octal D-Type Flip-Flop with Three-State Outputs	20
MC74F579N	MC74F579DW	8-Bit Bidirectional Binary Counter, Three-State	20
—	MC74F620DW	Octal Bus Transceiver with Three-State Outputs, Inverting	20
MC74F623N	—	Octal Bus Transceiver with Three-State Outputs, Non-Inverting	20
MC74F640N	—	Octal Bus Transceiver, Inverting with Three-State Outputs	20
MC74F646N	MC74F646DW	Octal Transceiver/Register with Three-State Outputs	24
MC74F64N	—	4-2-3-2-Input AND-OR-Invert Gate	14
MC74F657AN	MC74F657ADW	Octal Bidirectional Transceiver with 8-Bit Parity Generator Checker	24
MC74F74N	MC74F74D	Dual D-Type Positive Edge Triggered Flip-Flop	14
MC74F779N	MC74F779D	8-Bit Bidirectional Binary Counter, Three-State	16
MC74F803N	MC74F803D	Clock Driver Quad D-Type Flip-Flop with Matched Propagation Delays	14
MC74F823N	MC74F823DW	9-Bit D-Type Positive Edge Triggered Flip-Flop	24
MC74F827N	MC74F827DW	10-bit Buffer/Line Driver with Three-State Outputs, Enable Low	24
MC74F85N	MC74F85D	4-Bit Magnitude Comparator	16
MC74F86N	MC74F86D	Quad 2-Input Exclusive OR Gate	14

MC74HC and MC74HCT: High Speed and High Speed-TTL Compatible CMOS Logic Integrated Circuits

Mfr.'s Type				Description	No. of Leads
MC74HC		MC74HCT			
PDIP	SOIC	PDIP	SOIC		
MC74HC00AN	MC74HC00AD	MC74HCT00AN	MC74HCT00AD	Quad 2-Input NAND Gate	14
MC74HC02AN	MC74HC02AD	—	—	Quad 2-Input NOR Gate	14
MC74HC03AN	MC74HC03AD	—	—	Quad 2-Input NAND Gate With Open Drain Outputs	14
MC74HC04AN	MC74HC04AD	MC74HCT04AN	MC74HCT04AD	Hex Inverter	14
MC74HCU04N	MC74HCU04D	—	—	Hex Unbuffered Inverter	14
MC74HC08AN	MC74HC08AD	MC74HCT08AN	—	Quad 2-Input AND Gate	14
MC74HC107N	MC74HC107D	—	—	Dual JK Flip-Flop With Reset	14
MC74HC109N	MC74HC109D	—	—	Dual JK Flip-Flop With Set and Reset	16
MC74HC10N	MC74HC10D	—	—	Triple 3-Input NAND Gate	14
MC74HC112N	MC74HC112D	—	—	Dual JK Flip-Flop With Set and Reset	16
MC74HC11N	MC74HC11D	—	—	Triple 3-Input AND Gate	14
MC74HC125AN	MC74HC125AD	—	—	Quad Three-State Non-Inverting Buffer, Active Low Enable	14
MC74HC126AN	MC74HC126AD	—	—	Quad Three-State Non-Inverting Buffer, Active High Enable	14
MC74HC132AN	MC74HC132AD	—	—	Quad 2-Input NAND Gate With Schmitt Trigger Inputs	14
MC74HC133N	—	—	—	13-Input NAND Gate	16
MC74HC137N	MC74HC137D	—	—	1 Of 8 Decoder/Demultiplexer With Address Latch	16
MC74HC138AN	MC74HC138AD	MC74HCT138AN	MC74HCT138AD	1 Of 8 Decoder/Demultiplexer	16
MC74HC139AN	MC74HC139AD	—	—	Dual 1 Of 4 Decoder/Demultiplexer	16
MC74HC147N	MC74HC147D	—	—	Decimal To BCD Encoder	16
MC74HC14AN	MC74HC14AD	MC74HCT14AN	MC74HCT14AD	Hex Schmitt Trigger Inverter	14
MC74HC151N	—	—	—	8-Input Data Selector/Multiplexer	16
MC74HC153N	MC74HC153D	—	—	Dual 4-Input Data Selector/Multiplexer	16
MC74HC154N	MC74HC154DW	—	—	1 of 16 Decoder/Demultiplexer	24
MC74HC157AN	MC74HC157AD	MC74HCT157AN	—	Quad 2-Input Data Selectors/Multiplexers	16
MC74HC160N	—	—	—	Asynchronous Presettable BCD Counter	16
MC74HC161AN	MC74HC161AD	MC74HCT161AN	—	Asynchronous Presettable Binary Counter	16
MC74HC163AN	MC74HC163AD	MC74HCT163AN	—	Synchronous Presettable Binary Counter	16
—	MC74HC164D	—	—	8-Bit Serial-Input/Parallel-Output Shift Register	14
MC74HC165N	MC74HC165D	—	—	8-Bit Serial or Parallel-Input Serial-Output Shift Register	16
MC74HC173N	MC74HC173D	—	—	Quad Three-State D Type Flip-Flop With Common Clock and Reset	16
MC74HC174AN	MC74HC174AD	MC74HCT174AN	MC74HCT174AD	Hex D Type Flip-Flop With Common Clock and Reset	16
MC74HC175N	MC74HC175D	—	—	Quad D Type Flip-Flop With Common Clock and Reset	16
MC74HC194N	—	—	—	4-Bit Bidirectional Universal Shift Register	16
MC74HC195N	—	—	—	4-Bit Universal Shift Register	16
MC74HC20N	—	—	—	Dual 4-Input NAND Gate	14
MC74HC237N	—	—	—	1 Of 8 Decoder/Demultiplexer With Address Latch	16
MC74HC240AN	MC74HC240ADW	MC74HCT240AN	MC74HCT240ADW	Octal Three-State Inverting Buffer/Line Driver	20
MC74HC241AN	MC74HC241ADW	—	—	Octal Three-State Non-Inverting Buffer/Line Driver/Line Receiver	20
MC74HC242N	—	—	—	Quad Three-State Bus Transceiver	14
MC74HC244AN	MC74HC244ADW	MC74HCT244AN	MC74HCT244ADW	Octal Three-State Non-Inverting Buffer/Line Driver/Line Receiver	20
MC74HC245AN	MC74HC245ADW	MC74HCT245AN	MC74HCT245ADW	Octal Three-State Non-Inverting Bus Transceiver	20
MC74HC251N	MC74HC251D	—	—	8-Input Data Selector/Multiplexer With Three-State Outputs	16
MC74HC253N	MC74HC253D	—	—	Dual 4-Input Data Selector/Multiplexer With Three-State Outputs	16
MC74HC257N	MC74HC257D	—	—	Quad 2-Input Data Selector/Multiplexer With Three-State Outputs	16
MC74HC259N	MC74HC259D	—	—	8-Bit Addressable Latch/1 Of 8 Decoder	16
MC74HC273AN	MC74HC273ADW	MC74HCT273AN	MC74HCT273ADW	Octal D Type Flip-Flop With Common Clock and Reset	20
MC74HC27N	—	—	—	Triple 3-Input NOR Gate	14
MC74HC280N	MC74HC280D	—	—	9-Bit Odd/Even Parity Generator/Checker	14
MC74HC299N	MC74HC299DW	—	—	8-Bit Bidirectional Universal Shift Register With Parallel I/O	20
MC74HC30N	MC74HC30D	—	—	8-Input NAND Gate	14
MC74HC32AN	MC74HC32AD	MC74HCT32AN	MC74HCT32AD	Quad 2-Input OR Gate	14
MC74HC354N	—	—	—	8-Input Data Selector/Multiplexer With Data and Address Latches and Three-State Outputs	20
MC74HC365N	—	—	—	Hex Three-State Non-Inverting Buffer With Common Enable	16
MC74HC367N	—	—	—	Hex Three-State Non-Inverting Buffer With Separate 2-Bit and 4-Bit Sections	16
MC74HC368N	—	—	—	Hex Three-State Inverting Buffer With Separate 2-Bit and 4-Bit Sections	16
MC74HC373AN	MC74HC373ADW	MC74HCT373AN	MC74HCT373ADW	Octal Three-State Non-Inverting Transparent Latch	20
MC74HC374AN	MC74HC374ADW	MC74HCT374AN	MC74HCT374ADW	Octal Three-State Non-Inverting D Type Flip-Flop	20
MC74HC390N	MC74HC390D	—	—	Dual 4-Stage Binary Ripple Counter With Divide By 2 and Divide By 5 Sections	16
MC74HC393N	MC74HC393D	—	—	Dual 4-Stage Binary Ripple Counter	14
MC74HC4002N	MC74HC4002D	—	—	Dual 4-Input NOR Gate	14
MC74HC4017N	MC74HC4017D	—	—	Decade Counter	16
MC74HC4020AN	MC74HC4020AD	—	—	14-Stage Binary Ripple Counter	16
MC74HC4024N	MC74HC4024D	—	—	7-Stage Binary Ripple Counter	14
MC74HC4040AN	MC74HC4040AD	—	—	12-Stage Binary Ripple Counter	16
MC74HC4046AN	MC74HC4046AD	—	—	Phase Locked Loop	16
MC74HC4049N	MC74HC4049D	—	—	Hex Inverting Buffer	16
MC74HC4050N	MC74HC4050D	—	—	Hex Buffer	16
MC74HC4051N	MC74HC4051DW	—	—	8-Channel Single-Ended Break-before-Make Analog Multiplexer/Demultiplexer	16
MC74HC4052N	MC74HC4052DW	—	—	4-Channel Differential Break-before-Make Analog Multiplexer/Demultiplexer	16
MC74HC4053N	MC74HC4053DW	—	—	Triple 2-Channel Single-Ended Break-before-Make Analog Multiplexer/Demultiplexer	16
MC74HC4060AN	MC74HC4060AD	—	—	14-Stage Binary Ripple Counter With Oscillator	16
MC74HC4066N	MC74HC4066D	—	—	Quad Analog Switch/Multiplexer/Demultiplexer	14
MC74HC4075N	MC74HC4075D	—	—	Triple 3-Input OR Gate	14
MC74HC4078N	MC74HC4078D	—	—	8-Input NOR/OR Gate	14
MC74HC42N	—	—	—	1 of 10 Decoder	16
MC74HC4316N	MC74HC4316D	—	—	Quad Analog Switch/Multiplexer/Demultiplexer With Separate Analog and Digital Power Supplies	16
MC74HC4351N	—	—	—	8-Channel Single-Ended Break-before-Make Analog Multiplexer/Demultiplexer with Address Latch	20
MC74HC4511N	—	—	—	BCD To Seven Segment Latch/Decoder/Display Driver	16
MC74HC4514N	—	—	—	1 Of 16 Decoder/Demultiplexer With Address Latch	24
MC74HC4538AN	MC74HC4538AD	—	—	Dual Precision Monostable Multivibrator, Retriggerable/Resettable	16
MC74HC51N	—	—	—	2-Wide, 2-Input/2-Wide, 3-Input AND-NOR Gates	14
MC74HC534AN	—	—	—	Octal Three-State Inverting D Type Flip-Flop	20
MC74HC540AN	MC74HC540ADW	—	—	Octal Three-State Inverting Buffer/Line Driver/Line Receiver	20
MC74HC541AN	MC74HC541ADW	MC74HCT541AN	MC74HCT541ADW	Octal Three-State Non-Inverting Buffer/Line Driver/Line Receiver	20
MC74HC563N	—	—	—	Octal Three-State Inverting Transparent Latch	20
MC74HC564N	—	—	—	Octal Three-State Inverting D Type Flip-Flop	20
MC74HC573AN	MC74HC573ADW	MC74HCT573AN	MC74HCT573ADW	Octal Three-State Non-Inverting Transparent Latch	20
MC74HC574AN	MC74HC574ADW	MC74HCT574AN	MC74HCT574ADW	Octal Three-State Non-Inverting D Type Flip-Flop	20
MC74HC589N	—	—	—	8-bit Serial Or Parallel-Input/Serial-Output Shift Register With Three-State Output	16
MC74HC58N	—	—	—	2-Wide, 2-Input/2-Wide, 3-Input AND-OR Gates	14
MC74HC595AN	MC74HC595AD	—	—	8-Bit Serial-Input/Serial Or Parallel-Output Shift Register With Latched Three-State Outputs	16
MC74HC597N	MC74HC597D	—	—	8-Bit Serial or Parallel-Input/Serial-Output Shift Register With Input Latch	16
MC74HC646N	—	—	—	Octal Three-State Bus Transceiver and D Type Flip-Flop, Non-Inverting Outputs	24
MC74HC688N	MC74HC688DW	—	—	8-Bit Equality Comparator	20
MC74HC7266N	—	—	—	Quad 2-Input Exclusive NOR Gate	14
MC74HC73N	—	—	—	Dual JK Flip-Flop with Reset	14
MC74HC74AN	MC74HC74AD	MC74HCT74AN	MC74HCT74AD	Dual D Type Flip-Flop with Set and Reset	14
MC74HC75N	—	—	—	Dual 2-Bit Transparent Latch	16
MC74HC85N	—	—	—	4-Bit Magnitude Comparator	16
MC74HC86N	MC74HC86D	—	—	Quad 2-Input Exclusive OR Gate	14

SN74LS: Low Power Schottky TTL Logic Integrated Circuits

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
SN74LS00N	SN74LS00D	Quad 2-Input NAND Gate	14
SN74LS01N	—	Quad 2-Input NAND Gate With Open Collector Outputs	14
SN74LS02N	SN74LS02D	Quad 2-Input NOR Gate	14
SN74LS03N	—	Quad 2-Input NAND Gate With Open Collector Outputs	14
SN74LS04N	SN74LS04D	Hex Inverter	14
SN74LS05N	SN74LS05D	Hex Inverter With Open Collector Outputs	14
SN74LS08N	SN74LS08D	Quad 2-Input AND Gate	14
SN74LS09N	SN74LS09D	Quad 2-Input AND Gate With Open Collector Outputs	14
SN74LS107AN	—	Dual JK Negative Edge-Triggered Flip-Flop	14
SN74LS109AN	—	Dual JK Positive Edge-Triggered Flip-Flop	16
SN74LS10N	SN74LS10D	Triple 3-Input NAND Gate	14
SN74LS112AN	—	Dual JK Negative Edge-Triggered Flip-Flop	16
SN74LS113AN	—	Dual JK Negative Edge-Triggered Flip-Flop	14
SN74LS11N	—	Triple 3-Input AND Gate	14
SN74LS122N	—	Retriggerable Monostable Multivibrator, One Shot	14
SN74LS123N	SN74LS123D	Dual Retriggerable Monostable Multivibrator, One Shot	16
SN74LS125AN	SN74LS125AD	Quad Three-State Buffer, Enable Low	14
SN74LS126AN	SN74LS126AD	Quad Three-State Buffer, Enable High	14
SN74LS12N	—	Triple 3-Input NAND Gate	14
SN74LS132N	SN74LS132D	Quad 2-Input Schmitt Trigger NAND Gate	14
SN74LS133N	—	13-Input NAND Gate	16
SN74LS136N	—	Quad 2-Input Exclusive OR Gate With Open Collector Outputs	14
SN74LS137N	—	3-Line To 8-Line Decoders/Demultiplexers With Address Latches	16
SN74LS138N	SN74LS138D	1 Of 8 Decoder/Demultiplexer	16
SN74LS139N	—	Dual 1 Of 4 Decoder/Demultiplexer	16
SN74LS13N	—	Dual NAND Gate Schmitt Trigger	14
SN74LS145N	—	1 of 10 Decoder/Driver With Open Collector Outputs	16
SN74LS147N	—	10-Line To 4-Line Priority Encoder	16
SN74LS148N	SN74LS148D	8-Line To 3-Line Priority Encoder	16
SN74LS14N	SN74LS14D	Hex Schmitt Trigger Inverter	14
SN74LS151N	—	8-Input Multiplexer	16
SN74LS153N	—	Dual 4-Input Multiplexer	16
SN74LS155N	—	Dual 1 Of 4 Decoder/Demultiplexer	16
SN74LS156N	SN74LS156D	Dual 1 Of 4 Decoder/Demultiplexer With Open Collector Outputs	16
SN74LS157N	SN74LS157D	Quad 2-Input Multiplexer	16
SN74LS158N	—	Quad 2-Input Multiplexer, Inverting	16
SN74LS15N	—	Triple 3-Input AND Gate	14
SN74LS160AN	—	Synchronous Presettable BCD Decade Up Only Counter, Asynchronous Reset	16
SN74LS161AN	—	Synchronous Presettable 4-Bit Binary Up Only Counter, Asynchronous Reset	16
SN74LS163AN	—	Synchronous Presettable 4-Bit Binary Up Only Counter, Synchronous Reset	16
SN74LS164N	SN74LS164D	Serial-In Parallel-Out Shift Register	14
SN74LS165N	SN74LS165D	8-Bit Parallel-To-Serial Shift Register	16
SN74LS166N	SN74LS166D	8-Bit Shift Register	16
SN74LS169N	—	Synchronous Presettable Bidirectional 4-Bit Binary Counter	16
SN74LS173AN	—	4-Bit D Type Register With Three-State Outputs	16
SN74LS174N	SN74LS174D	Hex D Type Flip-Flop	16
SN74LS175N	SN74LS175D	Quad D Type Flip-Flop	16
SN74LS191N	—	Synchronous Presettable 4-Bit Binary Up/Down Counter	16
SN74LS192N	—	Dual Synchronous Presettable BCD/Decade Up/Down Counter	16
SN74LS193N	—	Dual Synchronous Presettable 4-Bit Binary Up/Down Counter	16
SN74LS195AN	—	Universal 4-Bit Shift Register	16
SN74LS197N	—	4-Stage Presettable Ripple Counter	14
SN74LS20N	—	Dual 4-Input NAND Gate	14
SN74LS21N	—	Dual 4-Input AND Gate	14
SN74LS221N	SN74LS221D	Dual Monostable Multivibrators With Schmitt Trigger Inputs	16
SN74LS240N	SN74LS240DW	Dual 4-Bit Inverting Buffer/Driver, Enable Low, Three-State Outputs	20
SN74LS241N	—	Dual 4-Bit Buffer/Driver With Three-State Outputs	20
SN74LS242N	—	Quad Bus Transceiver, Inverting	14
SN74LS243N	SN74LS243D	Quad Bus Transceiver	14
SN74LS244N	SN74LS244DW	Dual 4-Bit Buffer/Driver, Enable Low, Three-State Outputs	14
SN74LS245N	SN74LS245DW	Octal Bus Transceiver	20
SN74LS247N	SN74LS247D	BCD To Seven Segment Decoder/Driver With Open Collector Outputs	16
SN74LS251N	—	8-Input Multiplexer With Three-State Outputs	16
SN74LS253N	—	Dual 4-Input Multiplexer With Three-State Outputs	16
SN74LS256N	—	Dual 4-Bit Addressable Latch	16
SN74LS257BN	SN74LS257BD	Quad 2-Input Multiplexer With Three-State Outputs, Non-Inverting	16
SN74LS258BN	SN74LS258BD	Quad 2-Input Multiplexer With Three-State Outputs, Inverting	16
SN74LS259N	SN74LS259D	8-Bit Addressable Latch	16
SN74LS260N	—	Dual 5-Input NOR Gate	14
SN74LS266N	—	Quad 2-Input Exclusive NOR Gate	14
SN74LS26N	—	Quad 2-Input NAND Buffer	14
SN74LS273N	SN74LS273DW	Octal D Type Flip-Flop With Clear	20
SN74LS279N	—	Quad Set-Reset Latch	16
SN74LS27N	—	Triple 3-Input NOR Gate	14
SN74LS280N	—	9-Bit Odd/Even Parity Generators/Checkers	14
SN74LS283N	—	4-Bit Binary Full Adder With Fast Carry	16
SN74LS290N	—	Decade Up Only Ripple Counter	14
SN74LS293N	—	4-Bit Binary Up Only Ripple Counter	14
SN74LS298N	—	Quad 2-Input Multiplexer With Storage	16
SN74LS299N	SN74LS299DW	8-Bit Shift/Storage Register With Three-State Outputs	20
SN74LS30N	SN74LS30D	8-Input NAND Gate	14
SN74LS322AN	—	8-Bit Shift Registers With Sign Extend	20
SN74LS32N	SN74LS32D	Quad 2-Input OR Gate	14
SN74LS33N	SN74LS33D	Quad 2-Input NOR Buffer With Open Collector Outputs	14
SN74LS348N	—	8-Bit Priority Encoder With Three-State Outputs	16
SN74LS365AN	SN74LS365AD	Hex Three-State Buffer With Common 2-Input NOR Enable	16
SN74LS366AN	—	Hex Three-State Inverter Buffer With Common 2-Input NOR Enable	16
SN74LS367AN	SN74LS367AD	Hex Three-State Buffer With Separate 2-Bit and 4-Bit Sections	16
SN74LS368AN	—	Hex Three-State Inverter Buffer With Separate 2-Bit and 4-Bit Sections	16
SN74LS373N	SN74LS373DW	Octal Transparent Latch With Three-State Outputs	20
SN74LS374N	SN74LS374DW	Octal D Type Flip-Flop With Three-State Outputs	20
SN74LS375N	—	4-Bit D Latch	16
SN74LS377N	—	Octal D Type Flip-Flop With Enable	20
SN74LS378N	—	Hex D Type Flip-Flop With Enable	16
SN74LS37N	—	Quad 2-Input NAND Buffer	14
SN74LS38N	—	Quad 2-Input NAND Buffer With Open Collector Outputs	14
SN74LS390N	—	Dual Decade Ripple Counter	16
SN74LS393N	SN74LS393D	Dual 4-Stage Binary Ripple Counter	14
SN74LS399N	—	Quad 2-Port Register	16
SN74LS42N	—	1 Of 10 Decoder	16
SN74LS47N	—	BCD To Seven Segment Decoder/Driver	16
SN74LS48N	—	BCD To Seven Segment Decoder	16
SN74LS490N	—	Dual Decade Counter	16
SN74LS51N	—	Dual 2-Wide 2-Input/3-Input AND-OR-Invert Gate	14
SN74LS540N	—	Octal Inverting Buffer/Line Driver With Three-State Outputs	20
SN74LS541N	SN74LS541DW	Octal Buffer/Line Driver With Three-State Outputs	20
SN74LS569AN	—	4-Bit Up/Down Counter With Three-State Outputs	20
SN74LS623N	—	Octal Bus Transceiver With Three-State Outputs	20
SN74LS640N	SN74LS640DW	Octal Inverting Bus Transceiver With Three-State Outputs	20
SN74LS641N	—	Octal Bus Transceiver With Open Collector Outputs	20
SN74LS642N	—	Octal Inverting Bus Transceiver With Open Collector Outputs	20
SN74LS645N	—	Octal Bus Transceiver With Three-State Outputs	20
SN74LS669N	—	Synchronous 4-Bit Up/Down Counter	16
SN74LS670N	SN74LS670D	4 × 4 Register File with Three-State Outputs	16
SN74LS682N	SN74LS682DW	8-Bit Magnitude Comparator	20
SN74LS684N	—	8-Bit Magnitude Comparator	20
SN74LS688N	SN74LS688DW	8-Bit Magnitude Comparator	20
SN74LS73AN	—	Dual JK Negative Edge Triggered Flip-Flop	14
SN74LS74AN	SN74LS74AD	Dual D Type Positive Edge Triggered Flip-Flop	14
SN74LS75N	—	4-Bit D Latch	16
SN74LS76AN	—	Dual JK Negative Edge Triggered Flip-Flop With Set and Clear	16
SN74LS795N	—	Octal Buffer/Driver, Enable High, Three-State Outputs	20
SN74LS85N	SN74LS85D	4-Bit Magnitude Comparator	16
SN74LS86N	SN74LS86D	Quad 2-Input Exclusive OR Gate	14
SN74LS90N	—	Decade Ripple Counter	14
SN74LS92N	—	Divide By 12 Ripple Counter	14
SN74LS93N	—	4-Bit Binary Ripple Counter	14
SN74LS95BN	—	4-Bit Shift Register	14

—	MC10H603FN	9-Bit Latch ECL/TTL Translator	28
—	MC10H604FN	Registered Hex TTL/ECL Translator	28
—	MC10H605FN	Registered Hex ECL/TTL Translator	28
—	MC10H607FN	Registered Hex PECL/TTL Translator	28
—	MC10H640FN	68030/040 PECL/TTL Clock Driver	28
—	MC10H641FN	Single Supply PECL/TTL 1:9 Clock Distribution Chip	28
—	MC10H643FN	Dual Supply ECL/TTL 1:8 Clock Driver	28
—	MC10H645FN	1:9 TTL Clock Driver	28
—	MC10H680FN	4-Bit Differential ECL Bus/TTL Transceiver	28

MC100H: MECL 10H Monolithic Emitter-Coupled Logic Integrated Circuits

Mfr.'s Type	Description	No. of Leads
PLCC		
MC100H600FN	9-Bit TTL/ECL Translator	28
MC100H602FN	9-Bit Latch TTL/ECL Translator	28
MC100H640FN	68030/040 PECL/TTL Clock Driver	28

Mfr.'s Type	Description	No. of Leads
PLCC		
MC100H641FN	Single Supply PECL/TTL 1:9 Clock Distribution Chip	28
MC100H643FN	Dual Supply ECL/TTL 1:8 Clock Driver	28
—	—	—

MC10: MECL 10K Monolithic Emitter-Coupled Logic Integrated Circuits

Mfr.'s Type		Description	No. of Leads
PDIP	PLCC		
MC10101P	—	MECL Quad OR/NOR Gate	16
MC10102P	MC10102FN	MECL Quad 2-Input NOR Gate	16/20
MC10103P	—	MECL Quad 2-Input OR Gate	16
MC10104P	—	MECL Quad 2-Input AND Gate	16
MC10105P	—	MECL Triple 2-3-2-Input OR/NOR Gate	16
MC10107P	—	MECL Triple 2-Input Exclusive OR/Exclusive NOR	16
MC10109P	—	MECL Dual 4-5-Input OR/NOR Gate	16
MC10113P	—	MECL Quad Exclusive OR Gate	16
MC10114P	MC10114FN	MECL Triple Line Receiver	16/20
MC10115P	MC10115FN	MECL Quad Line Receiver	16/20
MC10116P	MC10116FN	MECL Triple Line Receiver	16/20
MC10123P	—	MECL Triple 4-3-3-Input Bus Driver	16
MC10124P	MC10124FN	MECL Quad TTL To MECL Translator	16/20
MC10125P	MC10125FN	MECL Quad MECL To TTL Translator	16/20
MC10131P	MC10131FN	MECL Dual Type D Master-Slave Flip-Flop	16/20

Mfr.'s Type		Description	No. of Leads
PDIP	PLCC		
MC10135P	—	MECL Dual J-K Master-Slave Flip-Flop	16
MC10136P	MC10136FN	MECL Universal Hexadecimal Counter	16/20
MC10137P	—	MECL Universal Decade Counter	16
MC10138P	—	MECL Bi-Quinary Counter	16
MC10158P	—	MECL Quad 2-Input Multiplexer (Non-Inverting)	16
MC10161P	—	MECL Binary To 1-8 Decoder (Low)	16
MC10164P	—	MECL 8-Line Multiplexer	16
MC10174P	—	MECL Dual 4 To 1 Multiplexer	16
MC10176P	—	MECL Hex D Master-Slave Flip-Flop	16
MC10178P	—	MECL Binary Counter	16
MC10188P	—	MECL Hex Buffer With Enable	16
MC10192P	MC10192FN	MECL Quad Bus Driver	16/20
MC10198P	MC10198FN	MECL Monostable Multivibrator	16/20
MC10216P	MC10216FN	MECL High Speed Triple Line Receiver	16/20
MC10231P	—	MECL High Speed Dual Type D Master-Slave Flip-Flop	16

MC16: MECL Monolithic Emitter Coupled Logic Integrated Circuits

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC1648P	MC1648D	Voltage Controlled Oscillator	14/8

Mfr.'s Type		Description	No. of Leads
PDIP	SOIC		
MC1658P	MC1658D	Voltage Controlled Multivibrator	16

Phase-Locked Loop Integrated Circuits

MC12: MECL Phase-Locked Loop Integrated Circuits

Mfr.'s Type			Description	No. of Leads
PDIP	SOIC	PLCC		
MC12002P	—	—	Double Balanced Analog Mixer	14
MC12009P	—	MC12009FN	Dual Modulus Prescaler, Divide By 5/6	16/20
MC12011P	—	MC12011FN	Dual Modulus Prescaler, Divide By 8/9	16/20
MC12013P	MC12013D	MC12013FN	Dual Modulus Prescaler, Divide By 10/11	16/20
MC12015P	MC12015D	—	225 MHz Dual Modulus Prescaler, Divide By 32/33	8
MC12016P	MC12016D	—	225 MHz Dual Modulus Prescaler, Divide By 40/41	8
MC12017P	MC12017D	—	225 MHz Dual Modulus Prescaler, Divide By 64/65	8
MC12018P	—	—	520 MHz Dual Modulus Prescaler, Divide By 128/129	8
MC12019P	MC12019D	—	225 MHz Dual Modulus Prescaler, Divide By 20/21	8
MC12022AP	MC12022AD	—	1.1 GHz Dual Modulus Prescaler, Divide By 64/65 or 128/129	8
MC12028AP	MC12028AD	—	1.1 GHz Dual Modulus Prescaler, Divide By 32/33 or 64/65	8
—	MC12034AD	—	2.0 GHz Dual Modulus Prescaler, Divide By 32/33 or 64/65	8
MC12040P	—	MC12040FN	Phase-Frequency Detector	14/20
—	MCH12140D	—	Phase-Frequency Detector	8
—	MCK12140D	—	Phase-Frequency Detector	8
MC12061P	—	—	Crystal Oscillator	16
MC12073P	—	—	1.1 GHz Prescaler, Divide By 64	8
MC12079P	MC12079D	—	Differential Input/ECL Output Prescaler, Divide By 64/128/256	8

TTL Phase-Locked Loop Integrated Circuits

Mfr.'s Type			Description	No. of Leads
PDIP	SOIC	PLCC		
MC4018P	—	—	Presettable 4-Bit Binary Up Only Ripple Counter	16
MC4024P	—	—	Dual Voltage Controlled Multivibrator	14
MC4044P	MC4044D	—	Phase Frequency Controller	14

CMOS Clock Drivers and Phase-Locked Loop Clock Drivers

MC88913N	MC88913D	—	Low Skew CMOS Clock Driver	14
MC88914N	MC88914D	—	Low Skew CMOS Clock Driver With Reset	14

—	—	MC88915FN70	70 MHz Low Skew CMOS PLL Clock Driver	28
—	—	MC88915TFN100	100 MHz Low Skew CMOS PLL Clock Driver, Three-State	28
—	—	MC88915TFN133	133 MHz Low Skew CMOS PLL Clock Driver, Three-State	28
—	—	MC88915TFN160	160 MHz Low Skew CMOS PLL Clock Driver, Three-State	28
—	—	MC88915TFN55	55 MHz Low Skew CMOS PLL Clock Driver, Three-State	28
—	—	MC88915TFN70	70 MHz Low Skew CMOS PLL Clock Driver, Three-State	28
—	MC88916DW70	—	70 MHz Low Skew CMOS PLL Clock Driver With Processor Reset	20
—	MC88916DW80	—	80 MHz Low Skew CMOS PLL Clock Driver With Processor Reset	20
—	MC88920DW	—	50 MHz Low Skew CMOS PLL Clock Driver With Power-Up/Down	20
—	MC88921DW	—	66 MHz Low Skew CMOS PLL Clock Driver With Power-Up/Down	20

Phase-Locked Loop Frequency Synthesizers

Mfr.'s Type		Description	Frequency (MHz)	Supply Voltage (V)	Nominal Supply Current (mA)	Phase Detector	Standby	Interface	No. of Leads
PDIP	SOG								
MC145106P	MC145106DW	PLL Frequency Synthesizer	4 @ 5 V	4.5 to 12.0	6.0 @ 5 V	Single-Ended Three-State	No	Parallel	18/20
MC145151P2	MC145151DW2	Parallel Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Parallel Input, Single Modulus	28
MC145152P2	MC145152DW2	Parallel Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Double-Ended	No	Parallel Input, Dual Modulus	28
MC145155P2	—	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Single Modulus	18
MC145156P2	MC145156DW2	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Dual Modulus	20
MC145157P2	MC145157DW2	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Single Modulus	16
MC145158P2	MC145158DW2	Serial Input PLL Synthesizer	20 @ 5 V	3.0 to 9.0	7.5 @ 5 V	Single-Ended Three-State, Double-Ended	No	Serial Input, Dual Modulus	16
MC145162P	MC145162D	Universal Programmable Dual PLL Synthesizer for Cordless Phones	60 @ 3 V	2.5 to 5.5	3.0 @ 3 V	Two Single-Ended Three-State	Yes	Serial	16
—	MC145191F	1.1 GHz PLL Frequency Synthesizer, Includes 64/65 Prescalers	1100 @ 5 V	4.5 to 5.5	7.0 @ 5 V	Current Source/Sink, Double-Ended	Yes	Serial	20

ISDN: Integrated Services Digital Network Integrated Circuits

MC14LC5472, ISDN U-Interface

ANSI T1.601 compliant, pin selectable LT or NT operation, industry standard IDL interface, slave-slave timing mode, control and status provided through four wire serial control port.

Mfr.'s Type	Function	Package Type
MC14LC5472FU	Line Cards, NT1s, Pair Gain, ISDN Compatible Bridge Routers, ISDN Terminals	68 Lead CQFP

MC145474 and MC145475, ISDN S/T Interface Transceiver

Conforms to CCITT I.430 and ANSI T1.605, pin selectable NT and TE modes, Interchip Data Link (IDL), serial control port (SCP), full multiframing capabilities, S/T and IDL loopbacks.

MC145474P	Network Termination (NT1), PC Based and Standalone ISDN Terminal Adapters, ISDN Telephone, ISDN Video Phone	22 Lead PDIP
MC145475DW	Network Termination (NT1), PC Based and Standalone ISDN Terminal Adapters, ISDN Telephone, ISDN Video Phone, Supports Optional NT1 Star Mode	28 Lead SOG

ULN2003A	500	TTL, +5 V CMOS	1	Yes	50	7	Invert	16 Lead PDIP
ULN2004A	500	8 V to 18 V MOS	1	Yes	50	7	Invert	16 Lead PDIP

CMOS Display Drivers

Mfr.'s Type	Function	Display Type	Input Format	Drive Capability Per Package	On-Chip Latch	Display Control	Segment Drive Current	Package Type
MC14543BCP	BCD-to-7 Segment Latch/Decoder/Driver	LCD, Direct Drive	Parallel BCD	7 Segments	Yes	Blank	Approx. 1.0 mA	16 Lead PDIP
MC14544BCP	BCD-to-7 Segment Latch/Decoder/Driver	LCD, Direct Drive	Parallel BCD	7 Segments	Yes	Blank, Ripple Blank	Approx. 1.0 mA	18 Lead PDIP
MC145453P	33-Segment, Non-Multiplexed	LCD, Direct Drive	Serial Binary (Compatible with SPI on CMOS MCUs)	33 Segments or Dots	Yes	—	20 μA	40 Lead PDIP
MC145453FN	33-Segment, Non-Multiplexed	LCD, Direct Drive	Serial Binary (Compatible with SPI on CMOS MCUs)	33 Segments or Dots	Yes	—	20 μA	40 Lead PLCC
MC145000P	48-Segment Serial Input Multiplexed LCD Driver (Master)	Muxed LCD (1/4 Mux)	Serial Binary (Compatible with SPI on CMOS MCUs)	48 Segments or Dots	Yes	—	Approx. 200 μA	24 Lead PDIP
MC14511BCP	BCD-to-7 Segment Latch/Decoder/Driver	LED, Incandescent, Fluorescent*	Parallel BCD	7 Segments	Yes	Blank, Lamp Test	25 mA	16 Lead PDIP
MC14513BCP	BCD-to-7 Segment Latch/Decoder/Driver	LED, Incandescent, Fluorescent*	Parallel BCD	7 Segments	Yes	Blank, Ripple Blank, Lamp Test	25 mA	18 Lead PDIP
MC14547BCP	High Current BCD-to-7 Segment Decoder/DriverFluorescent*	LED, Incandescent,	Parallel BCD	7 Segments	No	Blank	65 mA	18 Lead PDIP
MC14499P	4-Digit 7 Segment LED Display Decoder/DriverWith SPI On CMOS MCUs)	Muxed LED (1/4 Mux)	Serial Binary (Compatible	4 Digits + Decimals	Yes	Oscillator (Scanner)	50 mA (Peak)	18 Lead PDIP
MC14489P	Multi-Character LED Display Lamp Driver	Muxed LED (1/5 Mux)	Serial Binary (Compatible with SPI on CMOS MCUs)	5 Characters + Decimals or 25 Lamps	Yes	Oscillator (Scanner), Low Power Mode, Dimming	0 to 35 mA (Peak) Adjustable	20 Lead PDIP
MC14489DW	Multi-Character LED Display Lamp Driver	Muxed LED (1/5 Mux)	Serial Binary (Compatible with SPI on CMOS MCUs)	5 Characters + Decimals or 25 Lamps	Yes	Oscillator (Scanner), Low Power Mode, Dimming	0 to 35 mA (Peak)	20 Lead SOG
MC14495P1	Hexadecimal-to-7 Segment Latch/Decoder ROM/Driver	LED Direct Drive	Parallel Hex	7 Segments +A Thru F Indicator	Yes	—	10 mA**	14 Lead PDIP

*Absolute maximum working voltage=18 V. **On-chip current limiting resistor.

RF Communications

Wideband (FM/FSK) IFs

Mfr.'s Type		Vcc (V)	Icc (mA)	Sensitivity Typ. (μV)	IF (MHz)	Mute	RSSI	Max. Data Rate	Notes	No. of Leads
PDIP	SOIC									
MC13055P	MC13055D	3 to 12	25	20	40	Yes	Yes	2.0 Mb	Wideband Data IF	16
—	MC13155D	3 to 6	10	100	70	—	Yes	12.0 Mb	Video Speed IF	16

Wideband Single Conversion Receivers — VHF

Mfr.'s Type		Vcc (V)	Icc (mA)	Sensitivity Typ. (μV)	RF Input (MHz)	IF (MHz)	Mute	RSSI	Max. Data Rate	Notes	No. of Leads
PDIP	SOIC										
MC3356P	MC3356DW	3 to 9	25	30	200	10.7	Yes	Yes	500 Kb	Includes Front End Mixer/L.O.	20
—	MC13156DW	2 to 7	3	2	200	21.4	—	Yes	500 Kb	CT-2 FM/Demodulator	24

RF Communications (Continued)

Narrowband Single Conversion Receivers — VHF

Mfr.'s Type		Vcc (V)	Icc (mA)	12 dB SINAD Sensitivity Typ. (µV)	RF Input (MHz)	IF (KHz)	Mute	RSSI	Max. Data Rate	Notes	No. of Leads
PDIP	SOIC										
MC3359P	—	4 to 9	7	2	45	455	Yes	—	>4.8 Kb	Scan Output Option	18/20
—	MC3367DW	1 to 5	6	1	75	455	Yes	—	1.2 Kb	1 Cell Operation	28
—	MC3371D	2 to 8	6	1	60	455	Yes	Yes	>4.8 Kb	RSSI	16
—	MC3372D	2 to 8	6	1	60	455	Yes	Yes	>4.8 Kb	RSSI, Ceramic Quad Detect./Resonator	16

Narrowband Dual Conversion Receivers — FM/FSK — VHF

Mfr.'s Type		Vcc (V)	Icc (mA)	12 dB SINAD Sensitivity Typ. (µV)	RF Input (MHz)	IF1 (MHz)	IF2 (Limiter In) (KHz)	Mute	RSSI	Max. Data Rate	Notes	No. of Leads
PDIP	SOIC											
MC3362P	—	2 to 7	3.0	0.7	180	10.7	455	—	Yes	>4.8 Kb	Includes Buffered VCO Output	24
—	MC3363DW	2 to 7	4.0	0.4	180	10.7	455	Yes	Yes	>4.8 Kb	Includes RF Amp/Mute	28
—	MC3335DW	2 to 7	4.0	0.7	180	10.7	455	Yes	Yes	>4.8 Kb	Low Cost Version	20
—	MC13135DW	2 to 7	3.5	0.7	200	10.7	455	—	Yes	>50 Kb	Voltage Buffered RSSI	24
—	MC13136DW	2 to 7	3.5	0.7	200	10.7	455	—	Yes	>50 Kb	High Level IF Resonator Drive	24

Transmitters — AM/FM/FSK

Mfr.'s Type		Vcc (V)	Icc (mA)	Pout (dBm)	Max. RF Frequency Out	Max. Mod. Frequency	Notes	No. of Leads
PDIP	SOIC							
MC2833P	MC2833D	3 to 8	5	–30	50	50 KHz	FM Transmitter. Includes Low Battery Checker and Tone Oscillator	16
—	MC13175D	2 to 5	40	8	500	5 MHz	AM/FM Transmitter. Single Frequency PLL fout = 8 × fref	16
—	MC13176D	2 to 5	40	8	1 GHz	5 MHz	AM/FM Transmitter. Single Frequency PLL fout = 32 × fref	16

Balanced Modulator/Demodulator

Mfr.'s Type		Vcc (V)	Icc (mA)	Carrier Suppression	Common Mode Rejection	Function	No. of Leads
PDIP	SOIC						
MC1496P	MC1496D	5 to 30	10	65 dB typ. @ 0.5 MHz 50 dB typ. @ 10.0 MHz	85 dB typ.	Carrier Balance >50 dB, General Purpose Balanced Modulator/Demodulator For AM, SSB and FM Detection.	14

Video Integrated Circuits

Encoders

Mfr.'s Type			Function	Features	No. of Leads
PDIP	SOIC	PLCC			
MC1377P	MC1377DW	—	RGB To PAL/NTSC Encoder	RGB and Sync Inputs, Composite Video Out; PAL/NTSC Selectable	20
MC13077P	—	—	Advanced RGB To PAL/NTSC Encoder	RGB and Sync Inputs, Composite Video and S-VHS Out; PAL/NTSC Selectable; Subcarrier From Crystal or External Source	20

Video Capture Chip Sets

—	—	MC44011FN	Chroma 4 Multistandard Decoder	PAL/NTSC/S-VHS Input, RGB/YUV Outputs; Horizontal and Vertical Timing Outputs; All Digital Internal Filters, No External Tanks; µP and Crystal Controlled.	44
MC44140P	—	—	PAL Digital Delay Line	For PAL Applications Of The MC44011 and MC44001	16
—	MC44145D	—	Pixel Clock PLL/Sync Separator	PAL/NTSC Sync Separator With Vertical and Composite Sync Output, 6 To 40 MHz Pixel Clock PLL	20

Deflection

MC1391P	—	—	Horizontal Processor	Linear Balanced Phase Detector, Oscillator and Predriver, Adjustable DC Loop Gain and Duty Cycle	8

IF Circuits

MC44301P	MC44301DW	—	Advanced Video IF	Complete Video/Audio IF System For High Performance Analog TV Receivers	24
MC1350P	MC1350D	—	IF Amplifier	1st and 2nd Video IF Amplifiers, 50 dB Gain @ 45 MHz, 60 dB ADC Range	8

Modulators

MC1374P	—	—	Color TV Modulator With Sound	RF Oscillator/Modulator, and FM Sound Oscillator/Modulator	14

Sound

MC1357P	—	—	Sound IF Detector	Interchangeable With ULN2111A	14

Miscellaneous Video Circuits

MC1378P	—	MC1378FN	Video Overlay Synchronizer	Complete Color TV Video Overlay Synchronizer, Remote Or Local System Control	40/44
MC44144P	—	—	Subcarrier Reference Generator	Provides Continuous Subcarrier Sine Wave and 4x Subcarrier, Locked To Incoming Burst	8

Data Conversion

Analog to Digital Converters

CMOS

Mfr.'s Type		Resolution (Bits)	Nonlinearity Max.	Conversion Time/Rate	Input Voltage Range (V)	Supplies (V)	Comments	No. of Leads
PDIP	SOIC							
MC145040P	—	8	±1/2 LSB	10 µs	0 To VDD	+5.0 ±10%	Requires External Clock, 11 Channel MUX	20
MC145041P	—	8	±1/2 LSB	20 µs	0 To VDD	+5.0 ±10%	Includes Internal Clock, 11 Channel MUX	20
—	—	Triple 8	1.00 LSB	15 MHz	1.6 to 4.6	+5.0 ±10%	3 Separate Video Channels	44

Fully Integrated Pressure Sensor

The performance of Motorola's MPX series of pressure sensors is based on its patented strain gauge design. Unlike the more conventional pressure sensors which utilize four closely matched resistors in a Wheatstone bridge configuration, the MPX series uses only a single piezoresistive element ion implanted on an etched silicon diaphragm to sense the stress induced on the diaphragm by an external pressure. The extremely linear output is an analog voltage that is proportional to pressure input and ratiometric with supply voltage. High sensitivity and excellent long-term repeatability make these units suitable for the most demanding applications.

Motorola pressure sensors support three types of pressure measurements: Absolute Pressure, Differential Pressure and Gauge Pressure.

Absolute Pressure Sensors measure an external pressure relative to a zero-pressure reference (vacuum) sealed inside the reference chamber of the die during manufacture. This corresponds to a deflection of the diaphragm equal to approximately 15 PSI (one atmosphere), generating a quiescent full-scale output for the MPX100A (15 PSI) sensor, and a half-scale output for the MPX200A (30 PSI) device. Measurement of external pressure is accomplished by applying a relative negative pressure to the "Pressure" side of the sensor.

Differential Pressure Sensors measure the difference between pressures applied simultaneously to opposite sides of the diaphragm. A positive pressure applied to the "Pressure" side generates the same (positive) output as an equal negative pressure applied to the "Vacuum" side.

Gauge pressure readings are a special case of differential measurements in which the pressure applied to the Pressure side is measured against the ambient atmospheric pressure applied to the Vacuum side through the vent hole in the chip of the differential pressure sensor elements.

To make the designer's job even easier, Motorola's integrated devices carry sensor technology one step further. Besides the on-chip temperature compensation and calibration offered currently on the MPX2000 series, amplifier signal conditioning has been integrated on-chip in the MPX5000 series to allow interface directly to any microcomputer with an on-board A/D converter.

The signal conditioning is accomplished by means of a four-stage amplification network, incorporating linear bipolar processing, thin-film metalization techniques,and interactive laser trimming to provide the state-of-the-art in sensor technology.

Motorola designates the two sides of the pressure sensor as the Pressure (top) side and the Vacuum Pressure (back) side. The Pressure side is the side containing silicone gel which protects the die from harsh media. The Motorola MPX pressure sensor is designed to operate with positive differential pressure applied (i.e., top side pressure is greater than or equal to back side pressure). The Pressure side may be identified by using the tables below. Note: Stainless steel cap is not installed on devices with a port attached to the pressure (gel) side.

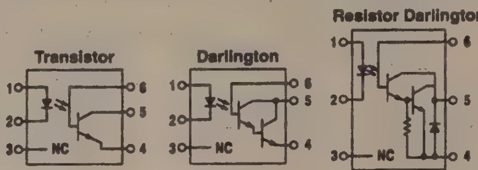
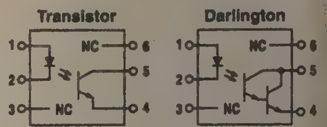
Optoisolators

CASE 730A



Style 1



Style 3

An optoisolator consists of a gallium arsenide infrared emitting diode, IRED, optically coupled to a monolithic silicon photodetector in a wide array of standard devices and encourages the use of special designs and selections for special applications. All Motorola optoisolators have V_{ISO} rating of 7500 Vac(pk), exceeding all other industry standard ratings.

Bipolar Transistors

Plastic-Encapsulated Transistors

Motorola's Small Signal TO-226 plastic transistors encompass hundreds of devices with a wide variety of characteristics for general-purpose, amplifier and switching applications. The popular high-volume package combines proven reliability, performance, economy and convenience to provide the perfect solution for industrial and consumer design problems. All devices are laser marked for ease of identification and shipped in antistatic containers, as part of Motorola's ongoing practice of maintaining the highest standards of quality and reliability.

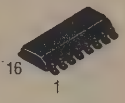
Plastic-Encapsulated Multiple Transistors

Case 646
(TO-116)
Style 1



Case 751B
SO-16
Style 4

The Manufacturing trend has been toward printed circuit board design with requirements for smaller packages with more functions. In the case of discrete components the use of the multiple device package helps to reduce board space requirements and assembly costs.

Many of the most popular devices are offered in the standard plastic DIP and surface mount IC packages. This includes small-signal NPN and PNP bipolar transistors, N-channel and P-channel FETs, as well as diode arrays.

Plastic-Encapsulated Multiple Transistors — Quad (Case 646—TO-116)
The Following table is a listing of the most popular multiple devices available in the plastic DIP package. These devices are available in NPN,PNP, and NPN/PNP configurations.

Mfr.'s Type	ID	P_D Watts One Die Only	V_{CEO} (V)	I_C (A) Max.	h_{FE} Min.	@ I_C (mA)	f_T (MHz) Min.	C_{ob} (pF) Max.	t_{on} (ns) Max.	t_{off} (ns) Max.	V_{CE} (sat) (V) Max.	@ I_C/I_B	I_C (mA)

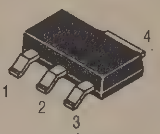
Plastic-Encapsulated Surface Mount Transistors

Case 318-07
TO-236AB
SOT-23



Case 318E
SOT-223

Case 318D
SC-59

Case 419
SC-70/SOT-323

This section of the selector guide lists the small-signal plastic devices that are available for surface mount applications. These devices are encapsulated with the latest state-of -the-art mold compounds that enhance reliability and exhibit excellent performance in high temperature and high humidity environments. This package offers higher power dissipation capability for small-signal applications.

Plastic-Encapsulated Surface Mount General-Purpose Transistors
Pinout: 1— Base, 2 — Emitter, 3 — Collector (Case 318-07 — TO-236AB (SOT-23) —NPN)
The following tables are a listing of small-signal general-purpose transistors in the SOT-23 surface mount package. These devices are intended for small-signal amplification for DC, audio, and lower RF frequencies. They also have applications as oscillators and general-purpose, low voltage switches. Devices listed in order of descending breakdown voltage.

[1] $|h_{fe}|$ @ MHz. [2] Darlington. [3] Available as preferred chip. [4] Case 77, (Style 3). [5] When 2 voltages are given, the format is $V_{CEO(sus)}/V_{CES}$. [6] Case 369A-10 may be ordered tape and reeled by adding a "T4" suffix; 2500 units/reel. [7] Case 197A-03 (TO-204AE).

Field Effect Transistors

JFETs

JFETs operate in the depletion mode. They are available in both P- and N-channel and are offered in both Through-hole and Surface Mount Packages. Applications include general-purpose amplified, switches and choppers, and RF amplifiers and mixers. These devices are economical and very rugged. The drain and source are interchangeable on many typical FETs.

Case 29-04
TO-226AA
(TO-92)

JFET Low-Frequency/Low-Noise (Case 29-04 — TO-226AA (TO-92) — N-Channel)
The following table is a listing of small-signal JFETs intended for low-noise applications in the audio range. These devices exhibit good linearity and are candidates for hi-fi and instrumentation equipment.

Mfr.'s Type	$R_e Y_{fs}$ @ f mmho Min.	$R_e Y_{fs}$ @ f (kHz)	$R_e Y_{os}$ @ f μmho Max.	$R_e Y_{os}$ @ f (kHz)	C_{iss} (pF) Max.	C_{rss} (pF) Min.	$V_{(BR)GSS}$ $V_{(BR)GDO}$ (V) Min.	$V_{GS(off)}$ (V) Min.	$V_{GS(off)}$ (V) Max.	I_{DSS} (mA) Min.	I_{DSS} (mA) Max.	Style

Motorola RF Power MOSFETs are constructed using a planar process to enhance manufacturing repeatability. They are N-Channel field effect transistors with an oxide insulated gate which controls vertical current flow. Compared with bipolar transistors, RF Power FETs exhibit higher gain, higher input impedance, enhanced thermal stability and lower noise. The FETs listed in this section are specified for operation in RF Power Amplifiers and are grouped by frequency range of operation and type of application. Arrangement within each group is first by order of voltage then by increasing output power.

Motorola's broad line of bipolar RF power transistors are characterized for operation in RF power amplifiers. Typical applications are in military and commercial landmobile, avionics and marine radio transmitters. Groupings are by frequency band and type of application. Within each group, the arrangement of devices is by major supply voltage rating, then in the order of increasing output power. All devices are NPN polarity except where otherwise noted.

HF Transistors

14-30 MHz, CB/Amateur Band
V_{CC}=12.5 or 13.6 Volts, Class AB
For economical, high volume use in CW, AM and SSB applications.

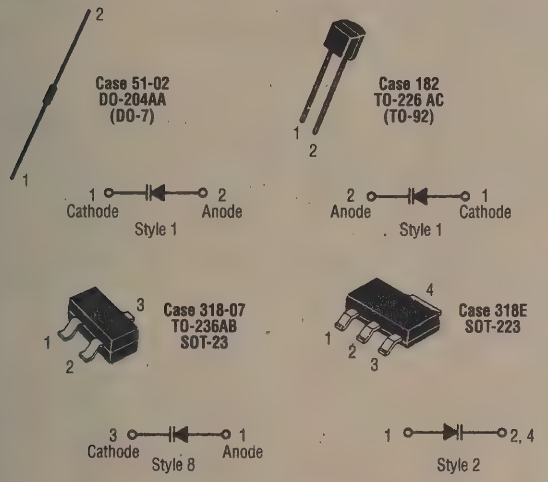
Hyper Abrupt Junction Tuning Diodes



Tuning Diodes — Hyper-Abrupt Junction

The Hyper-Abrupt family exhibits higher capacitance, and a much larger capacitance ratio. It is particularly well suited for wider-range application such as AM/FM radio and TV tuning.

Hyper-Abrupt Tuning Diodes For Telecommunications — Single
Case 182 — TO-226AC (TO-92)
The following is a listing of hyper-abrupt tuning diodes intended for high frequency, FM radio, and TV tuner applications.

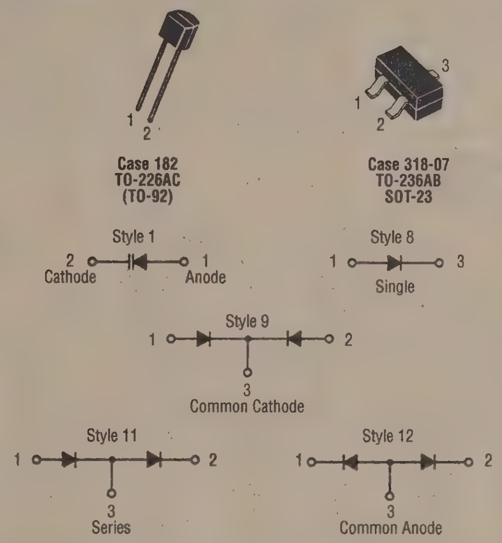
Switching Diodes



Small-signal switching diodes are intended for low current switching and steering applications. Hot-Carrier, PIN and general-purpose diodes allow a wide selection for specific application requirements.

PIN Switching Diodes

Case 182 — TO-226AC (TO-92)
The following PIN diodes are designed for VHF band switching and general-purpose low current switching applications.

Mfr.'s Type	$V_{(BR)R}$ (V) Min.	C_T @ V_R @ 1.0 MHz		IR @ V_R (nA) Max.	Series Resistance (Ω) Max.	Device Marking	Style

[1] Zener Voltage is the key parameter for each device type. It is specified at a particular test current applied at either thermal equilibrium (T.E.) or pulse test condition. The voltage tolerance for the device types listed is, in general, ±5%; however, for some series, the voltage tolerance varies from device type to device type over a range of ±(5 to 8.5)%. Consult the complete data sheet to determine the exact test conditions and minimum/maximum limits for the zener voltage. Consult Application Note AN924 regarding measurement of Zener Voltage (pulse versus thermal equilibrium). Power Ratings represent the capability of the case size listed as supplied by Motorola. These ratings may be higher than the JEDEC registration and/or the same device types supplied by other manufacturers. **V_Z Test Conditions and Tolerances.** [2] **1N4370A/1N746A Series:** I_{ZT}=20 mA (T.E.) — A suffix=±5%; C suffix=±2%; D suffix=±1%. **1N957B Series:** I_{ZT} @ approximately 125 mW point (T.E.) — B suffix=±5%; C suffix=±2%; D suffix=±1%. TVS (Transient Voltage Suppressors)

Transient Voltage Suppressors are designed for applications requiring protection of voltage sensitive electronic devices in danger of destruction by high energy voltage transients. The purpose of this section is to present the families of Motorola Zeners that are specified with the key transient voltage suppressor parameters and limits, e.g., maximum clamping voltage at maximum surge current rating and working peak reverse (stand-off) voltage.
